With no engagement."

Wordsworth: *Excursion*, bk. vii.

*6. Employment or occupation of time or attention; application to any work; exercise, practice.

"Play, either by our too constant or too long engagement in it, becomes like an employment."—Rogers.

*7. The act of engaging, hiring, or employing for any work or duty.

*8. The state of being engaged, hired, or employed.

*9. An enterprise embarked in.

"All my engagements I will construe to thee."

Shakespeare: *Julius Caesar*, ii. 1.

*10. Adherence or partiality to a cause or side; bias, prejudice.

"This practice may be obvious to any who impartially, and without engagement, is at the pains to examine."—Swift.

*11. A fight, a battle, a conflict between two armies or fleets.

"There were killed in this engagement 36,776 men."—Fawkes: *Braham Park*, note 8.

II. Technically:

*1. *Comm. (pl.)*: The contracts entered into by a trader for the fulfillment of which he is liable; the liabilities of a trader.

*2. *Scot. Hist.*: A secret treaty made at Carisbrook Castle on Dec. 27, 1644, between Charles I., then a prisoner there, and the Earls of Lanark and Lauderdale. These noblemen engaged to raise an army in Scotland to aid His Majesty in recovering the throne, and he promised to confirm Presbyterian Church government for three years, till an assembly of divines, assisted by twenty commissioners of his nomination, should decide on a form of church government most agreeable to the Word of God. He also promised to suppress all heresy and schism. The majority of the Church and people of Scotland, then strongly Presbyterian, were at the time Covenanters, and, with some exceptions, held aloof from the Engagement which was condemned by the General Assembly of 1648. In the same year the Duke of Hamilton led an army of "Engagers," as they were called, into England, was defeated by Oliver Cromwell, and died on the scaffold. When the news of his discomfiture reached Scotland, some of the Covenanting party, led by the Marquis of Argyll, and the Earls of Cassilis, Eglinton, and Loudon, took arms, overthrew the existing government in Edinburgh, and undertook the administration in its stead. This successful exploit was known as the Whigamores' Raid. Afterward they took steps to convince Cromwell that they had not subscribed the Engagement, or had to do with the recent expedition into England, thus averting hostilities with the great English military leader for a time.

† For the difference between engagement and battle, see BATTLE; for that between engagement and business, see BUSINESS; for that between engagement and promise, see PROMISE.

en-gāg'-ēr, *s.* [Eng. *engage(e)*; *-er*.]

I. Ordinary Language:

*1. One who binds or pledges himself; a surety.

"Several sufficient citizens were engagers."—Wood: *Athenæ Ozon*, *D'Avenant*.

*2. One who engages or takes part in any business or operation.

"Rash motions have lost noble enterprises and their engagers."—Waterhouse: *Apol. for Learn.* (1658), p. 125.

*3. One who engages, hires, or employs another for any work or duty; an employer.

*II. *Scot. Hist.*: One of the supporters of the treaty known as the "Engagement" (q. v.).

en-gāg'-līng, *pr. par., a. & s.* [ENGAGE, *v.*]

A. As *pr. par.*: (See the verb.)

B. As adjective:

*1. *Ord. Lang.*: Winning, pleasing, attractive (applied to manners or address).

*2. *Mech.*: [ENGAGING-WHEEL.]

engaging-wheel, *s.*

Mech.: [ENGAGED-WHEELS.]

engaging and disengaging machinery.

Mach.: That kind of machinery in which one part is alternately attached to and detached from another, as occasion may require.

***en-gāg'-līng-lý**, *adv.* [Eng. *engaging*; *-ly*.] In an engaging, winning, or attractive manner; so as to attract.

***en-gāg'-līng-nēss**, *s.* [Eng. *engaging*; *-ness*.] The quality of being engaging, pleasing, or attractive; attractiveness, pleasingness.

engine dynamo, *s.*

An invention for generating electricity without friction. Up to 1894, the most economical method of producing electricity was through the well-known dynamo, a steam-engine to drive it, a boiler to supply the engine with steam, and the furnace to heat the boiler.

It had long been recognized by electricians and others, that if one, or possibly two, of these features in the production of electricity could be dispensed with, and the same amount of electricity obtained, a large saving not only in the first cost of the apparatus, but also in the cost of production would be effected. To that end many attempts were made, and much work and time expended in efforts to generate electricity direct from heat, thus leaving out the boiler and the engine. This plan, however, which was called the thermo-battery, did not prove a success, as the cost of generating was higher even than by the former method. Mr. Nicola Tesla, the inventor of the engine-dynamo, attacked the problem from another standpoint and in another direction. He retained the furnace and the boiler, but constructed an apparatus which combined an engine and dynamo. This engine-dynamo has hardly one of the features which distinguish an engine. There are no fly-wheels, piston, crank-shaft, belts, or the heavy iron frame visible. In fact, the machine has the appearance of a dynamo with a steam-pipe directly connected to it. Mr. Tesla's own explanation of this device is to the effect that the steam is used to create a vibrating motion of certain mechanism (in a cylinder) which separates as so as to cut the lines of magnet force of the large field magnets in the apparatus, thus creating electricity. It is pointed out that by this method several important advantages are gained, viz.:—the absence of a costly engine; the entire absence of friction, and what is of much higher importance, the generation of electricity at about one-half the cost of former methods. These claims have been verified by the operation of machines that have been made and tested. [ELECTRO-MAGNETIC ENGINE.]

***en-gāl'-lant**, *v. t.* [Pref. *en*, and Eng. *gallant* (q. v.).] To make a gallant or fine fellow of.

***en-gāol'**, ***en-jāl'**, *v. t.* [Pref. *en*, and Eng. *gaol* (q. v.).] To throw into or put into gaol; to imprison, to confine, to shut up.

Sir Ferumbras, 3166.

5. In the same sense as II.

6. A machine for raising and pouring water on burning houses; a fire-engine.

*7. An instrument constructed with skill.

"Just then Clarissa drew, with tempting grace,
A two-edged weapon from her shining case
He takes the gift with reverence, and extends
The little *engine* on his fingers' ends."
Pope: *Rape of the Lock*, iii. 127-32.

*8. A gin, a trap.

"The hidden *engines* and the snares."
Quarles: *Emblems*, iii. 9.

*9. The rack; an instrument of torture.

"Theirsouls shot through with adders, torn on *engines*."
Beaumont & Fletcher: *Night-Walker*, iv.

10. Any means used to effect or bring to pass any purpose; usually in an evil sense.

"Prayer must be divine and heavenly, which the devil
with all his *engines* so violently opposeth."
Dunlop: *Rules for Devotion*.

11. An agent, a tool, a means acting for another.

"[They] had th' especial *engines* been, to rear
His fortunes up unto the state they were."
Daniel: *Civil Wars*, iv. 15.

II. Mech.: A machine of complicated parts which acts automatically both as to power and operation. It is distinct from a machine, the motor of which is distinct from the operator; and from a tool, which is propelled and operated by one person.

¶ The various forms of engines intended for particular or special purposes will be found under their several heads: as Caloric-engine, Calculating-engine, Steam-engine, &c.

B. As adj.: Of or pertaining to an engine.

engine-bearer, s.

Ship-build.: One of the sleepers or pieces of timber placed between the keelson in a steamer and the boilers of the engines, to form a proper seat for the boilers and machinery.

engine-driver, s. An engineer; one who drives or manages an engine, especially a locomotive engine. (English.) [ENGINEER.]

engine-furnace, s. A furnace appertaining to a steam-engine boiler.

engine-lathe, s. A lathe of the larger kind, having a capacity for all the principal turning-work of a machine-shop.

engine-man, s. An engine-driver.

engine-sized, a. Applied to paper sized by a machine, and not while in the pulp, in a tub.

engine-turning, s. A system of ornamental turning done by means of a rose-engine lathe, and commonly seen on the outside of watch-cases.

ēn'-gīne, v. t. [ENGINE, s.]

*1. To torture by means of or in an engine; to rack.

"A softe bed of large space
They hadde made, and encortained,
Where she was afterward *engined*."
Gower: *C. A.*, i.

*2. To assault, to batter.

"Professed enemies to *engine* and batter our walk."
Adams: *Works*, i. 29.

3. To furnish or supply with engines.

ēn-gī-neēr', *ēn'-gīn'-ēr, *en-gyn-eor, en-gyn-eour, s. [Eng. *engine*; -er; O. Fr. *ingenieur*; Fr. *ingénieur*.]

I. Ordinary Language:

*1. A person of genius or ingenuity.

"He is a good *engineer* that alone can make an instrument to get preferment."
—Burton: *Anatomy of Melancholy*, p. 134.

*2. One who has the management of, and understands the working of engines of war.

"The Amyral made his *engyneour* the engyns to sette and bend."
Sir Ferumbras, 322.

3. In the same sense as II.

"It may not throw its waters into so great a variety of forms as the artificial fountain of the *engineer*."
—Knox: *Winter Evenings*, Even. 3.

4. One who manages or attends to an engine; an engine driver.

5. One who manages or carries through any business or enterprise.

"Proceeded on with no less art,
My tongue was *engineer*."
Suckling: 'Tis Now.

II. One who is skilled in either of the branches of engineering, military, mechanical, or civil. [ENGINEERING.]

ēn-gī-neēr', v. t. [ENGINEER, s.]

1. To direct or carry out as an engineer the formation or execution of; to perform the duties or part of an engineer in respect of.

*2. To ply, to work upon, to use skill or ingenuity with.

"Unless we *engineered* him with question after question, we could get nothing out of him."
—Cooper: *Works*, xv. 64.

*3. To guide, conduct, or manage by ingenuity and tact, to carry through against or over obstacles: as, to *engineer* a Bill through Congress.

ēn-gī-neēr'-līg, pr. par., a. & s. [ENGINEER, v.]

A. As pr. par.: (See the verb.)

B. As adj.: Pertaining to the art or science of an engineer; planned, directed, or carried out by an engineer.

C. As subst.: The art or science of constructing engines and machines, and of planning and executing such works as fall to the duty of an engineer. Engineering may first be divided into four great branches—military, marine, mechanical, and civil. The Military Engineer has to do with that branch of the science which is connected with the planning, construction, and maintenance of fortifications, the defense or attack of places in war, the construction of such buildings as may be necessary for military posts, the surveying of a country for military operations, &c. The duties of the Marine or Naval Engineer embrace works partly of a military and partly of a naval character. To him fall the planning and construction of vessels of war, and of various engines of war, as torpedoes, &c.

Civil Engineering, the most extensive branch of the four, may be said to have originated in England about the middle of the last century. Before that

period, whenever extensive drainage or waterworks were undertaken, recourse was generally had to the Dutch. The case is very different now. A demand for this profession has been created in this country of late years by the extraordinary development of our system of internal communication, as well as by the application of steam to the purposes of our manufactures. A Civil Engineer should have such a knowledge of mathematics as will enable him to investigate as well as to apply the rules laid down by writers on those branches of the mixed sciences to which his attention will most frequently be drawn. He should be well acquainted with the principles of mechanics, hydraulics, and indeed with all the branches of natural philosophy. He should be able to draw neatly, and should understand the principles of projection upon which all engineering drawings are constructed. To the Civil Engineer proper belongs the construction of roads, bridges, railways, canals, harbors, and drainage works. The duties being thus so extensive, many members of the profession devote themselves to one or other of the subdivisions of the branch. Thus we have gas-engineers, sanitary-engineers, and others, the nature of whose duties is sufficiently explained by their titles.

The Mechanical Engineer is one who is efficient in the invention, contrivance, and adjustment of all kinds of machinery; who is acquainted with the strength and quality of the material used, and also possesses a thorough knowledge of the power of steam and of the engine in all its modifications, and the uses to which this motive power is applied; he should also be duly acquainted with mill-work of the several kinds, whether impelled by steam, water, or wind.

ēn'-gīn-ēr-y', *en-gin-rye, *en-gin-ry, s. [Eng. *engineer*; -ry.]

1. The act or art of managing engines of war.

"They may descend in mathematics to fortification, architecture, *engineery*, or navigation."
—Milton: *On Education*.

2. Engines of war; artillery.

"Not distant far, with heavy pace, the foe,
Approaching gross and huge in hollow cube,
Training his devilish *engineery*."
Milton: *P. L.*, vi. 551-3.

3. Thunder.

"All the dreadful *engineery* of heaven seemed collecting its forces."
—Mrs. Carter: *Letters*, iv. 223.

4. Artful contrivances or devices; machinations.

"The fraudulent *engineery* of Rome."
—Shenstone.

5. Mechanism, machinery, internal structure or arrangement.

"The *engineery* of the English language is too near for distinct vision."
—Marsh: *Lect. on Eng. Language*.

English architecture, s. [ARCHITECTURE, DECORATED, DOMESTIC ARCHITECTURE, GOTHIC, PERPENDICULAR, POINTED.]

English elm, s. *Ulmus campestris*.

English language, s. The English language is a member of a group of allied languages, to which the term Teutonic has been applied. The Teutons were a German tribe conquered by the Roman general Marius; and hence the terms *Teutonicus* and *Theutonicus* were subsequently applied to all German-speaking people, and the Germans still call their own language Deutsch, of which Dutch is merely another form. [Dutch.] The Teutonic dialects form three groups: (1) The Low German, (2) The Scandinavian, and (3) The High German. The English language belongs to the first of these groups, as do also the Gothic, Frisian, Dutch, Flemish, and Old Saxon. The Teutonic languages themselves form a sub-division of the European division of that great family of related languages to which the term Indo-European has been applied. The English language is closely related to those dialects still spoken on the northern shores and lowlands of Germany, a relationship due to the immigration of the Angles, Saxons, and other Low German tribes. The original inhabitants of England were Celts, but few words of their language still survive: such are *basket*, *bran*, *breeches*, *clout*, *crag*, *crook*, &c. The Teutonic invaders consisted of three tribes, Angles, Saxons, and Jutes, and their first appearance in this country was in A. D. 449. In process of time they drove the original inhabitants toward the mountainous districts of Wales and Scotland. The language introduced by the Teutonic invaders was an inflected language, and free from admixture of foreign elements. But the English of the present day, which is a direct development of the Anglo-Saxon, has lost its inflections, and has adopted words freely from other tongues. First it adopted many words from the Roman missionaries, by whom the island was converted to Christianity in A. D. 596. Secondly, a large number were adopted from the Northmen of Scandinavia (the Norwegians, Danes, and Swedes), who continually made attacks on the coast of England, and at last, in A. D. 1013, became the ruling power. These words are numerous in old northern English literature, and in northern provincial dialects. A few still survive, such as *are*, *till*, *until*, *bound*, *busk*, *busk*, &c. But the event which exercised the greatest influence on the English language was the Norman invasion in A. D. 1066. After this, French became the language of the court, of the nobility, the clergy, and of literature, and continued to be so for nearly 300 years. To it we owe most of the terms connected with feudalism and war, the church, the law, and the chase. Robert of Gloucester, writing in A. D. 1297, says: "(The lower classes cling to English and to their native tongue yet.)" And so in process of time, when the two nations coalesced, the language of the majority prevailed. In A. D. 1349, Latin ceased to be taught in schools through the medium of French, and in A. D. 1382, the pleadings in the law courts were directed by Act of Parliament to be for the future conducted in English. But the English of the end of the fourteenth century was greatly altered from that of the eleventh. It was no longer an inflected or synthetic language, but had become, through the influence of the Norman-French, analytic; that is to say, prepositions and auxiliaries were used instead of inflections to express the various modifications of the idea to be conveyed by any word, and the relations of the several words in a sentence to each other. The invention of printing, the revival of learning in the beginning of the sixteenth century, and increasing intercourse with other nations, and the discoveries of science, have all tended to increase the vocabulary of the English language by the introduction of new words.

The English language, using the term in its widest acceptance, may be divided into five periods—viz.:

1. First Period A. D. 450-1100.
2. Second " " 1100-1250.
3. Third " " 1250-1350.
4. Fourth " " 1350-1450.
5. Fifth " " 1450-the present day.

In the first period (called also Anglo-Saxon or Old English), the language was inflectional; in the second it began to show a tendency to become analytic, the tendency increasing till in the fourth period inflections had virtually disappeared. Before the Norman conquest there were two dialects in English, a southern and a northern, the former of which was the literary language. After the Conquest dialects became much more marked, so that we can distinguish three great varieties, the Northern, the Midland, and the Southern, distinguished from each other by various grammatical differences. The Midland dialect was that most widely spread, and it ultimately became the standard language, a result principally due to the influence of Chaucer, and in a less degree of Wycliffe, Gower, and others.

***en-grāv-ing**, *pr. par., a. & s.* [ENGRAVE (1), *v.*] A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. As substantive:

1. The act, process, or art of cutting figures, letters, &c., on wood, stone, or metal. Engraving is very ancient. The oldest records are cut in stone, some in relief, some in intaglio. The hieroglyphics of Egypt are cut in the granite monoliths, and on the walls of the tombs and chambers. From Egypt or Phoenicia the Greeks received the art of engraving, where it had considerably advanced in the time of Homer. Among other uses which are allied to chasing and inlaying, it was employed in delineating maps on metallic plates. Specimens of Etrurian art are also of great antiquity. The art of engraving is fairly referable to three divisions: chalcography, or plate-engraving; xylography, or wood-engraving; lithography, or stone-engraving. (See these words.)

Engraving on metal originated with chasers and inlayers. This art is very ancient, but does not seem to have suggested the sister art of printing from the plates thus engraved. In taking a cast in sulphur of some engraved church ornaments, it is stated that a Florentine artist named Finiguerra, about 1440, was led at length to the discovery of the value of plate-engraving as a means of printing. Some dust and charcoal which had gathered in the lines came out upon the sulphur and gave an unexpected and suggestive effect. Aquatint engraving was invented by Saint-Non, a Frenchman, in 1662. Engraving in steel (claimed to be a native American invention) was introduced into England by Perkins, of Philadelphia, 1819. The earliest application of the wood-engraver's art was in cutting blocks for playing-cards. French writers ascribe it to the time of Charles V., but the Germans show cards of the date 1300, and the Italians claim that it originated in Ravenna, about 1285. Engraving on wood assumed

the character of an art about 1440; the first impression, 1423. Improved by Dürer, 1471-1523; by Bewick, 1789.

Engraving on a lithographic stone is effected by etching-point, diamond, or ruling-machine; the stylus of the latter is a diamond. There are two modes, the first of which is the more usual: (1) The stone is covered with a gum and acid ink-resisting compound, dried, and the design scratched through this ground to such a depth merely as to expose the clean stone. The stone is then oiled, the engraved portions alone absorbing the oil; it is afterward washed and rolled up. The printing is, however, usually from transfers from the engraved stones. (2) The stone is etched through a ground of asphaltum; acid is applied to deepen the lines. These are inked; the face cleaned off, gummed, and etched, the stone rolled up and printed. There are many styles, and these are briefly considered under their respective heads, as chalcography, copperplate engraving, dry-point, etching, steel-plate engraving, wood-engraving, &c.

"With the work of an engraver in stone, like the engravings of a signet, shalt thou engrave the two stones with the names of the children of Israel."—Exodus xxviii. 11.

*2. That which is engraved; an engraved plate, &c.

"It appears from the engravings on Aaron's breast-plate."—Warburton: *Divine Legation*, bk. iv., § 5.

*3. An impression taken from an engraved plate; a print.

* For the difference between engraving and picture, see PICTURE.

engraving-machine, *s.*

1. A machine in which an intaglio impression is delivered upon a plate or cylinder for bank-note printing, or calico-printing, by the rotation under contact with the said object of a hardened steel roller bearing the design in cameo. This system was invented by Jacob Perkins, and was first adopted in bank-note engraving. [TRANSFERRING-MACHINE.] The process for obtaining the design in cameo on the mill, by rotation in contact with an intaglio die, is effected in a transfer press. [CLAMMING-MACHINE.] A pantograph is used in etching a reduced copy of a pattern on to the copper cylinder for calico-printing. Eccentric-engraving, for a certain class of patterns in calico-printing, is performed by a diamond etching-point on the varnished roller. The points are moved by elaborate machinery, and the effect is analogous to that of the eccentric and rose-engine lathes. (Knight.)

2. An apparatus on the principle of the pantograph, but provided with a cutting device and machinery for causing pressure upon the surface to be engraved, so as to produce lines similar to those made by hand with the graver.

en-jōy, ***en-joye**, ***en-yoy-en**, *v. t. & i.* [Fr. *en*=in, and *joie*=joy.]

A. Transitive:

1. To take a pleasure in; to have a pleasing sense or perception of; to take pleasure or delight in.

"Her joyous presence and sweet company
In full content he there did long enjoy."

Spenser: F. Q., I. xii. 41.

2. To have the possession, use, or enjoyment of; to have, hold, or occupy, as something advantageous or desirable.

"The Whigs had, under Fraser's administration, enjoyed almost as entire a liberty as if there had been no censorship."—*Macaulay: Hist. Eng., ch. xix.*

3. To gain, to obtain.

"Wherein it shall appear that your demands are just,
Ye shall enjoy them."

Shakespeare: Henry IV., Pt. II., iv. 1.

4. To have sexual intercourse with.

"So inflame my sense
With ardor to enjoy thee."

Milton: P. L., ix. 1032.

B. Reflex.: To feel pleasure; to take enjoyment in things; to delight one's self; to be happy.

"When a man shall, with a sober, sedate, diabolical rancor, look upon and enjoy himself in the sight of his neighbor's sin and shame, can he plead the instigation of any appetite in nature?"—*South.*

***C. Intrans.:** To feel joy; to have pleasure or happiness.

"Manye schulen entoye in His natyuite."—*Wycliffe: Luke i. 14.*

***en-jōy**, *s.* [ENJOY, *v.*] Joy, happiness, pleasure.

en-jōy-a-ble, *a.* [Eng. *enjoy*; -able.] Capable of or fit for being enjoyed; capable of affording enjoyment.

"The evening of our days is generally the calmest and the most enjoyable of them."—*Pope: Letters.*

en-jōy-ēr, *s.* [Eng. *enjoy*; -er.] One who enjoys, possesses, or has the benefit of anything.

"The unprofitable, unworthy enjoyers of them."—*South: Sermons, vol. ix., ser. 2.*

en-jōy-mënt, *s.* [Eng. *enjoy*; -ment.]

1. The state or condition of enjoying; the state of possessing or having anything advantageous or desirable; fruition.

"Who is there does not sometimes hazard it for the enjoyment of an hour."—*Rambler, No. 178.*

2. That which is enjoyed or affords pleasure or satisfaction.

"To despise the little things of present sense, for the hope of everlasting enjoyments."—*Stanvill, ser. 1.*

† **Crabb** thus discriminates between *enjoyment*, *fruition*, and *gratification*: "*Fruition*, from *frui* to enjoy, is employed only for the act of enjoying; we speak either of the enjoyment of any pleasure, or of the enjoyment as a pleasure; we speak of those pleasures which are received from the *fruition*, in distinction from those which are had in expectation. The enjoyment is either corporeal or spiritual, as the enjoyment of music, or the enjoyment of study, but the *fruition* of eating, or any other sensible, or at least external object; hope intervenes between the desire and the *fruition*. *Gratification*, from the verb to *gratify*, make grateful or pleasant, signifies either the act of giving pleasure, or the pleasure received. *Enjoyment* springs from every object which is capable of yielding pleasure; by distinction, however, and in the latter sense, from moral and rational objects: but the *gratification*, which is a species of enjoyment, is obtained through the medium of the senses. The enjoyment is not so vivid as the *gratification*: the *gratification* is not so permanent as the enjoyment. Domestic life has its peculiar enjoyments; brilliant spectacles afford gratification. Our capacity for enjoyment depends upon our intellectual endowments; our gratification depends upon the tone of our feelings, and the nature of our desires." (*Crabb: Eng. Synon.*)

***en-kēn-nel**, *v. t.* [Pref. *en*, and Eng. *kennel* (q. v.).] To shut up in a kennel.

C. Intransitive:

1. To grow larger; to become bigger; to increase in size or bulk.

"Where Avon shapes
His winding way, *enlarging* as it flows."
Jago: *Edgworth*, bk. i.

2. To dilate, to speak or write at length; to expatiate; to amplify.

"This is a theme so unpleasant, I delight not to *enlarge* on it; rather wish the memory of it were extinct."—More: *Decay of Piety*.

*3. To exaggerate.

"A severe critic would be apt to think I *enlarged* a little, as travelers are often suspected to do."—Swift.

4. To increase in capacity or comprehension; to increase in breadth or extent; to expand.

"Great objects make
Great minds, *enlarging* as their views enlarge."
Young: *Night Thoughts*, ix. 1,064, 1,065.

† Crabb thus discriminates between to *enlarge*, to extend, and to increase: "We speak of *enlarging* a house, a room, premises or boundaries; of *increasing* the property, the army, the capital, expense,

&c.: of *extending* the boundaries of an empire. We say the hole or cavity *enlarges*, the head or bulk *enlarges*, the number *increases*, the swelling, inflammation, and the like, *increase*; so likewise in the figurative sense, the views, the prospects, the powers, the ideas, and the mind, are *enlarged*; pain, pleasure, hope, fear, anger, or kindness, is *increased*; views, prospects, connections, and the like, are *extended*." (Crabb: *Eng. Synon.*)

2. *Pl.*: Every ninth day of a disease.

enneatical-years, *s. pl.* Every ninth year of a person's life.

***ên-new** (ew as û), ***ên-newe**, *v. t.* [Pref. *en*, and Eng. *new* (q. v.).] To make new; to renew.

***ên-niche**, *v. t.* [Pref. *en*, and Eng. *niche* (q. v.).] To place in a niche or conspicuous position.

ên-nô-ble, *v. t.* [Fr. *ennobler*: *en*=in, and *noble*=noble.]

1. To make noble; to raise to the degree of nobility.

"Many fair promotions
Are given daily to ennoble those,
That scarce some two days since were worth a noble."

Shakesp.: *Richard III.*, i. 3.

2. To give an appearance of dignity to.

"The expression which ennobled and softened the harsh features of William."—Macaulay: *Hist. Eng.*, ch. xi.

3. To elevate or raise morally; to raise in character.

"Prayer is the most proper means to ennoble and refine and spiritualize our natures."—Sharp: *Works*, vol. I., ser. 15.

4. To dignify, to raise in nature or qualities.

"The intention alone of amendment,
Fruit of the earth, ennobles to heavenly things."

Longfellow: *The Children of the Lord's Supper*.

5. To make famous or illustrious.

"Zenobia likewise, 72 miles from Samosata, is ennobled for the passage over Euphrates."—P. Holland: *Plinie*, bk. v., ch. xxiv.

ên-nô-ble-mént, *s.* [Eng. *ennoble*; -ment.]

1. The act of ennobling or advancing to nobility; the state of being ennobled.

"He added, during parliament, to his former creations the *ennoblement* or advancement in nobility of a few others."—Bacon: *Henry VII.*, p. 15.

2. Exaltation, elevation, dignity.

"The eternal wisdom enriched us with all *ennoblements*, suitable to the measures of an unstrained goodness."—Glanvill: *Scopsis Scientifica*, ch. I.

ên-nul (ân-nwê), *s.* [Fr.; O. Fr. *enui*, *anoi*; Sp. *enojo*; O. Venetian *inodio*, from Lat. *in odio*=in hatred, used in the phrase *in odio habui*=I had in hatred, I was sick and tired of.] Listlessness, weariness, want of interest in matters or scenes around; languor of mind arising from satiety, incapacity, or lack of interest.

"The only fault of it is insipidity; which is apt now and then to give a sort of *enui*, which makes one form certain little wishes, that signify nothing."—Gray: *Letters*.

en-nuy-é (ân-nwê-yâ), *a. & s.* [Fr., pa. par. of *ennuyer*.]

A. As adj.: Affected with ennui; languid, listless, bored.

B. As subst.: One affected with ennui; one bored or tired of pleasure.

en-nuy-ée (ân-nwê-yâ), *s.* [Fr.] A woman affected with ennui.

***ên-nôch**, *s.* [Sept. Gr. *Enôch*; Heb. *Chananok*. The name means in Hebrew initiated or initiating.]

I. Scripture History:

1. The first-born son of Cain. (Gen. iv. 17.)

2. The son of Jared. He was the father of Methuselah, walked with God, and after living 355 years "was not, for God took him." (Gen. v. 19-24.) Cf. also Heb. xi. 5. [III.]

3. The eldest son of Reuben. (Gen. xli. 9; Exod. vi. 14.)

4. The son of Midian. (Gen. xxv. 4; Num. xxvi. 5.)

II. Scrip. Geog.: An antediluvian "city," called by Cain after his son Enoch. [I.] (Gen. iv. 17.)

III. Apocryphal Lit.: A book quoted in Jude (verses 14, 15). Whiston, influenced by the consideration that it was quoted by an inspired writer, considered it canonical; nearly every other critic has set it down as apocryphal. It is quoted by Justin Martyr, Irenaeus, Clement of Alexandria, Tertullian, Origen, Augustine, Jerome, Hilary, Eusebius, &c. It was written originally in Hebrew, or in Hebrew-Aramaic, probably the latter; but the first publication was lost, it is believed, about the eighth century. In 1773 Bruce, the African explorer, brought three copies of the Ethiopic version with him from Abyssinia, and in 1821 Archbishop Lawrence translated it into English. It is divided into five books, which may not all have had the same author or have been written at the same time. The first may have appeared about B. C. 144, the last about B. C. 40. A book of Noah is obviously interwoven with it, but may have been originally separate. These two patriarchs are made to prophesy the future rewards of the righteous and the future punishment of the wicked. The passage quoted by St. Jude occurs in the part written by one of the apocryphal Enochs, though with some verbal differences.

***ên-nô-dê-tion**, *s.* [Lat. *enodatio*, from *enodo*=to free or clear from knots: *e*=ex=out, away, and *nodus*=a knot.]

1. *Lit.*: The act or process of untying a knot.

2. *Fig.*: The solution of a difficulty.

***ên-nô-de**, *a.* [Lat. *enodis*: *e*=ex=out, without, and *nodus*=a knot.]

Bot.: Destitute of or free from knots or joints; knotless, jointless.

***ên-nô-de**, *v. t.* [Lat. *enodo*.] To clear or free from knots; to make clear.

***ên-nôint**, *pa. par. or a.* [ANoint.] Anointed.

***ên-nô-mô-tarch**, *s.* [Gr. *enômotarchês*=the ruler or leader of an enomoty: *enômotia*, and *archô*=to rule, to lead.]

Gr. Antiq.: The commander or leader of an enomoty (q. v.).

***ên-nô-mô-tý**, *s.* [Gr. *enômotia*, from *enômotos*=bound by an oath; *onymi*=to swear.]

Gr. Antiq.: Any band of sworn soldiers. Specif., a division of the Spartan army, consisting, according to some, of twenty-five; according to others, of thirty-two men.

ên-nô-plê, *s. pl.* [Neut. pl. of Gr. *enoplos*=in arms, armed.] So named from the armature of the mouth or pharynx. (See def.)

Zool.: A tribe of Anneloidea, order Turbellaria, having the mouth or pharynx armed with styles, hooks, or rods. They consist of minute animals, inhabiting fresh or salt water.

***ên-ôp-tô-mân-cý**, *s.* [Gr. *enoptos*=visible in a thing, and *mantéia*=prophecy, divination. Perhaps we should read *enoptromancy*, from Gr. *enoptrom*=a mirror.] Divination by means of a mirror.

***ên-or-dêr**, *v. t.* [Pref. *en*, and Eng. *order* (q. v.).] To order, to command.

***ên-norm**, ***ên-norme**, *v. t.* [ENORM, *a.*] To make monstrous.

***ên-norm**, *a.* [O. Fr. *enorme*, from Lat. *enormis*=out of rule.] [ENORMOUS.]

1. Deviating from rule; irregular.

2. Deviating from right; wicked.

***ên-nor-mi-ôus**, *a.* [Eng. *enorm*; -ious.] ENORMOUS.

ên-nor-mi-tý, *s.* [Fr. *énormité*, from Lat. *enormitas*=out of rule, huge.]

1. The state, quality, or condition of being enormous, immoderate, irregular, or excessive; deviation from right; atrociousness.

"That this law will be always sufficient to bridle or restrain enormity, no man can warrant."—Hooker.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêre; pine, pît, sire, sir, marine; gô, pôr, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; try, Sýrian. æ, œ = ê; ey = â. qu = kw.

2. That which exceeds measure or right; an atrocious crime or act, an atrocity.

"Atheism hath not rested in the judgement, but proceeded to all enormities and debauches."—*Glanvill: ser. iii.*

3. A deviation from rule in any way.

"Pyramids, arches, obelisks, were but the irregularities of vain-glory and wild enormities of ancient magnanimity."—*Sir T. Browne: Hydrotaphia.*

ē-nor-mōus, *a.* [O. Fr. *enorme*; Lat. *enormis*: *e*=out, away, and *norma*=a rule.]

*1. Out of or transgressing all rule; abnormal.

"Titan, heaven's first born,

With his enormous brood, and birthright seized
By younger Saturn." *Milton: P. L., i. 510, 511.*

*2. Extending beyond certain limits; excursive.

"The enormous part of the light in the circumference of every lucid point, ought to be less discernible in shorter telescopes than in longer, because the shorter transmit less light to the eye."—*Newton: Optics.*

3. Exceedingly great in size, dimensions, bulk, or quantity.

"Yet not in vain the enormous weight was cast."

Dryden: Ovid: Metamorphoses xii.

4. Exceedingly great; exceeding.

"Nature here

Wanted, as in her prime; and played at will
Her virgin fancies, pouring forth more sweet,
Wild above rule or art, enormous bliss."

Milton: P. L., v. 294-97.

*5. Disordered, confused, perverse.

"I shall find time

From this enormous state, and seek to give
Losses their remedies." *Shakespeare: Lear, ii. 2.*

6. Wicked in an exceeding degree; excessively wicked, atrocious, or disgraceful.

*1 (1) Crabb thus discriminates between *enormous*, *huge*, *immense*, and *vast*: "*Enormous* and *huge* are peculiarly applicable to magnitude; *immense* and *vast* to extent, quantity, and number. *Enormous* expresses more than *huge*, as *immense* expresses more than *vast*: what is *enormous* exceeds in a very great degree all ordinary bounds; what is *huge* is only in the superlative degree. The *enormous* is always out of proportion; the *huge* is relatively extraordinary in its dimensions. Some animals may be made *enormously* fat by a particular mode of feeding: to one who has seen nothing but level ground, common hills will appear to be *huge* mountains."

(2) He thus discriminates between *enormous*, *monstrous*, and *prodigious*: "The *enormous* contradicts our rules of estimating and calculating; the *prodigious* raises our minds beyond their ordinary standard of thinking; the *monstrous* contradicts nature and the course of things. What is *enormous* excites our surprise or amazement: what is *prodigious* excites our astonishment: what is *monstrous* does violence to our senses and understanding." (*Crabb: Eng. Synon.*)

ē-nor-mōus-ly, *adv.* [Eng. *enormous*; *-ly*.] In an enormous manner or degree; excessively; beyond measure.

"Throughout an enormously large proportion of the ocean, the bright blue tint of the water bespeaks its purity."—*Darwin: Origin of Species* (ed. 1859), ch. ix.

ē-nor-mōus-ness, *s.* [Eng. *enormous*; *-ness*.] The quality or state of being enormous, excessive, or beyond measure; enormity.

"When those who have no opportunity to examine our faith, see the enormousness of our works, what should hinder them from measuring the master by the disciples?"—*More: Decay of Piety.*

ēn-or-thō-trope, *s.* [Gr. *en*=in, *orthos*=straight, and *trepō*=to turn.] A toy on the principle of the thaumatrope, the stroboscope, and phenakistoscope, which depend for their action upon the persistence of visual impressions. Upon different parts of a card are detached parts of a given figure, and when the card is rotated these become assembled and give a combined impression to the eye.

e-nough (**ē-nūf**), ***e-nogh**, ***i-nou**, ***i-noh**, ***i-now**, ***y-now**, ***y-nough**, ***y-nowgh**, *a., s., interj., & adv.* [A. S. *genōh*, *genōg*, from the imp. verb *geneah*=it suffices; Goth. *ganōhs*=sufficient; Icel. *gnōgr*; Dan. & Sw. *nok*; Dut. *genoeg*; Ger. *genug*.]

A. As adj.: Sufficient; in a measure, quantity, or amount to satisfy; adequate to the wants or demands; sufficient to meet and satisfy reasonable desire or expectation.

"It is *ynough* to the disciple that he be as his maister."—*Wycliffe: Matt. x.*

B. As substantive:

1. A sufficiency; a sufficient or adequate quantity; a quantity or amount which satisfies desire or expectation.

"And Eean said, I have enough, my brother."—*Gen. xxxiii. 9.*

2. That which is equal to the powers or abilities.

"Some great defects and main errors in his nature, customs, and proceedings, he had enough to do to save and help, with a thousand little industries and watches."—*Bacon.*

C. As interj.: An exclamation denoting sufficiency or satisfaction.

D. As adverb:

1. Sufficiently; in a sufficient quantity, degree, or measure.

"He never can enough atone
For each misdeed."

Hoole: Orlando Furioso, bk. xviii.

2. Tolerably, passably, fairly; in a tolerable or passable degree.

"An honest fellow enough."—*Shakespeare: Troilus, v. 1.*

*Blair thus discriminates between the two words *enough* and *sufficient*: "*Enough* relates to the quantity which one wishes to have of anything. *Sufficient* relates to the use that is to be made of it. Hence, *enough* generally imports a greater quantity than *sufficient* does. The covetous man never has enough, although he has what is *sufficient* for nature." (*Blair: Rhetoric* (1817), i. 232.)

*Crabb thus discriminates between *enough* and *sufficient*: "He has *enough* whose desires are satisfied; he has *sufficient* whose wants are supplied. We may therefore frequently have *sufficiency* when we have not *enough*. A greedy man is commonly in this case, he who has never *enough*, although he has more than a *sufficiency*." (*Crabb: Eng. Synon.*)

***ē-nōun-çe**, *v. t.* [Fr. *enoncer*, from Lat. *enuncio*: *e*=ex=out, and *nuncio*=to announce, to declare; *nuncius*=a messenger.] To declare, to proclaim, to utter, to pronounce, to enunciate.

Victoriously upraised his clear bright eye,
And, when that eulogy was ended, stood
Enrapt." *Wordsworth: Excursion, bk. vii.*

ēn-rāpt (2), *a.* [Prefix *en*, and English *rapt* for *wrapt* (q. v.).] Wrapt up.

"Nor hath he been so *enrapt* in those studies as to neglect the polite arts of painting and poetry."—*Arbuthnot and Pope.*

ēn-rāp-tūre, *v. t.* [Pref. *en*, and Eng. *rapture* (q. v.).] To fill with rapture; to transport with pleasure or delight.

"The Master's word

Enraptured the young man heard."
Longfellow: Building of the Ship.

ēn-rāv-ish, *v. t.* [Pref. *en*, and Eng. *ravish* (q. v.).] To throw into an ecstasy; to transport; to enrapture.

"What wonder,

Frail men, whose eyes seek heavenly things to see,
At sight thereof, so much *enravisht* be?"

Spenser: Hymn of Heavenly Love, 131, 132.

ēn-rāv-ish-ing, *pr. par., a. & s.* [ENRAVISH.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

ēn-rich, *v. t.* [O. Fr. *enrichir*; Fr. *enricher*; *en*=in, and *riche*=rich.]

1. To make rich or wealthy; to give riches to.

"Studious with traffic to enrich the land."

Dryden: Tarquin and Tullia.

2. To fertilize, to make fruitful.

"It [marl] mightily *enricheth* it [the ground] and maketh it more plentiful."—*P. Holland: Plinie, bk. xvii., ch. vi.*

3. To store, to fill; to furnish with wealth or plenty of anything.

"The bowels of the earth

Enriched with knowledge his industrious mind."
Wordsworth: Excursion, bk. vii.

4. To adorn, to beautify, to set out.

ēn-rich-ēr, *s.* [Eng. *enrich*; *-er*.] One who or that which enriches.

en-röck-mënt, s. [Pref. en; Eng. rock; and suff. -ment.] Stone pitched on to the sea-face of a breakwater or dyke, or a shore subject to encroachment by the waves or stream.

ën-röl, ën-röll, v. t. [O. Fr. *enroller*; Fr. *enrôler*, from *en*=in, and *rolle*=a roll, list.]

1. To write down on a roll; to record, to register.

"The concucious Of old engrossed, by great purueiaunce Which is enrolde, and put in remembrance."

2. To write or enter in a roll or register; to enter names in a list.

"There be enrolled among the king's forces about thirty thousand men of the Jews."—1 Maccabees x. 36.

3. To enter or include in a class or list.

"To be deemed considerable in this faculty, and enrolled among the wittes."—Barrow: *Sermons*, vol. i., ser. 14.

*4. To involve, to wrap up, to encircle, to surround.

"All these, and thousand thousands many more . . . Came rushing, in the foamy waves enroll'd."

Spenser: *F. Q.*, II. xii. 25.

¶ Crabb thus discriminates between *enrol*, to enlist, to register, and to record: "Enrol and enlist respect persons only; register respects persons and things; record respects things only. Enrol is generally applied to the act of inserting names in an orderly manner into any book; enlist is a species of enrolling applicable only to the military. The enlistment is an act of authority; the enlisting is the voluntary act of an individual. Among the Romans it was the office of the censor to enrol the names of all the citizens in order to ascertain their number, and estimate their property; in modern times soldiers are mostly raised by means of enlisting. In the moral application of the terms, to enrol is to assign a certain place or rank; to enlist is to put one's self under a leader, or attach one's self to a party. Hercules was enrolled among the gods; the common people are always ready to enlist on the side of anarchy and rebellion. To enrol and register both imply writing down in a book; but the former is a less formal act than the latter. The insertion of the bare name or designation in a certain order is enough to constitute an enrolment; but registering comprehends the birth, family, and other collateral circumstances of the individual. The object of registering likewise differs from that of enrolling; what is registered serves for future purposes, and is of permanent utility to society in general; but what is enrolled often serves only a particular of temporary end. To record is a formal species of registering; we register when we record; but we do not always record when we register. . . . Things may be said to be registered in the memory, or events, recorded in history." (Crabb: *Eng. Synon.*)

ën-röll-ër, s. [Eng. enroll; -er.] One who enrolls or registers.]

ën-röl-mënt, ën-röll-mënt, s. [Eng. enrol; -ment.]

1. The act of enrolling; specif. the act of registering or entering a deed, judgment, recognizance, &c., in any of the courts of law, being a court of record.

"He appointed a general review to be made, and enrolment of all Macedonians."—P. Holland: *Livius*, p. 1, 121.

*2. That in which anything is enrolled or registered; a register.

"The king . . . delivered the enrolments with his own hands, to the Bishop of Salisbury."—Davies: *On Ireland*.

***ën-roët, v. t.** [Pref. en, and Eng. root (q. v.).] To root, to fix by the root; to implant deeply.

en-sil-age (age as ig), s. [Fr. *en*=in; O. Fr. *silo*=a foss, a cavity, or trench underground, in which grain is deposited with a view to its conservation; Eng. suff. -age.]

Agriculture:

1. A method of preserving forage crops while moist and succulent, and without any previous attempt at drying them. It is effected by storing green fodder in mass, and covering it over in deep trenches cut in a dry soil.

"It seems almost certain, then, that *ensilage* has been known, probably for centuries, in Europe, Asia, and Africa. . . . The mass must be several feet in depth and width, and when the pit is filled, boards or dry straw, or in some cases heather, are laid on the top without delay, and earth and stones are heaped up on the surface to the weight of several hundred-weight per square foot. The fodder thus stored settles into a half solid mass, which, having undergone fermentation, is greedily devoured by cattle, and, with a little hay or dry food added, keeps them in admirable condition throughout the winter. Maize, prickly comfrey, peas, rye, tares, clover, lucerne, vetches, and grass may be profitably stored after this fashion."—*London Daily Telegraph*.

2. Fodder prepared by the process described under 1.

"One . . . states that he sold *ensilage* in the market town at from twenty-four to thirty-six shillings per ton."—*Chambers' Journal*.

en-sil-age (age as ig), v. t. [ENSILAGE, s.]

1. *Arch.*: Those members of a portico which were constructed upon the columns, consisting of the

Entablature.

is divided into architrave, the part immediately above the column; frieze, the central space; and cornice, the upper projecting moldings. Each of the orders has its appropriate entablature, of which both the general height and the subdivisions are regulated by a scale of proportion derived from the diameter of the column. The entablature, though architects frequently vary from the proportions here specified, may, as a general rule, be set at one-fourth the height of the column. The total height thereof thus obtained is in all the orders, except the Doric, divided into ten parts, three of which are given to the architrave, three to the frieze, and four to the cornice. But in the Doric order the whole height should be divided into eight parts, and two given to the architrave, three to the frieze, and three to the cornice. (Weale.)

"A range of Corinthian pillars with their full entablature surmounted by a balustrade."—*Eustace: Classical Tour*, i. 132.

***ên-thũ-gi-ân**, *s.* [Gr. *enthousiastês*=to be in-
spired.] An enthusiast.

ên-thũ-gi-asm, *s.* [Gr. *enthousiasmos*=inspiration,
from *enthousiastês*=to be inspired, from *entheos*,
enthous=inspired: *en*=in, and *theos*=God; Fr. *enthousiasme*.]

"1. An ecstasy of mind, as if from divine inspira-
tion; a vain belief by a person that he is divinely
inspired, or possessed of a private revelation;
religious ecstasy.

"*Enthusiasm* is that temper of mind, in which the
imagination has got the better of the judgment. In this
disordered state of things, *enthusiasm*, when it happens
to be turned upon religious matters, becomes fanaticism;
and this, in its extreme, begets the fancy of our being the
peculiar favorites of heaven."—Warburton: Divine Lega-
tion, App. bk. v.

2. Ardent zeal in pursuit of any object; complete
possession of the mind by any subject.

"Yet there was then in Scotland an *enthusiasm* com-
pared with which the *enthusiasm* even of this man was
lukewarm."—Macaulay: Hist. Eng., ch. xiii.

*3. Elevation of fancy; liveliness of imagination;
exaltation of ideas.

"He was the first who imparted to English numbers the
enthusiasm of the greater ode, and the gaiety of the less."
Johnson: Lives of the Poets; Cowley.

¶ Crabb thus discriminates between *enthusiast*,
fanatic, and *visionary*: "All these have disordered
imagination, but the *enthusiast* is only affected in-
wardly with an extraordinary fervor, the *fanatic* and
visionary betray that fervor by some outward
mark. . . . *Fanatics* and *visionaries* are there-
fore always more or less *enthusiasts*; but *enthusi-
asts* are not always *fanatics* or *visionaries*. . . .
There are *fanatics* who profess to be under extraor-
dinary influences of the spirit; and there are
enthusiasts whose intemperate zeal disqualifies them
for taking a beneficial part in the sober and solemn
services of the church. *Visionary* signifies prop-
erly one who deals in *visions*, that is, in the pre-
tended appearance of supernatural objects; a species
of *enthusiasts* who have sprung up in more
modern times. The leaders of sects are commonly
visionaries, having adopted this artifice to estab-
lish their reputation and doctrines among their de-
luded followers; Mahomet was one of the most suc-
cessful *visionaries* that ever pretended to divine
inspiration; and since his time there have been
visionaries, particularly in England, who have
raised religious parties, by having recourse to the
same expedient. *Fanatic* was originally confined
to those who were under religious frenzy, but the
present age has presented us with the monstrosity
of *fanatics* in irreligion and anarchy. *Enthusiast*
is applied in general to every one who is filled with
an extraordinary degree of fervor; *visionary* to one
who deals in fanciful speculation." (Crabb: Eng.
Synon.)

ên-thũ-gi-ast, *s.* [Gr. *enthousiastês*, from *en-
thousiastês*=to be inspired.]

*1. One who imagines he is divinely inspired, or
has a private divine revelation.

"The *enthusiast* then talks of illuminations, new lights,
revelations, and many wonderful fine things, which are
availed to the same Spirit."—Glanville: Sermon 10.

2. One who is filled with enthusiasm or ardent
zeal for any object; one whose mind is wholly pos-
sessed by any subject, and who is excessively
moved by his feelings in any pursuit; a person of
ardent zeal.

"With the wild rage of mad *enthusiast* swelled."
Thomson: Liberty, iv. 1, 986.

3. A person of elevated fancy or lively imagina-
tion.

"What tuneful *enthusiast* shall worship their eye,
When half of their charms with Cadwallon shall die?"
Scott: Last Words of Cadwallon.

ên-thũ-gi-ast-tic, *a. & s.* [Gr. *enthousiastikos*,
from *enthousiastês*=an enthusiast (*q. v.*)]

ên-thũ-gi-ast-tic-al-ly, *adv.* [Eng. *enthusias-
tical*; -*ly*.] In an *enthusiastic* manner; with en-
thusiasm; ardently, zealously.

"So *enthusiastically* loyal that they were prepared to
stand by James to the death, even when he was in the
wrong."—Macaulay: Hist. Eng., ch. xiii.

ên-thũ-mê-măt-ic-al, *a.* [Greek *enthymêma*
(genit. *enthymêmatos*); Eng. adj. suff. -*ic*, -*ical*.]
Pertaining to, containing, or of the nature of an
enthymeme.

"Encountered as they may be with handy stroke of
syllogism, or *enthymematical* conclusion."—Tooker: Fabric
of the Church (1604), p. 68.

ên-thũ-mê-mê, *s.* [Gr. *enthymêma*, from *en-
thymêmai*=to consider, to ponder: *en*=in, and
thymos=mind, spirit.]

Rhet.: An argument consisting only of an ante-
cedent and consequential proposition; a syllogism
where the major proposition is suppressed, and
only the minor and consequence produced in words:
as, Dionysius is a tyrant, therefore he must fear;
where the complete syllogism would be, All tyrants
fear: Dionysius is a tyrant: therefore he must fear.

"Several concurrent *enthymemes* are often as cogent as
a demonstrative syllogism."—Thomson: Lures of Thought,
§ 120.

"Sepp, Hubner, and other continental entomologists."—Newman: *British Moths* (1874) (Pref.), ix.

ên-tô-môl'-ô-gý, s. [Gr. *entoma*=insects (Aristotle), properly an *adj.*, with *zôa*=living creatures, understood; *entomos*=cut in pieces, cut up; *logos*=discourse.] The science which treats of insects. Aristotle pointed out one of the essential characteristics from which they derive their names in Greek, Latin, and English—viz., that their bodies are cut or divided into segments. [ANNULOSA.] In modern times Aldrovandus published a *History of Insects* in 1604, and Moufett one in 1634. Swammerdam's *General History of Insects*, published in 1669, was the first work in which good descriptions of insects were given. A work by Ray appeared in 1710, and in 1735 Linnaeus' classification of them in the *Systema Naturæ*. Latreille's *Précis des Caractères génériques des Insectes* was published in 1796, and his *Genera Crustaceorum et Insectorum* between 1806 and 1800. Writers upon entomology since this time are too well known to need mention here.

ên-tô-môl'-ô-tër, s. [Gr. *entomon*=an insect, and *metron*=a measure.] An instrument for measuring the parts of insects.

ên-tô-môph'-a-ga, s. pl. [Gr. *entoma*=insects, and *phagên*=to eat.]

1. *Zool.*: The name given by Prof. Owen to a division of the Marsupialia, having small canine teeth, and preying on the smaller invertebrate animals. It contains the families Peramelidæ (Bandicoots), Didelphidæ (American Opossums), and Myrmecobidæ (Banded Anteaters). Sometimes the first are called Saltatoria (Leapers), the second, Scansoria (Climbers), and the third, Ambulatoria (Walkers).

2. *Entom.*: A tribe of Hymenoptera, containing the Ichneumonids or Cuckoo-flies. They have an ovipositor at the end of the abdomen. This, in some genera, is exerted to a considerable length. They lay their eggs in the larvæ of other insects, on which the young ichneumonids, when they emerge from the egg, prey. The Entomophaga are generally of small size. There are numerous genera and species. The tribe is divided into four families, (1) Evanidæ, (2) Ichneumonidæ, (3) Chalcididæ, and (4) Proctotrupidæ.

ên-tô-môph'-a-gan, s. [ENTOMOPHAGA.]

Zool. & *Entom.*: An animal belonging to the mammalian or to the insect tribe of Entomophaga.

ên-tô-môph'-a-goûs, a. [ENTOMOPHAGA.]

Zool. & *Entom.*: Pertaining or relating to the Entomophaga; insect-eating.

ên-tô-môph'-i-loûs, a. [Gr. *entomon*=an insect, and *philos*=loved; *phileō*=to love.] Loved by insects; attractive to insects.

entomophilous-flowers, s. pl.

Bot.: Flowers in which the pollen is carried by insects from the male to the female flowers. They are to be contra-distinguished from anemophilous flowers, in which the instrumentality is that of the wind.

ên-tô-mô-stêg'-i-dæ, s. pl. [Gr. *entomos*=cut in pieces, and *stegê*=a roof, a covering.]

Zool.: A family of Rhizopoda, consisting of animals with shells, the chambers arranged spirally in a double series.

ên-tô-mô-stôm'-a-ta, s. pl. [Gr. *entomos*=cut in, and *stomata*, pl. of *stoma*=the mouth. Named from the notched lip.]

Zool.: In De Blainville's classification, the second family of his first order Siphonobranchiata. It nearly corresponds with the family Buccinidæ (q. v.).

ên-tô-môs'-tra-ça, s. pl. [Mod. Lat.=insects in shells. The name was first given by Otto Frederick Müller, in 1785, in his *Entomotraca seu insecta testacea quæ in aquis Danicæ et Norvegiæ reperit*. [Entomotraca or Shelled Insects which inhabit the Danish and Norwegian waters.] Fr. *entomotrachés* (Latreille). From Gr. *entomon*=an insect, and *ostrakon*=a shell.]

1. *Zool.*: A great sub-class of Crustaceans. When the name Entomotraca was first given, [Etyml.] the Arachnida (Spiders) and the Crustacea (Crabs) were included in the Insect class; now all these are regarded as distinct and equal in rank, though not in numbers. Prof. Thomas Rupert Jones, F. R. S., &c., thus defines the Entomotraca: "Animal aquatic, covered with a shell or carapace of a horny consistency, formed of one or more pieces, in some genera resembling a cuirass or buckler, and in others a bivalve shell, which completely, or in great part, envelops the body and limbs of the animal. In other genera the animal is invested with a multivalve carapace, like jointed plate armor; the branchiæ are attached either to the feet or to the organs of mastication; the limbs are jointed and more or less setiferous. The animals, for the most part, undergo a regular moulting or change of shell as they grow; in some cases this amounts to a species of transformation." They may be seen in numbers in ponds, pools, even in water-pipes, and move by a jerking motion. They are thus classified:

Legion or Division I.—Lophyropoda. Order I. Ostracoda; 2. Copepoda.

Legion or Division II.—Branchiopoda. Order I. Cladocera; 2. Phyllopoda; 3. Trilobita (?); 4. Merostomata (?).

2. *Palæont.*: The Copepoda and Cladocera have not yet been found fossil, the other orders have. The Cypridæ (typical genus *Cypris*) found so abundantly in the Carboniferous and other rocks, and still existing, are of the order Ostracoda [CYPRIDÆ, CYPRIS]. Its associate, *Cythere* (q. v.), has also ranged from Palæozoic times till now. Most of the Phyllopoda, except *Esteria* (q. v.), are Palæozoic. The Trilobita are very characteristic, though not exclusively, Silurian fossils. They extend from the Cambrian to the Lower Carboniferous rocks. The Merostomata range from the Upper Silurian till now.

ên-tô-môs'-tra-çan, a. & s. [ENTOMOTRACA.]

A. As *adj.*: Pertaining or relating to the Entomotraca.

B. As *subst.*: A small Crustacean belonging to that sub-class.

ên-tô-môs'-tra-coûs, a. [Mod. Lat. *entomotrach(a)* (q. v.); Eng. &c., suff. -ous.] Pertaining or relating to the Entomotraca.

ên-tô-môt'-ô-mist, s. [Eng. *entomotom*(y); -ist.] One who anatomizes insects; one who practices entomotomy.

ên-tô-môt'-ô-mý, s. [Gr. *entoma*=insects, and *tomê*=cutting.] The dissection of insects and the science which treats of their anatomy.

ên-tôn'-ic, a. [Gr. *entonos*=strained; *enteipô*=to stretch tight; *en*=intensive, and *teinô*=to stretch.]

Med.: Having increased tone; acting with morbidly great power, force or effect. Used chiefly of the circulatory system.

ên-tô-pêr'-lph-êr-al, a. [Gr. *entos*=within, and Eng. &c., *peripheral* (q. v.).]

Mental Phil.: A term introduced by Herbert Spencer to designate sensations, feelings, &c., produced by causes operating within the periphery,

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêtt, hêre, camel, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôr, or, wôre, wôlf, wôrk, whô, sôn; mâte, cûb, cûre, unite, cûr, rûle, fâll; trý, Sýrian. æ, œ=ê; ey=â. qu=kw.

circumference, or outer surface of the body. Examples, the sensations of hunger, thirst, &c. It is opposed to epiperipheral (q. v.).

ên-tô-phýte (pl. **ên-tô-phýtes**, **ên-tôph-ý-ta**), *s.* [Gr. *entos*=within, and *phyton*=a plant, a tree.]

Bot., &c.: A plant which grows in the interior of animal or vegetable structures, as distinguished from an entozoan, a word which, in the etymological sense, means an animal having a similar mode of life. Entophytes are mostly fungi; and though the species are really numerous, they have yet been unduly multiplied. Entophytes infesting man or the mammalia, specially when diseased, live on the skin, on the mucous surfaces, or in cavities. Thus in Favus, there are *Puccinia favus* and *Achorion schenkei*, if the latter be more than an immature stage of the former. *Trichophyton tonsurans* exists among the hair in Plicapilonia and Favus. *Microporon audouinii* in the hair follicles in *Porrigo decalvans*, *M. mentagrophytes* on the beard, and *M. furfur* on the skin of the chest in *Pityriasis versicolor*. In the mucous surfaces or in cavities there are *Sarcinia ventriculi* in the stomach, *Oidium albicans* in thrush, and *Leptothrix buccalis* among the tartar of the teeth. Birds, reptiles, fishes, insects, &c., have also their Entophytes. One of these is *Botrytis bassiana*, the muscardine of the silk-worm; another, a Sporendonema, produces the muscardine of the fly, killing it off in large numbers in autumn. Microscopic parasites of plants are very numerous. All are fungi. Thus *Botrytis infestans* is the potato-fungus, and *Oidium tuckeri* the vine mildew. (Griffith & Henfrey.)

ên-tô-phý-tíc, *a.* [Eng., &c., *entophyt(e)*; -ic.] Pertaining or relating to Entophytes (q. v.).

ên-tô-ptēr-ý-gôid, *a. & s.* [Gr. *entos*=within, and Eng., &c., *pterygoid* (q. v.).]

A. As adjective:

Comp. Anat.: Attached internally to the pterygoid bone; pertaining to the bone described under B.

B. As substantive:

Comp. Anat.: An oblong, thin, scale-like bone attached to the inner border of the co-adapted halves of the palatine and true pterygoid in fishes, and increasing the bony roof of the mouth in the direction toward the median line. It is edentulous in the cod and most other fishes. (Owen: *Comp. Anat.*; *Fishes* (1846), pp. 108, 109.)

ên-tôp-tíc, *a.* [Fr. *entoptique*, from Gr. *entos*=within, and *optomai*=to see.]

Phys.: Pertaining or relating to visions seen by the eye when the lids are shut.

ên-tor-ti-lā-tion, *s.* [Fr. *entortiller*=to twist; Lat. *torqueo*, *pa. par. tortus*.] A turning into a circle; circular figures.

"Willing that those which should work in the borders (of the table), raisings, fowries, and wrappings, *entortillations*, and such like, should amuse themselves only for beautifying and decoration."—Donne: *Hist. of the Septuagint* (1633), p. 47.

ên-tôs-thô-blast, *s.* [Gr. *entosthe*=from within, and *blastos*=a sprout, shoot, or sucker.]

Biol. & Phys.: The nucleus of the nucleolus or entoblast. (Agassiz.)

ên-toûred', *a.* [Fr. *entouré*.]

Her.: A term applied to a shield decorated with branches.

ên-tô-zô-a, *s. pl.* [Gr. *entos*=within, and *zôa*, *pl. of zôon*=a living being, an animal.]

Zool.: The name given by Rudolphi to a class of animals living within the bodies of other animals, nearly every species of which is infested by one or more of them. Cuvier divided them into Intestinal Cavitaria and Intestinal Parenchymata. For these names Professor Owen substituted Coelmintha and Sterelmintha. The class is not a natural one, for the internal parasites are not all closely akin. Nor has Entozoa been always used in a precise sense. Hence Nicholson thinks that it would be expedient to discard it altogether, but, as this would be difficult, he makes it include the Trematoda, Teniada, the Nematoidea (in part), the Acanthocephala, and the Gordiacea, but does not use it as a synonym for the Scolecida in general, some of which are not internal parasites. Cobbold says that the Entozoa living in the human body are divided into three classes—the already mentioned Coelmintha or solid worms, as tapeworm, &c.; and Accidental parasites. Also divided into sexually mature and immature, the latter included in cysts, and occurring in the lung, liver, or inclosed cavities, like the peritoneum, being by far the most dangerous.

ên-tô-zô-al, *a.* [Greek, &c., *entozo(a)*, and Eng., &c., suff. -al.]

Zool.: The same as ENTOZOIC (q. v.).

ên-tô-zô-ic, *a.* [Gr., &c., *entozoa* (q. v.), and Eng., &c., suff. -ic.]

Zool.: Pertaining or relating to the Entozoa.

ên-tô-zô-ôl'-ô-gist, *s.* [Greek *entos*; Eng. *zoolo-gy* (y), and -ist.] A zoologist whose special study is the Entozoa.

"This great entozoologist [Rudolphi] . . . divided the parenchymatous entozoa into four orders."—Owen: *Invert. Animals*, Lect. iv.

ên-tô-zô-ôl'-ô-gý, *s.* [Gr. *entos*, and Eng. *zoolo-gy*.]

Zool.: The department of zoology which treats of the Entozoa.

ên-tô-zô-ôn, *s.* [Gr. *entos*=within, and *zôon*=a living being, an animal.]

Zool.: One of the Entozoa (q. v.).

entr'act, **entr'acte** (**ân-tract**), *s.* [Fr.]

1. **Drama.**: The interval between the acts of a drama.

2. **Mus.**: Music played between the acts or divisions of an opera, drama, or other stage performance.

***ên-trail'**, ***ên-trayl**, *v. t.* [Pref. *en*, and O. Fr. *treiller*=to lattice.] To interweave, to variegiate.

"Entrailed with flowrets and with rare device."—Thompson: *Epithalamium*.

ên-trails, *s. pl.*, ***ên-trail**, ***ên-tralle**, ***in-trails**, *s.* [Fr. *entrailles*, from Low Lat. *intralia*, *intranea*, from Lat. *interanea*, neut. *pl. of interaneus*=inward, from *inter*=within.]

1. *Lit.*: The inward or internal parts of animals; the intestines; the guts.

"The thirsty point in Sulmo's entrails lay."—Byron: *Nisus and Euryalus*.

2. *Fig.*: The internal parts.

"Then toiled with mattock to explore
The entrails of the cavern floor."

Scott: *Rokeby*, vi. 6.

***ên-train'**, *v. t.* [Pref. *en*, and Eng. *train* (q. v.).] To draw on.

***ên-trām-mel**, *v. t.* [Pref. *en*, and Eng. *trammel* (q. v.).] To trammel, to entangle.

***ên-trām-mels**, *s. pl.* [ENTRAMMEL, v.]

1. Bondage, the chains of slavery.

2. Prisoners of war.

ên-trance, **en-trance**, *s.* [Eng. *enter*; -ance.]

I. Ordinary Language:

1. The act of entering or passing into any place.

"With her snowy arms supply'd a bolt
To bar their entrance."—Smollett: *The Rectitude*, v. 6.

2. Power or liberty of entering; admission.

"Has the porter his eyes in his head, that he gives entrance to such companions?"—Shakespeare: *Coriolanus*, iv. 5.

3. The passage, avenue, doorway, or gateway by which a place is entered.

"Palladio did conclude that the principal entrance was never to be regulated by any certain dimensions, but by the dignity of the master."—Wotton: *Architecture*.

4. Any passage or means by which anything may be entered.

"Languages are useful to men of all conditions, and they equally open to them the entrance either to the most profound or the more easy and entertaining parts of learning."—Locke: *Of Education*, § 195.

5. The act of entering into or taking possession of; as of lands, an office, &c.

"From the first entrance of this king to his reign, never was king either more loving, or better beloved."—Hayward: *Edward VI.*

6. Intellectual progress or advancement; acquaintance; elementary knowledge.

"He that traileth a country before he hath some entrance into the language, goeth to school, and not to travel."—Bacon: *Essays of Travaille*.

7. The act of entering upon or beginning.

"Beware
Of entrance to a quarrel; but, being in,
Bear it, that the opposer may beware of thee."—Shakespeare: *Hamlet*, i. 3.

8. Beginning, commencement.

"St. Augustine in the entrance of one of his sermons, makes a kind of apology."—Hakewill: *On Providence*.

9. A fee paid for admission, as to an entertainment, a society, a competition, &c.; entrance-money.

II. Technically:

1. *Comm.*: The act of entering a ship or goods at a custom-house.

2. *Shipbuild.*: The bow of a vessel; the form of the forebody under the load-line, which encounters the sea.

¶ *The joyful entrance*: A name given to an early constitution of Brabant.

entrance-fee, *s.* The same as ENTRANCE-MONEY (q. v.).

entrance-money, *s.* Money paid for entrance or admission, as to an entertainment, a society, &c., or a fee paid for the privilege of contesting for a prize, as, the entrance-fee of a horse at the races.

ên-tran'çe, *v. t.* [Pref. *en*, and Eng. *trance* (q. v.).]

1. To put into a trance; to make wholly insensible to present objects.

A. As adj.: Pertaining or relating to a disease which prevails either constantly or at periodical intervals, affecting one or more species of animals in a country. It is opposed to epizootic, to which it stands in the same relation as an endemic to an epidemic disease in man.

B. As subst.: A disease of the kind described under *A*.

**ë-ö-cë-ne*, *a. & s.* [Gr. *ëös*=the morning-red, the daybreak, the dawn, corresponding to Sans. *ushas*, and Gr. *kainos*=new, recent.] *Geology*:

A. As adj.: Characterized by the dawn or first appearance of shell species now existing, pertaining to the rocks, strata, &c., described under *B.*, or to the period of their deposition.

B. As subst.: The first great division of the Tertiary or Cainozoic strata or period. The name was given by Sir Charles Lyell in 1830, because, by the identification of Deshayes, the Lower Tertiary strata of Paris and London were held to contain 3¼ per cent. of recent species of shells, against 96¼ extinct. As to shells or mollusks, therefore, it was the dawn of the present order of things. The lower in organization a species is, the longer it tends to live, and *vice versa*. The first dawn of the recent infusorial species was in Mesozoic times, while that of mammals was not till toward the close of the Tertiary. Such a ratio as 3¼ to 96¼ is greatly altered in value by the increase or diminution of even one figure in the lesser number, and the discovery of other mollusks has proved the number 3¼

not quite accurate, without as yet furnishing materials to substitute another. Eocene strata are found in the United States and elsewhere. Those of North-western Europe are generally found in basins and patches of limited area. Of those at home and abroad some were deposited in salt, some in brackish, and some in fresh water. Man did not then exist upon the earth. About 50 species of mammals have been found of the genera Palæotherium, Anoplotherium, &c. There were birds, but only a few are yet known. Of reptiles there were crocodile, lacustrine and terrestrial tortoises, also erodiles, iguanas, geckos, &c. All the invertebrate classes still existing had appeared. Among trees and plants dicotyledons now became numerous; so did endogens; among the latter are a palm called Nipa [NIPA, NIPADITES] and other tropical species, the climate being warmer than now.

eocene formation or system.

Geol.: [ÆOLIC rocks.]

**ë-ö-l-ä-s*, *s. pl.* [ÆOLIDÆ.]

**ë-ö-l-pile*, **ë-ö-l-ä-pile*, **ë-ö-l-pyle*, **ë-ö-l-pyle*, *s.* [Lat. *æolipila* (pl.), from *Æolus*=the god of winds, and *pila*=a ball.]

Mach.: A rotary engine, invented by Heron, of Alexandria, who set it at work in the Serapion about B. C. 150. It consisted of a hollow ball of metal with bent arms. The ball was about two-thirds filled with water, and the ball put on the fire. When steam was generated it issued from the bent arms, and by reaction caused the metal globe to rotate. It was revived in this country for rotating a toy, and then as the principle of a Banta's Rotary Steam-engine Protector, on May 28, 1887. [REACTION STEAM-ENGINE.]

**ë-ö-l-is*, *s.* [ÆOLIS.]

**ë-ö-l-phön*, **ë-ö-l-phön*, *s.* [In Ger. *æolophon*; from Gr. *æiolophōnos*=with changeful notes; *æiolos*=moving with the wind, with changeful notes, and *phōnē*=sound.] The name of a musical instrument, the seraphine. It was the predecessor of the melodion and of the parlor organ.

**ë-ön*, *s.* [ÆON.]

**ë-öp-tër-üs*, *s.* [Gr. *ëös*=dawn, and *ptērīs*=a kind of fern.]

Palæobot.: A genus of Filices containing the oldest known fern. It is Silurian.

**ëorl*, *s.* [EÆRL.]

**ë-ö-scor-pi-üs*, *s.* [Gr. *ëös*=the dawn, and *skorpis*=a scorpion.]

Palæont.: A genus of Scorpions. *Eoscorpis carbonarius*, from the carboniferous rocks of Illinois, is the oldest known scorpion.

**ë-ö-sin*, *s.* [Gr. *ëös*=the morning-red, daybreak; suff. *-in* (Chem.).]

Chem.: A roseate dye-stuff, tetrabromo-fluorescin, $C_{20}H_2Br_4O_8$. Obtained by the action of bromine on fluorescin dissolved in acetic acid.

**ë-ös-phör-ite*, *s.* [Greek *ëös*=morning, i. e., the daybreak, and *phōros*=bearing.]

Min.: A variety of Childrenite (q. v.). (*Brit. Mus. Cat.*)

**ë-ö-thër-i-üm*, *s.* [Gr. *ëös*=the dawn, and *thērion*=a wild animal.]

Palæont.: A genus of Sirenia, from the Eocene. *Eotherium egyptiacum* is the oldest known member of the Manatee order.

**ë-ö-zö-ic*, *a.* [Gr., Mod. Lat., &c., *eoözön* (q. v.), and Eng., &c., suff. *-ic*.]

Geol.: Pertaining to the rocks of Laurentian age in which, as far as is at present known, the first life began.

**ë-ö-zö-ön*, *s.* [Gr. *ëös*=the dawn, and *zöon*=a living animal.] [Def.]

Palæont.: A genus of animals named Eozoön because when first examined (in 1844), it was the oldest fossil then known to exist, and its appearance

was held to be the dawn of animal life upon the globe. It occurs in the Laurentian of Canada, and is called *Eozoön canadense*.

**ë-ö-zö-ön-al*, *a.* [Eng. *eoözön* (q. v.); suff. *-al*.] Pertaining to or containing the fossil named Eozoön, or containing proof of the dawn of life.

eoözöon-rock, *s.*

Geol.: The rock of Laurentian age, in which the Eozoön was found and which is largely composed of it.

**ëp-*, **ëp-i-*, *pref.* [Gr. *ëpi*.] A Greek prefix signifying on, upon, over, in addition, or near. It becomes *ëph-* before an aspirate, and *ëp-* before a vowel.

**ëp-ä-crë-sä*, *s. pl.* [Mod. Lat. *epacr(is)* (q. v.), and Lat. fem. pl. adj. suff. *-ecä*.]

Bot.: A tribe of Epacridaceæ, consisting of the genera which are many-seeded.

**ëp-äc-ri-dä-cë-sä*, *s. pl.* [Mod. Lat. *epacris*, genit. *epacrid(is)* (q. v.), and Lat. fem. pl. adj. suff. *-acëä*.]

Bot.: Epacrids. An order of Hypogynous Exogens, alliance Ericales. It consists of shrubs or small trees, with simple, if any, hair. The leaves are generally alternate, entire, sometimes overlapping each other, and half sheathing the stem, and without a midrib; calyx five, rarely four-parted, persistent, often colored; corolla with five, rarely four segments; stamens generally five, with one-celled anthers; ovary sessile, surrounded by scales; style one; stigma generally simple; fruit drupaceous, baccate, or capsular. Found in the Indian Archipelago, Australia, and Polynesia, where they replace the Ericaceæ of other regions. Lindley in 1845 enumerated thirty genera, and estimated the known species at 320.

**ëp-ä-críd-sä*, *s. pl.* [Mod. Lat. *epacris* (genit. *epacridis*), and Eng. pl. suff. *-sä*.]

Bot.: The name given to the order Epacridaceæ.

**ë-päc-ris*, *s.* [Gr. *ëpākris*=on the heights, from *äkra*=the point, the top of a hill, referring to the fact that these plants grow on the tops of hills.]

Bot.: A large genus of plants, the typical one of the order Epacridaceæ (q. v.). They are branched shrubs, two to four feet high, generally with sharp-pointed lanceolate or cordate leaves, and axillary white, scarlet, crimson, or purple flowers. They abound in Australia, New Zealand, &c.

**ë-päct*, *s.* [Fr. *épacte*; Gr. *ëpaktai* (pl.)=intercalary (days); *ëpaktos*=brought in from abroad, foreign.]

Chron.: A number which indicates the excess of the common solar year above the lunar one. The essential point is to ascertain the age of the moon in any year, and its epact denotes the moon's age on the first of January in that year. If the new moon happens on the first of January, the epact for the twelve months then beginning is 0 or zero. The lunar year of 354 days is shorter than the solar one of 365 days by 11 days, and this difference runs through every year of the lunar cycle. The epact of the first year of the cycle is 11, that of the second 11+11=22, that of the third year would be 33 if the moon could ever be so old, but as it cannot go beyond 30, the epact is 33-30=3. That of the fourth is 3+11=14, and so on.

To obtain the epact or moon's age for the several remaining years of the present century, subtract 1 from the Golden Number, multiply the remainder by 11, divide the amount thus produced by 30, and not the quotient but the remainder is the epact.

To find the Gregorian epact for any year whatever, divide the number of centuries in the year by 4, multiply the remainder by 17, add to this 43 times the quotient + 86, and divide the total by 25. Subtract the quotient thus formed from the Golden Number multiplied by 11. If the remainder is susceptible of being diminished by one or more threes take it or them from it, and the result will be the epact required. (*Sir Harris Nicolas: Chron. of Hist.*)

"Divide by three; for each one left add ten; Thirty reject: the prime makes epact then."

Harris, in Johnson.

**ëp-ä-nët-ick*, *a.* [Gr. *ëpānetikos*, from *ëpaineō*=to praise; *ëpānos*=praise.] Pleasing, laudatory, encomiastic.

**ëp-ä-gö-gë*, *s.* [Gr. *ëpi*=on, and *agō*=to lead.] *Rhet.*: The bringing forward of a number of particular examples to prove a universal conclusion; the argument of induction.

**ëp-ä-gög-ic*, *a.* [Gr. *ëpagōgikos*, from *ëpagōgē*.] *Rhet.*: Of the nature of or pertaining to induction; inductive.

**ë-päl-päte*, *a.* [Latin *e*=out, without, and *palpum*, *palpus*=a stroking.] [PALPI.]

Entom.: Without palpi.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hëre, camel, hër, thëre; pine, plit, sire, sir, marine; gö, pöt, or, wöre, wolf, wörk, whö, sön; müte, cüb, cüre, unite, cür, rüle, füll; trÿ, sÿrian. æ, æ=ë; ey=ä. qu=kw.

ēp-ān-a-dī-plō-sis, *s.* [Gr., from *epanadiploō*=to make double, to repeat; *diploō*=to double; *diploos*=double.] [ANADIPLOSIS.]

Rhet.: Repetition; a term applied to that figure in rhetoric when the sentence ends with the same word with which it begins: as, "Rejoice in the Lord alway: and again I say, Rejoice." (Phil. iv. 4.)

ēp-ān-a-lēp-sis, *s.* [Gr., from *epi*, and *analep-sis*=taking up again, repetition; *analembanō*=to take up again, to repeat.]

Rhet.: A figure of speech by which the same word or clause is repeated after a parenthesis.

ēp-ān-āph-ō-ra, *s.* [Gr. *epanapherō*=to bring back, to repeat.]

Rhet.: A figure in which a word or phrase is repeated at the beginning of successive clauses.

ēp-ān-ar-thō-sis, *s.* [EPANORTHOSIS.]

ēp-ān-ās-trō-phō, *s.* [Gr., from *epanastrephō*=to return.]

Rhet.: A figure in which the end of one clause is made the beginning of the next.

ēp-ān-ō-dōs, *s.* [Gr., from *epi*, and *anodos*=a way up; *ana*=up, and *hodos*=a way.]

Rhetoric:

1. A figure in which a sentence or member is inverted or repeated backward.

2. A return to the principal heads or to the proper subject of a discourse after a digression, or in order to consider the topics separately and more particularly.

ēp-ān-ō-dy, *s.* [EPANODOS.]

Bot.: The reversion of an irregular flower to one of a regular form.

ēp-ān-or-thō-sis, *s.* [Gr., from *epanorthōō*=to set straight, to correct, from *epi*=up, and *anorthōō*=to set straight up; *orthos*=straight.]

Rhet.: A figure of speech by which a person recalls what he has said, in order to substitute stronger or more significant words.

ēp-ān-thōus, *a.* [Gr. *epi*=upon, and *anthos*=a blossom, a flower.]

Bot.: Growing upon a flower. Used of certain fungi.

***ēp-arch**, *s.* [Gr. *eparchos*=a commander; *eparchō*=to command, to be a commander; *epi*=on, upon, and *archō*=to rule.]

Greek Antiq.: A governor or prefect of a province or eparchy.

***ēp-ar-chy**, *s.* [Gr. *eparchia*, from *eparchos*.]

Greek Antiq.: A province or district under the jurisdiction of an eparch.

ē-pā-ule, *s.* [Fr. *épaule*=the shoulder.]

Fort.: The shoulder of a bastion; the salient angle formed by the face and flank.

ē-pā-ule-mēt, *s.* [Fr. *épaule*=the shoulder.] A species of breastwork formed to defend the flank of a post or any other place. A work thrown up to defend troops from an attacking force; usually shoulder high, hence the name *épaulement*. The expression is commonly used to designate the whole mass of earth, &c., which protects the guns in a battery in front and at the sides.

ēp-au-lētte, ***ēp-au-lēt**, *s.* [Fr. *épaulette*, from *épaule*=the shoulder.]

Mil.: A shoulder-piece; an ornamental badge worn on the shoulder, and made of various forms and material according to the rank of the wearer.

ēp-au-lēt-téd, *a.* [Eng. *épaulette*(e); -ed.] Furnished with or wearing epaulettes.

***e-paul-ière** (**ē-pōl-yāre**), ***e-paul-let** (**ē-pōl-lē**), *s.* [Fr. *épaule*=the shoulder.]

Mil. Antiq.: A shoulder-piece, or protection for the shoulder, made either of one or several successive plates. It was fastened to the sleeve of the hauberk by laces or points.

Epaulière.

ēp-āx-i-al, *a.*

[Gr. *epi*=upon,

over, and Lat. *axis*; Gr. *axōn*.]

Anat.: Per-

taining or relat-

ing to muscles

lying above the

embryonic verte-

bral axis. They

are called by

Huxley episke-

letal muscles.

[EPISKELETAL.] There are two divisions of them: a dorso-lateral, consisting chiefly of the long and shorter erector muscles of the spine and head, and a ventro-lateral, as the genio-hyoid, the sternomastoid, and other muscles.

ē-peir-a, *s.* [From Gr. *epēryō*, Epic and Ionic for *epēryō*=to pull to; *epi*=to, toward, and *eryō*=to draw or drag.]

Zool.: A genus of Arachnide, the typical one of the family Epeiride. *Epeira diadema* is the garden spider. It has eight eyes, nearly equal in size, on the anterior part of the head. It constructs a web with radiating threads, connected by concentric circles, in the center of which it takes its stand, to await the appearance and entanglement of its prey.

ē-peir-i-dā, *s. pl.* [Mod. Lat. *epeir(a)*, and Lat. fem. pl. adj. suff. -idae.]

Zool.: A family of Arachnide (Spiders), order Araneida or Dimerosomata; type *Epeira* (q. v.).

ēp-ēn-čē-phāl-ic, *a.* [Modern Latin *epencephal(ion)*, and Eng. &c. suff. -ic.]

Anat.: Pertaining or relating to the epencephalon; the occipital or back part of the brain.

"The epencephalic or occipital vertebra has also a neural and a hemal arch."—Todd & Bowman: *Physiol. Anat.*, ii. 697.

ēp-ēn-čēph-al-ōn, *s.* [Gr. *epi*=upon, and *engkephalos*=the brain.]

Anat.: A portion of the brain which, with the metencephalon, constitutes the posterior primary vesicle. The epencephalon comprehends the cerebellum, the pons Varolii, with the anterior part of the fourth ventricle. (Quain.)

ēp-ēn-dy-mā, *s.* [Gr. *epi*=upon, and *endyma*=a garment; in Fr. *endymne*.]

Anat.: A delicate epitheliated structure, which acts as a kind of skin to the ventricles of the brain. (Quain.)

ependyma-ventriculorum, *s.*

Anat.: The same as EPENDYMA (q. v.). (Quain.)

***ēp-ē-nēt-ic**, *a.* [EPENETIC.]

ē-pēn-thē-sis, ***ē-pēn-thē-sy**, *s.* [Gr., from *epenthēmi*=to place upon; *epi*=upon; *tithēmi*=to place; Fr. *épenthèse*.]

Gram.: The addition of a letter or letters in the middle of a word, as *alutium* for *alutim*.

ēp-ēn-thēt-ic, *a.* [Gr. *epi*=on, upon; *enthētos*=put in; *enthēmi*=to place or put in.]

Gram.: Inserted or added in the middle of a word.

ē-pērgue (*g* silent), *s.* [Etym. doubtful; perhaps from Fr. *éparque*=thrift, economy.] An ornamental stand for a large dish on a table.

ē-pēr-ū-a, *s.* [From *eperua*, the Guyanan name of the fruit of *Eperua falcata*. (See def.)]

Bot.: A genus of leguminous plants, sub-order Cæsalpinieæ, tribe Amherstieæ. *Eperua falcata*, the Wallaba tree of Guiana, has abruptly pinnate leaves, and peduncles of flowers. Sir R. Schomburgk says that the wood is deep red, frequently variegated with whitish streaks, hard, heavy, shining, impregnated with an oily resin, and in consequence very durable. (Lindley, &c.)

ē-pēx-ē-gē-sis, *s.* [Gr., from *epexēgeomai*=to narrate in detail; *exēgeomai*=to lead out, to detail; (*ex*)=out, and *hēgeomai*=to lead.] [EXEGESIS.] A full or detailed account or explanation of something which has gone before; exegesis.

ē-pēx-ē-gēt-ic-al, *a.* [Gr. *epi*, and Eng. *exegetical* (q. v.).] Of the nature of an exegesis; explanatory of something which has gone before; exegetical.

ē-phah, & **ē-pha**, *s.* [Heb. *ephah*, probably from an old Coptic or Egyptian word, spelled in Septuagint Gr. *oiphi* and *oiphei*=a measure of capacity.]

Weights and Measures: A measure of capacity among the Jews, containing ten omers (Exod. xvi. 36). It was used for measuring such goods as flour, barley, &c. (Judg. vi. 19; Ruth ii. 17.) It was the same in capacity as the bath, but the latter was for liquids (Ezek. xlv. 10, 11, 14). Calculations made from some statements of Josephus, give the ephah a capacity of 1985.77 cubic inches.

"And Gideon went in, and made ready a kid, and unleavened cakes of an ephah of flour."—Judges vi. 19.

ē-phē-bē, *s.* [Gr.=*ephēbos*=a kind of cup.]

Bot.: A genus of Lichens, the typical one of the family Ephebieæ.

ē-phē-bl-dā, *s. pl.* [Mod. Lat. *epheb(e)*, and Lat. fem. pl. adj. suff. -idae.]

Bot.: A family of Lichens, tribe Hymenothalamæ.

ēph-ē-drā, *s.* [Lat. *ephedra*, from Gr. *ephedra*=a setting by or at a thing, a plant, perhaps *Equisetum sylvaticum*.]

Bot.: A genus of Gnetales. The flowers are dioecious; the males in catkins, with a bifid calyx, seven stamens, with four inferior and two superior anthers; the females with a quintuple two-parted calyx, two ovaries, and two seeds. The species occur in all the four divisions of the world. Their fruit is said to be mucilaginous, eatable, sub-acid, and slightly purgative. The branches and flowers of the Asiatic Ephedras were formerly sold as styp-

tics.

ē-phē-llis (*pl. ē-phēl-lī-dēs*), *s.* [Gr. *ephēllis* (sing.)=an iron-band on a box cover, (pl.) freckles; *epi*=upon, and *hēlos*=a nail, or *hēlios*=the sun. (Liddell & Scott.)]

Med.: A term for the freckles which appear, in persons of fair complexion, on those parts of the skin which are exposed to the sun. It is also used to designate these patches occurring on other parts of the body.

ē-phēm-ēr-a, *s.* [Gr. *ephēmeron*=(1) a short-lived insect, the May-fly; (2) a poisonous plant; *epi*=here=for, and *hēmera*=a day.]

Entom.: The typical genus of the family Ephemeride (q. v.). *Ephemera vulgata* is the May-fly or Day-fly. The larva is aquatic. In the perfect state it lives a very short time. Its emergence from the water is not so striking a phenomenon as is that of its congeners in Holland, France, and Switzerland, which emerge in immense swarms, like driving snowflakes, one evening, and, having deposited their eggs, leave their dead bodies piled in heaps on the banks of their natal stream on the morning of the very next day. [ETYM.]

ē-phēm-ēr-al, *a. & s.* [Gr. *ephēmeros*, from *epi*=on, and *hēmera*=a day.]

A. As adjective:

1. *Lit.*: Beginning and ending in a day; existing only for a day.

2. *Fig.*: Short-lived; continuing or existing only for a short time.

"When the gale of ephemeral popularity shall have gradually subsided."—Knox: *On Grammar Schools*.

B. As subst.: Anything which lives or continues only for a day; anything short-lived.

***ē-phēm-ēr-āl-it-y**, *s.* [Eng. *ephemeral*; -ity.] A transient trifle.

"This lively companion . . . chattered ephepheralities while Gerard wrote the immortal lives."—C. Reade: *Cloister and Hearth*, ch. lxi.

***ē-phēm-ēr-an**, *s.* [Gr. *ephēmeros*.] Anything which is ephemeral.

"The least of these small insected ephemerals."—Howell: *Letters*, bk. ii., let. 60.

ēph-ē-mēr-ē-s, *s. pl.* [Mod. Lat. *ephemer(um)* (q. v.), and Lat. fem. pl. adj. suff. -eæ.]

Bot.: A tribe or family of inoperculate terminal foliated mosses.

***ē-phē-mēr-ic**, *a.* [Gr. *ephēmeros*.] The same as EPHEMERAL (q. v.).

ēph-ē-mēr-i-dā, *s. pl.* [Mod. Lat. *ephemer(a)* (q. v.), and Lat. fem. pl. adj. suff. -idae.]

1. **Entom.**: May-flies. A family of neuropterous insects; family Subulicorneæ. Antennæ very small, three jointed. Wings perpendicular or nearly so, anterior pair much the larger. Body terminating in three setæ. Anterior legs protruded forward to be used as organs of touch. The larvæ, which, except that they want wings, much resemble the perfect insect, are aquatic, breathing by branchiæ. According to Swammerdam, they are three years in reaching the perfect state, when they come forth immediately to deposit their eggs and die. The chief genera are Oxygryphæ, with only two wings; Cloe with four, the hinder ones, however, being minute; Baëtis and Ephemeræ with the inferior wings larger, the former with three ocelli, the latter with two. [EPHEMERA.]

2. **Palæont.**: Mr. Scudder believes his *Platephemera antiqua*, from the Devonian rocks of North America, to be one of the Ephemeride. The family is believed also to have had representatives in the Carboniferous rocks. [EPHEMERITES.] If so, then its discovery in all the intermediate strata is only a question of time.

ē-phēm-ēr-id, *s.* [EPHEMERIDÆ.]

Zool.: An insect of the family Ephemeride (q. v.).

"Larger than that of any recent Ephemerids."—Nicholson: *Palæont.*, i. 408.

ē-phēm-ēr-is (*pl. ē-phē-mēr-i-dēs*), *s.* [Gr.=a diary.]

I. Ordinary Language:

1. A journal, a diary, an account of daily transactions.

2. An almanac.

"Let him make an *ephemerides*, read Suisset the calculator's works, Scaliger De Emendatione Temporum, and Petavius his adversary, till he understand them."—Burton: *Anatomy of Melancholy*, p. 281.

II. Technically:

1. **Astron.** (of a planet): The place of the planet for a number of successive days.

2. **Literature**:

(1) A collective name for reviews, magazines, and other periodical literature.

(2) A record of events which have happened on the same date in different years.

bōil, bōy; pōūt, jōwl; cat, çell, chorus, çhīn, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tīon, -gion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

ē-phēm-ēr-ist, s. [EPHEMERIS.]

1. One who keeps a journal or diary; a diarist.
2. One who studies the daily motions and positions of the planets; an astrologer.

"The night before he was discoursing of and slighting the art of foolish astrologers, and genethiacal ephemerists, that pry into the horoscope of natives."—*Howell*.

ē-phēm-ēr-l-tēs, s. [Mod. Lat. *ephemer(a)*; -ites.]

Palæont.: A presumed genus of Ephemeroidea of Carboniferous age.

ē-phēm-ēr-ō-morph, s. [Eng. &c., *ephemero(n)*, and Gr. *morphē*=form.] A term coined by Bastian, to include the lowest forms of life under one general designation.

"The transformation from the vegetal to the animal, and from the animal to the vegetal modes of growth so common among ephemeromorphs."—*Bastian: The Brain as an Organ of Mind*, ch. 1.

***ē-phēm-ēr-ōn, s.** [Gr. *ephēmeron*.] [EPHEMERA.] The same as, but more correct than, EPHEMERA (q. v.).

ephemeron-worm, s. The ephemer which, however, continues long in the worm or larva state. It is when it reaches the perfect state that it is ephemer in the duration of its life. [EPHEMERA.]

"Swammerdam observes of the ephemeron-worms, that their food is clay, and that they make their cells of the same."—*Derham: Physico-Theology*.

***ē-phēm-ēr-ōus, s.** [Gr. *ephēmeros*.]

1. *Ord. Lang.*: Ephemerical, short-lived.
2. *Bot.*: Lasting only a day.

ē-phēm-ēr-ūm, s. [Mod. Lat., from Gr. *ephēmeros*=lasting but a day.]

Bot.: The typical genus of the tribe Ephemereæ (q. v.).

ē-phē-sian (sian as zhyūn), s. & a. [Lat., &c., *Ephesus*; Gr. *Ephesos*; *i* connective, and Eng., &c., adj. suff. -an.]

A. As adj.: Pertaining to Ephesus, a celebrated city in classic times, one of those belonging to the Ionic Confederation. It is now in ruins.

B. As substantive:

1. *Geog.*: A native of Ephesus.
2. (Pl.) *Scrip. Canon.*: St. Paul's Epistle to the Ephesians (q. v.).

St. Paul's Epistle to the Ephesians:

Scrip. Canon.: One of the books of the New Testament. It seems to have been sent forth by St. Paul about A. D. 62, while he was a prisoner at Rome. (Acts xxviii. 30-31; Eph. iii. 1, iv. 1.) He sent it to its destination by the hand of Tychicus (Eph. vi. 21). The Church at Ephesus had been founded by Paul himself, or at least he had raised it from the feebleness in point of numbers and knowledge in which it had been when he commenced his missionary work in that city. For two years he preached Christ, not merely to the permanent residents in Ephesus, but to the multitudes who resorted thither as pilgrims to visit the celebrated Temple of Diana, then one of the wonders of the world (Acts xix. 10). When driven from the city, owing to a riot raised by one whose craft would have been in danger had idolatry fallen, he retained a deep interest in his converts; and, dispatching Tychicus to inquire after their welfare (Eph. vi. 21), gave him the canonical Epistle to the Ephesians, for the Church just named, with another to the Church at Colosse (Col. iv. 7). Between these two there is great similarity, and that to the Colossians seems to have been written first. In consequence of the similarity, De Wette, rejecting the testimony of antiquity, considered the epistle to the Ephesians a mere imitation of that to the Colossians, allowing it, however, to be a production of the first century; while Ferdinand Baur rejected both, believing at least the Epistle to the Colossians to show traces of Gnosticism and Montanism. It is evident from the Epistle to the Ephesians that the converts at Ephesus were mainly Gentiles (Eph. ii. 11, iii. 1), and prominent in the didactic part of the letter is the doctrine that Christ has broken down the middle wall of partition which severs Jew and Gentile, putting both on the same level of privilege within his Church (Eph. ii. 11-22, iii. 1-6). The Epistle concludes with a series of practical exhortations.

ē-phē-sīte, s. [From Ephesus, in the vicinity of which it occurs.]

Min.: A pearly white mineral, hard enough to scratch glass. Specific gravity, 3.15 to 3.20. Composition: Silica, 30.4 to 31.54; alumina, 56.45 to 57.89; lime, 1.89 to 2.11; protoxide of iron, 1.0 to 1.34; soda with a little potassa, 4.41; water, 3.09 to 3.12. (*Dana*.)

***ēph-i-āl-tēs, s.** [Gr. *ephiattēs*=one who leaps upon, the nightmare: *ēpi*=upon, and *hallomai*=to spring, leap, or bound.]

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, there; pine, plē, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; try, sūrian. æ, œ = ē; ey = ā. qu = kw.

Med.: The nightmare. It is now technically known by its Latin name incubus (q. v.).

"The ephialtes, or night-mare, is called by the common people witch-riding."—*Brand: Popular Antiquities*.

ē-phīp-pl-ūm, s. [Lat., from Gr. *ephippion*=anything placed on a horse's back, such as a horse-cloth, or a saddle: *ēpi*=upon, and *hippos*=a horse.]

Zool.: A receptacle on the back of the entomostrocan called Daphnia, in which the winter eggs are deposited. (*Nicholson*.)

ēph-ōd, ē-phōd, s. [Heb., but partly of Aramaic form, *ephod*, from *aphud*=to gird to, on, or about; to wrap about.]

Hebrew Archaeology:
1. A short coat covering the shoulders and breast of the Jewish High Priest. It was in two pieces, one covering the breast and the other the upper part of the back, the connection between the two being maintained above by shoulder-pieces with clasps made of two large onyx stones, each inscribed with the names of six of the tribes of Israel. The two were, moreover, united beneath by a "curious girdle" of gold, blue, purple, scarlet, and fine twined linen, with cunning work, encircling the waist. The breast-plate of judgment with the "Urim and Thummim" was to be affixed to it in front by golden rings. There was, moreover, to be the robe of the ephod, a second and larger coat, of one entire piece of woven-work, blue in color, with a hole above for the neck and a hem beneath with alternate pomegranates and golden bells.

2. A similar but less splendid garment, described as of linen, worn by Samuel when, as a boy, he was engaged in the temple service (1 Sam. ii. 18); by King David when he took joyous part in the removal of the ark from the house of Obed-edom to the city of David (2 Sam. ii. 12), and even by the ordinary priests of Nob (1 Sam. xxii. 18).

3. Apparently an idol of a particular character (Judges viii. 24-27; xvii. 5, xviii. 18, 20).

ēph-or, s. [Gr. *ephoros*=overseeing; *ephora*=to oversee: *ēpi*=over, and *horāō*=to see, to look.]

Greek Antig.: One of five magistrates chosen at Sparta, and invested with the highest power, controlling even the kings.

ēph-ōr-āl, a. [Eng. *ephor*; -al.] Of or pertaining to an ephor.**ēph-ōr-āl-tŷ, s.** [Eng. *ephoral*; -ty.] The office, rank, or term of office of an ephor.***ēph-ō-rūs, s.** [Lat., from Gr. *ephoros*.] An ephor (q. v.).**ē-phyr-a (yr as ir), s.** [Latin *Ephyrā*; Gr. *Ephyrā* the old name of Corinth.]

Zoology:
1. A pseudo-genus of Rhizostomidae, being the "hydra-tuba" or larva state of Aurelia or other true genera of the family.

2. A genus of Geometer moths.

ēph-i-blast, s. [Gr. *ēpi*=upon, and *blastos*=a sprout, shoot, or sucker.]

Anat.: The name given by Foster and Balfour to what is by Quain and others called the ectoderm (q. v.).

ēph-i-blē-mā, s. [Gr. *epiblēma*=that which is thrown over, a cloak.]

Bot.: The name given by Schleiden to the young and tender epidermis of plants still in bud or that covering young ovals in the ovary.

***ēp-ic, *ēp-ick, a. & s.** [Lat. *epicus*, from Gr. *epikos*=epic, narrative; *epos*=a word, a narrative, a song.]

A. As adj.: Narrative, containing or of the nature of narrative, heroic. The term is specifically applied to a poem which narrates the history, real or fictitious, of some notable action or achievement, or series of actions or achievements, accomplished by some distinguished hero. The most celebrated epic poems are—in Greek literature, the Iliad and Odyssey of Homer; in Latin, the Æneid of Virgil; and in English, the Paradise Lost of Milton.

"The subject of the epic poem must be some one great, complex action. The principle personages must belong to the high places of the world, and must be grand and elevated in their ideas, and in their bearing. The measure must be of a sonorous dignity befitting the subject. The action is carried on by a mixture of narrative, dialogue, and soliloquy. Briefly to express its main requisites, the epic poem treats of one great, complex action in a grand style, and with fullness of detail."—*Dr. Arnold*.

B. As subst.: An epic or heroic poem; a narrative poem describing in elevated style the achievements of some hero.

"In pompous epic, tow'ring odes, I strut with heroes, feast with gods."—*Somerville: The Happy Lunatic*.

***ēp-ic-āl, a.** [Eng. *epic*; -al.] The same as epic (q. v.).**ēp-i-cā-lŷx, s.** [Gr. *epi*, and *kalux*=a covering, seed-vessel, shell, or pod.]

Bot.: An outer calyx, an involucre.

***ēp-i-cār-i-dāns, ēp-i-cār-i-dēs, s. pl.** [Gr. *epi*=upon, and *karis*=a shrimp, or prawn.]

Zool.: An old family or tribe of Isopodous Crustaceans founded by Latreille. They are now the family Bopyridæ (q. v.). They are parasitic on shrimps. [Etym.]

ēp-i-carp, s. [Gr. *epi*=upon, and *karpos*=fruit.]

Bot.: The integument or skin of a fruit, or the outermost layer of the pericarp. It is produced by the underside of the capillary leaf. It is distinguished from the sarcocarp or flesh and the endocarp or stone (q. v.).

***ēp-i-cēde, *ēp-i-ced, *ēp-i-cēd-i-ūm, s.** [Lat. *epicedium*, from Gr. *epikēdeion*=a dirge; *epikēdetos*=funereal: *ēpi*=upon, and *kēdos*=grief; Fr. *épicede*.] A funeral hymn or song; a dirge.

"We are yet in hope of somewhat to come forward, to the inistimable glory of the land, namely his worthy works of *Antiquitate Britannica*, et de *Illustribus Viris*, with hys epigrams and epicoes."—*Bale: Dedic. of Leland's Itinerary* (1649).

ēp-i-cēd-i-āl, a.** [Eng. *epiced(e)*; -ial.] Of or pertaining to an epicede; funeral, elegiac.ēp-i-cēd-i-ān, a. & s.** [Eng. *epiced(e)*; -ian.]

A. As adj.: The same as EPICEDIAL (q. v.).

B. As subst.: An epicede; a funeral hymn or song.

***ēp-ē-cēd-i-um, s.** [Lat.] An epicede (q. v.).**ēp-i-cēne, a.** [Lat. *epicænus*, from Gr. *epikoinos*=common: *ēpi*=upon, and *koinos*=common; Fr. *épiciène*.]

Gram.: Of common gender; a term applied to nouns which have but one form to indicate animals of both sexes: as, Lat. *ovis*=a sheep.

***ēp-i-cē-rās-tic, a.** [Gr. *epikerastikos*=tempering the humors: *epikerastium*=to mix; Fr. *épicerastique*.] Lenient, assuaging.**ēp-i-chile, s.** [Gr. *ēpi*=upon, and *cheilos*=a lip.]

Bot.: The upper half of the lip of a strangulated or jointed orchid flower.

ēp-i-chl-rē-mā, s. [Gr.=an attempt, from *epi*=upon, and *cheir*=the hand.]

Logic & Rhet.: A syllogism in which the proof of the major or minor premise, or both, is introduced with the premises themselves, and the conclusion is drawn in the usual way.

ēp-i-chlōr-hŷ-drin, s. [Greek *ēpi*=upon, and Eng., &c., *chlorhydrin*(s) (q. v.).]

Chem.: Glycidic hydrochlorate, C_2H_3ClO . It is isomeric with monochloracetone, $CH_3CO\cdot CH_2Cl$. Epichlorhydrin is obtained by adding finely powdered caustic soda slowly to dichlorhydrin, but the temperature must not rise above 130°. Then it is distilled. Epichlorhydrin is a colorless liquid insoluble in water; it boils at 117°. It is soluble in alcohol and in ether. It unites with fuming hydrochloric acid, forming symmetrical dichlorhydrin, $(CH_2Cl\cdot CH(OH)\cdot CH_2Cl)$. By long boiling with water it is converted into monochlorhydrin. Nitric acid converts it into chlor-lactic acid, $(CH_2Cl\cdot CH(OH)\cdot CO\cdot OH)$.

ēp-i-chlōr-ite, s. [Gr. *ēpi*=upon, over, with, and Eng., &c., *chlorite* (q. v.).] Named so as to suggest that it is akin to chlorite.

Min.: A dull green mineral with a white or greenish streak, and greasy luster. It occurs fibrous or columnar. Hardness, 2 to 2.5; specific gravity, 2.76. Composition: Silica, 10.48; alumina, 10.96; sesquioxide of iron, 8.72; protoxide of iron, 8.96; magnesia, 23; lime, 6.68; water, 10.18. Found at Harzburg.

***ēp-i-chōr-i-āl, a.** [Gr. *epichōrios*, from *ēpi*=on, in, and *chōra*=the country.] Belonging to the country.

ēp-i-clī-nāl, a. [Gr. *ēpi*=upon, and *klinē*=a couch.]

Bot.: Placed upon the disc or receptacle of a flower.

ēp-i-cōl-i-c, a. [Gr. *ēpi*=upon, *kōlon*=the colon, and Eng., &c., suff. -ic.]

Anat.: The colon; pertaining to the part of the abdomen so situated.

ēp-i-cōn'-dyle, *s.* [Gr. *epi*=upon, and Eng. *condyle* (q. v.).]

Anat.: The name given by Chaussier to what is generally called simply a condyle (q. v.).

ēp-i-cōr-ōl-line, *a.* [Greek *epi*=upon; Latin *corolla* (q. v.), and Eng., &c., suff. *-ine*.]

Bot.: Inserted in or upon the corolla.

ēp-i-crā-ni-al, *a.* [Modern Lat. *epicranium* (q. v.); Eng., &c., suff. *-al*.]

Anat.: Pertaining to the upper surface of the cranium. Thus the occipito-frontal aponeurosis is called also the epicranial aponeurosis. There are also epicranial muscles. They are the same as the occipito-frontal ones. (Quain.)

ēp-i-crā-ni-ūm, *s.* [Gr. *epi*=upon, and *kranion* =the skull.]

Anat.: The soft parts covering the cranium or skull.

ē-pīc-tē-ti-an (ti as shī), *a.* [See def.] Of or relating to Epictetus, a Stoic philosopher, born at Hierapolis, in Phrygia, about the middle of the first century of our era. He is said to have been originally brought to Rome as a slave, but the means by which he obtained his liberty and rose to eminence are not known.

ēp-i-cūre, *s.* [See def. 1.]

*1. *Orig.*: A follower of Epicurus, a celebrated philosopher, born at Gargettus, in Samos, B. C. 342. In B. C. 306 he founded the school of philosophy at Athens which afterward bore his name. He died in B. C. 270. He taught that the true end of existence is a species of quietism, in which the philosopher holds himself open to all the pleasurable sensations which the temperate indulgence of his ordinary appetites, and the recollection of past, with the anticipation of future enjoyments, are sufficiently abundant to supply.

"So the *epicureans* say of the Stoic's felicity placed in virtue, that it is like the feeling of a player, who, if he were left of his auditors and their applause, he would straight be out of heart and countenance."—Bacon: *Colors of Good and Evil*.

*2. Any one who, like Epicurus, denied a divine providence. In use among the old English divines.

"The *epicure* grants there is a God, but denies His providence."—Sydenham: *Athenian Babblers*. (Trench: *Select Glossary*, p. 70.)

3. Owing to a misrepresentation of the ethical system of Epicurus, as one characterized by gross sensualism, the word became applied to one who gave himself up to sensual enjoyments, especially those of the table.

"It is a maxim with some in modern days, never to ask a favor of an *epicure* till after his meals."—Cogan: *On the Passions*, vol. 1, pt. II, ch. II, § 18.

ēp-i-cūre, *v. t.* [EPICURE, *s.*] To live like an epicure; to epicurize.

ēp-i-cū-rē-al, *a.* [Eng. *epicure*; -al.] Epicurean.

ēp-i-cū-rē-an, *a. & s.* [Lat. *epicureus*, from Gr. *Epikoureios*; Fr. *épicurien*.]

A. As adjective:

*1. *Orig.*: Of or pertaining to Epicurus, or his system of philosophy.

2. Like an epicure; luxurious, voluptuary, sensual.

"Epicurean cooks
Sharpen with cloyless sauce his appetite."

Shakespeare: *Antony and Cleopatra*, II. 1.

B. As substantive:

*1. *Orig.*: A follower of Epicurus or his system of philosophy.

"Like a Stoic, or like
A wiser Epicurean."

Tennyson: *Maud*, I. iv. 21.

2. An epicure, a sensualist, a gourmet.

"The brotherhood
Of soft Epicureans, taught—if they
The ends of being would secure, and win
The crown of wisdom—to yield up their souls
To a voluptuous unconcern."

Wordsworth: *Excursion*, bk. III.

**Epicurean Philosophy*: The system of Epicurus and his tenets and teachings have been the subjects of gross misrepresentation and dense misunderstanding. To the popular mind the system has become the archetype of gross sensualism. In truth, Epicurus' cardinal doctrine was that the chief end of man was to be happy. And in the pursuit of that happiness all means of pleasure or enjoyment were to be allowed. Thus, if it gave pleasure to an ascetic to starve himself and to scourge his flesh, it was as much allowable for him to pursue these methods of attaining happiness, pleasure, or peace of mind, as was the eating or drinking of the voluptuary. No matter what the choice of instruments, the end to be attained was pleasure. If one man found pleasure in books, he was as much an Epicurean, if he sought his favorite enjoyment, as was the sleek, lazy Sybarite, who passed his existence in

pandering to his grosser nature. Epicureanism may be briefly defined as a supreme effort at enjoyment. (L. B. F.)

ēp-i-cū-rē-an-ism, *s.* [Eng. *epicurean*; -ism.] *1. *Orig.*: Attachment to, or following of the teaching of Epicurus.

2. Attachment or devotion to sensual enjoyments.

"A dislike which sprang, not from bigotry, but from Epicureanism."—Macaulay: *Hist. Eng.*, ch. xviii.

ēp-i-cūre-lī, *adv.* [Eng. *epicure*; -ly.] Like an epicure; delicately, luxuriously.

ēp-i-cū-rē-ōus, *a.* [Eng. *epicure*; -ous.] Epicurean.

ēp-i-cū-r-ism, **ēp-i-cūre-ism**, *s.* [Eng. *epicure*; -ism.] The same as EPICUREANISM (q. v.).

"Infidelity or modern Deism is little else but revived Epicureism, Sadducism, and Zondichism."—Waterland: *Works*, viii. 80.

ēp-i-cū-r-ize, *v. i.* [Eng. *epicure*(e); -ize.]

1. To profess or follow the tenets of Epicurus.

2. To indulge like an epicure; to luxuriate, to feast.

ēp-i-cū-r-ī, **ēp-i-cū-r-ye**, *a.* [Eng. *epicure*(e); -y.] Epicurean.

ēp-i-cy-clē, *s.* [Gr. *epikykos*=an epicycle, an additional circle.]

Geom. & Astron.: A circle, the center of which is carried round upon another circle. The term is used specially in connection with Ptolemy's complex system of astronomy. Wishing to account for the fact that a planet has sometimes a direct and sometimes a retrograde motion, relatively to the signs of the Zodiac, he supposed the earth to stand at a point E, in the diameter B D, though not in the center A of a circle B C D.

A small circle P Q R was described with one extremity B of the diameter as the center. Around this center the small circle was supposed to revolve while itself moving around the circumference of the larger one B C D. This small circle was the epicycle, and it was supposed to carry upon its circumference a planet P, which, viewed from the position of the earth, sometimes had a direct and sometimes a retrograde motion. The great circle is called the Deferent of the epicycle.

"Gird the sphere
With centric and eccentric, scribbled o'er;
Cycle and epicycle."—Milton: *P. L.*, viii. 82-4.

ēp-i-cy-clīc, *a.* [Eng., &c., *epicycl(e)*; -ic.]

Geom.: Pertaining or relating to an epicycle (q. v.).

"The *epicyclitic* motion with respect to the center of the epicycle."—Penny *Cyclo.*, xxv. 288.

epicyclīc-train, *s.*

Mach.: An epicyclīc-train is one in which the axes of the wheels revolve around a common center. Epicyclīc-trains are used for various purposes. A number of applications of the device have been made to harvesting-machines, in transmitting the motion of the driving-wheel axle to the cutter-bar.

ēp-i-cy-clōid, *s.* [Gr. *epikykos*=an epicycle, and *eidos*=form.]

1. *Gen. (Geom.)*: A curve generated by the revolution of the point in the circumference of a circle along the convex or concave part of another circle.

2. *Spec.*: The revolution of a point in a curve along the convex side of another one, as opposed to a hypocycloid, which revolves along the concave one. Used chiefly in connection with the Ptolemaic system of astronomy. [EPICYCLE.]

ēp-i-cy-clōī-dal, *a.* [Eng., &c., *epicycloid*; -al.]

Geom.: Pertaining or relating to an epicycloid or containing one.

epicycloīdal-wheel, *s.*

Mach.: An epicycloīdal-wheel is a contrivance for securing parallel motion, in converting reciprocating motion into circular, depending on the principle that an in epicycloīdal curve becomes a straight line when the diameter of the fixed circle is just double that of the rolling one. It consists of a fixed ring, with teeth on the inside, into which is geared a wheel of half its diameter; to a pin on the circumference of the smaller wheel the reciprocating motion is communicated, while the center of the wheel describes a circle and may receive the pin of a crank whose shaft is concentric with the ring.

ēp-i-deic'-tīc, **ēp-i-deic'-tīc-al**, *a.* [Gr. *epi-deiktikos*=displaying, showing off; *epideiktikymē*=to show off, from *epi*, and *deiknymī*=to show.] Showing off; displaying; specif., applied to elaborate eulogiums or set orations, such as were frequent among the Athenian orators, and of which Socrates gives the best examples.

"Fine pieces of eloquence of that kind which the ancient rhetoricians denominated the *epideictic*."—Knox: *Winter Evenings*, even. 29.

ēp-i-dēm'-ic, **ēp-i-dēm'-ick**, *a. & s.* [Latin *epidēmos*, from Gr. *epidēmos*, from *epi*=upon, and *dēmos*=the people; Fr. *épidémique*.]

A. As adjective:

1. Common to, affecting, or falling at once upon a large number of people in a community; as, an *epidemic* disease. [B.]

2. Generally prevailing; affecting large numbers.

"He ought to have been busy in losing his money, or in other amusements equally laudable and *epidemic* among persons of honor."—Swift.

*3. General, universal.

"The *epidemic* madness of the times."

Dennis: *Remarks on Homer*.

B. As substantive:

Med.: A disease which attacks many persons at the same time at different places, spreading with great rapidity, extremely virulent and fatal at the first onset, gradually becoming spent and feeble in the course of time, so that the early cases are usually the worst. The plague, cholera, small-pox, and influenza are epidemics, and other infectious diseases are among the number. The lower animals are also subject to epidemic, or more properly, *epizootic* influences, a typical example being the rinderpest, or cattle plague in 1865. Epidemics have a great tendency to alternate, such as small-pox, then measles, then scarlet fever, and so on, seldom markedly running simultaneously. Endemic, epidemic, and infectious poisons are classified as *zymotic* (q. v.). All we can say with certainty regarding epidemics, is that there must be some distempered condition of the circumstances around us—some secret power that is operating injuriously upon our system—and to this we give the name of *epidemic influence or constitution*, predisposing to the reception of a specific poison.

ēp-i-dēm'-ic-al, *a.* [Eng. *epidemic*; -al.] The same as EPIDEMIC (q. v.).

"The pestilence was so *epidemic* that there dy'd in London 6,000 a week."—Evelyn: *Memoirs*.

ēp-i-dēm'-ic-al-ī, *adv.* [Eng. *epidemic*; -ly.]

1. In manner of an epidemic.

2. Generally, universally.

"So audaciously and *epidemic*ally facinorous."—Feltam: *Resolves*, pt. II, res. 46

ēp-i-dēm'-ic-al-nēss, *s.* [English *epidemic*; -ness.] The quality or state of being epidemic.

ēp-i-dēm'-ic-ōg'-rā-phī, *s.* [English *epidemi(c)*; and Gr. *graphō*=to write.]

Med.: A treatise on epidemic diseases.

ēp-i-dēm'-ic-ō-lōg'-ic-al, *a.* [English *epidemiology*(y); -ical.] Of or pertaining to epidemiology.

ēp-i-dēm'-ic-ōl-ō-gy, *s.* [Eng. *epidemic*, and Gr. *logos*=a word, a discourse.]

Med.: That branch of medical science which deals with the treatment or investigation of epidemic diseases.

ēp-i-dēm'-ī, **ēp-i-dēm'-ye**, *a. & s.* [Fr. *épidémie*.] [EPIDEMIC.]

A. As adj.: Epidemic.

B. As subst.: An epidemic.

ēp-i-dēm'-drē-ēs, *s. pl.* [Mod. Lat. *epidendr(um)*, and Lat. fem. pl. adj. suff. *-eae*.]

Bot.: A tribe of Orchids. It comprises those genera which have the pollen masses waxy; a distinct caudicle, but no separate stigmatic gland.

ēp-i-dēm'-drūm, *s.* [Gr. *epidendrios*=on, or in a tree; *epi*=upon, and *dendron*=a tree.]

Botany:

1. A general term for an orchid of whatever genus growing on trees; an epiphytal orchid.

2. A large genus of South American orchids, family Liliaceae, and the typical genus of the tribe Epidendree (q. v.). More than 300 species are known, most of them epiphytal on trees, but some terrestrial. Many are beautiful, especially *Epidendrum nemorale*. *E. bifidum* is said to be purgative, anthelmintic, and diuretic.

ēp-i-dēm'-is, [EPIDERMIS.]

Anat.: The English equivalent of the modern Latin *epidermis* (q. v.).

"It [the epithelium] is analogous to the *epiderm* of the skin."—Owen: *Invertebrata* (Glossary).

ēp-i-dēm'-al, *a.* [Mod. Lat. *epiderm(is)*; Eng., &c., suff. *-al*.]

Anat. & Zool.: Belonging to the cuticle or scarf-skin. (Owen.)

bōl, bōy; pōut, jōwl; cat, gell, chorus, chīn, bench; go, gem; thīn, thīs; sin, aq; expect, Xenophon, exist. ph = f.
-cian, -tlan = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

epidermal-tissue, s.

Bot.: The dermatogen. It is the first independent tissue formed as a plant develops from the embryo. (Thomé.)

ĕp-i-dĕr-mă-tôid, a. [Gr. *epi*=upon; *derma* (genit. *dermatos*)=the skin, and *eidos*=form.] **Anat.:** Pertaining to or resembling the epiderm (q. v.).

ĕp-i-dĕr-mĕ-ous, a. [Lat. & Gr. *epiderm(is)* (q. v.), and Eng., &c., suff. *-ous*.] **Anatomy:** The same as EPIDERMAL, EPIDERMIC (q. v.).

ĕp-i-dĕr-mic, ĕp-i-dĕr-mic-al, a. [Mod. Lat. *epiderm(is)*; Eng., &c., suff. *-ic, -ical*.] **Anat.:** Of or belonging to the epidermis.

"Epithelial, epidermis, or cuticular tissue."—Quain: *Anat.*, ii. 43.

tĕp-i-dĕr-mid-al, a. [Gr. *epidermis* (genit. *epidermidos*); Eng. adj. suff. *-al*.] The same as EPIDERMIC (q. v.).

ĕp-i-dĕr-mis, s. [Lat. *epidermis*; Gr. *epidermis*: *epi*=upon, and *derma*=the skin.]

1. Anatomy:

(1) **Human:** The cuticle or scarf-skin constituting the external layer of the skin, and protecting the inner ones. It is thickest in the palms of the hands and the soles of the feet, where the skin is much exposed to pressure. It has no vessels, but possesses nerves and a decidedly organized structure. On the inner surface of the mouth it is called Epithelium (q. v.).

(2) Comparative:

(a) A somewhat similar cuticle in several animals.

(b) A layer of animal matter covering the shells of mollusks.

2. Bot.: A term which has been used in more senses than one. Thus in the *Treasury of Botany* it is defined as the true skin of a plant below the cuticle, while Mr. Robert Brown, F. L. S., writing in 1874, prefers using the term for the general integument as a whole, and dividing it into cuticle and derma.

ĕp-i-dĕr-môid, a. [Gr. *epidermis*, and *eidos*=form.] Resembling the epidermis.

ĕp-i-dĕr-môse, a. & s. [As if from an imaginary Mod. Lat. word *epidermosus*.] [EPIDERMIS.]

A. As adjective:

Bot.: The same as EPIDERMAL (q. v.). (Rossiter.)

B. As substantive:

Chem.: [HORNY-TISSUE.]

ĕp-i-dic-tic, ĕp-i-dic-tic-al, a. [EPIDEICTIC.]

ĕp-i-did-y-mis, s. [Gr. *epi*=upon, and *didymos*=a testicle.]

Anat.: A long, tortuous canal or efferent duct constituting part of the excretory apparatus of the testicle.

ĕp-i-dô-syte, s. [Gr. *epidosis*=a giving over and above, increase; *-yte* (Petrol.) (q. v.).]

Petrol. & Geol.: A rock consisting, in 100 parts, of 61.33 epidote and 38.22 quartz. It is found in parts of Canada. (Dana.)

ĕp-i-dôte, s. & a. [Greek *epidosis*=increase. {Haüy.}]

A. As substantive:

Mineral: A monoclinic subtransparent brittle mineral, the type of a group. [EPIDOTE-GROUP.] Hardness, 6-7; specific gravity, 3.22-3.51; luster vitreous, but pearly or resinous on one face of the crystals; color green, black, red, yellow, gray, or grayish-white; streak grayish. It possesses double refraction. Composition: Silica, 33.81-57.65; alumina, 14.47-28.90; sesquioxide of iron, 7.43-17.42; protoxide of manganese, 0.9-1.9; magnesia, 0.6-1; lime, 16.00-30.00; and water, 0.3-0.5. Dana divides it thus: Var. 1. Ordinary epidote; color green, (a) in crystals, (b) fibrous, (c) granular, (d) massive, or (e) in the form of sand. Of this type are Scoria, Arenalite, Thallite, Delphinite, Oisanite, Puschkinite, Achmatite, and Escherite (q. v.). Var. 2. Bucklandite; color black, with a tinge of green. It is the same as Bagrationite (q. v.). Var. 3. Withamite. Var. 4. Beustite. Epidote is found in many crystalline rocks, and more especially in those containing hornblende.

B. As adj.: Composed of, pertaining to, or akin to epidote.

Manganesiferous epidote: A variety of Epidote. {Brit. Mus. Cat.}

epidote-group, s.

Min.: According to Dana, a group of unisilicates, containing the following species or genera: Epidote, Koelbingite, Piedmontite, Allanite, Muromontite, Bodenite, Michaelsonite, Zoisite, Saussurite, Jadite, Partschinite, Gadolinite, Mosandrite, and Ilvaite.

ĕp-i-dô-tic, a. [Eng., &c., *epidot(e)*; *-ic*.]

Min.: Consisting in greater or less proportion of epidote, or in any way pertaining to it.

ĕp-i-gă-ous, a. [EPIGEOUS.]

ĕp-i-găs-tri-al, a. [Mod. Lat. *epigastri(um)*; Eng. suff. *-al*.] The same as EPIGASTRIC (q. v.).

ĕp-i-găs-tric, *ĕp-i-găs-trick, a. [Gr. *epigastrios*=as adj., over the belly; as subst., see def.: *epi*=upon, and *gaster*=the belly.]

Anat.: Pertaining to the region of the stomach from the breast to the waist, a little above the navel, and containing the right part of the stomach, the pancreas, and part of the liver. There are epigastric arteries and veins, besides a plexus.

epigastric-region, s.

Anat.: The region described under Epigastric (q. v.). (See the engraving in Vol. I., pt. i., p. 7, col. 2.)

ĕp-i-găs-tri-um, s. [Gr. *epigastrios*=over the belly or stomach.]

Anat.: The upper fore part of the abdomen, reaching from the pit of the stomach to an imaginary line above the umbilicus (navel) supposed to be drawn from the one extremity of the last false rib, on one side, to the corresponding point on the other.

ĕp-i-găs-trô-cĕle, s. [Fr. *épigastrocèle*; Gr. *epi*=upon; *gaster*=the belly, and *kĕlē*=a tumor.]

Surg.: Hernia of any portion of the hypogastric region.

tĕp-i-gĕ-al, s. [Gr. *epigeios*=on or of the earth: *epi*=upon, and *gĕ*=the earth.] The same as EPIGEAL (q. v.).

tĕp-i-gĕo, ĕp-i-gĕ-um, s. [EPIGEAL.]

Astron.: The part of a planet's orbit nearest to the earth. The same as PERIGEE (q. v.). (Glossog. Anglic., &c.)

ĕp-i-gĕne, a. [Gr. *epi*=upon, and *gennaō*=to produce.]

1. Min. & Crystallog.: Having undergone an alteration in its chemical character while retaining the same crystalline form as before, foreign to the position which the crystals at present occupy; pseudomorphic.

2. Geol.: Originating on the surface of the earth, as distinguished from hypogene rocks like granite, of which Lyell's hypothesis is that it originated at a considerable depth below the surface.

ĕp-i-gĕn-ĕ-sis, s. [Gr. *epi*=upon, and *genesis*=origin.]

Phys.: The hypothesis that in conception the germ is brought into being, and not simply developed by the agency of the parents. The hypothesis of Epigenesis was first published by Caspar Friedrich Wolff, then a young man, in A. D. 1759. It was opposed to that of Preformation, then strongly advocated by the physiologist Haller. Wolff proved that the evolution of every organism consists of a series of new formations, and that no trace of the developed organism exists either in the egg of the female or in the semen of the male. The germ or embryo which develops from the egg shows in the various phases of its evolution an internal structure and an external form totally different from those of the developed organism. In none of these phases are there any pre-formed parts or any encasement. Haeckel declared it essentially the correct hypothesis. (Haeckel: *Evolution of Man*, i. 40.)

ĕp-i-gĕn-ĕ-sist, s. [Mod. Gr., &c., *epigenesi(s)*; suff. *-ist*.] One who believes in the hypothesis of Epigenesis (q. v.).

ĕp-i-gĕn-ic, a. [Gr. *epi*=upon, above, and *gennai*=to produce.] Originating on the surface of the earth. [EPIGENE.]

"In the third book he inquires into the great changes which are being wrought upon the surface of the earth, partly by hypogenic agents acting from below, partly by epigenic forces working from above."—*Athenæum*, Oct. 28, 1882.

ĕp-lĕ-ĕn-ous, a. [Gr. *epigenēs*, in Class. Gr. =growing after or late, but here used for growing upon living bodies: *epi*=upon, and *genos*=race, stock (?).]

Bot.: Growing upon the surface of a plant, or part of it. Thus many fungals grow on the leaves of plants.

ĕp-i-gĕ-ous, ĕp-i-gĕ-ūs, a. [Gr. *epigeios*=on or of the earth: *epi*=upon, and *gĕ*=the earth.]

Bot.: Living close upon the earth. (Lindley.)

ĕp-i-glău-bite, s. [Gr. *epi*=upon, and Eng., &c., *-glau(bapat)*; *-ite*.]

Min.: A variety of Metabrushite (q. v.). (Dana.)

ĕp-i-glôt, s. [EPIGLOTTIS.]

Anat.: The epiglottis (q. v.).

ĕp-i-glôt-tic, a. [Mod. Gr., &c., *epiglott(is)*, and Eng., &c., suff. *-ic*.]

Anat.: Pertaining or relating to the epiglottis.

ĕp-i-glôt-tis, s. [Gr. *epiglōttis*, Attic for *epiglōssis*: *epi*=upon, and *glōssa*, Attic *glōtta*=the tongue.]

Anat.: A lamella of yellow cartilage placed in front of the superior opening of the larynx, and at ordinary times projecting upward immediately behind the base of the tongue. During the act of swallowing, however, it is carried downward and backward so as to cover and protect the entrance into the larynx. (Quain.)

Tubercle or Cushion of the Epiglottis:

Anat.: A tumescence of the mucous membrane of the lower part of the epiglottis to enable that structure to close the pharynx more accurately when it is depressed. (Quain.)

ĕp-i-gō-nă-ti-ōn, s. [Gr. *epigonatis*=(1) the kneepad, (2) a garment reaching to the knees: *epi*=on, upon, and *gonu* (genit. *gonatos*)=the knee.]

Eccl.: A lozenge-shaped piece of some stiff material, which forms part of the dress of bishops in the Greek Church while officiating. It hangs from the girdle on the right side as low as the knee, and is supposed to represent the napkin with which Our Lord girded Himself at the Last Supper.

ĕp-lĕ-g-ĕ-nĕ, ĕp-i-gō-nl-um, s. [Gr. *epigonē*=(1) increase, growth, (2) offspring, breed.]

Botany:

1. A membranous bag inclosing the young spore-cases of the Jungmanniaceæ (Liverworts). The epigonium is ruptured when the capsule elongates.

2. The nucule of a chara.

ĕp-i-grăm, s. [Fr. *épigamme*, from Lat. *epi*gramma, from Gr. *epigramma*, from *epi*=upon, and *gramma*=a writing, an inscription; *graphō*=to write.] A short poem of a pointed or antithetical character; any short composition expressed neatly and happily or antithetically. Epigram was the name given by the Greeks to a poetic inscription on a public monument, and hence the word came parsed into its modern signification. Of the Roman poets, Catullus and Martial are most celebrated for their epigrams.

"Dost thou think I care for a satire or an epigram?"—Shakesp.: *Much Ado*, v. 4.

Epigrams of Mutton, Veal, &c.:

Cook.: A name given to small cutlets of mutton, veal, &c., dressed in a particular manner.

***ĕp-i-grăm-ist, *ĕp-i-grăm-mist, s.** [Eng. *epigram*; *-ist*.] A writer of epigrams; an epigrammatist.

***ĕp-i-grăm-mă-tăr-i-an, s.** [Lat. *epigramma* (genit. *epigrammatis*), and Eng. suff. *-arian*.] An epigrammatist.

ĕp-i-grăm-măt-ic, ĕp-i-grăm-măt-ic-al, *ĕp-i-grăm-măt-ick, a. [Lat. *epigrammaticus*, from *epigramma* (genit. *epigrammatis*)=an epigram; Fr. *épigrammatique*.]

1. Writing, composing, or dealing in epigrams.

"Our good epigrammatical poet, old Godfrey of Winchester, thinketh no ominous forespeaking to lie in names."—Camden: *Remains*.

2. Of or pertaining to, or of the nature of an epigram; pointed, antithetical.

"None of the epigrammatic turns of Lucan."—Addison: *Spectator*, No. 279.

ĕp-i-grăm-măt-ic-al-lŷ, adv. [Eng. *epigrammatical*; *-lŷ*.] In an epigrammatic manner or style; antithetically.

ĕp-i-grăm-mă-tism, s. [Latin *epigramma*, (genit. *epigrammatis*), and Eng. suff. *-ism*.] Epigrammatical character.

"The latter would be greedily seized by nine philologists out of ten, for no better cause than its epigrammatism."—E. A. Poe: *Marginalia*, lxvii. (Davies.)

ĕp-i-grăm-mă-tist, s. [Lat. *epigrammatista*; Fr. *épigrammatiste*.] A writer or composer of epigrams.

"Too much nicety in this particular savors of the rhetorician and epigrammatist."—Addison: *Spectator*, No. 74.

Epiglottis.

ēp-i-grām-mā-tīze, *v. t.* [Gr. *epigrammatizō*.] To write or express by way of epigrams.

ēp-i-graph, *s.* [Gr. *epigraphē*, *epigraphō*=to write upon, to inscribe; *epi*=upon, and *graphō*=to write, to inscribe; Fr. *épigraphe*.]

1. *Ord. Lang.*: A citation from some author, or a sentence framed for the purpose, and placed at the beginning of a work, or of the several divisions of a work; a motto.

"The very legible *epigraph* round the seal of his letter: 'It is particularly requested that if Sir James Graham should open this, he will not trouble himself to seal it again,' expresses both its date and its writer's opinion of a notorious transaction of the time."—*Forster: Life of Dickens*, iii. 85.

2. *Arch.*, &c.: A terse inscription placed on works denoting their use and appropriation, and sometimes made part of their ornamental details, with which it is incorporated.

ēp-i-graph-ic, *a.* [Eng. *epigraph*; *-ic*.] Of or pertaining to an epigraph; of the nature of an epigraph.

"One of the most noteworthy additions to the Capitoline *epigraphic* collections."—*Athenaeum*, Oct. 23, 1882.

ēp-i-graph-ics, *s.* [EPIGRAPHIC.] The science of inscriptions.

ēp-ig-ra-phist, *s.* [Eng. *epigraph*; *-ist*.] One who studies or is versed in epigraphy.

ēp-ig-ra-phŷ, *s.* [Eng. *epigraph*; *-y*.] The study of inscriptions; that branch of science which deals with the deciphering and explanation of inscriptions.

ēp-ig-ŷn-oŷs, *a.* [Gr. *epi*=upon, and *gynē*=a woman.]

Bot.: Having the calyx or corolla united to the stamens, and all these organs to the side of the ovary. The name was first introduced by Jussieu.

epigynous exogens, *s. pl.*

Bot.: A subclass of Exogens, in which the ovary is nearly or quite inferior—*i. e.*, the tube of the calyx adheres to it almost if not altogether through its entire length. The flowers are generally bisexual—*i. e.*, have both stamens and pistils on the same flower. Lindley divides the subclass into seven alliances: (1) Campanales, (2) Myrtales, (3) Cactales, (4) Grossales, (5) Cinchonales, (6) Umbellales, and (7) Asarales (q. v.).

ēp-i-hŷ-al, *a. & s.* [Gr. *epi*=upon, Eng., &c., *hy(oid)*, and suff. *-al*.]

A. As adj.: Pertaining or relating to the stylohyoid ligaments. [B.]

B. As subst. (pl.): The stylohyoid ligaments constituting part of the lower or visceral arch, inclosing the nose, mouth, and pharynx. (*Quain*.)

ēp-i-lēp-sŷ, *s.* [Fr. *épilepsie*, Prev., Sp. & Port. *epilepsia*; Ital. *epilessia*; all from Gr. *epilēpsia*: *epilepsis*=a taking hold of, epilepsy; *epilambanō*=to take or get beside: *epi*=besides; *lambanō*=to take, to seize.]

Med.: Falling sickness. It derives its name, *Epilepsia*, from the suddenness of the attack. The leading symptoms are a temporary suspension of consciousness, with recurring clonic spasm. The first symptom is generally, but not invariably, a loud cry, and the patient falls to the ground senseless and convulsed, the breathing is embarrassed or suspended, face turgid and livid, foaming at the mouth, with a choking sound in the windpipe, biting of the tongue, and, apparently, suffocation; then the patient is left exhausted, and comatose, but, as a rule, with life no longer in danger. The spasms of the muscles are sometimes so violent as to dislocate the bones to which they are attached. Epilepsy may be caused by fear, passion, &c., or by a blow operating on the brain; it is often associated with idiocy and the puerperal state. There is little hope of cure, but although generally irregular, it is apt at times to become periodic (sometimes at night). If the patient be young, the attacks often cease at the period of adolescence, or in others at the period of the grand climacteric. Frequently on post-mortem examination no lesion of the brain can be found. Cullen calls it *musculorum convulsio cum sopore*.

"My lord is fell into an epilepsy:

This is the second fit."

Shakespeare: Othello, iv. 1.

ēp-i-lēp-tic, *a. & s.* [Fr. *épileptique*; Lat. *epilepticus*; Gr. *epileptikos*.]

A. As adjective:

Pathology:

1. Afflicted with epilepsy.

2. Pertaining to or indicating the presence of epilepsy.

"A plague upon your epileptic visage."

Shakespeare: Lear, ii. 2.

B. As substantive:

Path.: One affected with epilepsy.

"Epileptics ought to breathe a pure air, unaffected with any steams, even such as are very fragrant."—*Arbutnot: On Diet*.

2. Pharmacy:

(1) A medicine given to cure or mitigate epilepsy. (2) (*Pl.*): Medicines of the kind described under definition (1).

ēp-i-lēp-tic-al, *a.* [Eng., &c., *epileptic*; *-al*.] The same as EPILEPTIC, *a.* (q. v.)

"In the previous use of some extant solemnities, he became frantic and epileptic."—*Spencer: On Vulg. Proph.* (1665), p. 38.

ēp-i-lēp-ti-form, *a.* [English *epileptic*(c), and *form*.]

Med.: Of the form or appearance of one affected by epilepsy.

***ē-pi-lēp-tōid**, *a.* [Gr. *epileptikos*=one afflicted with epilepsy, an epileptic, and *eidos*=form.]

Med.: Resembling an epileptic seizure. (*The Scotsman in Ogilvie*.)

ēp-i-lōbe, *s.* [EPILOBIUM.]

Bot.: The genus *Epilobium* (*Bentham: British Flora*, p. 273). *Bentham* enumerates nine common species, viz., the Willow Epilobe (*Epilobium angustifolium*), the Great Epilobe (*E. hirsutum*), the Hoary Epilobe (*E. parviflorum*), the Broad Epilobe (*E. montanum*), the Pale Epilobe (*E. roseum*), the Square Epilobe (*E. tetragonum*), the Marsh Epilobe (*E. palustre*), the Chickweed Epilobe (*E. alsinifolium*), and the Alpine Epilobe (*E. alpinum*). [EPILOBIUM.]

ēp-i-lō-bē-sŷ, *s. pl.* [Mod. Lat. *epilobium*], and Lat. fem. pl. adj. suff. *-eae*.]

Bot.: A tribe of Onagraceae, sometimes called Epilobiaceae (q. v.).

***ēp-i-lō-bi-ā-cē-sŷ**, *s. pl.* [Mod. Latin *epilobi(um)*, and Lat. fem. pl. adj. suff. *-aceae*.]

Bot.: An order of plants now generally called, following Lindley, Onagraceae, *Onethera*, formerly called by Tournefort Onagra, being regarded as more typical of it than the genus *Epilobium* is.

ēp-i-lō-bi-ūm, *s.* [Gr. *epi*=upon, and *lobon*, accus. of *lobos*=the lobe of the ear, . . . the pod or legume of some plants, from the position of the corolla, &c., on the pod.]

Bot.: Willow-herb or Epilobe. A genus of plants, the typical one of the tribe Epilobaeae. Calyx tube slender, limb four-partite, deciduous; petals four, usually two-lobed; stamens eight, the alternate over the shorter. Ovary four-celled, style filiform, stigma obliquely clavate or four-lobed. Fruit a long four-valved capsule, seeds many, each with a long pencil of hairs. About fifty species are known. They have leafy spikes, generally pink or purple flowers, and are tall and beautiful plants. [EPILOBE, WILLOW-HERB.]

ēp-i-lō-gŷc, **ēp-i-lō-gŷc-al**, *a.* [Gr. *epilogikos*, from *epilogos*=an epilogue.] Pertaining to or resembling an epilogue; epilogistic.

***ē-pil-ō-gŷm**, *s.* [Gr. *epilogismos*, from *epilogizomai*=to calculate, to reckon.] A calculation, a computation, an enumeration.

ēp-i-lō-gŷt-ic, *a.* [Gr. *epilogistikos*, from *epilogos*=an epilogue.] Pertaining to or of the nature of an epilogue; epilogic.

"These lines are an epilogistic palinode to the last elegy."—*Warton: On Milton's Smaller Poems*.

ē-pil-ō-gŷse, ***ē-pil-ō-gŷse**, *v. t. & i.* [EPILOGUIZE.]

ēp-i-lōgue, *s.* [Fr. from Lat. *epilogus*, from Gr. *epilogos*=a concluding speech: *epi*=upon, and *logos*=a word, a speech.]

1. *Drama*: A short speech or poem addressed to the spectators by one of the actors at the end of a play.

"The compositions in which the greatest license was taken were the *epilogues*."—*Macaulay: Hist. Eng.*, ch. iii.

2. *Rhet.*: The conclusion or winding-up of a speech, in which the principal matters are recapitulated.

***ē-pil-ō-gŷze**, ***ē-pil-ō-gŷze**, *v. i. & t.* [Eng. *epilogu(e)*; *-ize*.]

A. Intrans.: To pronounce or deliver an epilogue.

"The dances being ended, the spirit *epiloguizes*."—*Milton: Comus; Direction* after 976.

B. Trans.: To add to in the way of an epilogue; to wind up.

"I was rude enough to interrupt the laugh of applause, with which the charming companion of my new acquaintance was *epiloguizing* his witty rallery."—*Student* (1750), i. 143.

***ē-pil-ō-gŷz-ēr**, *s.* [Eng. *epiloguiz(e)*; *-er*.] One who epiloguizes; a writer or speaker of an epilogue.

"Thou art not framed for an epiloguizer."—*Hoadley*.

ēp-i-mā-chi-nŷs, *s. pl.* [Mod. Lat. *epimach(us)*, and Lat. fem. pl. adj. suff. *-inŷs*.]

Ornith.: Plum'd Birds. A sub-family of Upipidae (Hoopes). The bill is like that of *Procerops*, but

the margins are obtuse and somewhat inflexed. There are velvety plumes clothing the nostrils. The wings are short, the toes long and strong. The species are beautiful birds, almost like Birds of Paradise. They are found in New Zealand.

ē-pim-a-chŷs, *s.* [Gr. *epimachos*=(1) that may be easily attacked, (2) ready or equipped for battle, assailable; *epi*=upon, and *machomai*=to fight.]

Ornith.: The typical genus of the sub-family Epimachinae (q. v.).

ēp-i-mē-di-ūm, *s.* [Lat. *epimedium*=a plant, by some supposed to be *Marsilea quadrifolia*; Greek *epimēdon*=barrenwort.] [See def.]

Bot.: Barrenwort. A genus of Berberids, tribe Nandineae. *Epimedium alpinum* (Alpine Barrenwort) is found in rock-works, old castle gardens, &c. Its leaves are somewhat bitter. They were formerly regarded as sudorific and alexipharmic.

ē-pim-ēr-a, *s. pl.* [Gr. *epi*=upon, and *mēros*=the upper fleshy part of the thigh, the ham.]

Compar. Anat. (in the Crustacea): The lateral pieces of the dorsal arc of any somite in a crustacean (q. v.).

***ē-pim-ēr-al**, *a.* [Mod. Lat. *epimer(a)* (q. v.); Eng., &c., suff. *-al*.]

Comparative Anatomy:

Zool.: Pertaining to that part of the segment of an articulate animal which is above the joint of the limb. (*Owen*.)

ēp-i-nēph-ē-lŷs, *s.* [Gr. *epinephelos*=clouded; *epi*=upon, and *nephelē*=a cloud.]

Entom.: A genus of butterflies, family Satyridae. *Epinephela janira* is the Meadow Brown. It is smoky-brown with a white-pupilled black spot on the upper side of the fore wings. The male is so much darker than the female that Linnaeus thought them different insects, calling the former *Papilio-janira* and the latter *P. jurtina*. The caterpillar feeds on grasses through the autumn, winter, and spring; the perfect insect, which is common through the three kingdoms, is seen during hay harvest. (*E. Newman*.)

ēp-i-nŷt-ē, *s.* [Fr.]

Ord.: An iron needle for piercing the cartridge of a piece of ordnance before priming.

***ēp-i-nŷ-cl-ōn**, ***ēp-i-nŷ-cl-ōn**, *s.* [Gr. neut. sing. of *epinikios*=pertaining to victory: *epi*=upon, and *nike*=victory; Lat. *epinictium*.] A song of triumph; a psalm.

ēp-i-nŷk-i-an, *a.* [Gr. *epinikios*.] Pertaining to victory; triumphant.

ēp-i-nŷc-tis, *s.* [Gr. *epinyktis*=a pustule which is most painful by night. (*Hippocrates*.)]

Med.: For definition see etymology.

"The *epinyctis* is of the bigness of a lupin, of a dusky red, and sometimes of a livid and pale color, with great inflammation and pain."—*Wiseman: Surgery*.

ēp-i-or-nŷs, ***ē-pi-or-nŷs**, *s.* [ÆFYORNIŷ.]

ēp-i-ōt-ic, *a.* [Gr. *epi*=upon, and *ous* (genit. *otos*)=the ear.]

Anat.: The name given by Prof. Huxley to the upper bone of the auditory capsule, part of the pars petrosa in man. It is the ossific center corresponding to the lower part of the mastoid bone. It surrounds the posterior semicircular canal, and extends into the mastoid portion. (*Huxley & Quain*.)

epiotic-center, *s.* The center described under EPIOTIC (q. v.).

ēp-i-pāc-tis, *s.* [Lat. *epipactis*; Gr. *epipaktis*=a plant, helioberine, probably an orchid.]

Bot.: A genus of orchids, with the sepals and petals conniving or spreading, the lip much contracted in the middle, the basal lobe concave, the terminal one with two basal tubercles, the anther sessile, the pollen masses two, powdery, the glands connate, the stigma prominent, the capsule pendulous. Eight species are known; they are from Europe and Asia.

ēp-i-pē-dōm-ē-trŷ, *s.* [Gr. *epipedos*=on the ground, on the ground floor, level, flat: *epi*=upon;

pedos=the ground, and *metron*=a measure.]

Geom., &c.: The measurement of figures standing on the same base.

Epipactis.

Mental Phil. & Physiol.: At the periphery, circumference, or external surface of the body. The term was introduced by Herbert Spencer, and was used of sensations produced by contact with the extremities of the nerves, as distinguished from sensations the consequence of internal mental action. [ENTOPERIPHERAL.]

ēp-i-pēt-a-lōūs, a. [Gr. *epi*=upon, *petalon*=a leaf, and Eng., &c., suff. *-ous*.]
Bot.: Inserted upon the petals.

ē-piph-ān-ite, s. [Gr. *epiphānēs*=coming suddenly into view, and suff. *-ite* (Min.) (q. v.).]
Min.: A variety of Eukamptite (q. v.). (*Brit. Mus. Catal.*)

ē-piph-a-nŷ, s. [In Fr. *épiphanie*; Prov. *epifania*, *piphanā*; Sp., Port., & Ital. *epifania*; Ger. *epiphania*; all from Gr. *epiphāneia*=appearance, manifestation; *epiphainō*=to show forth, to display; *epi*=to, and *phainō*=to bring to light, to make to appear.]

Ecccl. Calendar: The annual festival, held on January 6, to commemorate the manifestation of the Savior to the world by the appearance of the miraculous star which led the Magi to Bethlehem. It is stated to have been first observed by the Gnostic followers of Basilides, who flourished about A. D. 125. It does not figure in the list of church feasts given by Origen in A. D. 250, not yet apparently having been adopted by the church catholic. When the name Epiphany came into use, in the fourth century, which it did first among the Oriental churches, it was designed to commemorate both the birth and baptism of Jesus, which two events the Eastern churches believed to have occurred on January 6. Not seemingly till A. D. 813 did it become a Western festival appointed to commemorate the manifestation of the Savior by the star, without reference either to His birth or baptism.

ēp-i-phē-gūs, s. [Gr. *epi*=upon, and *phēgos*=a kind of oak, not the Latin *Fagus* (Beech).]

Bot.: A genus of Orobanchaceæ, Broomrapes. *Epiphegus virginiana*, a North American parasite on the roots of the beech, is believed to have been one ingredient in Martin's cancer powder, white oxide of arsenic being another.

ēp-i-phlō-dal, a. [Mod. Lat. *epiphloe*(um), & euphonic, and Eng., &c., suff. *-al*.]
Bot.: On the surface of the bark. (*R. Brown, 1854*.)

ēp-i-phlō-ūm, s. [Gr. *epi*=upon, and *phloios*=the ring of trees; *phleo*, *phloio*=to burst out or be in bloom.]

Bot.: Link's name for the cellular integument or layer of bark immediately below the epiderm. Mohl called it the *Phloem*, or *Peridermis*.

ē-piph-ō-nēm, **ē-piph-ō-nē-mā**, s. [Greek *epiphōnēma*=a thing uttered; *epiphōneō*=to utter; *phōneō*=to speak or utter.]

Rhet.: An exclamatory sentence or striking reflection which sums up or concludes a discourse.

"If those preachers who abound in *epiphonemas* would but look about them, they would find one part of their congregation out of countenance, and the other asleep."
—Swift.

ē-piph-ōr-ā, s. [Lat. *epiphora*; Gr. *epiphora*=a bringing to or upon, . . . a defluxion of humors; *epiphērō*=to bring, put, or lay upon; *epi*=upon, and *phērō*=to bear.]

*3. A phrase, an expression.

"Suffer love! a good epithet: I do suffer love indeed for I love thee against my will."—*Shakespeare: Much Ado*, v. 2.

¶ Crabb thus discriminates between *epithet* and *adjective*: "*Epithet* is the technical term of the rhetorician. *Adjective* that of the grammarian. The same word is an *epithet* as it qualifies the sense; it is an *adjective* as it is a part of speech: thus in the phrase, 'Alexander the Great,' great is an *epithet* inasmuch as it designates Alexander in distinction from all other persons; it is an *adjective* as it expresses a quality in distinction from the noun Alexander, which denotes a thing. The *epithet* is the word added by way of ornament to the diction; the *adjective* is the word added to the noun as its appendage, and made subservient to it in all its inflections. When we are estimating the merits of any one's style or composition, we should speak of the *epithets* he uses; when we are talking of words, their dependencies, and relations, we should speak of *adjectives*: an *epithet* is either gentle or harsh, an *adjective* is either a noun or a pronoun *adjective*. All *adjectives* are *epithets*, but all *epithets* are not *adjectives*; thus in Virgil's *Pater Aeneas*, the *pater* is an *epithet*, but not an *adjective*." (Crabb: *Eng. Synon.*)

***ēp-i-thēt**, *v. t.* [EPITHET, *s.*] To describe by epithets; to designate, to entitle.

ēp-i-thēt-ic, **ēp-i-thēt-ic-al**, *a.* [Gr. *epithetikos*, from *epithetos*=added.] Pertaining to, containing, or consisting of epithets; of the nature of an epithet.

"The principal crept past, and made his way to the bar, whither Sam, after bandying a few epithetical remarks with Mr. Smouch, followed at once."—*Dickens: Pickwick*, ch. xl.

***ēp-i-thēt-ic**, *s.* [Gr.] An epithet (q. v.).

***ēp-i-thēte**, *s.* [Gr. *epithētēs*=an impostor.] A worthless fellow.

***ēp-i-thu-mēt-ic**, ***ēp-i-thu-mēt-ic-al**, *adj.* [Gr. *epithymētikos*, from *epithymēō*=to desire, long for; *epi*=upon, and *thymos*=mind.] Inclined or given to lust, or desire; pertaining to the animal passions.

ēp-i-tith-i-dēs, *s. pl.* [Gr. *epitithēmi*=to place upon, to add; *epi*=upon, and *tithēmi*=to place.]

Arch.: The upper members of the corona surmounting the fastigium of a temple, which was also continued along the flanks.

***ēp-i-tō-mā-tōr**, *s.* [Eng. *epitom(e)*; -*ator*.] An epitomizer.

"This elementary blunder of the dean is repeated by nearly all his epitomizers."—*Sir W. Hamilton*.

ēp-i-tō-mē, *s.* [Lat., from Gr. *epitōmē*=a cutting; *epi*=upon, over, and *tomē*=a cutting; *temnō*=to cut; Fr. *épitome*.]

1. An abridgment, abstract, or compendium of any book, writing, document, &c.; a compendious abstract.

"It would be well, if there were a short and plain epitome made."—*Locke*.

2. Anything which represents another or others in a condensed or compendious form.

"A man so various that he seemed to be

Not one, but all mankind's epitome."—*Dryden: Absalom and Achitophel*, l. 545, 546.

ēp-i-tō-mist, *s.* [English *epitom(e)*; -*ist*.] An epitomizer.

"Amenophis III., confounded by the Greeks and ecclesiastical epitomists with the dusky Memnon of the Trojan war."—*Cooper: Monumental Hist. of Egypt* (1876), p. 28.

ēp-i-tō-mize, *v. t. & i.* [Eng. *epitom(e)*; -*ize*.]

A. Transitive:

*1. To cut down, to shorten, to curtail, to diminish as by cutting off something.

"We have epitomized many particular words, to the detriment of our tongue."—*Addison: Spectator*.

2. To make an epitome, abridgment, or compendium of; to abstract; to condense.

"The story has been published in English, and I have epitomized the translation."—*Johnson: General Observations on Merchant of Venice*.

3. To represent or describe in an abridged or condensed manner or form.

"Epitomize the life; pronounce, you can,

Authentic epitaphs on some of these."—*Wordsworth: Excursion*, bk. v.

B. Intrans.: To make epitomes or abridgments.

ēp-i-tō-miz-ēr, *s.* [Eng. *epitomiz(e)*; -*er*.] One who makes or composes an epitome, or abridgment; an abridger, a condenser.

"I shall conclude with that of Baronius and Spondanus his epitomizer."—*Frymoe: Histrio-Mastix*, vii. 1.

ēp-i-trite, *s.* [Gr. *epitritos*=containing an integer and a third, 1+; or $\frac{4}{3}$: *epi*=upon, and *tritos*=the third; Fr. *épître*.]

Pros.: A foot consisting of three long syllables and a short one, and denominated first, second, third, or fourth epitrite, according as the short syllable is the first, second, third, or fourth in position; as, *salūtāntēs, eōncitātī, intercālāns, incāntārē*.

ēp-i-trōch-lē-a, *s.* [Gr. *epi*=upon, and Eng., &c., *trochlea* (q. v.).]

Anat.: The name given by Chaussier to internal condylar eminence.

epitrochlea-anconeus, *a.*

Anat.: Pertaining to the anconeus muscle, near the elbow, with the epitrochlea (q. v.).

¶ **Epitrochleo-anconeus muscle**:

Anat.: The name given by Wenzel Gruber to a small muscle inserted into the olecranon, and rising from behind the inner condyle.

ēp-i-trōch-ōid, *s.* [Gr. *epitrochos*=running easily, easily inclined: *epi*=upon, and *trochos* (as *adj.*)=running, tripping; (as *subst.*)=a runner, a ball, a wheel, a hoop; *trōchō*=to run.]

Geom.: A curve formed by one circle revolving like a wheel or hoop around the convexity or outer side of the circumference of another circle. It is akin to the epicycloid, but differs in not having the generating points in the circumference of the revolving circle.

"It appears, then, that a planetary system with a direct epicycle belongs to both the *epitrochoid* and the external hypotrochoid."—*Penny Cyclopædia*, xxv. 284.

ēp-i-trō-chōid-al, *a.* [Eng., &c., *epitrochoid*; -*al*.]

Geom.: Containing or in any way pertaining to an epitrochoid (q. v.).

"Every epitrochoidal system is a planetary system in which the epicycle is direct."—*Penny Cyclopædia*, xxv. 283.

ēp-i-t-rō-pē, **ēp-i-t-rō-pē**, *s.* [Gr. *epitropē*=a yielding, a surrender: *epitropēō*=to turn over to another; to yield, to submit: *epi*=over, and *tropēō*=to turn.]

Rhet.: Concession; a figure of speech by which any point is yielded or granted, with a view to obtain an advantage.

ēp-i-zēu-mi, *s.* [Gr.=a fastening together; from *epizeugnumi*=to fasten on or together: *epi*=upon, on, and *zeugnumi*=to join.]

Rhet.: A figure of speech by which a word is repeated with vehemence or emphasis; as,

"Alone, alone, all, all, alone,

Alone on a wide, wide sea."

Coleridge: *Ancient Mariner*, iv.

ēp-i-zō-a, *s. pl.* [Gr. *epi*=on, and *zōa*, pl. of *zōon*=animals.] [EPIZŌON.]

Zoology:

1. *Gen.*: Animals parasitic upon the external surface of other animals, as distinguished from entozoa, those which live in their internal parts.

2. *Spec.*: A sub-class of Crustacea, called also *Haustellata*. They undergo metamorphosis, being locomotive in their young state, though sedentary when adult. The mouth is suctorial, the feet have suckers, hooks, or bristles; sometimes the feet are worn away with age. They live as external parasites upon other animals, infesting the skin, the eyes, and the gills of fishes and other marine animals.

When mature they are elongated or sub-cylindrical, have a parchment-like integument, a more or less distinct head, and a pair of long cylindrical ovaries dependent from the opposite extremity of the body. Example: *Lernæa*, &c. They are very numerous in species. They are divided into two orders—(1) *Ichthyophthira*, and (2) *Rhizocephala*. (Owen, &c.)

***ēp-i-zō-an**, **ēp-i-zō-on**, *s.* [Gr. *epi*=upon, and *zōon*=a living being, an animal.] [EPIZŌA.]

Zool.: An animal belonging to the Epizoa.

***ēp-i-zō-ic**, *a. & s.* [Eng. *epizōic*(n); -*ic*.]

A. *As adj.*: The same as EPIZŌTIC (q. v.).

B. *As subst.*: An epizōotic disease.

"The Philadelphia correspondent of the *Times* calls the horse disease an epizōotic."—*Mortimer Collins: Thoughts in my Garden*, l. 190.

ēp-i-zō-ōt-ic, *a.* [Fr. *épizootique*.] [EPIZŌA.]

1. *Vet.*: Pertaining or relating to diseases which are epidemic upon animals.

¶ *In America*: In this country the word Epizōotic has acquired a definitive and specific meaning. It is generally spoken of as "*the Epizōotic*" (the vulgar paying not too much attention to the correct pronunciation and calling it as though spelled *epizewtick*), and by this expression is meant to denominate an almost universal attack of contagious catarrhal fever, very fatal, which raged throughout this country in the earlier part of the seventies, and sporadically apparent since. Thousands of horses died therefrom and many more thousands were temporarily disabled. The street-car lines, and in fact almost every business dependent upon horses and their labor, were forced to suspend, and great pecuniary loss ensued. The disease was singularly intractable to treatment, and the only hope of salvation for a patient lay in general tonic and stimulative measures actively employed at proper intervals, or in natural constitutional strength. Some pathologists have claimed to trace a connection between this disease and the epidemic prevalent in this country for the past three or four years called "*La Grippe*." [DISTEMPER.]

*2. *Geol.*: Containing fossil remains.

"Epizōotic mountains are of secondary formation."—*Kirwan*.

3. *Zool.*: Pertaining to the epizoa (q. v.).

epizōotic-diseases, *s. pl.*

Med.: Diseases epidemic upon animals. Some of them may be produced by the action of epizoa or similar parasites.

ēp-i-zō-ōt-ic, *s.* [Fr. *épizootic*.] [EPIZŌTIC.]

Med.: A murrain or epidemic among animals.

ēp-i-cāte, *a.* [Lat. *e*=out, here the same as *not*, and *plicatus*=folded, pr. par. of *plico*=to fold.]

Bot.: Not plaited. (R. Brown, 1874.)

ē-pōch, ***ē-pō-chā**, *s.* [Fr. *époque*; Low Lat. *epocha*; Gr. *epochē*=a check, a sensation; *echō*=to have or hold.]

1. *Ord. Lang.*: A point of time from which a new computation of years is begun; a fixed point from which succeeding years are numbered.

"In divers ages and nations divers epochs were used, and several forms of years."—*Usher: Annals* (Epistle to the Reader).

II. *Technically*:

1. *Hist.*: A point of time in which an event of such importance takes place that its influence is powerfully felt in all succeeding time.

"That year is, on many accounts, one of the most important epochs in our history."—*Macaulay: Hist. Eng.*, ch. i.

*2. *Geol.*: The term is sometimes used for period, as the Tertiary epoch; this sense of the word is loose and objectionable, as the term epoch more properly refers to the moment at which a new space of time commences than to its whole duration. As it is now believed that the transition from one period to the next was not instantaneous but very gradual, the inapplicability of the term epoch to such a change is even more obvious than when it was held that each alteration was heralded by a convulsion or catastrophe.

3. *Astron.*: The longitude which a planet has at any given moment of time. To predict this for any future period the longitude at a certain instant in the past must be known; that instant is the epoch of the planet, which is an abbreviation for its longitude at that epoch.

¶ (1) An epoch and an era are different. Both mark important events, but an era is an epoch which is chronologically dated from: an epoch is not marked in this way. The birth of Christ and the Reformation were both of them highly important epochs in the history of mankind; the former, the inconceivably greater event of the two, gave rise to the Christian era; but the Protestant nations and churches do not any of them reckon time from the Reformation. The birth of Christ was, therefore, both an epoch and an era, the Reformation an epoch only. This distinction is only now coming into use.

(2) For the difference between epoch and time, see TIME.

***ē-pō-chā**, *s.* [Epoch.]

ē-pōch-al, *a.* [Eng. *epoch*; -*al*.] Pertaining or relating to an epoch.

ēp'-ōde, *s.* [Gr. *epōdos*, from *epi*=upon, after, and *odē*=a song, contr. from *oidē*, from *adō*=to sing; Lat. *epodos*; Fr. *épode*.]

1. In lyric poetry the strain after the strophe and antistrophe; an after-song.

2. A verse or passage recurring at intervals; a chorus, a burden.

3. A kind of lyric poetry invented by Archilochus, and used by Horace, in which a longer line is followed by a shorter one.

"Horace seems to have purged himself from those spleenetic reflections in those odes and epodes."—Dryden: *Juvenal* (Dedic.).

ē-pōd'-ic, *a.* [Gr. *epōdikos*, from *epōdos*.] Pertaining to or of the nature of an epode.

ēp'-ō-nym, **ēp'-ō-nyme**, **ē-pōn'-y-mūs**, *s.* [Gr. *epōnymia*=a surname; *epōnumos*=named after: *epi*=upon, after, and *onoma*=a name.]

1. A surname.

2. A name given to a people or place after some person.

3. A name of a mythical person called into existence to account for the name of a country or people; as, *Hellen* for *Italy*, *Brutus* for *Britain*, &c.

"Hellen is the *eponymus* of the Hellenes or Greeks; not that such a progenitor ever existed, but that some early speculator on the origin of the Greek nation conceived that he did, and accounted for a name and nation accordingly."—Latham: *Handbook of the English Language*, ch. ii.

ēp'-ō-nym'-ic, **ē-pōn'-y-mōūs**, *a.* [Eng. *eponym*; *-ic*; *-ous*.] Of or pertaining to an eponym; giving one's name to a people or place.

"Beda's notice of the place of Horsa's death has a very eponymic look."—Latham: *Handbook of the English Language*, ch. ii.

"The eponymous heroes from whom tribes and nations have been supposed to derive their names."—Sayce: *Introduction to the Science of Language*, ch. ix.

ēp'-ō-ph'-ō-rōn, *s.* [Gr. *epi*=upon; *ōon*=egg, and *phoros*=bearing.]

Anat.: The same as *PAROVARIUM* (q. v.). It corresponds in the female to the epididymis in the male.

ēp'-ō-peē, **ēp'-ō-pe'-ia** (ia as ya), *s.* [French *épopée*, from Gr. *epopōia*, from *epos*=a word, and *poteo*=to make.]

1. An epic or heroic poem.

"Tragedy borrows from the *epopee*, and that which borrows is of less dignity, because it has not of its own."—Dryden: *Virgil* (Dedic.).

2. The action or series of events which form the subject of an epic poem.

ēp'-ō-pe'-ia (ia as ya), *s.* [EPOPEE.]

ēp'-ō-pe'-ist, *s.* [English *epopae(ia)*; *-ist*.] A writer of epics.

ēp'-ōs, *s.* [Greek.] An epic or heroic poem; an epopee; epic poetry.

***ē-pōs-cu-lā'-tion**, *s.* [Prefix *epi*, and English *osculation* (q. v.).] The act of kissing; a kiss.

***ē-pō-tā'-tion**, *s.* [Lat. *epotatio*, from *epoto*=to drink out; *e*=out, and *poto*=to drink.] A drinking out or off.

"The *epotation* of dumbe liquor damnes him."—Fellham: *Resolves*, pt. i., res. 84.

ē-proū-vēt-te, *s.* [Fr., from *éprouver*=to try, to prove, to test.]

1. *Mil.* An apparatus for proving the strength of gunpowder.

2. *Metal.* A flux-spoon; a spoon for sampling an assay.

ēp'-sōm, *s. & a.* [Eng. *Epsom* [A.], **Ebbasham*=A. S. *Ebbas*=*Ebba's*, and *ham*=home.]

A. As substantive:

Geog.: A market-town and parish in Surrey, England, about fifteen miles S. W. by S. from London. In 1618 certain mineral springs were discovered in it, with the result of making Epsom a watering-place. The "Derby" is run in the vicinity.

B. As adj.: Found at, derived from, or in any way pertaining to the place named, mentioned under A.

Epsom-salts, *s. pl.*

1. *Min.*: The same as Epsomite (q. v.).

2. *Pharm.*: Magnesia sulphas, magnesium sulphate, $MgSO_4 \cdot H_2O$. It is soluble in water, and is used as a saline purgative; with infusion of senna it forms the ordinary black draught. It causes a free secretion of watery fluid from the intestinal canal.

ēp'-sōm-ite, *s.* [Named from *Epsom* (q. v.), and suff. *-ite* (*Min.*) (q. v.).]

Min.: An orthorhombic, transparent, or translucent mineral, type of the Epsomite group. It occurs botryoidal, fibrous, &c. Hardness, 2.25; specific gravity, 1.75-1.68; streak and color, white; taste, bitter and saline. Compos.: sulphuric acid, 31.37-34.07; magnesia, 14.58-17.31; protoxide of iron,

0-.02; protoxide of manganese, 0-3.61; water, 48.32-51.70. It exists in mineral waters or as an efflorescence on rocks in the Mammoth Cave, Kentucky; in England, at Epsom; in Bohemia, Carniola, and at Montmartre, near Paris.

***ēp'-u-lar'-y**, *a.* [Lat. *epularis*, from *epulum*=a feast.] Of or pertaining to a feast or banquet.

***ēp'-u-lā'-tion**, *s.* [Lat. *epulatio*, from *epulor*=to feast; *epulum*=a feast.] A feasting, a banquet.

ēp'-u-lis, *s.* [Gr. *epoulis*=a gumboil; *epi*=upon, and *oulon*=the gum.]

Med.: A small tubercle on the gums, sometimes turning into cancer.

***ēp'-u-lōse**, *a.* [Lat. *epulor*=to feast; *epulum*=a feast.] Feasting to excess; gluttony.

***ēp'-u-lōs'-i-tŷ**, *s.* [Eng. *epulos(e)*; *-ity*.] A feasting to excess; gluttony.

ēp'-u-lōt'-ic, *a. & s.* [Gr. *epoulōtikos*, from *epoulō*=to scar over; *epi*=over; *oulē*=a wound healed over, a scar; *oulos*=whole, sound.]

A. As adj.: Tending to heal or cicatrize; cicatrizing.

B. As subst.: A medicament or preparation which has the property of healing, drying, or cicatrizing wounds.

"The ulcer, incarnated with common sarcocticks, and the ulcerations about it, were cured by ointment of tuty, and such like *epulotics*."—Wiseman: *On Inflammation*.

***ē-pūr'-tion**, *s.* [Lat. *e*=out, fully, and *puro*=to make pure, to purify.] The act of purifying; purification.

ēp'-ūr-ē'-ā, *s.* [Gr. *epouratos*=on the tail: *epi*=upon, and *oura*=tail.]

Entom.: A genus of Beetles, family Nitidulidae.

ēp'-y-or'-nis, *s.* [EPIYORNIS.]

ē-qua-bil'-i-tŷ, ***ē-qua-bil'-i-tie**, *s.* [Latin *æquabilitas*, from *æquabilis*; Ital. *equabilità*.] The quality or state of being equable; evenness; uniformity; continued equality.

"Bodies seem to act mutually upon each other, with a kind of *equability* in power."—Cogan: *Ethical Questions*, No. 5.

ē-qua-ble, *a.* [Lat. *æquabilis*, from *æquo*=to make equal; *æquus*=equal.]

1. Characterized by evenness or uniformity; consistently equal or uniform in character, force, or intensity.

"He spoke of love, such love as spirits feel
In worlds whose course is *equable* and pure."
Wordsworth: *Loadamia*.

2. Uniformly smooth, level, or even.

"He would have the vast body of a planet to be as elegant and round as a factitious globe represents it to be everywhere smooth and *equable*, and as plain as elysian fields."—Bentley.

¶ For the difference between *equable* and *equal*, see *EQUAL*.

ē-qua-ble-nēss, *s.* [Eng. *equable*; *-ness*.] The quality or state of being equable; equality.

ē-qua-blŷ, *adv.* [Eng. *equab(le)*; *-ly*.] In an equable manner; with uniformity of motion.

"If bodies move *equably* in concentric circles, and the squares of their periodical times be as the cubes of their distances from the common center, their centripetal forces will be reciprocally as the squares of the distances."—Cheyne.

ē-quā, ***ē-gal**, ***ē-galle**, ***ē-quall**, *a., adv. & s.* [Lat. *æqualis*, from *æquus*=equal, just; Fr. *égal*; Sp. & Port. *igual*; Ital. *eguale*.]

A. As adjective:

1. Ordinary Language:

1. The same with another in bulk, magnitude, dimensions, degree, quality, &c. (Followed by *to* or *with*).

"Things which are *equal* to the same thing are *equal* to one another."—Euclid, bk. i., axiom.

2. The same in rank, position, or condition.

"*Equal* to the Father as touching his Godhead."—Athanasian Creed.

*3. Just, fair, candid.

"Hear now, O house of Israel, is not my way *equal*?"—Ezekiel xviii, 25.

*4. Impartial, neutral.

"With *equal* eye their merites to restore."
Spenser: *F. Q.*, I. viii, 27.

5. Indifferent.

"They who are not disposed to receive them, may let them alone or reject them; it is *equal* to me."—Cheyne: *Philosophical Principles*.

6. Equitable, just, fair; not unduly favorable to any side.

"To content themselves with an *equal* share."—Ludlow: *Memoirs*, ii. 17.

7. In just proportion or relation.

"It is not permitted me to make my commendations *equal* to your merit."—Dryden: *Fables*. (Dedic.)

8. Adequate to any purpose.

"The Scots trusted not their own numbers, as *equal* to fight with the English."—Clarendon.

9. Even, uniform, equable.

"An *equal* temper in his mind he found,
When fortune flattered him, and when she frowned."
Dryden: *Juvenal*, sat. i.

10. On the same terms; enjoying equal rights or benefits.

"They made the maimed, orphans, widows, yea, and the aged also, *equal* in spoils with themselves."—2 Maccabees, viii. 30.

II. Botany:

1. A term used when both sides of a figure are symmetrical; as the leaf of an apple.

*2. (Of a corolla): The same as *REGULAR* (q. v.).

*B. As adv.: Equally.

A thing that, *equal* with the Devil himself
I do detest and scorn."
Massinger: *Duke of Milan*, ii. 1.

C. As substantive:

1. Anything which is equal to another.

"If *equals* be taken from *equals* the remainders are *equal*."—Euclid, bk. i., axiom.

2. One who is of equal rank or position with another; one who is not inferior or superior to another.

"Those who were once his *equals*, envy and defame him, because they now see him their superior."—Addison.

*3. One of the same age.

"I profited in the Jews' religion above many my *equals* in mine own nation."—Galatians, i. 14.

*4. A state of equality. (Spenser.)

¶ Crabb thus discriminates between *equal*, *even*, *equable*, *like* or *alike*, and *uniform*: "All these epithets are opposed to difference. *Equal* is said of degree, quantity, number, and dimensions, as *equal* in years; of an *equal* age; an *equal* height; *even* is said of the surface and position of bodies; a board is made *even* with another board; the floor or the ground is *even*; *like* is said of accidental qualities in things, as *alike* in color or in feature; *uniform* is said of things only as to their fitness to correspond; those which are *unlike* in color, shape, or make, or not *uniform*, cannot be made to match as pairs; *equable* is used only in the moral acceptation, in which all the others are likewise employed. As moral qualities admit of degree, they admit of *equality*: justice is dealt out in *equal* portions to the rich and the poor; God looks with an *equal* eye on all mankind. As the natural path is rendered uneven by high and low ground, so the *evenness* of the temper, in the figurative sense, is destroyed by changes of humor, by elevations and depressions of the spirits; and the *equability* of the mind is hurt by the vicissitudes of life, from prosperous to adverse; *even* and *equable* are applied to the same mind in relation to itself: *like* or *alike* is used to the minds of two or more. . . . *uniform* is applied to the temper, habits, character, or conduct." (Crabb: *Eng. Synon.*)

¶ *Equal voices in music*: A term for an assortment of men's voices or women's voices. Thus, a piece is said to be set for equal voices when the voices of men only are needed, though the quality of those voices is not equal, the alto voice differing from the tenor, as the tenor does from the bass. The like difference in a less marked manner also exists among women's voices, but when all men's or all women's voices are required, the term *equal* is applied to each group. The union of the voices of the two sexes is styled mixed. In its most true sense the term should only be applied to groups of voices of like register and compass (Stainer & Barrett.)

equal-aqual, *a.* Alike. (Scotch.)

equal-aqual, *v. t.* To make equal; to equalize or balance accounts.

"I pay debt to other folk, I think they suld pay it to me—that *equals-aquals*."—Scott: *Heart of Mid-Lothian*, ch. viii.

equal-sided, *a.*

Bot.: The same as *EQUAL II.* (q. v.).

equal-veined, *a.*

Bot. (of leaves): Having the midrib perfectly formed, and the veins all of equal size. Example: ferns. The term was first introduced by Lindley.

ē-quā, *v. t. & i.* [EQUAL, *a.*]

A. Transitive:

1. To make equal; to raise to or place in a state of equality.

"A rival hand recalls from every part
Some latent grace, and *equals* art with art."
Broome: *To Mr. Pope*; *On his Works*.

bōll, bōy; pōūt, jōwl; cat, cēll, chorus, chīn, bench; go, gēm; thin, thīs; sin, aq; expect, Xenophon, exist. ph = f.

-tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

2. To rise to a state of equality with; to become equal to.

"I know no body so like to equal him, even at the age he wrote most of them, as yourself."—*Trumbull: To Pope.*

3. To be equal or adequate to.

"A light along the sea, so swiftly coming,
Its motion by no flight of wing is equalled."
Longfellow: The Celestial Pilot. (Trans.)

*4. To recompense fully; to return a full equivalent for.

"[She] sought Sichæus through the shady grove,
Who answered all her cares, and equalled all her love."
Dryden: Virgil; Æneid, vi. 639, 640.

5. To regard as equals; to compare.

*B. *Intrans.*: To be equal, to match.

"I think we are a body strong enough,
Even as we are, to equal with the king."
Shakesp.: Henry IV., Pt. II., i. 3.

ē-qual-lāg, ē-qual-līg, pr. par., a. & s. [EQUAL, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making equal or equalizing.

equaling-file, s. A flat file which has a constant thickness, but sometimes tapering a little in width.

*ē-quāl-l-tār-l-ān, s. [Eng. equalit(y); -arian.] One who believes in or upholds certain doctrines concerning equality.

ē-quāl-l-tŷ, *e-gal-i-to, *e-gal-i-tee, s. [Lat. *æqualitas*, from *æqualis*=equal; O. Fr. *egalite*, *egalite*; Fr. *égalité*; Sp. *igualdad*; Port. *igualdade*.]

I. Ordinary Language:

1. The state or condition of being equal or like in magnitude, dimensions, degree, quality, value, &c.

"The onset and retire
Of both your armies, whose equality
By our best eyes cannot be censured."
Shakesp.: King John, ii. 2.

2. The state of being equal in rank, position, or condition; the state of being neither inferior nor superior to another.

"The natural feeling of equality."
Wordsworth: Excursion, bk. vi.

3. Evenness, uniformity, equability.

"Measure out the lives of men, and periodically define the alterations of their tempers, conceive a regularity in mutations, with an equality in constitutions."—*Broune: Vulgar Errors.*

4. Evenness, plainness, or smoothness of surface.

II. Math.: Exact agreement between two expressions or magnitudes with respect to quantity; it is expressed by the symbol= $=$; thus $a=b$, signifies that a contains exactly the same number of units of measure of a certain kind that b does.

ē-qual-l-zā-tion, s. [Eng. equaliz(e); -ation.] The act of equalizing; the state of being equalized or made equal.

"Their ease, and their satisfaction, and their equalization with the rest of their fellow-subjects of Ireland."—*Burke. Lett. on the Affairs of Ireland.*

ē-qual-ize, ē-qual-lize, v. t. [Eng. equal; -ize; Fr. *égaliser*.]

1. To make equal, even or alike as compared with another or others.

"A proportion of payment, beyond all the powers of algebra to equalize and settle."—*Burke: On Conciliation with America.*

*2. To be equal to; to equal; to match.

"No woe her miserie can equalize,
No griefe can match her sad calamities."
J. Taylor: Siege of Jerusalem, pt. ii.

*3. To represent as equal; to place on an equality.

"The finest poem that we can boast, and which we equalize, and perhaps would willingly prefer to the Iliad, is void of those fetters."—*Mery: Remarks on Dr. Swift, let. 22.*

ē-qual-lz-ēr, s. [Eng. equaliz(e); -er.]

1. Ord. Lang.: One who or that which equalizes or makes equal.

2. Vehicles: An evenner or whiffletree to the end of which the swingle-trees or single-trees of the individual horses are attached. A three-horse equalizer divides the load to three draft-animals. [TREBLE-TREE.]

ē-qual-lz-lāg, pr. par., a. & s. [EQUALIZE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making equal; equalization.

equalizing-saw, s. A pair of saws on a mandrel at a gauged distance apart, and used for squaring-off the ends of boards and bringing them to dimensions.

ē-qual-lŷ, *e-gal-ly, *e-gal-y, adv. [English equal; -ly.]

1. In an equal or the same degree; alike.

"The Jacobites were equally willing to forget that Athol had lately fawned on William."—*Macaulay: Hist. Eng., ch. xiii.*

2. Evenly; equably; uniformly.

"If the motion of the sun were as unequal as of a ship, sometimes slow, and at others swift; or, if being constantly equally swift it yet was not circular, and produced not the same appearances, it would not help us to measure time."—*Locke.*

3. In equal shares or proportions; as, to divide anything equally among several persons.

*4. Impartially; with impartiality.

"We shall use them,
As we shall find their merits and our safety
May equally determine." *Shakesp.: Lear, v. 3.*

equally-pinnate, equally-pinnated, a.

Bot. (of pinnate leaves): Terminated neither by a leaflet nor by a tendril.

ē-qual-nēss, s. [Eng. equal; -ness.]

1. The quality or state of being equal; equality.

"Let me lament
That our stars unreconcilable should have divided
Our equalness to this."
Shakesp.: Antony and Cleopatra, v. i.

*2. Evenness, uniformity, smoothness.

*ē-quān-gu-lar, a. [Latin *æquus*=equal, and *angularis*=pertaining to an angle; *angulus*=an angle.] The same as EQUANGULAR (q. v.).

ē-quā-nīm-l-tŷ, s. [Latin *æquanimitas*, from *æquus*=equal, and *animus*=mind; Fr. *équanimité*.] Evenness of mind; calmness, firmness, or composure of mind, such as is not easily affected or agitated by good or ill fortune.

"This quality [good-nature] keeps the mind in equanimity."—*Tatler, No. 242.*

*ē-quān-l-mōŷ, a. [Lat. *æquanimis*, from *æquus*=equal, and *animus*=mind.] Of an even, composed, or firm frame of mind; treating things with equanimity; not easily depressed, elated, or agitated; calm, composed.

*ē-quān-l-mōŷ-nēss, s. [English *equanimous*; -ness.] The state of being equanimous; equanimity. (*Ash*.)

*ē-quānt, s. [Fr. *équant*; Ital. *equante*, from Lat. *æquans*, pr. par. of *æquo*=to make level; *æquus*=level, equal.]

Astron.: In the complex system of Ptolemy an imaginary circle placed in the plane of the deferent to regulate and adjust the planetary movements.

ē-quā-te, v. t. [Lat. *æquatus*, pa. par. of *æquo*=to make equal, to equalize; *æquus*=equal.] To make equal; to equalize; to reduce to an average; to make such allowances or corrections in as will reduce to a common standard of comparison, or will bring a true result.

ē-quā-tion, s. [Fr. *équation*, from Lat. *æquatō*=an equalizing, an equal distribution; *æquo*=to make level, equal; *æquus*=level, equal.]

*I. Ord. Lang.: The act of making equal, the state of being made equal; equality.

"Again the golden day resumed its right,
And ruled in just equation with the night."
Rowe: Lucan, iv. 93, 94.

II. Technically:

1. Alg.: Two algebraic expressions which are equal to one another, and are connected by the sign= $=$. Thus

$$6x-13=2x+19$$

is an equation; and, since the equality of the members depends on the value assigned to x , it is called an Equation of Condition. The two quantities separated by the sign= $=$ are called the members of the equation; the quantity to the left of= $=$ being the first member, and that to the right the second. The quantities separated by the signs + and - are called the terms of the equation. Of the quantities some are known and the others unknown. The known quantities are generally represented by numbers. If letters be used, then those employed are generally $a, b, c, d, &c.$, -i. e., letters at or near the beginning of the alphabet. Unknown quantities are represented by letters toward the conclusion of the alphabet. If there be one unknown quantity it is generally represented by x ; if two, by x and y ; and if three, by x, y , and z . Sometimes a statement that two expressions are equal for all numerical values that can be assigned to the letters involved, provided that the same value be given to the same letter in each member, e. g.—

$$(x \pm a)^2 = x^2 \pm 2ax + a^2.$$

Such a statement is called an Identical Equation, or briefly, an Identity. The solution of an equation is the process which ultimately results in discovering and stating the value of the unknown quantity, which value is the root of the equation. Equations are classified according to the highest power of the

unknown quantity sought. When that quantity exists only in the first power we have a Simple Equation, or one of the first degree; if there be a square or second power of the unknown quantity, the Equation becomes a Quadratic, or one of the second degree; if the third power be present a Cubic Equation, or of the third degree. It is rarely that a higher power than the cube of the unknown quantity has to be dealt with. When such cases occur the equation is a Biquadratic, or one of the fourth degree, an Equation of the fifth, of the sixth, of any degree.

2. Astron.: Any sum to be added or subtracted to allow for an anomaly or a special circumstance affecting the exactness of a calculation. If, for instance, the orbit of a planet were calculated on the supposition that its orbit was circular when in reality it is elliptical, a small number would require to be added or subtracted to make the calculations accurate. That small sum would be the astronomical equation. If the movements of the planets be calculated on the supposition that the only attraction operating on them is that of the sun, error, though not of considerable magnitude, will be the result. There is a mutual attraction among all the planets; each is capable of producing a perturbation in the orbits of all the rest. An equation is required for every such perturbation before it is possible to calculate accurately the course of the planet.

"We are to find out the extremities on both sides, and from and between them the middle daily motions of the sun along the Ecliptic; and to frame tables of equation of natural days, to be applied to the mean motion by addition or subtraction, as the case shall require."—*Holder: On Time.*

3. Chem.: A chemical equation represents symbolically a chemical reaction, the symbols of the reacting substances being placed on the left hand, and the symbols of the new substances formed by the reaction being placed on the right hand. In a chemical equation the number of atoms of each element must be the same on each side of the equation, thus, $3AgNO_3 + Na_2HPO_4 = Ag_3PO_4 + 2NaNO_3 + HNO_3$. Three molecules of argentic nitrate and one molecule of di-sodium-hydrogen-phosphate equal (that is, form when added together) one molecule of triargentic phosphate, and two molecules of sodium nitrate, and one molecule of hydrogen nitrate (nitric acid). Chemical equations are imperfect, as they do not show the amount of heat liberated, or absorbed, during the reaction.

1. Annual Equation:

Astron.: One of the numerous equations requisite in determining the moon's true longitude.

(2) Equation of the Center:

Astron.: The equation required to fix the place or orbit of a planet calculated as if it were moving in a circle when it is doing so really in an ellipse.

(3) Equation of the Equinoxes:

Astron.: The equation required to calculate the real position of the equinoxes from its mean one, the disturbing element being the movement called Precession of the Equinoxes (q. v.).

(4) Equation of Payments: A rule for ascertaining at what time a person should in equity pay the whole of a debt contracted in different portions to be repaid at different times.

(5) Equation of Time:

Astron.: The difference between mean and apparent time.

(6) Personal Equation:

Astron.: The difference between the time at which an astronomical occurrence takes place and that at which a fallible observer notes that it does so.

ē-quā-tōr, s. &c. [From Lat. *æquator*, in the compound term *æquator monetæ*=one who examines the weight of money. In the senses of the definition equator is Sw. *equator*; Dan. *æquator*; Ger. *æquator*; Fr. *équateur*; Sp. & Port. *ecuador*; Ital. *equatore*.]

A. As substantive:

I. Ord. Lang.: In the geographical sense [II. 2], but sometimes also in the astronomical one [II. 1.].

II. Technically:

1. Astronomy:

(1) A great circle of the celestial vault at right angles to its axis, and dividing it into a northern and a southern hemisphere. It is constituted by the plane of the earth's equator, produced in every direction till it reaches the concave of the celestial sphere. In his progress north and south, and *vice versa*, the sun is twice a year in the celestial equator—viz., at the equinoxes (q. v.). The point in the equator which touches the meridian is raised above the true horizon by an arc which is the complement of the latitude.

"Thrice had the sun to rule the varying year,
Across the equator rolled his flaming sphere."
Falconer: Shipwreck, i.

(2) The sun and planets have all equators. They rotate around their several axes, and the plane at right angles in each case is the equator of the heavenly body.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, plē, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

2. *Geog.*: A great circle on the surface of the earth equidistant from its poles, and dividing it into two hemispheres. Its latitude is zero; it is therefore marked on maps as 0. Other parallels of latitude are counted from it, augmenting in their numerical designation as their distance from it north or south increases, the poles being 90°.

"It is not enough to know merely the distance of a place upon the earth from the equator."—*Matte Brun: Physical Geography*, bk. x.

3. *Magnetism*: A somewhat irregular line, nearly but not quite a great circle of the earth, in which there is no dip of the magnetic needle. It is hence called also the *Aclinic Line*. It is inclined to the horizon at an angle of 12°, and cuts it at two points almost exactly opposite to each other, the one in the Atlantic and the other in the Pacific. It is not far from the geographical equator, but its situation slowly alters year by year, there being a slow oscillation of the magnetic poles, while the geographical equator and poles are fixed. The two points in which the magnetic equator cuts the horizon seem traveling at present from east to west.

B. As adjective: (See the compound.)

¶ Plane of the Equator:

Geog.: A plane perpendicular to the earth's axis, and passing through its center. (*Herschell*.)

equator-sun, s. The sun viewed as shedding down fierce beams, as he does at the equator.

ē-quā-tōr'-ē-al, s. [EQUATORIAL.]

ē-quā-tōr'-ī-al, ē-quā-tōr'-ē-al, a. & s. [*Fr.* *équatorial*, from *Lat. æquator* (genit. *æquatoris*) [EQUATOR], and *Eng.*, *Fr.*, &c., suff. *-al*.]

A. As adjective: In any way pertaining to the astronomical, the geographical, or the magnetical equator.

"Excess of the equatorial above the polar radius."—*Matte Brun: Physic. Geog.* (2d ed., 1884), p. 59.

B. As subst.: An astronomical instrument designed to note the course of the stars as they move through the sky. A strong axis is constructed and permanently fixed in a slanting position so as to point exactly to the North Pole of the heavens. It turns upon its axis, carrying with it a telescope which, if it retained its relative position to that of the revolving portion of the instrument, would enable an observer looking through it to see no more than a single great circle of the sky. It is not, however, fixed to the revolving portion of the instrument, but may be moved up or down so that with it an astronomer can follow the entire course of a circumpolar star in its passage around the sky. It is of importance to ascertain not only the course of a star, but the apparent rapidity of its movement. This end is attained by attaching to the axis of the equatorial a racked wheel in which works an endless screw or worm, the whole put in motion by an apparatus furnished with centrifugal balls, like those of the governor of a steam-engine, and which render the motion uniform. The telescopes in the equatorials used at well-equipped observatories thus follow the course of any star which an astronomer may wish to observe. He has but to bring the star within the field of telescopic vision, and machinery will keep it there hour after hour without any further attention on his part. (*Prof. Airy: Popular Astron.* (6th ed.), pp. 8 to 12.)

equatorial-current, s.

Hydrol.: A current in the ocean which crosses the Atlantic from Africa to Brazil, having a breadth varying from 160 to 450 nautical miles. Its waters are cooler by 3° or 4° than those of the ocean under the line. Its effect, therefore, is to diminish the heat of the tropics. (*Lyell: Principles of Geology*, ch. vii.)

equatorial-sector, s. An instrument of large radius for finding the difference in the right ascension and declination of two heavenly bodies.

equatorial-telescope, s. A telescope so mounted as to have a motion in two planes at right angles to each other; one parallel to the axis of the earth, and the other to the equator. Each axis has a graduated circle, one for measuring declination and the other right ascension. Clock-work is sometimes attached to the instrument to give the motion in right ascension, and thereby keep the object constantly in the field of the instrument.

ē-quā-tōr'-ī-al-ī-ly, adv. [*Eng.* *equatorial*; *-ly*.] In a line with the equator.

ē-quēr-ry, ē-quēr-y, s. [*Fr.* *écurie*; *O. Fr.* *escurie*=a stable, from *Low Lat. scuria*; *O. H. Ger. sküra*, *scüra*; *M. H. Ger. schüre*=a shed; *Ger. schauer*. The spelling *equerry* is due to a supposed connection with *Lat. equus*=a horse.]

*1. A stable.

2. An officer to whom is committed the care and management of the horses of nobles or princes.

ē-quēs, s. [*Lat.* = a horseman, from *equus* = a horse.]

*1. *Roman. Antiq.*: A knight; one of the order of citizens known as *Equites* (q. v.).

2. *Ichthy.*: A genus of *Sciaenidae*, from the West Indies and the eastern parts of tropical America. It contains *Eques lanceolatus*, the Belted Horseman; *E. punctatus*, the Spotted Horseman, and other species.

ē-quēs'-tri-an, a. & s. [*Latin equester* (genit. *equestris*)=pertaining to horsemen; *equus*=a horse, and *Eng. suff. -an*.]

A. As adjective:

1. Of or pertaining to horses or horsemanship; performed with or on horses; as, *equestrian exercises* or performances.

2. Mounted on horseback.

"An equestrian lady appeared upon the plain."—*Speotator*, No. 104.

*3. Given to or skilled in horsemanship.

"A certain equestrian order of ladies."—*Speotator*, No. 104.

4. Of or pertaining to the order of Roman citizens known as *equites* or knights. [*EQUITES*.]

"One that had four hundred [sestertii] might be taken into the equestrian order."—*Kennet: Antiq. of Rome*, pt. ii., bk. iii., ch. i.

B. As subst.: A rider on horseback; specifically, one who performs feats of horsemanship in a circus, &c.

ē-quēs'-tri-an-ism, s. [*Eng.* *equestrian*; *-ism*.] The art or science of horsemanship; the performance of an equestrian.

ē-quēs'-tri-āne, s. [*A pseudo-French form from equestrian* (q. v.).] A female performer on horseback.

ē-quī-, pref. [*An Eng. pref. formed from Latin æquus*=equal.] Used in composition to express equality.

ē-quī-añ'-gled (gled as gēld), ***æ-quī-añ'-gled, a.** [*Pref. equi-*, and *Eng. angled* (q. v.).] Having equal angles; equiangular.

"Twelve equilateral and equiangular pentagons."—*Boyle: Works*, iii. 534.

ē-quī-añ'-gu-lar, a. [*Lat. æquus*=equal; *angulus*=an angle, and *Eng., &c., suff. -ar*.]

Geom.: Having equal angles. Used—

(1) Of such figures as have all their angles equal—the square, the equilateral triangle, rectangles of various forms.

(2) Of different geometrical figures which have their respective angles equal, or, as it is geometrically worded, equal each to each.

ē-quī-bāl'-ānce, s. [*Pref. equi-*, and *Eng. balance* (q. v.).] Equal weight or balance; equilibrium.

***ē-quī-bāl'-ānce, v. t.** [*EQUILANCE, s.*] To counterbalance; to be of equal weight with something else.

ē-quī-bāl'-ānced, a. [*Pref. equi-*, and *Eng. balanced* (q. v.).] Counterbalanced; supported by something of an equal weight or balance; in a state of equilibrium.

***ē-quī-crūr'-al, a.** [*Pref. equi-*, and *Eng. crural* (q. v.).] Having legs of equal length; isosceles.

"A solid rhombus being made by the conversion of two equicrural cones."—*Brownie: Garden of Cyrus*, ch. iv.

***ē-quī-crūre, a.** [*Lat. æquus*=equal, and *crus* (genit. *cruris*)=a leg.] The same as *EQUICRURAL* (q. v.).

"An equicrural triangle goes upon a certain proportion of length and breadth."—*Digby: On the Soul*.

ē-quī-dæ, s. pl. [*Lat. equ(us)*=a horse, and *fem. pl. ad. suff. -ide*.]

1. *Zool.*: A family of *Perissodactyle* Ungulates. It is of the same value as the old order *Solidungula*—solid-hoofed animals, *i. e.*, animals in which, if attention be limited to the living genera, there is on each foot only a single perfect toe in a broad hoof without supplementary hoofs. Dentition: incisors 3—3; canines 1—1; premolars 3—3; molars 3—3=40. The skin is covered with hair, and the neck has a mane. It contains the horse, the ass, the zebra, and their allies. [*EQUUS, ASINUS*.]

2. *Paleont.*: The family appeared in the Eocene with the *Orophippus*, a small animal about the size of a fox; it had four toes on the fore and three on the hind feet. *Anchitherium* and various other genera came in with the Miocene, all of which have three toes on both the fore and hind feet. In the Upper Miocene and the Pliocene occurs the *Hipparion*, still with three toes but the two lateral ones abortive, being too short to reach the ground. Finally, in the Upper Pliocene the one-toed *Plihippus* and the modern *Equus* appear upon the scene. Prof. Huxley believes that the line of ancestry of the modern horse ran through the *Anchitherium* and the *Hipparion* (*Quar. Jour. Geol. Soc.*, xxvi (1870), p. xlix, to li, &c.), and that the facts now mentioned lend great support to the doctrine of evolution.

ē-quī-dif-fēr-ēnt, a. [*Pref. equi-*, and *Eng. different* (q. v.).]

*1. *Ord. Lang.*: Having equal differences; arithmetically proportional.

*2. *Crystallog.*: Having a different number of faces presented by the prism and by each summit, the numbers forming an arithmetical progression, 6, 4, 2.

equidifferent series, s.

Arith.: The same as arithmetical progression; an arithmetical series having the difference between the first and second, the second and the third, the third and the fourth, and so on, equal. Thus, 4, 8, 12, 16, and 21, 18, 15, 12 are equidifferent series.

ē-quī-dis-tānce, s. [*Prefix equi-*, and *English distance* (q. v.).] An equal distance.

"The Antaei are also opposite, but vary neither in meridian nor equidistance from the horizon respecting either hemisphere."—*Sir T. Herbert: Travels*, p. 6.

ē-quī-dis-tānt, a. [*Prefix equi-*, and *English distant* (q. v.).]

1. *Ord. Lang.*: Being at the same or equal distances from some point or place; equally distant.

"The fixed stars are not all placed in the same concave superficies, and equidistant from us, as they seem to be."—*Ray: On the Creation*.

2. *Geom.*: Applied to things which are everywhere at the same or equal distances from each other.

ē-quī-dis-tānt-ī-ly, adv. [*Eng. equidistant*; *-ly*.] At the same or equal distances.

"The liver, though seated on the right side, yet by the subclavian division, doth equidistantly communicate its activity unto either arm."—*Brownie: Vulgar Errors*, bk. iv., ch. v.

***ē-quī-di-ūr'-nal, a.** [*Pref. equi-*, and *Eng. diurnal* (q. v.).] Pertaining to or accompanied by equal days and nights; a term applied to the equinoctial line.

***ē-quī-form, a.** [*Lat. æquus*=equal, and *forma*=a form, shape.] Having the same form, shape, or figure.

***ē-quī-form-ī-tŷ, s.** [*English equiform*; *-ity*.] Uniform quality.

ē-quī-lāt'-ēr-al, a. & s. [*Pref. equi-*, and *Eng. lateral* (q. v.).]

A. As adjective:

1. *Geom.*: Having all the sides equal; as a square.

"Circles or squares, or triangles equilateral, which are all figures of equal lines, can differ but in greater or lesser."—*Bacon*.

2. *Zoology*:

(1) Having its sides, broadly speaking, equal. Used chiefly of the shells of the Brachiopods.

(2) Having all the convolutions of the shell on the same plane. Used chiefly of the Foraminifera.

B. As subst.: A figure of equal sides.

"The sepulcher . . . is of four equilaterals raised above eight yards high."—*Sir T. Herbert: Travels*, p. 200.

tequilateral-bivalves, s. pl.

Zool.: The name sometimes given to the Brachiopods. [*BRACHIOPODA, EQUILATERAL*, 2 (1).]

equilateral-hyperbola, s.

Math.: A hyperbola having the two axes equal to one another, the asymptotes forming a right angle.

***ē-quī-lī'-brāte, v. t.** [*Lat. æquilibratus*, *pa. par. of æquilibrium*, from *æquus*=equal, and *libra*=balanced, *pa. par. of libra*=to balance, *libra*=a balance.] To balance exactly; to keep in a state of equilibrium or equipoise.

ē-quī-lī-brā-tion, s. [*Lat. æquilibratus*, *pa. par. of æquilibrium*.] The act of keeping the balance even; equipoise; the state of being evenly balanced.

"The exquisite equilibration of all these opposite and antagonistic muscles."—*Derham: Physico-Theology*, bk. iv., ch. ii.

***ē-quī-lī-bre** (bre as bŕr), **s.** (*Fr.*, from *Lat. æquilibrium*, neut. sing. of *æquilibrium*=evenly balanced.) Equilibrium, even balance.

***ē-quī-līb'-rī-ōūs, a.** [*Lat. æquilibrium*=balancing equally.] Evenly balanced; in a state of equipoise.

***ē-quī-līb'-rī-ōūs-ī-ly, adv.** [*Eng. equilibrious*; *-ly*.] In an evenly balanced state; in a state of equipoise.

***ē-quī-lī-ybrist, s.** [*Eng. equilibr(ium)*; *suff. -ist*.] One who can keep his balance in unnatural positions, as a rope dancer.

ē-quī-līb'-rī-tŷ, s. [*Lat. æquilibrium*, from *æquilibrium*=evenly balanced.] The state of being evenly balanced; equilibration, equilibrium.

ē-quī-līb'-rī-ūm, *æ-quī-līb'-rī-ūm, s. [*Lat. æquilibrium*, from *æquilibrium*=evenly balanced; *æquus*=equal, and *libro*=to balance; *libra*=a balance; *Fr. équilibre*; *Ital. & Sp. equilibrio*.]

bōil, bōy; pōut, jōwī; cat, gell, chorus, ghin, bench; go, gem; thin, thīs; sin, as; expect, Xenophon, exist, ph = f -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

I. Ordinary Language:

1. *Lit.*: A state of being evenly balanced; equipoise.

II. Figuratively:

1. A position of due or proper balance.

"To preserve the just equilibrium of happiness."—*Knox: Essays*, No. 53.

2. Equal diffusion or distribution, as of temperature.

3. Equality of evidence, motives, or powers of any kind; equal balancing of the mind between motives or reasons, with consequent indecision, indifference or doubt.

"Wherever this happens there is an end of the doubt or equilibrium."—*Sharp: Works*, vol. ii.; *A Doubting Conscience*.

4. Just or due relationship or proportion.

"Health consists in the equilibrium between those two powers, when the fluids move so equally that they don't press upon the solids with a greater force than they can bear."—*Arbutnot*.

III. Technically:

1. *Art.*:

(1) The true or just poise or balance of a figure, so that it may appear to stand firmly.

(2) The due balancing of objects, lights, shadows, &c.

2. *Mech.*: A balance or equipoise produced when two or a number of forces act against each other, those on each side being just powerful enough to counteract each other. The term equilibrium etymologically points to the equipoise of the two arms of a balance, which is as good an illustration as can be given of what equilibrium in the mechanical sense is. But there are many cases less simple. There may be a polygon of forces, each with its separate action, but collectively producing equipoise and a state of rest. When the force acting in one direction upon a solid body is that of gravity drawing it downward, this force is really applied at the center of gravity, the support of which by an equal or greater one will constitute an equilibrium. The tendency of the center of gravity to occupy the lowest possible position creates three kinds of equilibrium—stable, unstable, and neutral. In stable equilibrium the body when disturbed tends at once to return to its original position; in unstable equilibrium it tends when disturbed to depart farther from the original position; and in neutral equilibrium it does neither, but simply remains in its new position.

3. *Hydros.*: The equipoise of the particles of a liquid, &c., when they remain at rest. This will take place if the surface be everywhere perpendicular to the resultant of forces which act upon the molecules of the liquid, and if every one of these molecules be subject in every direction to equal and contrary pressures. A solid body floating in a liquid is in equilibrium when the force of gravity pressing it downward is exactly balanced by the pressure of the liquid acting upward. This will take place if the floating body displaces a volume of liquid exactly equaling the former in weight, and if the center of gravity be in the same vertical line with that of the body displaced.

4. *Heat.*: [*Mobile equilibrium of temperature.*] *Politics.*: Such an equipoise between the different political powers in Europe or the world as to leave peace undisturbed; but the effort to preserve what the relative power of each nation should be, and reduce that of any one whose preponderance is supposed to endanger the existence or welfare of others, has been a fruitful source of bloody wars. [*Balance of power.*]

† (1) *In equilibrio*: In a state of equilibrium; evenly balanced by reasons or proofs on either side.

"Is it in equilibrio

If deities descend or no?"

Prior: The Ladle.

(2) *Mobile equilibrium of temperature*:

Heat.: Constancy of temperature when each of two bodies radiating heat to the other receives exactly as much as it gives.

equilibrium-valve, s.

Steam-engine:

1. A valve having a pressure nearly equal on both sides, so as to make it more easily worked by nearly neutralizing its pressure on the seat.

2. The valve in the steam-passage of a Cornish engine for opening the communication between the top and bottom of the cylinder, to render the pressure equal on both sides of the piston.

ē-qui-mūl'-tī-ple, a. & s. [Pref. *equi-*, and Eng. *multiple* (q. v.); Fr. *équimultiple*.]

A. As *adj.*: Multiplied by the same number or quantity.

B. As *substantive*:

Arith. & Geom.: The products obtained by multiplying two quantities by the same quantity are equimultiples of the given quantities; thus *ma* and *mb* are equimultiples of *a* and *b*. Equimultiples of

two quantities are to each other as the quantities themselves. Thus, if 5 and 3 be each multiplied by 5, the equimultiples 25 and 15 will bear the same proportion to each other as 5 bears to 3.

ē-quinē, ē-quin-āl, a. [Lat. *equinus*=relating to horses; *equus*=a horse.] Of or pertaining to a horse or horses; of the nature of or resembling a horse.

"Bearing an equinal shape."—*Heywood: Hierarch. of Angels* (1835), p. 175.

ē-qui-nī-ā, s. [Lat. *equinus*=pertaining to horses; *equus*=a horse.]

Med.: The disease produced in man when he is infected by a glandered horse.

ē-qui-nēc-ēs-sa-rŷ, a. [Pref. *equi-*, and Eng. *necessary* (q. v.).] Equally necessary; necessary in the same degree.

ē-qui-nēc-tial (tial as *shal*), ē-qui-noc-tial, ē-qui-nōx-ī-āl, a. & s. [Lat. *equinoctialis*, from *equinoctius*=the equinox (q. v.); Fr. *équinoctial*; Sp. & Port. *equinoctial*; Ital. *equinoziale*.]

A. As *adjective*:

1. Of or pertaining to the equinoxes; designating an equal length of day and night.

2. Happening at or about the time of the equinoxes; pertaining to the time when the sun enters the equinoctial points.

"The defence might be prolonged till the equinoctial rains."—*Macaulay: Hist. Eng.*, ch. xvii.

3. Pertaining to those regions or climates near the equinoctial line.

"In vain they covet shades and Thracia's gales,
Pining with equinoctial heat."

Philips: Cider, bk. ii.

B. As *substantive*: (Properly the *Equinoctial line*).

Astron.: The celestial equator, so called because when the sun is on it the days and nights are of equal length all over the world.

equinoctial-colure, s.

Astron.: The meridian passing through the equinoctial points. [*COLURE*.]

equinoctial-dial, s. A dial whose plane lies parallel to the equinoctial.

equinoctial-flowers, s. pl.

Bot.: Flowers which open at a stated hour. [*FLORAL-CLOCK*.]

equinoctial-points, s. pl. The two points wherein the equator and ecliptic intersect each other; the one, called the vernal point or equinox, being in the first point of Aries; the other, the autumnal point or equinox, in the first point of Libra. [*PRECESSION OF THE EQUINOXES*.]

equinoctial-time, s. Time reckoned from a fixed instant common to all the world.

ē-qui-nēc-tial-ŷ (tial as *shal*), ē-qui-noc-tial-ŷ, *adv.* [English *equinoctial*; -*ly*.] In the direction of the equinoctial.

"The flame twists equinoctially from the left hand to the right."—*Brownie: Garden of Cyrus*, ch. iv.

ē-qui-nōx, s. [Lat. *equinoctius*, from *æquus*=equal, and *nox*=night; Fr. *équinoxe*; Ger. *equinoxtium*; Sp. *equinoccio*; Port. *equinoxio*; Ital. *equinozio*.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II.

"Since the vernal equinox, the sun,

In Aries twelve degrees or more had run."

Dryden: Cook and Fox, 447, 448.

2. Figuratively:

(1) An equinoctial wind.

"Nor more than usual equinoxes blew."

Dryden: Hind and Panther, iii. 604.

* (2) Equality, even measure.

"Do but see his vice:

'Tis to his virtues a just equinox,

The one as long as th' other."

Shakespeare: Othello, ii. 3.

II. *Astron.*, &c.: The moment at which the sun, in passing the equator, renders the days and nights equal in length through the world, except in as far as this equality is modified by the effect of refraction at the apparent time of the luminary's rising and setting. There are two equinoxes, the vernal, on or about March 20, when the sun seems to cross the equator going northward, and the autumnal, on or about September 23, when he recrosses it toward the south. At the former date he is at the first point of Aries, at the latter at the first of Libra.

"But, before the equinox, disease began to make fearful havoc in the little community."—*Macaulay: Hist. Eng.*, ch. xxiv.

† *Precession of the Equinoxes*: [*PRECESSION*.]

ē-qui-nōx-ī-āl, a. [*EQUINOCTIAL*.]

ē-qui-nū-mēr-ant, a. [Lat. *æquus*=equal, and *numerus*, pr. par. of *numero*=to number.] Having the same number; consisting of the same number.

"This talent of gold, though not equinumerant, nor yet equiponderant, as to any other; yet was equivalent to some correspondent talent in brass."—*Arbutnot: On Coins*.

ē-quip, v. t. [Fr. *équiper*; O. Fr. *esquiper*, from Icel. *skipa*=to arrange, set in order.] [*SHAPE, SHIP*.]

1. To furnish, to accouter, to dress out.

"Equipped from top to toe."—*Cowper: John Gilpin*.

2. *Specif.*: To furnish with arms for military service; to supply with military apparatus; to arm.

3. To fit out for sea, as a ship; to furnish with all munitions, stores, &c., necessary for a voyage.

"He soon equips the ship, supplies the sails,
And gives the word to launch."

Dryden: Ovid: Metamorphoses x.

4. To prepare for any particular service or duty, physical or mental; to supply or furnish with the necessary qualifications; to qualify.

† For the difference between *to equip* and *to fit* see *Fit*.

equipment (ēk-kwip-ig), s. [Fr., from *équiper*=to equip.]

*1. Those things with which a person is equipped; accouterments, dress, outfit.

To walk in equipage with better wit

Is kept from light."

Brownie: Britannia's Pastorals, bk. i., a. 2.

equipped (ēk-kwip-iged), a. [English *equipage* (e); -*ed*.] Accoutered, furnished, fitted out or provided with an equipage.

"Well dressed, well bred,

Well equipped, is ticket good enough

To pass us readily through every door."

Cowper: Task, iii. 97-8.

ē-quip-a-rā-ble, a. [Lat. *æquus*=equal, and *paratus*=to prepare, to arrange.] Comparable.

ē-quip-a-rāte, v. t. [Lat. *æquus*=equal, and *paratus*, pa. par. of *paratus*=to prepare, to arrange.] To compare.

ē-qui-pēd-āl, a. [Lat. *æquus*=equal, and *pes* (genit. *pedis*)=a foot.]

1. *Ord. Lang.*: Having equal feet; used of the two equal sides of an isosceles triangle.

2. *Zool.*: Having the pairs of feet equal.

1. *Ord. Lang.*: Equality of force or power.

2. *Logic*: An equivalence between two or more propositions.

***ē-qui-pōl-lent**, *a.* [Fr. *équipollent*, from Lat. *æquipollens*; Sp. *equipolente*; Ital. *equipollente*.]

1. *Ord. Lang.*: Having equal force or power; equivalent.

2. *Logic*: Equivalent in signification, force, or reach.

***ē-qui-pōl-lent-ly**, *adv.* [Eng. *equipollent*; *-ly*.]

With equal force, power, or weight.

***ē-qui-pōn-dēr-ance**, ***ē-qui-pōn-dēr-an-cy**, *s.* [Fr. *équi pondérance*, from Lat. *æquus*=equal, and *ponderans*, pr. par. of *pondero*=to weigh; *pondus* (genit. *pondus*)=a weight.] Equality of weight; equipoise.

***ē-qui-pōn-dēr-ant**, *a.* [Fr. *équi pondérant*, from Lat. *æquus*=equal, and *ponderans*, pr. par. of *pondero*.]

1. Of the same or equal weight.

"Two equally capacious and equiponderant phials."—*Boyle: Works*, iii. 638.

2. Of equal weight, force, or influence.

"Having accurately weighed the reasons, I find them so nearly equiponderant."—*Rambler*, No. 1.

3. Evenly balanced; in a state of equipoise.

"If the needle be not exactly equiponderant that end which is thought too light, if touched, becometh even."—*Browne: Vulgar Errors*, bk. ii., ch. ii.

***ē-qui-pōn-dēr-ate**, *a.* [Lat. *æquus*=equal, and *ponderatus*, pr. par. of *pondero*=to weigh; *pondus* (genit. *pondus*)=a weight.] Of the same or equal weight.

***ē-qui-pōn-dēr-ate**, *v. i. & t.* [EQUIPONDERATE, *a.*]

A. Intrans.: To be of the same or equal weight with something else.

"The heaviness of any weight doth increase proportionally to its distance from the center; thus one pound A at D, will equiponderate unto two pounds at B, if the distance A D is double unto A B."—*Wilkins: Mat. Magic*.

B. Trans.: To balance exactly; to counterbalance; to weigh the same as.

***ē-qui-pōn-dēr-ous**, *a.* [Pref. *equi-*, and Eng. *ponderous* (q. v.).] Of the same or equal weight; equiponderant.

***ē-qui-pōn-dl-ous**, *a.* [Lat. *æquus*=equal, and *pondus*=weight.] In a state of equilibrium; balanced.

***ē-qui-rād-ic-al**, *a.* [Pref. *equi-*, and English *radical* (q. v.).] Equally radical. (*S. T. Coleridge*.)

***ē-qui-rō-tal**, *a.* [Lat. *æquus*=equal, and *rota*=a wheel.] Having wheels of the same size or diameter; having equal rotation.

***ē-qui-sē-tā-cē-s**, *s. pl.* [Latin *equiset(um)*, (q. v.), and Lat. fem. pl. adj. suff. *-acea*.]

1. *Bot.*: Horsetails. An order of Acrogens, alliance Muscales, but with many unique characters of its own. It consists of leafless, branched plants, with a striated, fistular, fluted stem, in the cuticle of which silex is secreted. Articulations separable, and surrounded by a menbranous, toothed sheath. Spiral vessels very small, but abundant spore-cases, opening inward by a longitudinal slit attached to the lower face of peltate scales collected into terminal cones. Spores consisting of oval grains, wrapped round with a pair of highly elastic clavate elaters. Found in ditches and rivers all over the world, most abundant in the north temperate zone. Known species, twenty-five. [EQUISETUM.]

2. *Palæobot.*: The Equisetaceæ have been found from the Devonian strata upward. The Calamites of the Coal Measures were probably of this order. [CALAMITE.]

***ē-qui-sē-tā-cē-ous**, *a.* [Mod. Lat. *equisetace(æ)*, and Eng., &c., suff. *-ous*.]

Bot.: Belonging to or suggesting the order Equisetaceæ (q. v.).

***ē-qui-sēt-ic**, *a.* [Latin *equiset(um)*, and Eng., &c., suff. *-ic*.]

Chem., &c.: Pertaining to, existing in, or derived from Equisetum (q. v.).

equisetiic-acid, *s.* [ACONITIC-ACID.]

***ē-qui-sēt-i-form**, *a.* [Lat. *equisetum*, and *forma*=form, shape.]

Bot.: Having the form of an equisetum.

***ē-quis-ē-ti-tēs**, *s.* [Lat. *equiset(um)*; *-ites*.]

Palæobot.: A fossil plant akin to Equisetum, found in the Permian and Triassic rocks.

***ē-qui-sē-tūm**, *s.* [Lat. *equisetum*, from *equi*=of a horse, and *seta*=a stiff hair; a bristle.]

Bot.: A genus of plants, the typical and only one of the order Equisetaceæ (q. v.). (1) *Equisetum arvense*, the Corn;

(2) *E. pratense*, the Blunt-topped; (3) *E. maximum*, the Greatest; (4) *E. sylvaticum*, the Branched Wood; (5) *E. palustre*, the Marsh; (6) *E. limosum*, the Great Water; (7) *E. hyemale*, the Rough; (8) *E. variegatum*, the Variegated Rough Horsetail. 2, 7, and 8 are less common than the rest. *E. giganteum*, discovered in South America by Humboldt and Bonpland, is about five feet high, the stem being an inch thick. Various equiseta are used for polishing furniture and household utensils, for which the silex in their cuticle renders them well adapted. Medically viewed, they are said to be slightly astringent and stimulating.

***ē-qui-sō-nance**, *s.* [Fr. *équisonnance*, from Lat. *æquus*=equal, and *sonans*, pr. par. of *sono*=to sound.]

Mus.: The name given to the consonance of the unison and octave.

***ē-qui-sō-nant**, *a.* [Lat. *æquus*=equal; *sonans*=sounding.]

Mus.: Sounding equally, or in unison or octave.

equit-a-ble (equit as *ēk'-kwit*), *s.* [Fr., from *équité*=equity (q. v.).]

1. According to equity or justice; marked by a due consideration of what is just and fair to all; fair, just.

"No two of these rural prætors had exactly the same notion of what was equitable."—*Macaulay: Hist. Eng.*, ch. xxii.

2. Acting according to equity or justice; fair, just, impartial, unbiased in the distribution of justice; distributing equal justice to all: as, an equitable judge.

*3. Fair, impartial, unprejudiced, unbiased.

"All equitable men may judge whether the king did not pass sentence against himself."—*Luttwig: Memoirs*, iii. 282.

4. Pertaining to a court or the rules of equity; exercised in a court of equity: as, the equitable jurisdiction of a court.

¶ For the difference between *equitable* and *fair*, see *FAIR*.

equitable-estate, *s.*

Law.: An equitable estate is properly one for which a court of equity affords the only remedy: as the benefit of a trust which is not converted into a legal estate by the statute of uses. It is one of the three kinds of property in lands and tenements, the others being legal property and customary property.

equit-a-ble-ness (equit as *ēk'-kwit*), *subst.* [Eng. *equitable*; *-ness*.] The quality of being equitable, just, fair, or impartial.

"Demonstrating both the equitableness and practicableness of the thing."—*Locke*.

equit-a-ble-ly (equit as *ēk'-kwit*), *adv.* [Eng. *equitab(ly)*; *-ly*.] In an equitable manner; according to equity; fairly, justly, impartially.

"More justly, and perhaps more equitably."—*Goldsmith: The Bee*, No. 6; Upon Political Frugality.

equit-an-cy (equit as *ēk'-kwit*), *s.* [Lat. *equitans*=riding, pr. par. of *equito*=to ride; *equus* (genit. *equi*)=a horseman.]

1. *Ord. Lang.*: Horsemanship.

*2. *Bot.* (of leaves): Equitant state.

***ē-qui-tān-gēn-tial** (tial as *shal*), *a.* [Prefix *equi*=equal, and Eng., &c., *tangential*.]

Geom. (of a curve): Having the tangent equal to a constant line.

equit-ant (equit as *ēk'-kwit*), *a.* [EQUITANCY.]

Bot. (of leaves, &c.): Completely overlapping each other in a parallel direction without any involution.

Equisetum.
1. Barren Frond. 2. Fertile Frond.
3. Scale of Catkin, with Sporangia.

equi-tā-tion (equi as *ēk'-kwit*), *s.* [Lat. *equitatio*, from *equito*=to ride; *equus*=a horse; Fr. *équitation*; Sp. *equitacion*; Ital. *equitazione*.] The act or art of riding; horsemanship; a ride on horseback.

"I have lately made a few rural equitations to visit some seats, gardens, &c."—*Nichols: Illus. of Lit. History*, iv. 497.

***ē-qui-tēm-pō-rā-nē-ous**, *a.* [Formed with pref. *qui-* on analogy of *contemporaneous* (q. v.).] Contemporaneous.

equites (pron. *ēk'-kwit-tēs*), *s. pl.* [Lat., pl. of *equus*=a knight.]

Rom. Antiq.: In the earlier ages the term was employed in a military sense to denote the cavalry of the army, and we are told by Livy that they were established by Romulus, who levied one hundred cavalry in each of the three original tribes, ten from each Curia. These were divided into ten squadrons (*turme*) of thirty men each, each turma being subdivided into three *decuriæ* of ten men each, at the head of each *decuria* being a *decurio*. They were from the first selected from the wealthiest of the citizens. By a law passed by C. Gracchus, in B. C. 122, the equites obtained great power in the State, the right of acting as jurors in criminal trials, which had previously been the distinctive privilege of the Senators, being transferred to them. Each eques had to possess a fortune of 400,000 sesterces. They wore a tunic with a narrow stripe of purple, and a gold ring, were allowed a sum of money to buy a horse, and also a small sum for its keep, and had particular seats in the theaters and circus.

equity (pron. *ēk'-kwit-ty*), ***ē-qui-tee**, ***ē-quy-tee**, *s.* [Fr. *équité*, from Lat. *æquitas*, from *æquus*=equal; Sp. *equidad*; Port. *equidade*; Ital. *equità*.]

I. *Ordinary Language*:

1. Justice, right, fairness, impartiality.

"So right he kept his liberties
To do justice and equite."

Gower: C. A., vii.

2. In the same sense as II.

3. An equitable claim.

"I consider the wife's equity to be too well settled to be shaken."—*Kent*.

II. *Law*: The word equity in legal works is used in three distinct senses, which are often confounded.

1. In the broadest sense: The principal of doing to others as we should wish others in similar circumstances to do to us; the Christian or golden rule.

2. In a more restricted sense: A modification of strict law; the administration of law not according to its strict letter, but in a reasonable or benignant spirit. This is called, by Aristotle and others, *Moral equity*.

3. In a yet more restricted sense: The substantial justice which formerly a Court of Chancery, now the Chancery side of a common law court, is appointed to administer. Common Law may take up one fragment of a subject, everything else being irrelevant except the specific point raised between plaintiff and defendant; the Chancery side can take up a subject in all its breadth, summon others than those two to appear for their rights, and attempt to give an equitable decision on all conflicting claims, duties, and interests. It should be observed that the Chancery side of the court follows its precedents as much as the common law side does, so that a decision is not left to the judges' instinctive feeling as to what should be done in each particular case. This third kind of equity has been called *Municipal equity*.

American courts of equity are, in some instances, distinct from those of law; in others, the same tribunals exercise the jurisdiction both of courts of law and equity.

¶ For the difference between *equity* and *justice*, see *JUSTICE*.

¶ (1) *Equity of a statute*: The construction or interpretation of a statute in accordance with its reason and spirit, and not according to the mere letter.

(2) *Equity of redemption*: The advantage allowed to a mortgagor of a reasonable time within which to redeem his estate, when mortgaged for a less sum than it is worth. As soon as the estate is created, the mortgagee may immediately enter on the lands; but is liable to be dispossessed upon performance of the condition by payment of the mortgage-money at the day limited. And therefore the usual way is to agree that the mortgagor shall hold the land till the day assigned for payment; when, in case of failure, whereby the estate becomes absolute, the mortgagee may enter upon it and take possession, without any possibility at law of being afterward evicted by the mortgagor, to whom the land is now forever dead. But here the courts of equity interpose; and though a mortgage be forfeited, and the estate thus absolutely vested in the mortgagee, yet they consider the real value of the tenements compared with the sum borrowed. And, if the estate be of greater value than the sum lent, they will allow the mortgagor, at any time within twenty

years, to redeem his estate; paying to the mortgagee his principal, interest, and expenses. This reasonable advantage is called the *Equity of Redemption*; and enables a mortgagor to call on the mortgagee, who has possession of his estate, to deliver it back and account for the rents and profits received, on payment of his whole debt and interest. equivalence of force.

Nat. Phil. The equality of forces differing from each other in character, but any one of which may be transformed into any other one.

***ē-quiv-a-lence, v. t.** [EQUIVALENCE, s.] To be equal or equivalent to; to counterbalance.

"Whether the transgression of Eve seducing did not exceed Adam seduced, or whether the resistibility of his reason did not equivalence the facility of her seduction, we shall refer to schoolmen."—*Broune: Vulgar Errors*, bk. i., ch. 1.

ē-quiv-a-len-cy, s.

[EQUIVALENCE.]

***1. Ord. Lang.** The same as EQUIVALENCE (q. v.).
"There are yet three ways more by which single acts do become habits by equivalency and moral value."—*Bishop Taylor: On Repentance*, ch. iv., § 8.

2. Chem. The quality in elements of combining with or displacing one another in certain definite proportions. When the atomic weight is taken into account the equivalency of an element is called its atomicity (q. v.). [CHEMICAL EQUIVALENT.]

ē-quiv-a-lent, a. & s. [Fr., from Lat. *æquivalens*, pr. par. of *æquivalere* = to be equivalent: *æquus* = equal, and *valeo* = to be worth; Sp., Port. & Ital. *equivalente*.]
A. As adjective:

1. Ord. Lang. Of equal value, force, weight, effect, import, or meaning; alike in significance or value; interchangeable.
"The dread of Israel's foes, who, with a strength Equivalent to angel's, walked their streets, None offering fight."—*Milton: Samson Agon.*, 348.

II. Technically:

***1. Geom.** Applied to magnitudes or surfaces which have equal areas or dimensions.
2. Geol. (of strata in different places): Corresponding in position, and, within certain limits, in age.

B. As substantive:

I. Ordinary Language:
1. Anything which is equal in value, power, force, or weight with something else.
"In the possession of some good that is more than an equivalent."—*Cogan: On the Passions*, disc. iii., § 2.

2. A word of equal meaning, force, or import.

II. Technically:

1. Chem. [Chemical Equivalents.]
2. Geol. A stratum or a series of strata formed at the same period as a stratum or a series of strata of different lithologic character in a different region, or occupying the same relative position in the scale of rocks, and containing fossils of the same kind if deposited under similar circumstances. Thus the Bath Oolite is the equivalent of the Caen building stone.

ē-quiv-a-lent-ly, adv. [Eng. equivalent; -ly.] In an equivalent manner; in a manner equal in value, power, or degree with something else.

"Insufficient am I
His grace to magnify,
And laude equivalently."—*Skelton: Poems*, p. 88.

A. As adjective:

1. When two or more ideas are named by one word; doubtful, ambiguous; capable of a twofold interpretation.
"The greater number of those who held this were misguided by equivocal terms."—*Swift*.

***2. Uncertain, unsatisfactory.**
"How equivocal a test this kind of popular opinion forms of the merit that obtained it."—*Burke: Letter to a Noble Lord*.

***3. Uncertain; doubtful; out of the usual course.**

4. Liable or open to doubt or suspicion; suspicious.

***5. Equivocating.**
"What an equivocal companion is this."—*Shakespeare: All's Well*, v. 3.

***6. Apparently but not in reality the same.**
"The visible world is but a picture of the invisible, wherein, as in a portrait, things are not truly but in equivocal shapes, and as they counterfeit some real substance in that invisible fabric."—*Sir T. Browne: Religio Medici*.

B. As subst. A word or term of doubtful meaning; a word admitting or capable of a twofold interpretation.

"In languages of great ductility, *equivocals* like those just referred to are rarely found."—*Hall: Modern English*, p. 168.

equivocal chord, s.
Mus. A name given to a combination of sounds which are common to two or more distinct keys, and which when heard make the listeners doubtful as to the particular key-tonality into which they are about to be resolved. (*Stainer & Barrett*.)

equivocal generation, s.
Physiol. The hypothesis that the generation of certain animals, whose existence in situations which it is difficult to see how they could have ever reached, constitutes a perplexing phenomenon, came into being in some equivocal way. The expression was used chiefly in connection with the genesis of the Entozoa, but recent researches have thrown much light on the origin and transformation of these internal parasites.

"The advocates for the *equivocal generation* of the Entozoa adduce the fact."—*Owen: Invertebrata*, lect. vi.

ē-quiv-ō-cal-ly, adv. [English *equivocal*; -ly.]

1. In an equivocal, ambiguous, or doubtful manner or sense; so as to admit of a twofold interpretation.

***2. By equivocal or uncertain birth or generation.**
"No insect or animal did ever proceed *equivocally* from putrefaction, unless in miraculous cases, as in Egypt by the divine judgments."—*Bentley*.

***3. In appearance only, and not in reality.**
"Which [courage and constancy] he that wanteth is no other than *equivocally* a gentleman as an image or carcase is a man."—*Barrow: Sermon on Industry in our several Callings*.

ē-quiv-ō-cal-ness, s. [Eng. *equivocal*; -ness.] The quality or state of being equivocal; ambiguity, doubtfulness.

"The equivocality of the title gave a handle to those that came after."—*Waterland: Athanasian Creed*, ch. viii.

***ē-quiv-ō-cant, a.** [Low Lat. *æquivocans*, pr. par. of *æquivoco*.] Equivocating, ambiguous, doubtful.

"Which verily was true, but no less ambiguous and equivocal."—*P. Holland: Ammanius*, p. 224.

ē-quiv-ō-cāte, v. i. & t. [Low Lat. *æquivoco*, from Lat. *æquus* = equal, and *voco* = to call; French *equiviquer*; Sp. *equivocar*; Ital. *equivocare*.]

A. Intrans. To name two things by one word; to use words or terms in an equivocating, ambiguous, or doubtful manner; to make use of expressions admitting of a twofold interpretation; to prevaricate, to quibble.

"Prebendaries and Rectors were not ashamed to avow that they had *equivocated*."—*Macaulay: Hist. Eng.*, ch. xvi.

***B. Trans.** To render equivocal.
"He equivocated his vow by a mental reservation."—*Sir G. Buck: Hist. Richard III.*, p. 142.

† For the difference between to *equivocate*, and to *evade*, see EVADE.

ē-quiv-ō-cā-tion, s. [Low Lat. *æquivocatio*, from *æquivoco*. A word introduced by the schoolmen. (*Trench: Study of Words* (2d ed.), p. 77.)]

1. (Orig.) The act of calling two ideas by one word; ambiguity of speech.

"All words being arbitrary signs, are ambiguous; and few disputers have the jealousy and skill which is necessary to discuss *equivocations*, and to take verbal differences for material."—*Baxter in Trench's Glossary*, pp. 71, 72.

2. Prevarication, quibbling, evasion.
"We must speak by the card, or *equivocation* will undo us."—*Shakespeare: Hamlet*, v. 1.

ē-quiv-ō-cā-tōr, s. [Eng. *equivocat(e)*; -or.] One who equivocates; one who expresses himself in ambiguous or doubtful language; a prevaricator, a quibbler.

"Here's an *equivocator*, that would swear in both the scales against either scale, yet could not equivocate to heaven. Oh, come in, *equivocator*."—*Shakespeare: Macbeth*, ii. 3.

***ē-quiv-ō-cā-tōr-ŷ, a.** [Eng. *equivocat(e)*; -ory.] Of the nature of or containing equivocation.

***ē-qui-vōque (que as k), *ē-qui-vōke, s.** [Fr. *équivoque*, from Lat. *æquivocus*.]

1. An ambiguous term; an equivocal.

2. Equivocation, prevarication, evasion, quibbling.

***ē-quiv-ōr-ōus, a.** [Lat. *æquus* = a horse; *voro* = to devour, and Eng. adj. suff. -ous.] Feeding upon or eating horseflesh.

ē-quū-lē-ūs, s. [Latin *equuleus*, *eculeus* = a young horse, a colt, dimin. of *æquus* = a horse.]

Astron. One of the twenty ancient Northern constellations. It was founded by Ptolemy. It is surrounded by Pegasus, Vulpecula, Aquila, and Capricornus.

equuleus pictoris (=the painter's horse or easel), s.

Astron. One of Lacaille's twenty-seven accepted Southern constellations. It is situated close to the principal star of Argo.

***ē-quūs, s.** [Lat.]

1. **Zoöl.** A genus of ungulates, the typical one of the family Equidae (q. v.). Animal not banded, no dorsal line, warts upon both the fore and hind legs, tail in every part hairy. Type *Equus caballus*, the Horse (q. v.). The other modern Equidae are placed by Dr Gray in the genus *Asinus*. Many, however, retain them in the genus *Equus*, in which case *Equus asinus* is the ass; *E. hemionus*, the djuggetai; *E. onager*, the wild-ass; *E. zebra*, the zebra; *E. quagga*, the quagga. The horse probably came originally from Central Asia, the ass from Northern Africa, or from Western Asia, the zebra and quagga from South Africa.

2. **Palæont.** The first appearance of the genus is in the *Equus stivalensis* of the Siwalik, or Sub-Himalayan strata, in India, generally considered as Upper Miocene, but perhaps Pliocene. The *Equus fossilis* of Europe and other parts is perhaps identical with the modern horse. (*Nicholson*.)

-er, affix.

1. An English affix corresponding to the French *-eur* and Lat. *-or*, and used for forming nouns of agency [-OR.] It is used for persons or things of any gender, but was originally masculine, the corresponding feminine form being *-ster*, *-strix*, which has also lost its feminine force. As a rule words in -or are of Latin origin, those in -er of English origin, but there is a tendency to drop the former termination in favor of the latter.

2. An affix denoting an inhabitant, native of or dweller in a place; as, a New Yorker = one who lives in or is a native of New York.

3. The sign of the comparative degree of adjectives in English. Cognate with Lat. *-or*, and Gr. *-eros*. The r represents an original s.

4. An affix used with verbs to give them a diminutive or frequentative force; as, pat, pater; spit, sputter.

ēr, [See def.]

Her. A frequent abbreviation of the word *ermine*.

Er (pron. ūr). [An abbreviation of *Erbium* (q. v.).]

Chem. The symbol for the earth-metal Erbium; the symbols Eb and E are also used.

***ēr, adv.** [ERE.]

ēr-a, ēr-a, s. [Lat. *æra*, properly = counters, from *æs* = brass, money; Ital. & Sp. *era*; Fr. *ère*.]

1. A fixed point of time from which a series of years is reckoned; as, the Christian *era*.

"Learned men are not all agreed in the fixing of the true time of Christ's incarnation, some placing it two years, and some four years before the vulgar *era*."—*Prideaux: Connection*, vol. I., pref. p. ii.

**ê-râ-dî-â-te*, v. t. [Pref. *e=ex*=out, and Eng. *radiate* (q. v.).] To radiate out; to proceed or shoot out, as rays of light.

**ê-râ-dî-â-tion*, s. [Pref. *e=ex*=out, and Eng. *radiation* (q. v.).] Emission or radiation, as of rays of light; emanation.

**ê-râd'-ic-a-ble*, a. [Latin *e=ex*=out, away, *radix* (genit. *radicis*)=a root, and Eng. suff. *-able*.] [ERADICATE.] That may or can be eradicated.

**ê-râd'-i-câ-te*, v. t. [Lat. *eradicatus*, pa. par. of *eradicō*; *e=ex*=out, and *radix* (genit. *radicis*)=a root; Sp. *eradicar*; Ital. *eradicare*.]

*1. *Lit.*: To tear or pull up by the roots; to root up or out.

"He suffereth the poison of Nubia to be gathered, and acornite to be eradicated, yet this not to be moved."—Brown.

2. *Fig.*: To root out, to extirpate, to destroy or do away with completely; to exterminate.

"No kind of institution will be sufficient to eradicate these natural notions out of the minds of men."—Wilkins: *Natural Religion*, bk. i., ch. iv.

¶ Crabb thus discriminates between *eradicate*, *to extirpate*, and *to exterminate*: "To *eradicate*, from *radix* the root, is to get out by the root: *extirpate*, from *ex* and *stirps* the stem, is to get out the stock, to destroy it thoroughly. In the natural sense we may *eradicate* noxious weeds whenever we pull them from the ground; but we can never *extirpate* all noxious weeds, as they always disseminate their seeds and spring up afresh. These words are seldom used in the physical than in the moral sense; where the former is applied to such objects as are conceived to be plucked up by the roots, as habits, vices, abuses, evils; and the latter to whatever is united, or supposed to be united into a race or family, and is destroyed root and branch. *Exterminate* . . . signifies to cast out of the boundaries, that is, out of existence. It is used only in regard to such things as have life, and designates a violent and immediate action: *extirpate*, on the other hand, may designate a progressive action: the former may be said of individuals, but the latter is employed in the collective sense only. Plague, pestilence, famine *extirpate*; the sword *exterminates*." (Crabb: *Eng. Synon.*)

**ê-râd'-i-câ-tion*, s. [Lat. *eradicatio*, from *eradicatus*, pa. par. of *eradicō*; Fr. *éradiation*; Sp. *eradicación*.]

*I. *Literally*:

1. The act of pulling or tearing up by the roots; the act of rooting up or out.

2. The state of being pulled or torn up by the roots.

"They affirm the roots of mandrakes give a shriek upon eradication, which is false below confutation."—Brown: *Vulgar Errors*, bk. ii., ch. vi.

II. *Fig.*: The act or process of eradicating, extirpating, or rooting out completely; extirpation, extermination, utter destruction.

"The very eradication of all lusts."—Cowley: *Essays; Of Solitude*.

**ê-râd'-i-câ-tive*, a. & s. [Eng. *eradicat(e)*; -ive.]

A. As adj.: Tending to eradicate, extirpate, or root out utterly; removing or destroying completely.

B. As subst.: A medicine or preparation which eradicates or removes completely any disease.

**ê-râ-grôs'-tis*, s. [Gr. *eros*, *êrôa*=love, and Mod. Lat. *agrostis* (q. v.), with reference to the dancing spikelets of the flower.]

Bot.: A genus of Grasses, tribe Festuceæ, family Bromidæ. Stendel enumerates 243 species, six of them European.

**ê-rân'-thê-mê'-æ*, s. pl. [Mod. Latin *eranthemum*], and Lat. fem. pl. adj. suff. *-ææ*.]

Bot.: A tribe of Acanthaceæ.

**ê-rân'-thê-mûm*, s. Gr. *eros*, *êrôa*, and *anthemon*

=a flower.]

A. As subst.: A genus of Acanthaceæ, the typical one of the tribe Eranthemæ. Corolla salver-shaped, stamens four, only two of them fertile. About twenty species, including *Eranthemum pulchellum* with blue, and *E. bicolor*, with white and red flowers, are cultivated in greenhouses.

**ê-rân'-this*, s. [Gr. *eros*, *êrôa*=love, and *anthos*=blossom, flower.]

Bot.: Winter-aconite. A genus of plants, order Ranunculaceæ. Sepals five to eight, narrow, petaloid, deciduous; petals small, clawed, and twolipped; stamens many; carpels five to six, stipitate; follicles many-seeded.

**ê-râs'-a-ble*, **ê-râs'-i-ble*, a. [English *eras(e)*; -able.] That may or can be erased.

**ê-râs'e*, v. t. [Lat. *eratus*, pa. par. of *erado*=to scrape out; *e=ex*=out, away, and *rado*=to scrape; Fr. *raser*; Ital. *radere*; Sp. *raer*.]

1. To rub or scrape out; to efface, to expunge, to obliterate, as letters or characters written, printed, or engraved.

2. To remove, as by rubbing or scraping out.

"The heads of birds, for the most part, are given *erased*; that is, plucked off."—Peacock: *On Blazoning*.

3. To remove completely in any way; to eradicate.

"To impress a value, not to be *erased*, On movements squandered else, and running all to waste."—Couper: *Tirocinium*, 613, 614.

*4. To destroy utterly; to erase, to exterminate:

¶ For the difference between *to erase* and *to blot out*, see BLot.

**ê-râs'ed*, pa. par. & a. [ERASE.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. *Ord. Lang.*: Rubbed or scraped out or off; effaced, expunged, obliterated.

2. *Her.*: A term applied to anything forcibly torn off, so as to leave jagged or uneven ends. It is the opposite to *couped*, which means cut straight off or away.

**ê-râs'e-mënt*, s. [Eng. *erase*; -ment.] The act of erasing, expunging, or effacing; effacement, destruction, expunction, erasure.

**ê-râs'-ër*, s. [Eng. *eras(e)*; -er.] One who or that which erases; specifically, a sharp instrument, prepared caoutchouc, &c., used to erase writing.

**ê-râs'-i-ble*, a. [ERASABLE.]

**ê-râs'-ing*, pr. par., a. & s. [ERASE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of scratching or rubbing out; erasure.

erasing-knife, s. A knife with a cordate blade, sharpened on each edge, and adapted for erasing marks from paper by an abrading or cutting action, according to the angle at which it is held. The ends are provided with burnishers or other appendages useful about the desk; an eraser.

**ê-râ'-gion*, s. [Lat. *eratus*, pa. par. of *erado*.] The act of erasing or rubbing out; erasure.

**ê-râs'-tî-an*, a. & s. [Named after Erastus. (See def.).]

A. As adj.: Embracing the views of Thomas Lieber, Latinized into Erastus, a physician and professor of medicine in the University of Heidelberg, who was born at Baden, Sept. 7, 1524, and died at Basel, Switzerland, Dec. 31, 1583.

B. Assubstantive:

1. One holding the same views as Erastus with regard to excommunication. [ERASTIANISM.]

2. One holding that the Church, especially if established by law, is under the jurisdiction of the State in spiritual as well as secular matters, and that all ecclesiastical sentences are liable to review in the civil courts. [ERASTIANISM.]

**ê-râs'-tî-an-ism*, s. [Eng. &c., *Erastian*; -ism.]

Theol., Law, & Ch. Hist.: The views with regard to the limits of ecclesiastical authority which Erastus [ERASTIAN] held or is supposed to have held.

†(1) *The views which Erastus undoubtedly held*: An ardent Protestant, he believed it unwise that the Churches which had separated from Rome should excommunicate any of their members, or even pass upon their lesser kinds of censure. If a church member committed a crime, the punishment should be inflicted not by the ecclesiastical authorities, but by the civil magistrate; if he fell into sin as distinguished from crime, the church with which he agreed in doctrine should not expel him or even alienate his affections by heavily censuring his conduct. Erastus, who attempted to base his views on Scripture, found himself in controversy on the subject with Dathenus and Beza. His tenets were committed to writing in A. D. 1568, but were not published till after his death. At length, however, Castelvetro, who had married Erastus' widow, gave them to the world in 1568, under the title *Explicatio Questionis gravissimæ de Excommunicatione*. The opinions of Erastus regarding excommunication were unsuccessfully advocated in the Westminster Assembly of 1643 by a small party, of whom Selden was chief.

(2) *The views attributed to Erastus*: When the opinion is held that the Church has no warrant from its Divine Head for executing spiritual sentences on its offending members, some one is sure to suggest that the civil power then should prevent them from being carried out at all, and

annihilate independent government in every ecclesiastical body. When the State has taken it upon itself to define who are to be permitted to partake of the sacred communion, it is pretty certain to contend next for the right of nominating those who are to minister at the Church's altars and occupy her pulpits. If it cannot appoint every one itself, it gives the weight of its authority to the maintenance of lay patronage. In modern ecclesiastical controversy the term *Erastianism* has been held to designate the opinions now stated regarding the borderland between Church and State. This was the signification attached to the term in the controversy which resulted in the disruption of the Scottish Establishment in 1843. [DISRUPTION.] In 1845, however, the Rev. Robert Lee, afterward Professor of Biblical Criticism in Edinburgh University, re-edited an English translation of Erastus' theses made in 1669, and showed that the evidence on which he was assumed to have held the views called after him was scanty and insufficient. They perhaps existed in his work in germ, but in germ only.

**ê-râ'-gûre*, s. [Eng. *eras(e)*; -ure.]

1. The act of erasing, rubbing, or scratching out; obliteration, effacement.

"Fear would prevent any corruptions of them by willful mutilation, changes, or *erasures*."—Horsley: *Disc. on Prophecies of the Messiah*.

2. That which is erased, scratched out, obliterated or effaced.

3. The place from which a word, &c., has been erased or scratched out.

"The superinduced words were written on an *erasure*."—Prof. Menzies.

*4. The act of razing or destroying utterly; as, the *erasure* of a city.

**ê-r-a-tô*, s. [Lat. *Erato*; Gr. *Eratô*=the Lovely; *eratos*=lovely; *erâto*=to love.]

1. *Class. Myth.*: One of the nine Muses. She presided over elegy and love songs. When she was playing, she carried a lyre in the one hand and a plectrum in the other, and was crowned with roses and myrtle.

"Now, Erato! thy post's mind inspire,
And fill his soul with thy celestial fire."
Dryden: *Virgil; Æneid*, vii. 62, 63.

2. *Astron.*: An asteroid, the sixty-first found. It was discovered by Lesser, on September 14, 1860.

3. *Zool.*: A genus of Cypræidæ (Cowries). Eleven recent species occur, and two fossil, the former from Britain, the West Indies, China, &c., the latter from the Miocene onward.

4. *Bot.*: A genus of Asteraceæ, sub-tribe Psidiææ.

**ê-r-bi-a*, s. [ERBIUM.]

Chem.: Er₂O₃. Mol. weight 389.1. The oxide of the earth-metal Erbium. It is a rose-colored powder, insoluble in water; it is infusible, and glows when heated with an intense green light. It forms crystalline rose-colored salts which give characteristic lines in the spectrum. Erbium is said to exist in the sun. Erbia is probably a mixture of three earths: true Erbia, Holmia, and Thulia. It is very difficult to obtain it in a pure state.

**ê-r-bi-ûm*, s. [From Ytterby in Sweden, where gadolinite, the mineral containing this metal, is found.]

Chem.: Er, atomic weight 170.55. An earth-metal forming a rose-colored oxide, Er₂O₃. It gives a peculiar spectrum, marked by characteristic absorption bands. It is said to be associated with two other earth-metals: Thulium, atomic weight 169.5; and Holmium, atomic weight 162. Its oxide is yellow. Salts of erbium are rose-colored, and erbium oxalate is soluble in a solution of ammonium oxalate, forming a crystallizable double salt.

**ê-r'-cin'-ite*, s. [From *Sylva Hercynia*, the Roman name for the Harz mountains, in which it was found at Andreasberg.] [HERCYNITE.]

Min.: The same as HARMOTOME (q. v.).

**êrd'-man-nite*, s. [Named after Professor Erdmann.]

Min.: The name of two minerals: (1) *Erdmannite* of Berlin: A variety of Orthite; (2) *Erdmannite* of Esmark: A variety of Zircon.

**er'-ce-dek-ne*, s. [ARCHDEACON.]

**er'd*, s. [EARTH.]

**er'd'-folc*, s. [Mid. Eng. *er'd*=earth, and Eng. *folk*.] The people of a country.

ēr-ē-blī-s, s. [Lat. *Erebus*; Gr. *Erebos*=the
place of nether darkness.] [EREBUS.]

Entom.: A genus of Butterflies, family Satyridæ.
Erebia epiphron is the Small Ringlet. It is of a
sepia-brown color, with black spots, and occurs in
Cumberland and in Ireland. The caterpillar feeds on
grass. The perfect insect appears in June and
July. (Newman.)

ēr-ē-būs, s. [Lat., from Gr. *Erebos*.]

Mythol.: A deity of hell—the son of Chaos and
Darkness; he married his sister Night, and was the
father of Light and Day. The word was used for the
gloomy region in the Lower World, distinguished
both from Tartarus, the place of torment, and
Elysium, the region of bliss. Hence it was used
later for the Lower World generally; hell, hades.

"Not Erebus itself were dim enough
To hide thee from prevention."

Shakesp.: Julius Cæsar, ii. 1.

*2. Elevated in mind; noble, aspiring.

"High erected thoughts seated in a heart of courtesy."
—Sir P. Sidney.

ēr-rēc-tēr, ē-rēc-tōr, s. [Eng. erect; -er.] One
who or that which erects, sets up, or builds.

ēr-rēc-tile, a. [Fr. *érectile*.]

Anat.: Capable of being erected; susceptible of
erection.

erectile-tissue, s.

Anat.: A kind of tissue entering into some or-
gans of the body which are capable of being ren-
dered turgid or erected by their distension with
blood. It is called also Cavernous tissue.

ēr-rēc-tīl-i-tŷ, s. [Eng. *erectil(e)*; -ity.] The
quality or state of being erectile; capability of
being erected.

ēr-rēct-līng, pr. par., a. & s. [ERECT, v.]

A. & B. As pr. par. & particip. adj.: (See the
verb.)

C. As subst.: The act of raising or setting upright;
erection.

erecting eye-piece, s.

Optics: A combination of four lenses used for ter-
restrial telescopes, and so arranged as to exhibit
the objects viewed in an erect position.

erecting-glass, s. A tube with two lenses,
slipped into the inner end of the draw-tube of a mi-
croscope, and serving to erect the inverted image.
[ERECTOR, II. 2.]

erecting-prism, s. [ERECTOR, II. 2.]

ēr-rēc-tion, s. [Lat. *erectio*, from *erectus*, pa.
par. of *erigo*; Fr. *érection*; Span. *ereccion*; Italian
erezione.]

I. Ordinary Language:

1. The act of erecting, raising, or setting upright
or perpendicular; a raising or setting up.

2. The act of building, constructing, or raising
edifices.

"The erection of several spacious parish churches."—
Porteus: Works, vol. i., lect. viii. (Note.)

3. The state of being erected, built, or raised up.

4. That which is erected or raised up; a building,
a construction.

5. The act of establishing, forming, setting up, or
instituting.

"After the first erection of the Scottish kingdom."—
Holmshed: Hist. of Scotland, an. 203.

6. The state of being established, formed, set up,
or instituted.

*7. Elevation, nobility, or exaltation of senti-
ments.

"Her peerless height my mind to high erection draws
up."—Sir P. Sidney.

*8. The act of rousing, stimulating, exciting, or
encouraging.

"When a man would listen suddenly he starteth; for
the starting is an erection of the spirits to attend."—
Bacon.

II. Anat.: The state of a part when it becomes
turgid or distended with blood. [ERECTILE-TISSUE.]

ēr-rēc-tive, a. [Eng. erect; -ive.] Tending to
erect or set upright; erecting, raising.

ēr-rēc-tīlŷ, adv. [Eng. erect; -ly.] In an erect
or upright position.

erectly-spreading, a.

Bot.: Between erect and spreading. (Paxton.)

ēr-rēc-t-nēss, s. [Eng. erect; -ness.] The quality
or state of being erect; uprightness of posture or
form.

"We take erectness strictly and so as Galen defined it;
they only, sayeth he, have an erect figure, whose spine
and thighbones are carried in right lines."—Browne:
Vulgar Errors, bk. iv., ch. i.

ēr-rēc-tō-, prefix. [Lat. *erectus*=erect.] Erect.
erecto-patent, a.

1. **Bot.:** The same as **ERECTLY-SPREADING** (q. v.).

2. **Entom.:** Having the primary wings vertical
and the secondary ones horizontal.

ēr-rēc-tōr, s. [Fr. *érecteur*.]

I. Ord. Lang.: One who erects, raises, sets up, or
establishes.

II. Technically:

1. **Anat.:** A muscle which causes the erection of
any part.

2. **Optics:** An arrangement to antagonize the
inversion of the image formed by the object-glass,
by again inverting the image to make it correspond
in position with the object. It is a tube about
three inches long, having a meniscus at one end
and a plano-convex lens at the other, the convex
sides upward, and a diaphragm about half-way
between them. The erector is screwed into the
lower end of the draw-tube.

***erege, s.** [O. Fr. *herege*; Sp. & Port. *harage*,
from Lat. *hæreticus*.] A heretic.

ère-lōng, adv. [Eng. *ere*; -long.] Before the
lapse of any long time; before long; soon.

"I think ere long he will believe."

Messenger: Unnatural Combat, iii. 2.

ēr-rē-mā-cāu-sis, s. [Gr. *hērema*=slowly, and
kousis=burning.]

Chem.: A name given by Liebig to the slow oxida-
tion of vegetable matter when exposed to air and
moisture. *Eremacausis* is accompanied by evolu-
tion of heat, which may cause large masses of cot-
ton, flax, hay, and other substances of a porous
nature, when damp or greasy, to take fire sponta-
neously. The hydrogen of the organic body is con-
verted into water, and the carbon into carbonic
acid; the oxygen in the body unites with the hydro-
gen to form water, so the substance formed, *humus*,
&c., contains a larger percentage of carbon than
the original substance. The nitrogen escapes into
the air, either as free nitrogen or ammonia, unless
an alkali or alkaline earth is present, then a nitrate
is formed.

***ēr-ē-mīt-age (age as īg), s.** [Eng. *eremit(e)*;
-age.] A hermitage.

***ēr-ē-mīt-al, a.** [Mid. Eng. *eremit(e)*; -al.] Of
or pertaining to a hermit.

ēr-ē-mīte (ī), s. [Lat. *eremita*; Gr. *erēmītēs*=
one belonging to the desert, a hermit, from *erēma*=
a solitude; *erēmos*=desolate, lonely; Fr. *ermite*,
hermite; Prov. *ermita*, *hermitan*; Sp. *ermitaño*;
Port. *eremita*, *eremita*; Ital. *eremita*.] [HERMIT.]

1. **Ord. Lang.:** A hermit; a solitary; a recluse.

2. **Ch. Hist.:** A hermit, an ascetic, who preferred
solitude to association in a community with others
of the same sex who, like him, had withdrawn from
the world. Jerome, on indifferent authority, states
that Paul the hermit of Thebais, was the author of
the institution of Eremites, but they probably
existed in connection with Christianity, and cer-
tainly with other faiths, before his time. This Paul
lived in the third century, when the Decian perse-
cution led many to withdraw to the wilderness.
They lived in caves and such places, and were dis-
tinguished not merely from the Anachorites, who
lived in communities, but from the Anchorites, who,
as solitary as the Eremites, had no fixed abode, but
wandered about, subsisting chiefly on roots and
fruits; as also from the Sarabites, a vagrant race of
religious mendicants and impostors.

Aquitaine:

Ch. Hist.: A monastic order instituted in the
thirteenth century. [AUGUSTINIANS.]

ēr-ē-mīte (2), s. [Gr. *erēmos*=lonely, in allusion
to its rarity.]

Min.: The same as **MONAZITE** (q. v.).

***ēr-ē-mīt-ic, *ēr-ē-mīt-ic-al, *er-e-mīt-ic-
all, a.** [Eng. *eremit(e)*; -ic, -ical.]

1. Relating to or having the nature or character
of a hermit; living in solitude or seclusion.

"They have multitudes of religious orders, *eremitical*
and cenobitical."—Stillingerfleet.

2. Spent in solitude or seclusion.

"Led an *eremitical* life in the woods near Stafford."—
Fuller: Worthies: Staffordshire.

***ēr-ē-mīt-ish, a.** [Eng. *eremit(e)*; -ish.] Of or
pertaining to a hermit; eremitic, solitary.

ēr-ē-mīt-izm, s. [Eng. *eremit(e)*; -ism.] The
state or condition of a hermit; seclusion from soci-
ety.

ēr-ē-mūs, s. [Gr. *erēmos*=solitary.]

Bot.: A ripe carpel, partially detached from the
rest.

ere-nōw, adv. [Eng. *ere*, and *now*.] Before now,
before this time.

"Had the world eternally been, science had been
brought to perfection long *erenow*."—Cheyne.

Since night you loved me, yet since night you left me,"
Shakesp.: *Mida. Night's Dream*, iii. 2.

ērf (1) (pl. **ēr-vēn**), s. [Dut.] A garden plot, usually containing about half an acre.

***ērf** (2), ***ērrfe**, ***erve**, s. [A. S. *erfe*, *yrf*; O. H. Ger. *arbi*, *erbi*.] Cattle.

ērg, **ēr-gōn**, s. [Gr. *ergon*=a work.]

Nat. Phil.: The amount of work done by a dyne working through a distance of a centimeter. It is the C. G. S. unit of work and of energy. (Everett: *C. G. S. System of Units* (1873), ch. iii., p. 13.)

"The C. G. S. unit of work is the work done by this force [a dyne] working through a centimeter; and we purpose to denote it by some derivative of the Greek *ergon*. The forms *ergon*, *ergal*, and *erg* have been suggested; but the second of these has been used in a different sense by Clausius. In this case also we propose for the present to leave the termination unsettled, and we request that the word *ergon* or *erg* be strictly limited to the C. G. S. unit of work, or what is for purposes of measurement equivalent to this, the C. G. S. unit of energy, energy being measured by the amount of work which it represents."—*First Report of the Committee of the British Association for the Selection and Nomenclature of Dynamical and Electrical Units*, Brit. Assoc. Rep. (1873), pt. I., p. 224.

ēr-gā-sil-i-āns, s. pl. [Mod. Lat. *ergasilus* (us) and Eng., &c., suff. -ans.]

Zool.: The family of Ergasilidae.

ēr-gā-sil-i-dæ, s. pl. [Mod. Lat. *ergasilus* (us), and Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Crustaceans, placed under Milne Edwards' order Siphonostomata, now Epizoa or Parasita. Most of the species are parasitic on the gills of fishes, one on those of the lobster.

ēr-gā-sil-i-ūs, s. [Gr. *ergasia* = work, daily labor (?).]

Zool.: A genus of Crustaceans, the typical one of the family Ergasilidae (q. v.).

***ēr-gāt**, ***ēr-gōt**, v. t. [ERGO.] To draw as a conclusion, to infer, to deduce.

"Little doth it concern us what the schoolmen *ergat* in their schools."—*Heuvel*.

***ēr-gā-ta**, s. [Lat., from Gr. *ergatēs*.] A capstan, a windlass.

ēr-gō, adv. [Lat.] Therefore, consequently.

"If black and white horses are devised, pyed horses shall pass by such device: but black and white horses are devised; ergo, the plaintiff shall have the pyed horses."—*Fortescue: Specimen of Scriblerus' Reports*.

ēr-gōn, s. [ERG.] Occurs in composition, as *ergon-eight*.

"The heliogramme is rather less than the *ergon-eight*, being about 36 million ergs."—*Brit. Assoc. Report for 1873*, p. 224.

ēr-gōt, s. [Fr.=a spur, stub of a branch, &c.]

1. Anat.: The hippocampus minor of the cerebellum. [HIPPOCAMPUS.] It is called also the Calcar avis. (Quain.)

2. Farr.: A sort of stub, like a piece of soft horn, about the bigness of a chestnut, which is placed behind and below the pastern joint, and is commonly hidden under the tuft of the fetlock. (Farrier's Dict.)

3. Bot.: A disease affecting rye, corn, maize, and other grasses, one prominent morbid symptom being that the seed, besides becoming black, grows elongated so as to resemble the spur of a cock, whence the name *ergot* comes. When the disease begins first spheclia appear upon the nascent pistil. After a time a viscid fluid exudes from them; then comes the spur already mentioned. In the early stage a fungus, *Oidium abortifaciens*, appears; at a later one, if the plant be kept sufficiently damp, Cordiceps, Purpurea, and other species. The disease is very fatal to the plants attacked, and an

admixture of ergotised with sound grain is dangerous, and sometimes fatal, to man and the lower animals.

4. Mat. Medica: Ergot is used in the form of *Extractum ergotæ liquidum* (liquid extract of ergot), *Infusum ergotæ* (infusion of ergot), and *Tinctura ergotæ* (tincture of ergot). Ergot causes contraction of the minute arteries by acting on their muscular walls, and thereby increasing the systemic blood pressure. It is employed to cause contraction of the uterus in cases of labor. When taken for a long time in small quantities in the form of bread made from ergotised rye, it causes gangrene. In large doses it induces nausea, vomiting, delirium, stupor, and death. (Gayrod: *Mat. Medica*.)

5. Chem.: Ergot contains several principles, which have not been properly isolated, as ergotine, scleromucin, sclerotic acid, &c. Ergot is recognized by yielding, when distilled with caustic potash, a distillate of trimethylamine, N(CH₃)₃.

***ēr-gōt**, v. t. [ERGAT.]

ēr-gōt-ēd, a. [Eng. *ergot*, s.; -ed.] Attacked or diseased with ergot; diseased by the attacks of the fungus *Claviceps purpurea*.

ēr-gōt-ine, s. [English, &c., *ergot*; -ine (Chem.) (q. v.).]

Chem.: An amorphous, feebly bitter substance contained in Ergot (q. v.).

ēr-gōt-ised, a. [Eng. *ergot*; -ised.] Diseased, as rye and other grasses, with ergot.

"We know the terrible effect of *ergotised* grasses, and there may be equally deleterious and more minute fungi which escape notice."—*Field*, Jan. 28, 1882.

ēr-gōt-ism (1), s. [Eng. *ergot*; -ism; Fr. *ergotisme*.]

Botany, Agriculture, &c.:

1. The same as ERGOT (q. v.).

2. Med.: A disease produced by eating grain affected by ergot.

***ēr-gōt-ism** (2), s. [Eng. *ergot*, v.; -ism.] A logical inference, conclusion, or deduction.

"States are not governed by *ergotisms*."—*Browne: Christian Morals*, ii. 4.

***ēr-i-ach**, ***ēr-ic**, s. [Ir. *eric*.] A fine or penalty paid in ancient times in Ireland by any one guilty of murder. [WERE, WITE.]

"By the brehon law or custom no crime, however enormous, was punished with death, but by a fine or pecuniary mulct, which was levied upon the criminal. Murder itself was atoned for in this manner; and each man, according to his rank, had a different rate or value affixed to him, which was called his *eric*."—*Hume: History of Great Britain*, i. 43.

ēr-i-ān, a. [From Lake Erie on the St. Lawrence.]

Geog. & Geol.: Pertaining to Lake Erie.

Erian formation, s.

Geol.: The name given by Principal Dawson to a North American formation believed to be contemporaneous with the British Devonian rocks.

ēr-i-cā, s. [Lat. *erice*; Gr. *ereikē*=health.]

Bot.: A genus of plants, the typical one of the order Ericaceæ. Sepals four; corolla hypogynous, campanulate, or tubular, four-lobed, persistent; stamens eight; ovary, four-celled; style filiform; stigma capitate, dilated, four-lobed; capsule, four-celled, splitting loculicidally into four valves, many-seeded; leaves whorled, rarely scattered, narrow rigid; much-branched shrubs. About 400 species are known.

ēr-i-cā-ē-āns, s. pl. [Mod. Lat. *erica* (a), and Lat. fem. pl. adj. suff. -acæ.]

Bot.: An order of hypogynous Exogens, the typical one of the alliance Ericales. It consists of shrubs or undershrubs, with evergreen leaves, rigid, entire, whorled or opposite, without stipules; calyx four to five-cleft, sometimes separating into four or five pieces, regular or irregular; stamens definite, equal in number to the segments of the corolla, or twice as many, hypogynous or nearly so; ovary surrounded by a disc, many-celled, many-seeded; style one, straight; stigma one, undivided, toothed or three-cleft; fruit capsular, many-celled, with central placentæ; seeds indefinite, minute. Known genera about seventy; species about 1,000. Their great seat is the Cape of Good Hope, but they are found also in Europe and this country, in the Himalayas, and North Asia. In Australia they are absent, their place being supplied by Epacridaceæ (q. v.). The berries of the succulent-fruited kinds are grateful to the taste. The order is divided into two tribes, Ericæ and Rhododendreæ.

ēr-i-cā-ē-ōis, a. [Mod. Lat. *erica* (æ), and Eng., &c., suff. -ous.]

Bot.: Pertaining or relating to the order Ericaceæ (q. v.).

ēr-i-cā-lēs, s. pl. [Mod. Lat. *erica* (a), and Lat. fem. pl. adj. suff. -ales.]

Bot.: An alliance of hypogynous Exogens with dichlamydeous flowers, symmetrical in the ovary,

axile placentæ, definite stamens, and embryo inclosed in a large quantity of fleshy albumen. Lindley includes under it five orders, Humiriaceæ, Epacridaceæ, Pyrolaceæ, Francoaceæ, Monotropaceæ, and Ericaceæ.

ēr-ic-ē-æ, s. pl. [Mod. Lat. *erica* (a), and Lat. fem. pl. adj. suff. -ææ.]

Bot.: A tribe of Ericaceæ. The fruit is loculicidal, rarely septical or berried. The buds are naked. It is divided into two families, Ericideæ and Andromedideæ.

ēr-ic-ē-thi-āns, s. pl. [Mod. Lat. *erichthys*, and Eng., &c., pl. suff. -ans.]

Zool.: The English name for the tribe of unicarriated stomapod crustaceans, the type of which is *Erichthus* (q. v.).

ēr-ic-ē-thys, ***ēr-ic-ē-thūs**, s. [Gr. *erion*=wool, and *ichthys*=fish.]

Zool.: A genus of stomapoda. It contains the Glass Shrimps (q. v.).

ēr-ic-ē-l-dæ, s. pl. [Mod. Lat. *erica* (a), and Lat. fem. pl. adj. suff. -idæ.]

Bot.: A family of Ericæ (q. v.).

ēr-ic-ē-nōne, s. [Latin *erica*, and Eng., &c., (qui)none.]

Chem.: A crystalline substance obtained by the dry distillation of ericaceous plants. The liquid distillate is treated with plumbic acetate and filtered; the filtrate is treated with H₂S gas to remove the lead, and then evaporated to dryness. The residue is purified by sublimation in small quantities at a time between two watch-glasses. It has been found to be identical with hydroquinone, C₆H₄(OH)₂ (14) (q. v.).

ēr-ic-ē-nūs, s. [Lat. *Eridanus*=the river Po.]

Astron.: One of the fifteen ancient Southern Constellations. It winds like a river [etym.] through the sky, from the star of the first magnitude, Achernes, in the constellation Phoenix, past the feet of Cetus, to the star Rigel in Orion.

ēr-i-gōr-ē-āns, s. pl. [Mod. Lat. *erigeron* (on), and Lat. fem. pl. adj. suff. -ææ.]

Bot.: A subtribe of Composite plants, tribe Asteroideæ. Type *Erigeron* (q. v.).

ēr-i-gōr-ē-ōn, s. [Lat. *erigeron*, Gr. *erigerōn* =early, old, the name of a groundsel (Senecio) from its hoary down.]

Bot.: A genus of plants, the typical one of the sub-tribe *Erigeron* (q. v.). It resembles the Aster, but has the ray flowers multiseriate, and the fruit compressed. About eighty species are known. They are from the temperate and colder regions.

***ēr-i-gō-ē-ble**, a. [As if from Lat. *erigibilis*, from *erigo*=to erect (q. v.).] Capable of being erected.

ēr-in, **ēr-in**, s. [Ir.] The native name of Ireland.

"The most ancient Irish called their country *Erin*, or Eire, or Iere; which word imports a western country; and by this name it was called by the old Greek Geographers."—*Campbell: On the Ecc. and Lit. Hist. of Irel.*, p. 14.

ēr-i-nā-ē-l-dæ, **ēr-i-nā-ē-l-dæ**, s. pl. [Lat. *erinaceus*=a hedgehog, and fem. pl. adj. suff. -idæ.]

Zool.: A family of Insectivora. The body above is covered with prickly spines, and may be rolled into a ball, with these defensive weapons presented nearly in every direction; the feet are not suitable for digging. Range in space Europe, Asia, and Africa. Range in time from the Eocene till now. [EOCENE.]

ēr-i-nā-ē-l-ōis, a. [Lat. *erinaceus* (us)=a hedgehog, and Eng., &c., suff. -ous.]

Zool.: Pertaining to a hedgehog.

ēr-i-nā-ē-l-ūs, s. [Lat.]

Zool.: The typical genus of the Erinaceideæ (q. v.). *Erinaceus europæus* is the hedgehog. Range in time from the Miocene till now. [MIOCENE.]

ēr-i-nē-ūm, s. [Gr. *erineos*=of wool, woolen.]

Bot.: An abnormal development of the cells of the epidermis of trees, specially of the Amentaceæ, the Aceraceæ, and the Rosaceæ. The cells so developed used to be mistaken for Fungi. (Griffith & Henfrey.)

ēr-in-ē-gō, s. [ERYNGO.]

ēr-in-ē-ite, s. [From *Erin* (q. v.), and suff. -ite. (Min.) (q. v.).] Named from the erroneous belief that Erinite No. 1 came from Ireland.]

Mineralogy: Two metals.

1. *Erinite of Haydinger*: A subtranslucent brittle mineral, occurring in maxillated crystalline groups, concentric or fibrous. Hardness, 4.5-5. Specific gravity, 4.04. Luster between dull and resinous; color emerald-green. Composition: arsenic acid 33.78, oxide of copper 59.14, water 5.01, alumina 1.77=100.

2. *Erinite of Thomson*: A variety of Montmorel-lonite (q. v.). It is a yellowish-red, clayey mineral, from the Giant's Causeway, Ireland.

bōll, **bōy**; **pōut**, **jōwī**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph** = **f**.

ēr-rin-nys, ē-rin-nys, s. [Lat. *Erinnys*; Gr. *Erinys*. See def. The double *n* came from an erroneous notion that the Greek word had a *nn*, which it has not, at least in the best manuscripts.]

1. *Class. Mythol.*: A Greek avenging deity like the Roman Furies. Then the number was multiplied to three—Tisiphone, Megera, and Alecto.

2. *Zool.*: The name given by Salter to a genus of Trilobites, family Protridæ.

ēr-ī-ō-bō-trý-a, s. [Gr. *erion*=wool, and *botrys*=a cluster or bunch of grapes.]

Bot.: A genus of Pomaceæ. *Eriobotrya japonica*, formerly called *Mespilus japonica*, is the Loquat or Javanese Medlar.

ēr-ī-ō-cāu-lā-qō-ē, s. pl. [Mod. Lat. *ericaucal* (on), and Lat. fem. pl. adj. suff. -acē.]

Bot.: An order of Endogæes, alliance Glumales. It consists of perennial marsh plants with linear cellular spongy leaves sheathing at the base. Flowers in heads, bracteate, unisexual, very minute, glumes two, unilateral, or three; ovary superior, three or two-celled; seeds solitary, pendulous. About 200 species are known. Two-thirds occur in the tropics of America, and half the remainder in Australia. A few are in temperate America, and one in Britain. *Eriocaulon setaceum*, boiled in oil, is used in India as a remedy for itch.

ēr-ī-ō-cāu-lōn, s. [Gr. *erion*=wool, and *kaulos*=the stalk of a plant. Named from the wooly scapes of some species.]

Bot.: Pipewort. A genus of plants, the typical one of the order Eriocaulaceæ. The male flowers are chiefly in the center of the head, the outer perianth-segments subspathulate, the stamens four to six.

ēr-ī-ō-qō-phāl-ē-s, s. pl. [Mod. Lat. *eriocephalus* (us), and Lat. fem. pl. adj. suff. -eæ.]

Bot.: A sub-tribe of Asteraceæ, tribe Senecionidææ.

ēr-ī-ō-qēph-ā-lūa, s. [Greek *erion*=wool, and *kēphalē*=the head.]

Bot.: The typical genus of the sub-tribe Erioccephalæ (q. v.). It contains some South African bushes greatly branched.

ēr-ī-ō-dēn-drōn, s. [Greek *erion*=wool, and *dendron*=tree.]

Bot.: Wool-tree. A genus of Sterculiaceæ, sub-order or tribe Bombacæ, or according to some they are of the order Malvaceæ. The calyx is naked, irregularly five-lobed, with the lobes usually twin; petals five, joined together; filaments divided at the apex into five bundles; stigma five or six-cleft. The genus contains large trees with spongy wood, palmate leaves, and large red, white, or scarlet flowers. About six species are known, five from America, the other from Asia and Africa. The wood is too spongy to be used for building, but it can be made into canoes.

ēr-ī-ō-gōn-ē-s, s. pl. [Mod. Lat. *erigonum* (um), and Lat. fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Polygonaceæ, type Eriogonum.

ēr-ī-ō-g-ō-nūm, s. [Gr. *erion*=wool, and *gony*=the knee, a joint of a plant.]

Bot.: A genus of plants, the typical one of the tribe Polygonaceæ (q. v.).

ēr-ī-ō-lā-nā, s. [Gr. *erion*=wool, and *chlaina*=a cloak; because the calyx is wooly.]

Bot.: A genus of plants, the typical one of the tribe Eriolaneæ (q. v.).

ēr-ī-ō-lā-nē-s, s. pl. [Mod. Lat. *eriolan* (a) (q. v.), and Lat. fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Byttneriaceæ.

ēr-ī-ōm-ē-tēr, s. [Gr. *erion*=wool, and *metron*=a measure.] An instrument for measuring the diameter of small fibers, such as wool, cotton, or flax, by ascertaining the diameter of any one of the colored rings which they produce.

"The *erimeter* is formed of a piece of card or plate of brass, having an aperture of about one-fiftieth of an inch in diameter in the center of a circle of one-half inch in diameter, and perforated with small holes. The fiber or particle to be measured is fixed in a slider, and the *erimeter* being placed before a strong light, and the eye assisted by a lens applied behind the small hole, the rings of colors will be seen. The slider must then be drawn out or pushed in till the limit of the first red and green ring (the one selected by Dr. Young) coincides with the circle of perforations, and the index will then show on the scale the size of the particle or fiber."—*Brewster: Optics*.

ēr-ī-ō-mys, s. [Gr. *erion*=wool, and *mys*=a mouse.]

Zool.: A genus of Chinchillidæ. *Eriomys laniger* is the Chinchilla.

ēr-ī-ōph-ēr-ūm, s. [Gr. *erion*=wool, and *phoros*=bearing.]

Botany: Cotton-grass. A genus of Cyperaceæ (Sedges), tribe Scirpæ. It consists of perennial tufted herbs, with many-flowered spikelets; the glumes imbricated on every side, and several hypogynous bristles, becoming very long and silky. The silk or cotton from an English species of the

genus has been made into paper and the wicks of candles or used for stuffing pillows. The immature leaves of a Himalayan species, *E. comosum* or *canabinum*, are used for rope-making.

ēr-rīph-ī-a, s. [Lat. *eriphia*; Gr. *erepheia*=an unknown plant.]

Zool.: A genus of decapod short-tailed Crustaceans. *Eriphia spinifrons* is widely diffused in the different seas.

ēr-rīq-mā, s. [Gr. *erisma*=a cause of quarrel; *erizō*=to strive; *eris*=strife.] So called from the anomalous character of the structure described under No. 1, and the genus placed under No. 2.]

Botany: 1. The rachis or axis of grasses. 2. A genus of South American Vochyaceæ, *Erisma japura*, is the Japura of Brazil, a fine tree, 80 to 120 feet high.

***ēr-ris-tic, *ēr-ris-tick, *ēr-ris-tic-al, a. & s.** [Gr. *eristikos*=pertaining to strife; *eris*=strife.]

A. As adj. (of both forms): Controversial; pertaining to or of the nature of disputation or controversy.

B. As subst. (of the form Eristic): A controversialist.

"An Eucithe as well as an Eristick."—Gauden: *Tears of the Church*, p. 93.

***ēr-mīne, *er-mīne, *er-min, *er-myn, s. & a.** [From O. Fr. *ermine* (Mod. French *hermine*, Prov. *ermīn*). In Sw., Dan. & Ger. *hermelin*; Dut. *hermelijn*; Sp. *armīño*; Port. *arminho*; Ital. *armellino*, *ermellino*=the ermine or its fur. Low Latin *armelinus*, *armellina*, *hermelina* and *Pellis armenia*=the Armenian rat (*Mus armenius*, or *Mus ponticus*). The etym. which connects the ermine through the Span., the Port. and the Low Latin with the Armenian mouse, to which the ermine has no zoological affinity, was first made by Ducange; it was adopted by Littré, and is not directly controverted by Skeat.]

A. As substantive: 1. Ordinary Language:

1. Literally: (1) An Armenian.

"Ne non Ermine ne Egipciene." Chaucer: C. T., 15, 824.

(2) The fur of the animal described under II. 1, prepared for use by having the black tips of the tail inserted at regular intervals in the white fur of the body, so as to contrast with it. It is obtained from Russia in Europe, Norway, Siberia, Lapland, and also, though to a less extent than formerly, in North America.

(3) The animal described under II. 1.

2. *Fig.*: The office, position, or dignity of a judge (from his state robe being ornamented or bordered with ermine.)

II. Technically:

1. *Zool.*: The Ermine-weasel, a small mammal, *Mustela erminea*. The body in summer is reddish-brown above and white beneath, and in winter is wholly white, except the extremity of the tail, which all the year round is black. The more northerly the latitude and the severer the individual winter is, the purer is the white of the animal's fur. It is found in the arctic and temperate parts

of Europe, becoming more abundant as one travels northward. It occurs also in the corresponding parts of North America, ranging as far south as the middle of the United States. It frequents stony places and thickets, and is active, fierce, and blood-thirsty. It is called also the stoat (q. v.).

2. *Her.*: One of the furs, represented by black spots of a particular shape on a white ground.

B. As adjective:

1. Formed in whole or in part of ermine fur.

2. In any way pertaining to the animal described under II. 1.

3. White in color. [ERMINEMOTH.]

I. Ordinary Language:

1. The act of eating or gnawing away; corrosion.
2. The state of being eaten or gnawed away; corroded.

"As sea-salt is a sharp solid body, in a constant diet of salt meat, it breaks the vessels, produceth erosions of the solid parts, and all the symptoms of the sea-scurvy."—*Arbuthnot*.

II. Med.: A gradual eating away or destruction of a part of the body by ulceration, or by increased action of the absorbents, whether spontaneous or not.

erosion theory or hypothesis.

Geol.: A theory or hypothesis which attributes the excavation of lakes chiefly to the erosive power of water in the form of glaciers, instead of regarding them as due to the existence in the spots where they occur of cracks or fissures in the strata. Much support is lent to the erosion hypothesis by glancing at a map of a country near the Arctic circle, like Sweden, or one full of high mountains like Switzerland, in which glaciers have scope for action, and noting how lakes abound.

ē-rō-gion-ist, *s.* [Eng. *erosion*; -*ist*.]

Geol.: One who holds the Erosion theory or hypothesis as to the origin of mountain tarns or lakes. [EROSION THEORY.]

"The Erosionists, or upholders of the efficacy of superficial waste."—*A. Geikie*, in *Macmillan's Magazine*, July, 1881, p. 230.

***ē-rō-sive**, *a.* [Lat. *erosus*, pa. par. of *erodo*.] Tending to eat away or corrode; corrosive.

ē-rō-gō, *pref.* [Lat. *erosus*.] [EROSE.]

Bot., &c.: Erode, eroded, as if gnawed or bitten. eros-dentate, *a.*

B. As substantive:

***I. Ord. Lang.**: A rogue, a vagabond, a street Arab.

II. Technically:

*1. *Astron.*: A planet, as distinguished from a fixed star.

2. *Geol.* (chiefly pl.): The same as *ERRATIC BLOCKS* (q. v.).

erratic blocks.

Geol.: Blocks torn from the rocks of which they constituted a part, and transported to long distance by the action either of ice or water. If floated by ice or so carried along by descending glaciers as not to rub against the ground during their course, erratic blocks retain their salient angles uninjured; but if they have been rolled over and over again along a shallow sea-bed or shore by the action of furious waves, they become quite rounded. The occurrence of such blocks in the arctic and temperate zones of both hemispheres, their frequency increasing toward the poles, is one of the distinguishing characteristics of the Glacial Period (q. v.). Such mountains as the Alps are great centers whence erratic blocks descend. As a rule erratic blocks differ in composition from the rocks on which they are found lying. This fact enables the geologist to decide that any particular block or boulder is an erratic one, and trace out the spot from which it came and the direction of the current which brought it to its present resting-place. The transport of erratic blocks has not in general depended on the present distribution of hills, valleys, sea, and land; they have crossed valleys, gulfs, and even seas, and

2. A wandering or deviation from the truth; a mistake, a misapprehension; a mistaken judgment or opinion.

***3. A sin, a transgression of law or duty; a crime, a fault.**

"Blood which he offered for himself and for the errors of the people."—*Heb. ix. 7.*

4. A mistake in writing, printing, speaking, &c.; an inaccuracy.

5. False doctrine or teaching.

"In Religion,
What damned error, but some sober brow
Will bless it!"—*Shaksp.: Mer. of Venice*, iii. 2.

fāte, **fāt**, **fāre**, **amidst**, **whāt**, **fāl**, **fāther**, **wē**, **wēt**, **hēre**, **camēl**, **hēr**, **thēre**; **plne**, **pīt**, **sire**, **sīr**, **marīne**; **gō**, **pōt**, **or**, **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūb**, **cūre**, **unite**, **cūr**, **rūle**, **fūll**; **trȳ**, **Sȳrian**. æ, œ = ē; ey = ā. qu = kw.

II. Technically:

1. Astron.: The difference between the positions of any of the heavenly bodies as determined by calculation and by observation.

2. Law: A mistake in the proceedings of the court of record upon matters of law, entitling the party grieved to have the case reviewed. (*Writ of Error*.)

3. Math.: The difference between the result arrived at by any operation and the true result.

4. Hor. (of a clock): The difference between the time to which a clock really points and that which it was intended to indicate.

¶ Writ of Error:

Law: An appeal from an inferior court of record assigning error in the proceedings. It lies only upon matter of law arising upon the face of the proceedings, so that no evidence is required to substantiate or support it.

¶ (1) Crabb thus discriminates between *error*, *mistake*, and *blunder*: "Error is the lot of humanity; into whatever we attempt to do or think error will be sure to creep; the term therefore is of unlimited use; we have errors of judgment; errors of calculation; errors of the head, and errors of the heart. The other terms designate modes of error, which mostly refer to the common concerns of life: mistake is an error of choice; blunder an error of action; children and careless people are most apt to make mistakes; ignorant, conceited, and stupid people commonly commit blunders; a mistake must be rectified; in commercial transactions it may be of serious consequence; a blunder must be set right; but blunders are not always to be set right; and blunders are frequently so ridiculous as only to call for laughter."

(2) He thus discriminates between *error* and *fault*: "Error respects the act; fault respects the agent: the error may lie in the judgment or in the conduct; but the fault lies in the will or intention; the errors of youth must be treated with indulgence; but their faults must on all accounts be corrected; error is said of that which is individual and partial; fault is said likewise of that which is habitual: it is an error to use intemperate language at any time; it is a fault in the temper of some persons who cannot restrain their anger." (*Crabb: Eng. Synon.*)

***ēr-rōr**, *v. t.* [ERROR, *s.*] To determine or to decide to be erroneous; as the decision of a court.

***ēr-rōr-fūl**, ***ēr-rōr-fūll**, *a.* [Eng. *error*; *-full*.] Full of error; mistaken, wrong.

***ēr-rōr-ist**, *s.* [Eng. *error*; *-ist*.] One who is in error; one who encourages or promotes error.

***ēr-rōr**, *s.* [ERROR, *s.*]

ērs, *s.* [Fr. & Prov. *ers*; Sp. *ierro*; Ital. *erro*; Lat. *errum* (q. v.).]

Bot.: *Ervm erulia*, the Bitter Vetch.

ers bitter-vetch, *s.*

Bot.: A designation used by Skinner. Probably *Ervm erulia*.

ērs'-bȳ-ite, *s.* [Sw. *ersbyit*.]

Min.: A doubtful mineral, called also Anhydrous Scolecite. It is monoclinic, of a white color and vitreous luster, and a hardness of 6. Dana thinks that it may be altered orthoclase.

ērs'-mērt, *s.* [ARSE-SMART.] *Polygonum hydroperum*.

ērs'-wōrt, *s.* [Eng. *arse*, and *wort*.]

Bot.: The herb Mouse-ear. (*Wright*). Mouse-ear is *Hieracium pilosella*. (*Britten & Holland*.)

ērse, *s.* [A corrupt. of Irish (q. v.).] The name given to the language of the Gaels or Celts in the Highlands of Scotland, as being of Irish descent. It is called by the Highlanders themselves Gaelic.

ērsh, **ēarsh**, *s.* [A corrupt. of *eddish* (q. v.).] Stubble.

ērst, *adv.* [A. S. *ærest*, superlative of *ær*=soon.] [ERE.]

1. First; at first; at the beginning.

2. Once; formerly.

3. Before; previously; till then; till now, hitherto.

"Forth skipped the cat, not now replete
As erst with airy self-conceit."
Cowper: Retired Cat.

¶ At erst:

1. At length.

"It's now at erst become a stonier one."
Spenser: F. Q., V. i. 2.

2. At present.

"Left both bare and barren now at erst."
Spenser: Shepherd's Calendar (Dec.).

***ērst-while**, *adv.* [Eng. *erst*, and *while*.] Before, till then, till now, hitherto.

"Those thick and clammy vapors which erstwhile ascended in such vast measures."—*Glanvill: Preexistence of Souls*, p. 142.

***erthe-calle**, *s.* [EARTH-CALL.]

***erthe-smok**, *s.* [EARTH-SMOKE.]

***ēr-ā-bēs-gēnce**, ***ēr-ā-bēs-gēn-gȳ**, *s.* [Fr. *erubescence*, from Lat. *erubescencia*, from *erubescens*, *pr. par.* of *erubescere*=to grow red; *incept. form* of *rubeo*=to be red; *ruber*=red.] The act of becoming red; redness.

***ēr-ā-bēs-gēnt**, *a.* [Lat. *erubescens*, *pr. par.* of *erubescere*.]

1. Ord. Lang.: Reddish; somewhat red; inclined to redness; blushing.

2. Bot.: Reddish, blush-colored. (*Parton*.)

ēr-ā-bēs-çite, *s.* [Lat. *erubescere*=to become red, to blush, and *suff. -ite* (Min.) (q. v.).]

Min.: The same as **BORNITE**. (*Dana*.) The *Brit. Mus. Cat.* adopts the name *erubescite*, and makes *bornite* and *bornite* two of its synonyms.

ēr-rū-qa, *s.* [Lat.=(1) the caterpillar of the cabbage butterfly, (2) the plant genus here defined.]

Bot.: A genus of Crucifers, family Brassicidæ. The seeds have a burning taste, and when applied to the skin cause blisters. *Eruca sativa*, formerly called *Brassica eruca*, is used in the south of Europe, its native region, as a salad, the young and tender roots alone being chosen, for when old it has an unpleasant taste and smell. The whole plant has been used as a sialogogue.

ēr-ā-cār-l-ā, *s.* [From Lat. *eruca*=a kind of colewort, *Eruca sativa*, to which it is remotely akin.]

Bot.: A genus of Cruciferæ, the typical one of the family *Eurucidæ*.

ēr-ā-cār-l-dæ, *s. pl.* [Mod. Lat. *erucar*(ia), and Lat. *fem. pl. adj. suff. -idæ*.]

Bot.: A family of Crucifers, tribe *Spiroloboæ*.

ēr-rū-çic, *a.* [Mod. Lat. *eruc*(a); Eng. *suff. -ic*; Gr. *ereggomai*=to vomit.] Pertaining to, contained in, or derived from the *Eruca* (q. v.).

erucic-acid, *s.*

Chem.: $C_{21}H_{41}COOH$. A monatomic fatty acid belonging to the acrylic series, also called *Brassic acid*. It occurs in colza oil expressed from the seeds of *Brassica campestris*, and in the fat oil of mustard seed, *Sinapis alba*. The colza oil is saponified with litharge, and the oleate of lead removed by digesting with ether; the residue is decomposed by hydrochloric acid, and crystallized from alcohol. Erucic acid forms long white needles, which melt at 34°. It is insoluble in water. It unites freely with bromine, forming a crystalline dibromide, $C_{22}H_{42}Br_2O_2$, which melts at 42°.

***ē-rūct**, *v. t.* [Lat. *eructo*; *e*=ex=out, and *ructo*=to belch.] To belch out; to eructate.

***ē-rūc-tāte**, *v. t.* [Lat. *eructatus*, *pa. par.* of *eructo*.]

1. Lit.: To eject as wind from the stomach; to belch out.

"They would make us believe in Syracuse, now Messina, that Ætna in times past hath eructated such huge gobbets of fire."—*Howell: Letters*, I. i. 27.

2. Fig.: To belch out; to give vent to.

"Though he should . . . daily eructate his invectives against the most respectable men."—*Knorr: Essays*, No. ix.

***ē-rūc-tā-tion**, *s.* [Lat. *eructatio*, from *eructatus*, *pa. par.* of *eructo*.]

1. The act of belching; a belch.

"Cabbage . . . is greatly accused for provoking eructations."—*Evelyn: Discourse of Sallets*.

2. That which is ejected from the stomach by belching.

"The signs of the functions of the stomach being depraved, are eructations, either with the taste of the aliment, acid, inodorous, or fetid."—*Arbuthnot*.

3. Any sudden bursting out or ejection of wind or matter.

"Thermæ are hot springs, or fiery eructations; such as burst forth of the earth during earthquakes."—*Woodward*.

***ē-rū-di-āte**, *v. t.* [ERUDITE.] To teach, to instruct.

ēr-ā-dite, *a.* [Lat. *eruditus*, *pa. par.* of *erudio*=to free from rudeness, to cultivate, to teach; *e*=ex=out, away, and *rudis*=rude.] Instructed, taught, learned, well-read, well-informed.

"With the fore-mentioned treasures of erudite pamphlet-tracts, there appeared a far more considerable collection of valuable little treatises."—*Critical Hist. of Pamphlets* (1715), p. 6.

ēr-ā-dite-ly, *adv.* [Eng. *erudite*; *-ly*.] In an erudite, learned manner; with erudition.

ēr-ā-dite-ness, *s.* [Eng. *erudite*; *-ness*.] The quality of being erudite; erudition.

ēr-ā-dī-tion, *s.* [Lat. *eruditio*, from *eruditus*, *pa. par.* of *erudio*; Fr. *érudition*; Sp. *erudición*; Ital. *erudizione*.]

1. The act or process of instructing or improving.

"The erudition of her mind is much more to be regarded."—*Spectator*, No. 66.

2. Learning; knowledge gained by study; scholarship.

"He talks of light, and the prismatic hues,
As men of depth in erudition use."
Couper: *Charity*, 391, 392.

† For the difference between *erudition* and *knowledge*, see KNOWLEDGE.

ēr-ū-gāte, *a.* [Lat. *erugatus*, pa. par. of *erugo*; *e*=away, out, and *rugatus*=wrinkled; *ru*=a wrinkle.] Free from wrinkles; smooth, unwrinkled.

ēr-rū-gī-noūs, *a.* [Lat. *ærginosus*, from *cæro*=the rust of copper, *verdigris*; *æs* (gen. *æris*)=copper.] [ÆRUGINOUS.] Partaking of the substance or nature of copper.

ēr-rūm-pent, *a.* [Lat. *erumpens*, pr. par. of *erumpo*=to burst or break out; *e*=out, and *rumpo*=to break, to burst.]
Bot.: Breaking out.

ēr-rūn-dā, ēr-rūn-dī, *s.* [Maharatta & Hind. *erunda*=the castor oil plant; Maharatta *erundel*=castor oil.] For def. see etym. (Anglo-Indian.)

ēr-rūpt, *v. t. & i.* [Lat. *eruptus*, pa. par. of *erumpo*=to burst or break out.]

A. Trans.: To throw out or eject with violence; to emit violently.

"Erupted, sedimentary, metamorphosed, conglomerated aggregates of mineral matter."—S. Highley, in Cassell's *Technical Educator*, pt. ii., p. 358.

B. Intrans.: To burst or break out suddenly; to give vent to eruptions.

ēr-rūp-tion, *s.* [Lat. *eruptio*, from *eruptus*, pa. par. of *erumpo*; Fr. *éruption*; Sp. *erupcion*; Ital. *eruzione*.]

1. Ordinary Language:

1. The act of bursting or breaking out from any confinement or restraint; a sudden burst or emission.

"Anon with black eruption from its jaws
A night of smoke, thick driving, wave on wave
In stormy flow." Mallet: *The Excursion*, i.

2. In the same sense as II. 1.

3. That which bursts or breaks out. [II. 2.]

"From the volcanoes gross eruptions rise."
Garth: *Dispensary*, i. 109.

*4. A sudden excursion of a hostile nature.

"The confusion of things, the eruptions of barbarians
... did all turn to account for him."—Barrow: *Of the Pope's Supremacy*.

*5. A violent exclamation or ejaculation.

"To his secretary, whom he laid in a pallet near him for natural ventilation of his thoughts, he would, in the absence of all other ears and eyes, break out into bitter and passionate eruptions."—Wotton: *Life of Buckingham*.

II. Technically:

1. Medical:

(1) The breaking out upon the skin of vesicles, pustules, &c., ultimately becoming crusts or scabs. In some cases fungi have been found in the center of the vesicle or other morbid growth.

(2) The exanthemata thus produced, as the vesicles in small-pox or the rash in scarlet fever.

"Unripe fruits are apt to occasion foul eruptions on the skin."—Arbuthnot.

2. *Geol.*: An outburst of fluid lava mixed with stones, scoræ, dust, &c., from a volcanic crater or other vent. Sir Charles Lyell computes that about 2,000 such eruptions (variously located) may occur in the course of a century, or an average of twenty every year. [VOLCANO.]

ēr-rūp-tive, *a.* [Fr. *éruptif*; Sp. *eruptivo*, from Lat. *eruptus*, pa. par. of *erumpo*.]

1. Bursting forth; breaking out.

"To the startled eye the sudden glance
Appears far south eruptive through the cloud."
Thomson: *Summer*, i. 129, 1, 130.

2. Attended with eruption or rash; producing eruptions.

"It is in the nature of these eruptive diseases in the state to sink in by fits, and to re-appear."—Burke: *Regicide Peace*, let. I.

3. Produced by eruption; as, *eruptive rocks* (q. v.).

eruptive rocks:

Geol.: The same as volcanic rocks, using the latter term to include those of all geological formations, and not simply those sent forth by recent volcanoes. Basalt and greenstone, equally with lava, are considered eruptive rocks. [VOLCANIC.]

ēr-vā-lēn-tā, *s.* [Lat. *Ervum lens*, the botanical name of the lentil.] The farina or meal of the common lentil, prepared in a special manner. Its use as a food is said to promote the peristaltic action of the bowels. The same as REVALENTA (q. v.).

ēr-vīl'-ī-a, *s.* [Lat. *ervilla*=the bitter vetch.]

1. *Bot.*: An obsolete genus of papilionaceous plants containing *Ervilla sativa*, the species generally called *Ervum ervilla*. [ERVUM.]

2. *Zool.*: Lentil-shell. A genus of bivalve mollusks, family Tellinidae. Two recent species are known. Distribution: West Indies, Britain, Canaries, Mediterranean, and the Red Sea. (Woodward.)

ēr-vūm, *s.* [Lat.=the bitter vetch, *Ervum ervilla* (def.).]

Bot.: A genus of papilionaceous plants, tribe Viciæ. It is akin to Vicia, but differs in the sharp, equal segments of the calyx, &c. The leaves are generally pinnate and terminate in tendrils. *Ervum lens* is the lentil (q. v.). *Ervum ervilla* is the Bitter Vetch. Its seeds mixed with flour and made into bread produce weakness of man's limbs, and are said to render horses paralytic.

ēr-rŷc'-ī-bē, *s.* [From *erima-tali*, its native name in the Malayalam language.]

Bot.: An anomalous genus of perigynous Exogones, placed by Lindley doubtfully at the end of the Convolvulaceæ, and by Endlicher made the type of an order which he calls Erycibæ. Mr. W. Carruthers, F. R. S., states that it nearly approaches Convolvulaceæ, but differs in having a sessile radiating stigma like that of a poppy. This character exists also in Ebenaceæ, to which in other respects Erycibæ seems not very closely akin. The species are from tropical Asia.

ēr-rŷc'-ī-bē, *s. pl.* [Mod. Lat. *erycib(e)*, and Lat. fem. pl. adj. suff. -eæ.]

Bot.: An order of plants established by Endlicher for the reception of the genus Erycibæ (q. v.).

ēr-rŷc'-ī-nā, ēr-rŷc'-ī-nā, *s.* [Erycina, a name of Venus, from Mount Eryx, now San Giuliano, a mountain in Sicily, where she had a temple.]

1. *Class. Myth.*: [See etym.]

2. *Entom.*: A genus of Butterflies, the typical one of the family Erycinidæ (q. v.).

*3. *Zool.*: An old genus of Tellinidæ.

ēr-rŷc'-ī-nā, *s. pl.* [Lat. *Erycin(a)*, and fem. pl. adj. suff. -ideæ.]

Entom.: Dryads. A family of Butterflies. The males have only four perfect legs, the females have six. In other respects they resemble the Lyceinidæ (Argus Butterflies) (q. v.).

ēr-rŷn-gī-ūm, *s.* [Lat. *eryngion*; Gr. *erynggion*, dimin. of Latin *erynge*=Greek *erynggē*=the eryngo (q. v.).]

Bot.: Eryngo. A genus of Umbelliferous plants, family Saniculidæ. There is an involucre in many leaves; the fruit is ovate, clothed with chaffy scales or bristles. About 100 species are known, most of them from South America. [ERYNGO.]

ēr-rŷn-gō, ēr-rŷn-gō, *s.* [ERYNGIUM.]

1. *Bot.*: The genus Eryngium. The Sea Eryngo is *Eryngium maritimum*, the Field Eryngo *E. campestris*. (Benth.)

2. *Phar.*: [ERYNGO-ROOT.]

eryngo-root, *s.*

Phar.: The root of *Eryngium maritimum*, or Sea-holly, prepared as a sweetmeat. Its aphrodisiac qualities, either real or supposed, are mentioned by dramatists and poets from Jonson to Prior.

ēr-rŷ-ōn, *s.* [Greek *eryōn*=dragging along the ground, pr. par. of *eryō*.]

Paleont.: A genus of macrurous Crustaceans found in the Lias and Oolite, being most abundant in the Solenhofen Slates, which are Middle Oolite.

ēr-rŷs'-ī-mūm, *s.* [Lat. *erysimum*; Gr. *erysimon*=the hedge mustard.]

Bot.: Treacle-mustard. A genus of Crucifera, family Sisymbriidæ. The pod is four-sided, its valves one-nerved. There are generally two hypogynous glands opposite the placenta and between the longer stamens. About seventy species are known.

ēr-rŷs'-ī-p-e-las, *ēr-rŷs'-ī-p-e-ly, *s.* [Lat., from Gr. *erysipelas*=a redness on the skin; Fr. *érysiplé*.]

Med.: A peculiar inflammation of the skin, spreading with great rapidity; the parts affected are of a deep red color, with a diffused swelling of the underlying cutaneous tissue and cellular membrane, and an indisposition to take on healthy action. It is called by John Hunter the adhesive inflammation. Erysipelas is divided into: (1) Simple, where the skin only is affected; (2) Phlegmonous, where the cutaneous and areolar tissue are both attacked at the same time, going on to vesication, then yellowness, and death of the skin; death of the areolar tissue may follow, constituting malignant or gangrenous erysipelas; (3) Œdematous, or sub-cutaneous, of a yellowish, dark brown, or red color, occurring about the eyelids, scrotum, or legs, usually in broken-down dropsical constitutions. The first is superficial and sthenic, the other forms more deep-seated and asthenic, and require

vigorously active treatment by free incisions before the formation of pus, as it is too late to wait till pus has actually formed. Some physicians speak highly of poultices of phytolacca leaves, while others recommend topical applications of some form of iron in tincture. The constitutional treatment is mainly restorative: the more asthenic the case the sooner should perchloride of iron be given, from 20 to 30 minims of the tincture every two or three hours, and continued during convalescence to insure a cure.

ēr-rŷ-sī-pēl'-a-tōid, *a.* [Gr. *erysipelas* (genit. *erysipelatos*)=erysipelas, and *eidos*=form, resemblance.] Resembling erysipelas.

ēr-rŷ-sī-pēl'-a-toūs, *a.* [Gr. *erysipelas* (genit. *erysipelatos*)=erysipelas, and Eng., &c., suff. -ous.]
Med.: Having the nature of erysipelas, or in some way resembling it.

"A person, who for some years had been subject to erysipelatous fevers."—Bp. Berkeley: *Stiris*, § 6.

ēr-rŷ-sī-pēl'-ōūs, *a.* [ERYSIPELAS.] Eruptive; pertaining to, resembling, or partaking of the nature of erysipelas (q. v.).

ēr-rŷs'-ī-phē, *s.* [Gr. *erysibē*=mildew.]

Bot.: An old genus of Fungi now much reduced in extent by the removal from it of various species now ranked under distinct genera. When undeveloped they are called Oidia (q. v.).

ēr-rŷth'-a-cæ, *s.* [ERYTHACUS.]

ēr-rŷth'-a-cī-næ, *s. pl.* [Lat. *erythac(us)*, and fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of Sylviidæ or Warblers. It contains the Robins. They are scattered over both hemispheres.

ēr-rŷth'-a-cūs, ēr-rŷth'-a-cæ, *s.* [Gr. *erythainō*=to dye red, to cause to blush, in allusion to the red plumage of the Robin Redbreast, a species of the genus.]

Ornith.: The typical genus of the sub-family Erythacinæ (q. v.).

ēr-rŷ-thē-mæ, *s.* [Gr. *erythema*=redness; *ereuthos*=red.]

Med.: Uniform redness, with puffiness of the skin, seldom accompanied by general febrile disturbance, and not extending to the areolar tissue. The chief variety is *Erythema nodosum*. The redness and bumps gradually subside. It is commonest in young females, but is also seen in feeble boys. It is often a symptom of some other disease, as in measles or scarlatina, in which case active treatment of it may kill the patient; but if otherwise, painting with nitrate of silver generally induces a favorable resolution.

ēr-rŷth'-ē-māt'-ic, *a.* [Eng., &c., *erythema* (q. v.); *t* connective, and suff. -ic.]

Med.: A term applied to skin affections marked by or associated with redness, specially relating to erythema, erysipelas, and the more common Rose-rash and Nettle-rash.

ēr-rŷ-thēm'-a-toūs, *a.* [English, &c., *erythema* (q. v.); *t* connective, and suff. -ous.]

Med.: The same as ERYTHMATIC (q. v.).

ēr-rŷth-ræ'-a, *s.* [Gr. *erythraios*=red.]

Bot.: A genus of Gentianaceæ, tribe Gentianeæ. The calyx is five-cleft; the corolla funnel-shaped and withering, its limb short; stigmas two; capsule linear, two-celled. Known species about fifteen.

***ēr-rŷth-ræ'-an**, *a.* [Gr. *erythros*=red; Eng. adj. suff. -an.] Of a red color.

Erythraean main, *s.*

Geog.: The Red Sea.

"The ruddy waves he cleft in twain
Of the Erythraean main."
Milton: *Psalm cxi*, 46.

† The Erythraean Sea mentioned by Herodotus included not only the Red Sea or Arabian Gulf, but also the Indian Ocean. Xenophon, in the *Cyropædia*, applies the name to the Persian Gulf.

ēr-rŷth'-ric, *a.* [Gr. *erythros*=red; -ic.] See the compound.

erythric-acid, *s.* [ERYTHRIN.]

ēr-rŷth'-rin, ēr-rŷth'-rine, *s.* [Gr. *erythros*=red; Eng., &c., suff. -in, -ine (Chem.).]

1. *Chem.* (chiefly of the form erythrin): Erythric acid, erythritic orsellinate, $C_{10}H_{10}O_{10}$. It is contained in *Roccella fusiformis*, and extracted by boiling with milk of lime. It forms crystals but very slightly soluble in hot water, reddened by ammonia in the open air, and is resolved by boiling with baryta water into orsellinic acid and pieroythrin, $C_{12}H_{12}O_{12}$, which by further boiling with baryta water is converted into orcin, $C_7H_6O_2$, erythrite, $C_4H_8O_4$, and CO_2 . The orcin is readily soluble in strong alcohol, while the erythrite is only slightly soluble.

2. *Min.* (of the form erythrine): The same as ERYTHRITE (q. v.).

bōl, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist, ph=f.

ē-ryth-rin-ā, s. [Modeled on Gr. *erythros*, which, however, is a red kind of mullet, and not a plant.]

Bot.: Coral Tree. A genus of papilionaceous plants, the typical one of the sub-tribe Erythrine (q. v.). The species consist of shrubs or trees with trifoliate leaves or long stalks and blood-red flowers. Found in the tropics. *Erythrina monosperma* furnishes gum lac (q. v.).

ē-ryth-rine, s. [ERYTHRIN.]

ē-ry-thrī-nē-ā, s. pl. [Mod. Lat. *erythrin*(a), and Lat. fem. pl. adj. suff. -eē.]

Bot.: A sub-tribe of Phaseoleae (q. v.).

ē-ryth-rī-nūs, s. [Gr. *erythros*=red kind of mullet.]

Ichthy.: A name given by Johnston and Willoughby to what is now called *Pagellus erythrinus*. [PAGELLUS.]

ē-ryth-rīte, s. [Gr. *erythros*=red, and Eng. suff. -ite (Chem.) (q. v.).]

1. Chem.: Erythrol, erythromannite, erythroglucin, phycite, $C_4H_6O_4$. A tetratomic alcohol, existing ready formed in the alga, *Protoecoccus vulgaris*; also by boiling erythrin with baryta water. Erythrite crystallizes in large colorless prisms, melting at 120°, which are readily soluble in water, insoluble in ether, and sparingly in cold alcohol. Heating with concentrated hydrochloric acid, converts it into secondary butyl iodide, $CH_3CH(CH_3)CH_2CH_3$. Fused with caustic potash it yields oxalic and acetic acids. Erythrite has a sweet taste; it does not ferment with yeast. It is optically inactive. It unites directly with acids forming ethers. It does not reduce an alkaline solution of a cupric salt.

2. Min.: A monoclinic mineral; its hardness 1½ to 2½; specific gravity, 2.9; luster on the different faces of the crystal from dull to adamantine; color red or greenish-gray. Composition: Arsenic acid, 38.43; oxide of cobalt, 37.55; water, 24.02. Earthy cobalt bloom is a variety of it, consisting of cobalt bloom with free arsenic acid. Found abroad in Saxony, Thuringia, Baden, Norway, &c.; in Cornwall and Cumberland, England, and near Killarney, Ireland. (*Dana*.) Called also Erythrine (q. v.).

ē-ryth-rīt-ic, a. [Eng. *erythrit*(e), and suff. -ic (Chem.) (q. v.).] Pertaining or relating to Erythrite (q. v.).

erythritic-acid, s.

Chem.: A monobasic tetratomic acid, $C_4H_6O_5$, or $CH_3(OH) \cdot CH(OH) \cdot CH(OH) \cdot COOH$. Erythritic acid, also called erythroglucinic acid, is obtained by the oxidation of erythrite with platinum black in an aqueous solution. It forms a deliquescent mass, which is soluble in water and in alcohol. It forms salts.

ē-ryth-rō, pref. [Lat. *erythros*; Gr. *erythros*=red, of the color of nectar and wine; cogn. with Lat. *ruber*, *rutilis*, and with Sansc. *rudhiram*=blood, and *rōhitas*=red.]

Bot., &c.: Red, pale red.

ē-ryth-rō-gēn, s. [Greek *erythros*=red, and *gēnnāō*=to produce.]

Chem.: A substance originally colorless, but reddened by acids, supposed by Hope to be contained in flowers.

ē-ryth-rō-glū-clin, s. [Pref. *erythro-*, and Eng., &c., *glucin*.] [ERYTHRITE.]

ē-ryth-rō-glū-clin-ic, a. [Pref. *erythro-*, and Eng. *glucin* (q. v.).] (See the compound.)

erythroglucinic-acid, s.

Chem.: Another name for Erythroleic-acid (q. v.).

ē-ryth-rōid, a. & s. [Gr. *erythroideōs*=of a ruddy look; *erythros*=red, and *eidos*=form; Fr. *erythroide*.]

A. As adj.: Of a red color.

B. As substantive:

Anat.: The reddish muscular envelope of the testicle.

ē-ryth-rō-lē-ic, a. [Pref. *erythro-*, and Eng., &c., *oleic* (q. v.).] (See the compound.)

erythroleic-acid, s.

Chem.: A purple semi-fluid substance, said to exist in archil.

ē-ryth-rō-lein, s. [Pref. *erythro-*, and Eng., &c., *olein* (q. v.).]

Chem.: $C_{26}H_{52}O_4$. An oily liquid extracted by Kane from archil and litmus. (*Larousse*.)

ē-ryth-rō-lit-min, s. [Pref. *erythro-*; Eng. *litm*(us), and suff. -in (Chem.) (q. v.).]

Chem.: $C_{26}H_{52}O_{13}$. A red coloring matter extracted by Kane from litmus. (*Larousse*.)

ē-ryth-rō-mān-hite, s. [Pref. *erythro-*, and Eng. *mannite*.] [ERYTHRITE.]

ē-ryth-rō-ni-ūm, s. [Gr. *erythronion*=a plant of the satyrium kind (*Dioscorides* in *Liddell & Scott*). A Satyrium is a kind of Orchid.]

Bot.: A genus of widely diffused Liliaceae, tribe Tulipeae. The Tartars are said to reckon one species, *Erythronium dens canis*, the Dog's-tooth Violet, as an article of diet. It is found in the south of Europe. Its bulbs have been regarded as aphrodisiac and anthelmintic. The leaves and roots of *E. americanum* are emetic.

2. Min.: Vanadite (q. v.).

ē-ryth-rō-phlēs-ūm, s. [Gr. *erythros*=red, and *phlois*=bark.]

Bot.: A genus of leguminous plants, sub-order Mimoseae, tribe Parkiaceae. *Erythrophloeum guineense* is an ornamental tree about 120 feet high growing in Western Africa. The natives call it gregre tree—i. e., ordeal tree, from the use to which its abundant red juice is put. It is also called *Azelia grandis*. (*Paxton*.)

ē-ryth-rō-phlō-ine, s. [Mod. Latin *erythrophloeum*(um), and Eng. suff. -ine (Chem.) (q. v.).]

Chem.: A poisonous base, extracted by alcohol from the bark of *Erythrophloeum guineense*, a tall leguminous tree, growing on the west coast of Africa. It is only slightly soluble in ether, benzene, or chloroform, but is soluble in water and in alcohol. It forms salts with acids. In contact with manganese peroxide and sulphuric acid erythrophloeine develops a violet color less intense than that produced by strychnine; the color soon changes to a dirty brown. It acts as a poison by paralyzing the action of the heart.

ē-ryth-rō-phyll, ē-ryth-rō-phyl'-line, s. [Gr. *erythros*=red, *phylon*=a leaf, and Eng. suff. -ine (Chem.) (q. v.).]

Chem.: The red coloring matter of leaves in autumn. It is soluble in water and alcohol, and dissolves with brown color in alkali.

ē-ryth-rō-prō-tide, s. [Greek *erythros*=red, *protos*=first, and Eng. suff. -ide (Chem.) (q. v.).]

Chem.: A red extractive matter obtained by Mulder from albumin and allied substances.

ē-ryth-ror'-chis, s. [Pref. *erythr*(o), and Eng., &c., *orchis*.]

Bot.: A genus of Orchids, tribe Arethuseae, family Vanillideae. *Erythrorchis scandens* has slender stems one hundred feet long, and runs like a creeper over trees in wet jungles in the Eastern peninsula and the adjacent islands.

ē-ryth-rōge, s. [ERYTHROISIS.]

Chem.: The name given by Garot to the yellow or orange-colored substance obtained by treating rhubarb with nitric acid, which, however, he allows to be a mixture. It dissolves in alkalis, forming red solutions which produce very deep stains. [RHUBARB.]

ē-ryth-rō-si-dēr'-ite, s. [Pref. *erythro-*, and Eng. *siderite*.]

Min.: Scacchi's name for a hydrated chloride of potassium and iron, $2KCl + Fe_2Cl_3 + 2H_2O$. Prismatic in crystallization. Soluble in water. Found embedded in volcanic bombs inclosed in Vesuvian lava of April, 1872, and was probably formed by sublimation during that eruption. (*Thomas Davies, F. G. S.*)

ē-ry-thrō'-gis, s. [From Gr. *erythros*=red.]

Med.: Plethora. (*Dunglison*.)

ē-ryth-rō-spēr-mē-ā, s. pl. [Mod. Lat. *erythrospermum*(um), and Lat. fem. pl. adj. suff. -eē.]

Bot.: A tribe of Flacourtiaceae. The styles are several, the fruit ultimately splits.

ē-ryth-rō-spēr-mūm, s. [Gr. *erythros*=red, and *sperma*=seed.]

Bot.: The typical genus of the tribe Erythrospermeae (q. v.).

ē-ryth-rō-stō-mūm, s. [Gr. *erythros*=red, and *stoma*=mouth.]

Bot.: The name given by Desvauz to the aggregate fruit more generally called *Etaerio* (q. v.). Example, the strawberry.

ēr-yth-rōx-yl-ā-çē-ā, ē-ryth-rōx-yl'-ē-ā, s. pl. [Mod. Lat. *erythroxylon*(on) (q. v.), and Lat. fem. pl. adj. suff. -acee, -eē.]

Bot.: Erythroxyls. An order of Hypogynous Exogens, alliance Sapindales. It consists of shrubs or trees with the young shoots scaly, alternate stipulate leaves, and small white or greenish flowers. Sepals five, combined at the base; persistent petals five, each with a plaited scale at the base; stamens ten, monadelphous; ovary three-celled, but having two of the cells spurious; styles three; stigmas three, capitate; ovule solitary pendulous; fruit a one-seeded drupe. Only known genus *Erythroxylon*, species seventy-five. Most are from Brazil and other parts of South America, or the West Indies, a few from Madagascar, Mauritius, the East Indies, and Australia. [ERYTHROXYLON.]

ēr-yth-rōx-yl-ōn, s. [Gr. *erythros*=red, and *xylon*=wood.]

Bot.: The typical and only known genus of the order Erythroxylaceae (q. v.). As the etymology suggests, the wood of most species is bright red.

Erythroxylon hypericifolium is called in the Island of France *bois d'huile*=oil-wood. In Brazil a permanent reddish-brown dye is made from the bark of *E. suberosum*. The young branches of *E. areolatum*, which grows near Carthage, are refrigerant; its bark is tonic; the subacid juice of its fleshy fruit is purgative and diuretic, and from the juice of its leaves an ointment is formed which is employed against scald heads. Two Brazilian species, *E. anguifugum* and *E. campestre*, are used, the former as an alexipharmic and the latter as a purgative. *E. coca* furnishes the stimulant called coca (q. v.).

ēr-yth-rōx-yl, s. [ERYTHROXYLON.]

Botany:

1. (Sing.): A plant belonging to the order Erythroxylaceae.

2. (Pl.): The English name given by Lindley to that order itself.

ē-ryth-rō-zyme, s. [Gr. *erythros*=red, and *zymē*=leaven.]

Chem.: An azotized substance, which exists in madder, and gives rise to a peculiar transformation of rubian. It is extracted by macerating madder in water at 88°, and precipitating the aqueous extract with alcohol. [MADDER, RUBIAN.]

ēr-ŷx, ēr'-ix, s. [Lat. *Eryx*, an opponent of Hercules, slain by the latter and buried by him on a mountain, which retained his name. [ERYCINA.] Various other classic men or myths.]

Zool.: A genus of snakes, family Boideae. They are small in size, and have not the prehensile tail of the huge Boas and Pythons. They are found in India and the Eastern Islands, and in Turkey, Greece, and Egypt.

ēs-çā-lā-de, s. [Fr.; Sp. *escalada*; Ital. *scalata*, from Lat. *scala*=a ladder.]

1. Ord. Lang. & Mil.: An attack on a fortified place, in which scaling-ladders are used to pass a ditch and mount a rampart.

2. Fig.: Any violent onslaught.

ēs-çā-lā-de, v. t. [ESCALADE, s.]

Ord. Lang. & Mil.: To scale; to mount by means of ladders.

ēs-çā-lō-nī-ā, s. [Named after Escallon, a Spanish traveler in South America, who first found these plants in Guiana.]

Bot.: The typical genus of the order Escalloniaceae. The species are South American trees or shrubs, with dotted leaves and white, pink, or red whorled flowers.

ēs-çā-lō-nī-ā-çē-ā, ēs-çā-lō-nī-ē-ā, s. pl. [Mod. Lat. *escalloni*(a), and Lat. fem. pl. adj. suff. -acee, -eē.]

Bot.: Escalloniads: an order of Epigynous Exogens, alliance Grossales. It consists of shrubs with alternate, toothed, resinously glandular exstipulate leaves and axillary conspicuous flowers. Calyx superior, five-toothed; petals five, sometimes temporarily cohering into a tube; aestivation imbricated; stamens alternate with the petals; ovary inferior, two to three-celled, with a large polyspermous placenta in the axis; stigma two to five-lobed; seeds numerous, minute. Known genera seven, species sixty, all from the temperate parts of South America and elsewhere. If within the tropics, then they are found high up on mountain sides. (*Lindley*.)

ēs-çā-lō-nī-ā-de, s. pl. [Mod. Lat. *escalloni*(a), and Eng., &c., pl. suff. -ads.]

Bot.: The English name given by Lindley to the order Escalloniaceae (q. v.).

ēs-cāl-lōp, ēs-cāl'-ōp, s. [O. French *escalope*.] [SCALLOP, s.]

1. Ordinary Language:

1. Lit.: In the same sense as II. 2.

"Nymphs, Tritons, sea-gods, scallop shells, &c."—*Evangelin*: An Account of Architects.

2. Fig.: A regular curving indenture in the border or margin of anything.

"Divided into so many jags or scallops and curiously indented."—*Ray*: On the Creation, pt. i.

II. Technically:

1. Heraldry: The figure of a scallop-shell, which was originally worn as a sign that the wearer had made a pilgrimage to the shrine of St. James, at Compostella, in Spain, and now borne on a shield to intimate that the bearer or his ancestors had been at the Crusades or had made long pilgrimages.

2. Zool.: The molluscan genus *Pecten*. The same as Scallop and Scallop-shell (q. v.).

Escallop.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ēs-cal-lō-pēo, *a.* [Fr.]
Her.: A term applied to an escutcheon, &c., which is covered with curved lines, resembling the outline of a scallop-shell, and overlapping each other.

ēs-cāl-ōp, *s.* [ESCALLOP.]

ēs-cāl-ōped, *a.* [Eng. *escalloped*, -ed.]

1. *Ord. Lang.*: Cut or fashioned in the form of a scallop-shell, cut at the edge or border into segments of a circle.

2. *Her.*: The same as ESCALLOPÉE (q. v.).

Escallopée.

ēs-cām-bl-ō, *s.* [Low Lat. *escambium*=exchange.]

English Law: A writ or authority given to merchants to draw bills of exchange on persons beyond the seas.

ēs-cāp-a-ble, *a.* [Eng. *escap(e)*; -able.] That may or can be escaped or avoided; avoidable.

ēs-cā-pā-de, *s.* [Fr., from Ital. *scappata*=an escape, fem. of *pa par.* of *scappare*=to escape.] [ESCAPE, v.]

1. A wild fling of a horse; a kicking with the hind legs.

"He entered first, and with a graceful pride, His fiery Arab dexterously did guide, Who while his rider every stand surveyed, Sprung loose, and flew into an escapade,"
Dryden: 1 Conquest of Granada, l. 1.

2. A wild freak or prank; a mad frolic.

ēs-cā-pe, *v. t. & i.* [O. Fr. *escaper*, *eschaper*; Fr. *échapper*, from Lat. *ex cappa*=out of a cape or cloak; so that to escape is to free one's self, or slip out of one's cape and get away; Ital. *scappare*=to escape; Low Lat. *escapium*=flight, escape.]

A. Transitive:

1. To get away from; to avoid by flight; to elude, to evade; to get out of the way or power of.

"Where his own person, eagerly pursued, Hardly (by boat) escaped the multitude."
Daniel: Civil Wars, vii. 16.

2. To pass or remain unnoticed or unobserved by.
"Men are blinded by ignorance and error: many things may escape them, in many they may be deceived."
Hooker.

3. To pass away from; to be forgotten by; as, to escape one's memory.

4. To be uttered by inadvertence; as, Not a word has escaped me on the matter.

B. Intransitive:

1. To flee away; to avoid danger or harm by flight; to make one's escape; to seek or obtain safety or liberty by flight.

"Escape for thy life; look not behind thee, neither stay thou in all the plain: escape to the mountain lest thou be consumed."
Genesis xix. 17.

2. To avoid or elude notice; to pass or remain unnoticed or untouched; to be overlooked.

"Death mansest every age, and smit
 In each estat, for ther escapeth non."
Chaucer: C. T., 7, 999.

3. To find a means of discharge or exit from anything which incloses or contains; to leak; as, Gas escapes from a pipe.

4. To be carried, conveyed, or transported in any way; as, A plant escapes from cultivation.

"Crabb thus discriminates between to escape, to elude, and to evade: 'The idea of being disengaged from that which is not agreeable is comprehended in the sense of all these terms; but escape designates no means by which this is effected; elude and evade define the means, namely, the efforts which are used by one's self: we are simply disengaged when we escape; but we disengage ourselves when we elude and evade: we escape from danger; we elude the search: our escapes are often providential, and often narrow; our success in eluding depends on our skill: there are many bad men escape hanging by the mistake of a word. There are many who escape detection by the art with which they elude observation and inquiry. Elude and evade both imply the practice of art: but the former consists mostly of actions, the latter of words as well as actions: a thief eludes those who are in pursuit of him by dexterous modes of concealment; he evades the interrogatories of the judge by equivocating replies. He is said to elude a punishment, and to evade a law.'" (Crabb: Eng. Synon.)

ēs-cā-pe, *s.* [ESCAPE, v.]

1. *Ordinary Language*:

1. The act of escaping from danger or hurt by flight; a fleeing from.

"No sooner was the king's escape taken notice of by the guards,"—*Ludlow*: Memoirs, i. 191.

2. The state of having escaped or avoided danger or hurt.

"Men of virtue have had extraordinary escapes out of such dangers as have enclosed them, and which have seemed inevitable,"—*Addison*.

*3. An excuse; a means or ground for escaping.

"St. Paul himself did not despise to remember whatsoever he found agreeable to the word of God among the heathen, that he might take from them all escape by way of ignorance,"—*Raleigh*: Hist. of the World.

*4. An excursion, a sally.

"We made an escape, not so much to seek our own, As to be instruments of your safety,"
Denham: Sophy, iii. 1.

*5. A flight, a sally.

"Thousand 'scapes of wit
 Make thee the father of their idle dreams,"
Shakesp.: Measure for Measure, iv. 1.

*6. An oversight, a mistake.

"In transcribing there would be less care taken, as the language was less understood, and so the escapes less subject to observation,"—*Brerewood*: On Language.

7. An escaping or finding a means of discharge or exit from anything which incloses or contains; a leakage; as, an escape of gas from a pipe.

*8. An irregularity, a transgression.

"Dost thou behold
 With watchful eyes the subtle 'scapes of men?"
R. Wilmot: Tancred and Gismunda, iv. 2.

II. Technically:

1. *Arch.*: The part of a column where it springs out of the base; the apophyse.

2. *Bot.*: A plant which has escaped from a garden, and now grows apparently but not really wild.

"Whether the hill could be considered as a habitat for the Colubina in its wild state, or whether the plant had not originally been an escape,"—*Edin. and Glasg. Geol. Soc. Excursion*, in Weekly Scotsman, June 30, 1883.

3. *Law*: Violent or privy evasion out of some lawful restraint. For example, if the sheriff, upon a capias directed upon him, takes a person, and endeavors to carry him to jail, and he on the way, either by violence or by flight, breaks from him, this is called an escape. (Cowel.)

"An escape of a person arrested upon criminal process, by eluding the vigilance of his keepers before he is put in hold, is also an offense against public justice, punishable by fine or imprisonment. The officer permitting such escape, either by negligence or connivance, is evidently much more culpable than the prisoner; but private individuals, who have persons lawfully in their custody, are not less guilty of this offense if they suffer them illegally to depart, for they may at any time protect themselves from liability by delivering over their prisoner to a peace-officer,"—*Blackstone*: Comment., bk. iv, ch. 10.

4. *Telegr.*: Leakage of current from the line-wire to ground, caused usually by defective insulation and contact with partial conductors.

5. *Engin.*: The same as fire-escape (q. v.).

escape-valve, *s.*

Steam-engine:

1. A loaded valve fitted to the end of the cylinder for the escape of the condensed steam, or of water carried mechanically from the boilers with the steam; a priming valve.

2. A valve fitted to the feed-pipe as a means of exit for the surplus water.

3. A valve which affords escape to steam in a given contingency: upon excessive pressure by a safety-valve, to announce low-water, &c.

escape-warrant, *s.*

Law: A warrant or process addressed to all sheriffs, &c., to retake an escaped prisoner, and deliver him up to proper custody.

escape-wheel, *s.*

Hor.: These are various in form; the wheel is acted upon by the spring or weight of the clock or watch, and is allowed an intermittent rotation, one tooth at a time, and the pendulum or balance-wheel which thus regulates the movement becomes the time-measurer. The pallets on the oscillating pendulum arbor allow the teeth to escape, one at a time. [ESCAPEMENT.] (Knight.)

ēs-cā-pe-mēt, **scā-pe-mēt**, *s.* [Eng. *escape*; -ment.]

*1. *Ord. Lang.*: The act of escaping; an escape.

2. *Hor.*: A device intervening between the power and the time-measurer in a clock or watch, to convert a continuous rotary into an oscillating isochronous movement. It is acted on by each. The power, through the escapement, imparts to the pendulum or balance-wheel an impulse sufficient to overcome the friction of the latter and the resistance of the atmosphere, and thus keeps up the vibrations. The time-measurer (pendulum or balance-wheel) acts through the escapement to cause

Escapement.

the motion of the train to be intermittent. Clocks and watches are generally named according to the form of their escapement; as, Chronometer, Crown-wheel, Cylinder, Deadbeat, Detached, Duplex, Horizontal, and Lever escapement, &c. (See these words.)

ēs-cāp-ēr, *s.* [Eng. *escap(e)*; -er.] One who or that which escapes.

ēs-cāp-īng, *pr. par., a. & s.* [ESCAPE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of avoiding danger or hurt by flight; an escape.

***ēs-car'** (1), ***ēs-char'**, *s.* [Fr. *eschare*.] A scar or hard scar upon a hurt, sore, wound, &c. [SCAR.]

 Which hangs out Death in one eternal night?"
Young: Night Thoughts, ii. 356, 357.

Es-dräs, s. [Gr. *Esdras*=Ezra (q. v.).]
Apocrypha: Two books constituting the first and second of the collection called the Apocrypha.

(1) **First Book of Esdras:** The first of the books just mentioned. The Vulgate makes the canonical Book of Ezra, 1 Ezra, 1 Nehemiah, 2 Ezra, and 1st and 2d Esdras, 3 and 4 Ezra respectively. So does the 6th of the Thirty-nine Articles. The nucleus of the book is iii. 1-v. 6; from this part comes the oft quoted *Magna est veritas, et prevalebit*. The rest of the work consists of compilations more or less altered from the canonical Ezra and Nehemiah. The book seems to have been composed in Palestine. The author and date are unknown. Dr. Ginsburg thinks it must have existed at least a century before Christ. Singularly enough the Council of Trent, generally so liberal in its reception of apocryphal books into the Canon, rejected this.

(2) **Second Book of Esdras:** The second book of the Apocrypha in the English version, which in this respect follows the Zurich Bible. Great difference of opinion has existed as to the authority and date. Dr. Ginsburg assigns it to about 50 B. C., and believes the author to have been a Jew, interpolations having, however, been subsequently made by a Christian. The Council of Trent rejected this work like the First Book of Esdras.

es-ëm-pläs-tic, a. [Gr. *es*=one; *hen*=one, and *plastikos*=molding, shaping.] Molding, shaping or fashioning into one.

es-ën-béc-klä, s. [Named after Nees Von Esenbeck, a celebrated botanist.]

Bot.: A genus of Rutaceæ, tribe Pilocarpeæ. The bark of *Esenbeckia febrifuga*, a native of Brazil, has the properties of quinine, and is almost as effective as a remedy in fever.

es-ën-béc-klä-ine, s. [Mod. Lat. *Esenbekia*; -ine (Chem.). (q. v.).]
Chem.: An alkaloid obtained from the bark of *Esenbeckia febrifuga*.

es-ër-ine, s. [*Esér*, the native name for the Calabar bean, and suff. -ine (Chem.). (q. v.).]
Chem.: Physostigmin, $C_{15}H_{21}N_3O_5$. A base contained in the Calabar bean, *Physostigma venenosum*. An extract of the bean is made with alcohol and water, then dissolved in water and filtered, and the alkaloid shaken out with ether; it is carefully neutralized with sulphuric acid and allowed to crystallize. Eserine is a yellow amorphous mass, very poisonous, causing contraction of the pupil of the eye. It is easily soluble in alcohol and in ether. It melts at 45°. Eserine exactly neutralized with dilute sulphuric acid, then treated with excess of ammonia and evaporated to dryness on a water-bath, yields a residue of a blue color, soluble in water and in alcohol. It stains the skin, and dyes silk blue. A trace of sulphate of eserine in solution gives a red color when bromine water is added.

fäte, fät, färe, amidst, whät, fäll, father; wé, wét, hère, camél, hër, thère; plne, plt, sîre, sîr, marine; gö, pöt, or, wöre, wolf, wörk, whö sön; müte, cüb, cüre, unite, cür, räle, füll; try, Sýrian. æ, œ = é; ey = ä. qu = kw.

***ēs-guard** (*u* silent), *s.* A guard as escort. (*Beaumont & Fletcher.*)

ēs-ki-mō, *s. & a.* [ESQUIMAUX.]

***ēs-lōin**, ***ēs-loyn**, ***ēs-loyne**, *v. t.* [O. Fr. *esloigner*; Fr. *éloigner*, from *loin*=far.] [ELOIN.] To remove, to take or put away.

"How I shall stay, though she *esloigne* me thus."
Donne: Poems, p. 23.

ēs-mar-kite, *s.* [Ger. & Sw. *esmarkit*.] Named after Esmark, the discoverer of No. 2.]

***ēs-sō-pl-ān**, *a.* [Lat. *Esopius*; Gr. *Ἀισόπιος*=pertaining to *Aisōpios* or *Esop*.] Pertaining to or written by *Esop*; composed in the manner or after the style of *Esop*.

"He [Alex. Neckham] wrote a tract on the mythology of the ancient poets, *Esopian* fables, and a system of grammar and rhetoric."—*Warton: History of English Poetry*, I, diss. 2.

ēs-ō-tēr-īc, **ēs-ō-tēr-īc-āl**, *a.* [Gr. *esōterikos*=inner; *esō*=within. The word was first used to describe the writings of Aristotle, though he does not use it. It was probably invented to correspond with Greek *esōterikos*=external, which he does use. (*Liddell & Scott.*)]

1. *Ord. Lang.*: Hidden, secret.

"His *esoteric* project was the original project of Christopher Columbus, extended and modified."—*Macaulay: Hist. Eng.*, ch. xiv.

II. *Greek Phil.*: The precise sense in which *esōterikos* was used is not quite clear, or rather it would seem to have been used in different senses by different Teachers, and sometimes even in different senses by the same Teacher. Among the Pythagoreans this epithet was applied only to those disciples who had passed through a long and severe ordeal, and had been admitted to intimate communion with the Master. In Platonic philosophy the word has a different meaning. It cannot be admitted that Plato had two sets of doctrines, and it is probable that the allusion of Aristotle (*Physica*, iv. 2) to the unwritten opinions of the founder of the Academy is to teaching which found no place in the Dialogues from its very simplicity and clearness. Aristotle divides his works into *esoteric* and *acroamatic*, which word he uses in the sense given later to *esoteric*. They both treat of the same subjects, and the distinction has regard to forms and processes of the expositions. In the former he gives the elements that are more superficial, and therefore easily comprehended by the less intelligent, for the latter he reserves the arguments that are difficult and weighty, and most deserving the meditation of the philosopher. [EXOTERIC.]

ēs-ō-tēr-īc-āl-īy, *adv.* [Eng. *esoterical*; *-ly*.] In an esoteric manner.

ēs-ō-tēr-ī-cism, *s.* [Eng. *esoteric*; *-ism*.] Esoteric doctrine or principles.

ēs-ō-tēr-īc-s, *a.* [EXOTERIC, *a.*] Mysterious or occult doctrines or science.

ēs-ō-tēr-īsm, *s.* [Gr. *esōteros*=inner, and Eng. suff. *-ism*.] The same as ESOTERICISM (*q. v.*).

***ēs-ō-tēr-īy**, *s.* [Gr. *esōteros*=inner.] Mystery; hidden or occult doctrines.

"The ancients, delivering their lectures by word of mouth, could adapt their subjects to their audience, reserving their *esoterics* for adepts, and dealing out *exoterics* only to the vulgar."—*Note in Search's Freewill*, p. 172.

ē-sōx, *s.* [Lat. *esox*; Gr. *isox*=a fish from the Rhine, a pike.]

Ichthy.: The typical genus of the family Esocidæ. Snout protruded, broad and somewhat flattened; gape wide, the palate, throat, and sides of the lower jaw thickly armed with prominent teeth; body lengthened, dorsal and anal fins single, far behind and opposite each other. (*Couch.*) *Esoc lucius* is the pike (*q. v.*). *Esoc* belongs of Linneus, Block, and Donovan is the *Belone vulgaris* of Cuvier, Fleming, Jenyns, and Yarrell. [BELONE, GARFISH.]

ēs-pāl-ier (*ier* as *yēr*), *s.* [Fr. *espallier*; Sp. *espalera*, *espaldera*; Ital. *spalliera*; O. Fr. *espalde*; Fr. *épaule*; Sp. *espalda*; Ital. *spata*=shoulder.]

1. Lattice-work on which to train and support ornamental shrubs or plants.

2. A row of trees trained up to a lattice-work, so as to constitute a shelter for plants.

"Behold Villario's ten years' toil complete,
His arbors darken, his *espaliers* meet."
Pope: Moral Essays, iv. 80.

ēs-pāl-ier (*ier* as *yēr*), *v. t.* [ESPALIER, *s.*] To form an espallier of; to protect by means of an espallier.

ēs-par-čēt, *s.* [Fr. *esparcette*; Sp. *esparceta*.] A kind of Sanfoin.

ēs-par-čē, *s.* [Sp. *esparto*, from *Lat. spartum*=a grass, *Stipa tenacissima*; Gr. *sparton*.]

Bot. & Comm.: Two grasses, *Macrochloa* (formerly called *Stipa*) *tenacissima* and *Lygeum spartum*. The former is the genuine esparto grass. Probably it was the species used in Spain in Roman times for making ropes, mats, nets, whiphongs, &c. It has continued to be employed in Spain for such purposes to the present day; but it was not till the middle of the nineteenth century that it attracted notice in Britain as a material for paper-making. Many thousand tons are now annually imported for this purpose. It is used also for making mats, nets, baskets, &c.

ē-spā-thāte, *a.* [Latin *e*=out; *spatha*=the spathe of a palm-tree, and Eng., &c., suff. *-ate*.]

Bot.: Not having a spathe.

ēs-pē-cial (*cial* as *shāl*), ***es-pe-cial**, *a.* [Old Fr.; Fr. *spécial*, from *Lat. specialis*=belonging to a particular kind; *species*=a kind.] Distinguished or eminent in a certain class or kind; special; chief; particular.

ēs-pē-cial-īy, ***es-pe-cial-īy** (*cial* as *shāl*), *adv.* [Eng. *especial*; *-ly*.] In an especial manner or degree; chiefly, particularly, principally, mainly.

"Then said some at the table, Nuts spoil tender teeth, especially the teeth of the children."—*Bunyan: Pilgrim's Progress*, pt. ii.

¶ Crabb thus discriminates between *especial*, particularly, principally, and *chiefly*: "Especially and particularly are exclusive or superlative in their import; they refer to one object out of many that is superior to all: *principally* and *chiefly* are comparative in their import; they designate in general the superiority of some objects over others. *Especially* is a term of stronger import than *particularly*, and *principally* expresses something less general than *chiefly*: we ought to have God before our eyes at all times, but *especially* in those moments when we present ourselves before Him in prayer; the heat is very oppressive in all countries under the torrid zone, but *particularly* in the deserts of Arabia, where there is a want of shade and moisture; it is *principally* among the higher and lower orders of society that we find vices of every description to be prevalent; patriots who declaim so loudly against the measures of government do *chiefly* (may I not say solely?) with a view to their own interests." (*Crabb: Eng. Synon.*)

***ēs-pē-cial-nēss** (*cial* as *shāl*), *s.* [English *especial*; *-ness*.] The state or quality of being especial or chief.

***ēs-pē-ānce**, *s.* [Fr.] Hope.

"Thou hast wanton *espies*, ne wachte, thy body for to save."—*Chaucer: Tale of Melibeu*.

ēs-quimaux (quimaux as kī-mō), **ēs-kī-mō**, s. & a. [Native name; *Esquimaux*, the popular spelling, is a French form; *Eskimo*, the modern scientific one, is more accurate.]

A. As substantive:

Ethnol.: A race or people of Turanian descent, using that word in a comprehensive sense. They inhabit Greenland and the adjacent parts of the North American continent, but may in early times have had a much more extensive area. Some anthropologists believe that if the Paleolithic age is divided into two periods, that of the Mammoth and that of the Reindeer, the men of the second or Reindeer period were *Esquimaux*, while those of the first, or Mammoth period, resembled the Australians.

B. As adj.: Pertaining or relating to the race or people described under A.

"Some of the *Esquimaux* knives brought to England."—*Tyler: Early Hist. of Mankind* (1865), p. 166.

Esquimaux-dog, Eskimo-dog, s.

Zool.: *Canis familiaris*, variety *Borealis*. These dogs are generally, though not always, dark in color, and utter a wolfish growl rather than a genuine dogish bark. They are used by the *Esquimaux* for drawing their sledges over the ice, at the rate, it is said, of sixty miles a day for several successive days.

***ēs-qui-re**, s. [O. Fr. *esquier*, *escuyer*; Fr. *écuyer*, from Low Lat. *scutarius*=a shield-bearer; Lat. *scutum*; O. Fr. *escut*, *escu*; Fr. *écu*=a shield; Sp. *escudero*; Ital. *scudiere*; Port. *escudeiro*.]

*1. The armor-bearer or attendant on a knight.

"His *esquire* or armor-bearer that stuck close to his side was wounded."—*P. Holland: Ammianus Marcellinus*, p. 253.

2. *In England*: A title of dignity, next in degree below a knight. It is properly given to the younger sons of noblemen, the eldest sons of baronets and knights-bachelor, officers of the king's courts or household, barristers at law, sheriffs, justices of the peace, gentlemen holding commissions in the army, navy, &c. But the title is commonly given to all professional and literary men, and is, indeed, in ordinary usage treated as a mere complimentary adjunct to a person's name in the addresses of letters, in which cases it is abbreviated to *Esq.*

"His wife and his children are dear to him, and have an equal right to be fed and clothed with those of the *esquire* or farmer."—*Knox: Essays*, No. x.

3. *In the United States*: The title is most frequently applied to justices of the peace and lawyers.

*4. A gentleman acting as an escort or attendant upon a lady.

***ēs-qui-re**, v. t. [ESQUIRE, s.] To attend or wait upon; to act as an *esquire* to: as, to *esquire* a lady—i. e., to escort her in public.

***ēs-qui-r-ēss**, ***ēs-qui-r-ēssō**, s. [English *esquire(e)*; -*ess*.] A female *esquire*.

ēs-quis-se (qu as k), s. [Fr.]

Art: The first sketch of a picture, or model of a statue.

***ēs**, s. [From the letter S.] A turning, winding, or meandering of a river.

***ēs-sāy**, ***ēs-sāy**, s. [Originally the same word as *essay* (q. v.); Fr. *essai*, from Lat. *exagium*=a trial of weight, from Gr. *exagion*=a weighing; Ital. *saggio*.]

1. An attempt, an effort, an endeavor.

"She and her companion made a fresh *essay* to go past them."—*Bunyan: Pilgrim's Progress*, pt. ii.

2. An attempt, a trial, an experiment.

"Yet modestly I do his work survey
And call it a finished poem an *essay*." Dryden: To the Earl of Roscommon, 30, 31.

*3. An assay, or trial of the qualities of a metal, &c.

"For a man to take an *essay* of the nature of any species of things."—*Wilkins: Natural Religion*, bk. i, ch. iv.

*4. A trial, a test.

"I hope, for my brother's justification, he wrote this but as an *essay* or taste of my virtue."—*Shakespeare: Lear*, i, 2.

5. In literature, a composition or disquisition upon some particular point or topic; less formal and methodical than a regular treatise.

"To write just treatises requireth leisure in the writer, and leisure in the reader . . . which is the cause which hath made me choose to write certain brief notes set down rather significantly than curiously, which I have called *essays*. The word is late, but the thing is ancient."—*Bacon: Essays*; To Prince Henry.

† To take the *essay*: To try or taste food before the lord or master partook of it.

"Come and uncover the meat, which was served in covered dishes, then taking the *essay* with a square slice of bread which was prepared for that use and purpose."—*G. Rose: Instruct. for Officers of the Mouth* (1682), p. 20.

† Crabb thus discriminates between *essay*, *dissertation*, *tract*, and *treatise*: "A *treatise* is more systematic than an *essay*; it treats on the subject in a methodical form, and conveys the idea of something labored, scientific, and instructive. A *tract* is only a species of small *treatise*, drawn up upon particular occasions, and published in a separate form. *Dissertation* is with propriety applied to performances of an argumentative nature. *Essays* are either moral, political, philosophical, or literary; they are the crude attempts of the youth to digest his own thoughts, or they are the more mature attempts of the man to communicate his thoughts to others. The *essay* is the most popular mode of writing; it suits the writer who has not either talent or inclination to pursue his inquiries farther, and it suits the generality of readers who are amused with variety and superficiality: the *treatise* is adapted for the student; he will not be contented with the superficial *essay*, when more ample materials are within his reach: the *tract* is formed for the political partisan; it receives its interest from the occurrence of the motive: the *dissertation* interests the disputant." (Crabb: *Eng. Synon.*)

ēs-sā'y, v. t. & i. [ESSAY, s.] [Fr. *essayer*; Ital. *assaggiare*.] [ASSAY.]

A. Transitive:

1. To try, to attempt, to endeavor or exert one's self to perform or accomplish.

"While I this unexampled task *essay*." Blackmore: *Creation*, bk. i.

*2. To make trial or experiment of.

*3. To assay; to test the value and purity of metals.

"The standard in my mind being now settled, the rules and methods of *essaying* suited to it should remain unvariable."—*Locke*.

B. Intrans.: To endeavor, to attempt, to try.

"Yet such a tongue alike in vain *essays*

To blot with censure or exalt with praise." Hoole: *Orlando Furioso*, bk. xxxviii.

ēs-sāy-ēr, s. [Eng. *essay*; -*er*.]

1. One who tries, attempts or essays anything.

2. One who writes essays; an essayist.

"A thought in which he hath been followed by all the *essayists* upon friendship, that have written since his time."—*Addison: Spectator*, No. 68.

***ēs-sāy-ist**, s. [Eng. *essay*; -*ist*.] A writer of an essay or essays.

"I make, says a gentleman *essayist* of our author's age, as great difference between Tacitus and Seneca's style and his [Cicero's], as musicians between Trenchmore and Lachrymæ."—*Ben Jonson: Masques*.

***ēs-sēnce**, s. [Fr., from Lat. *essentia*=a being; esse=to be.]

I. Ordinary Language:

1. That which constitutes the very nature of anything.

"If, as thou say'st, thing *essence* be as ours,
We have replied in telling thee, the thing
Mortals call death, hath naught to do with us." Byron: *Manfred*, i, 1.

2. Existence; the quality or state of being.

"In such cogitations have I stood, with such a darkness and heaviness of mind, that I might have been persuaded to have resigned my very *essence*."—*Sidney*.

3. A being; an existent person.

"As far as gods, and heavenly *essences*
Can perish." Milton: *P. L.*, i, 138.

4. A species of existent being.

"Here be four of you, as differing as the four elements; and yet you are friends: as for Eupolis, because he is temperate, and without passion, he may be the fifth *essence*."—*Bacon*.

5. A constituent substance.

"For spirits when they please,
Can either sex assume, or both; so soft
And uncompounded is their *essence* pure." Milton: *P. L.*, i, 423-5.

6. The cause of existence.

"She is my *essence*; and I leave to be,
If I be not by her fair influence
Fostered, illumined, cherished, kept alive." Shakespeare: *Two Gentlemen*, iii, 1.

7. The essential principle or element of a plant, drug, &c., extracted, refined, or distilled.

8. A perfume, a scent, an odor; the volatile principle which constitutes the perfume.

"Our humble province is to tend the fair;
To save the powder from too rude a gale,
Nor let the imprisoned *essences* exhale." Pope: *Rape of the Lock*, ii, 91-3.

9. The most important, essential, or characteristic part or element of anything.

II. Technically:

1. *Metaph.*: The Schoolmen defined *essence* to be *id quo res est id quod est* (that which makes a thing what it is), or that which answered the question *Quid est?* (What is it?), whence it was also termed *Quidditas*. [QUIDDITY.] *Essence* is that which constitutes the particular nature of any ens (q. v.), whether actually existent or only conceived as possible. The dispute between the Nominalists and the Realists was a dispute as to the meaning of the term *essence*. Mill (*Logic*, i, 128) says that the objective tendency of Locke's unmetaphysical mind led him to a clear recognition of the scholastic error respecting *essence*—i. e., the existence of entities corresponding to general terms . . . Locke distinguished two sorts of *essences*—Nominal and Real. His nominal *essences* were the *essences* of classes. But he also admitted real *essences*, which he supposed to be causes of the sensible properties of those objects. 'We know not,' he said, 'what these *essences* are' (and this acknowledgment rendered the fiction comparatively innocuous), 'but, if we did, we could from them alone demonstrate the sensible properties of the object as the properties of the triangle are demonstrated from the definition of a triangle.'

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hār, there; pīne, plit, sire, sir, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; māte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

2. *Pharm.*: *Essentia*. An alcoholic solution of volatile oil. Essence of peppermint, *Essentia menthae piperatae*, and essence of anise, *Essentia anisi*, are formed by dissolving one part of the volatile oil of the respective plants in four parts by volume of rectified spirit of wine.

essence d'orient, *s.* Essence of pearls; a liquor prepared from a nacreous substance found in the scales of a fish called the bleak. It is used in the manufacture of artificial pearls.

ēs-sēnce, *v. t.* [ESSENCE, *s.*] To perfume, to scent.

"And tender as a girl, all essenced o'er
With odors." Cowper: *Task*, ii. 227.

Es-sēne, *s. & a.* [Probably from Syriac *asa*=cure, recovery. So named because they claimed to be physicians of souls.]

A. As subst. (*chiefly in pl.*): A Jewish sect having affinities to, but not identical with, the Egyptian Therapeutae. They practiced voluntary poverty, had community of goods, and cultivated holiness of life. They represent Judaism in the form which it assumed when the Jew of Palestine began, like his brethren abroad, to find in the Græco-Alexandrian doctrine a deeply religious conception of life. Essenism prepared a congenial soil on which Christianity might work, but the two, as far as is known, never joined their forces into one. (Baur: *Church History*.)

B. As adj.: Pertaining or relating to the sect described under A.

"Touched more or less by the *Essene* spirit."—Baur: *Church History*, i. 22.

Ēs-sē-nī-ān, *a.* [ESSENE.] The same as *ESSENIC* (q. v.).

"What shadow of proof is there that nothing of the kind existed among the vain babblings of *Essenian* speculation?"—Farrar: *Life and Work of St. Paul*, Excur. ix.

Ēs-sē-nīc, *a.* [Eng., &c., *Essen(e)*; -ic.] Pertaining or relating to the Essenes.

Essenic-Eblionitic, *a.* Pertaining to or derived from the Essenes and the Eblionites.

"This view is of *Essenic-Eblionitic* origin."—Baur: *Church History*, i. 108.

Ēs-sē-nīsm, *s.* [Eng., &c., *Essen(e)*; -ism.] The system of doctrine and practice among the Essenes. [ESSENE.]

"Of course it cannot be thought for a moment that Christianity itself sprang from *Essenism*."—Baur: *Church History*, i. 21.

ēs-sēn'-tial (*tial* as *shāl*), ***es-sen-tiall**, *a. & s.* [Low Lat. *essentialis*, from *essentia*=essence; Fr. *essenciel*; Port. *essencial*; Sp. *esencial*; Ital. *essenziale*.]

ēs-tāb'-lished, *pa. par. or a.* [ESTABLISH.]

Established Church, *s.* The State religion of a country; a Church selected by the State to receive great and special privileges over other churches. During the first three centuries of the Christian era the Church had little countenance from the State. But in 312 it obtained in Constantine an imperial proselyte, who made Christianity the State religion of the Roman Empire, exempted the clergy from personal taxes, and ordered that work should no longer be done on the Lord's Day. Though Julian the Apostate tried hard to re-establish heathenism, his success was only temporary, and Constantine's arrangements remained with little modification to the fall first of the Western, and a millenium later of the Eastern Empire. During mediæval times, Roman Catholicism was the State religion of the western part of Christendom, but in religious matters every kingdom was in vassalage to the Papacy. At the Reformation every nation which cast off the Roman yoke had a Protestant Established Church. That of England was based on the principle of the Royal Supremacy (q. v.). Except during the short reactionary period under Mary, and the revolutionary one of the Commonwealth, the arrangements then made have continued till now. On the union with Ireland in 1801, the Established Church became the United Church of England and Ireland, but the Irish portion of the Church was disestablished and disendowed in 1870. [Church of Ireland.] In Scotland the Established Church has, with some intervals, been Presbyterian since the first General Assembly met in A. D. 1560. It is expected that, when in England, the Sovereign shall attend the Established Church, which is Episcopal, and in Scotland, as a rule, go to the Established Church of that country, which is Presbyterian. The principle of State-Churchism has never found favor in this country.

ēs-tāb'-lish-ēr, *s.* [Eng. *establish*; -er.] One who or that which establishes.

"I reverence the holy fathers as divine *establishers* of faith."—Lord Digby.

6. A class or order of men in a nation invested with political rights; as, in Great Britain the estates of the realm are the lords spiritual, the lords temporal, and the commons.

"That question the Estates of Scotland could not evade."—*Macaulay: Hist. Eng.*, ch. xiii.

*7. The English press is frequently called the Fourth Estate, in reference to the great power wielded by it in public matters.

*8. The general public interests or affairs; the state; the general body politic.

"Many times the things adduced to judgment may be *meum et tuum*, when the reason and consequences thereof may reach to point of estate: I call matters of estate not only the parts of sovereignty, but whatsoever introduceth any great alteration, or dangerous precedent, or concerneth manifestly any great portion of people."—*Bacon: Essays.*

9. A piece of landed property; a domain.

10. Property, possessions, fortune.

"They have lived for harsher servitude,
Whether in soul, in body, or estate!"
Wordsworth: Excursion, bk. vi.

11. In the same sense as II. 2.

II. Law:

1. The interest or amount of interest which a man has in lands, tenements, or other effects. Real estate consists of freehold lands, tenements, or hereditaments; personal estate comprises interests in lands, tenements, or hereditaments for a term of years, and all other property. The former descends to the heirs; the latter to the executors or administrators.

"Every man who had fifty pounds a year derived from land, or six hundred pounds of personal estate, was charged in like manner with one pikeman or musketeer."—*Macaulay: Hist. Eng.*, ch. iii.

2. In bankruptcy, the assets belonging to the bankrupt.

*ēs-tā-te, v. t. [ESTATE, s.]

*1. To establish.

"I will estate your daughters in what I have promised."—*Beaumont & Fletcher.*

2. To endow with an estate; to settle an estate upon.

"How royally we are allied, how gloriously estated."—*Bp. Hall: Holy Raptures.*

3. To settle as an estate or fortune.

"All the revenue that was old Sir Rowland's will I estate upon you."—*Shakespeare: As You Like It*, v. 2.

*es-tate-lich, *es-tat-ly, a. [Eng. estate; -lich, -ly.] Stately.

"It peined hire . . . to ben estatelich of manere."
Roman of the Rose (Prolog.), 140.

ēs-teēm, *es-te-me, v. t. & i. [Fr. *estimer*, from Lat. *estimo*=to value, to estimate; Sp. & Port. *estimar*; Ital. *estimare*, *stimare*.]

A. Transitive:

1. To estimate, to value by comparison.

"It shall be worth according as it is esteemed."—*Bible* (1551), *Levit. xxvii.*

2. To set a value upon, whether high or low; to estimate, to value; to hold in estimation.

"I preferred her before sceptres and thrones, and esteemed riches nothing in comparison of her."—*Wisdom vii. 8.*

3. To value or rate highly; to prize; to hold in high estimation.

"Me and my possessions she esteems not."
Shakespeare: Two Gentlemen, iii. 1.

4. To think, consider, repute.

"'Tis better to be vile than vile esteemed."
Shakespeare: Sonnet 121.

B. Intransitive:

1. To consider as to value; to reckon.

"That no man esteems of himself more than it becometh him to esteem."—*Bible* (1551), *Romans xx.*

2. To think, to consider, to hold an opinion.

"Beseech you so to esteem of us."
Shakespeare: Winter's Tale, ii. 3.

*Crabb thus discriminates between *esteem*, *regard*, and *respect*: "*Esteem* and *respect* flow from the understanding; *regard* springs from the heart, as well as the head; *esteem* is produced by intrinsic worth; *respect* by extrinsic qualities; *regard* is

affection blended with *esteem*: it is in the power of every man, independently of all collateral circumstances, to acquire the *esteem* of others: but *respect* and *regard* are within the reach of a limited number only: the high and the low, the rich and the poor, the equal and the unequal, are each, in their turn, the objects of *esteem*; those only are objects of *respect* who have some mark of distinction or superiority, either of birth, talent, acquirements, or the like; *regard* subsists only between friends, or those who stand in close connection with each other: industry and sobriety excite our *esteem* for one man, charity and benevolence our *esteem* for another; superior learning or abilities excite our *respect* for another; a long acquaintance, or a reciprocity of kind offices, excites a mutual *regard*." (*Crabb: Eng. Synon.*)

ēs-teēm, s. [Fr. *estime*.] [ESTEEM, v.]

*1. Valuation, price, value, worth.

"The full esteem in gold."—*J. Webster.*

2. Estimation, opinion, or judgment as to merit or demerit.

"A coward in thine own esteem."
Shakespeare: Macbeth, i. 7.

3. A high value, estimation, or opinion concerning anything; great regard.

"Esteem is the commencement of affection."—*Coggin: On the Passions*, ch. ii., class. 2.

4. The state or condition of being estimated; estimation, value.

"It is not always necessary to grant things not asked for, lest by so doing they become of little esteem."—*Bunyan: Pilgrim's Progress*, pt. ii.

ēs-teēm-a-ble, a. [English *esteem*, v.; -able.] Worthy of being esteemed or valued highly; estimable.

"Homer allows their characters estimable qualities."—*Pope: Homer's Iliad*, vi. 390 (note).

ēs-teēm-ēr, s. [Eng. *esteem*, v.; -er.] One who esteems or values highly; one who sets a high value or estimation upon anything.

"This might instruct the proudest esteemer of his own parts, how useful it is to talk and consult with others."—*Locke.*

Es-ther (ther as tēr), s. [Gr. *Esther*; Heb. *Ester*=(1) the planet Venus, (2) Esther.]

1. *Scrip. Hist.*: The Persian name of Hadassah, daughter of Abihail, a son of Shimei, he again being a son of Kish a Benjamite. Her story is too well known to require repetition. Gesenius thinks the name Hadassah the same as Atossa, daughter of Cyrus, but the general opinion is that the Ahasuerus to whom she was married was Xerxes, the same who so utterly failed in his invasion of Greece.

2. *Scrip. Canon*: An Old Testament book, placed in the English Bible between Nehemiah and Job, but in the Hebrew between Ecclesiastes and Daniel. Its Hebrew is like that of Ezra and parts of the Chronicles, with some Persian and some Aramean words. Its author is unknown, and regarding its various opinions have been entertained. The Jews valued it highly. Some of the Christian fathers rejected it, moved by the sanguinary spirit which it seems to breathe and the absence from it of the Divine name. Luther had not a high opinion of it. It was formally attacked by Eder, Corrodi, Augusti, Bertholdt, De Wette, Bleek, and the Rationalists generally, but has been defended by Eichhorn, Jahn, Havernick, and others. Though some have deemed its story mythic, a powerful argument to prove that the dreadful events recorded actually occurred has been founded on the fact that the Jews still observe the feast of Purim (ix. 24-32).

ēs-thēr-i-ā, s. [An anagram for Theresia. A St. Theresa is recognized in the hagiology of the Roman Church.]

1. *Zool.*: A genus of crustaceans, order Phyllopoda, family Limnadiadae. The body is protected by a bivalve carapace, with concentric lines of growth, the two bivalves of which are united at their beaks, though they have not a ligament. Twenty-four recent species have been discovered, all inhabitants of fresh or of brackish water, not one marine. [2.]

2. *Palæont.*: Till 1856, the carapace of *Estheria*, found in the Old Red Sandstone rocks of Scotland, was believed to be the bivalve shell of a small marine mollusk, *Posidonomya minuta*. The discovery in that year by Mr. T. Rupert Jones, F. R. S., that it was probably crustacean and from fresh or brackish water was one reason why the old view that the Old Red Sandstone of Scotland was marine had to be abandoned. [DEVONIAN, OLD RED SANDSTONE.] In a monograph of *Estheria* for the Palæontographical Society, published in 1862, and in a paper subsequently before the Geological Society, Prof. Jones showed that *Estherias* occurred in the Devonian, Lower and Upper Carboniferous, Permian, Triassic, Rhenish, Oolitic, Wealden, and Tertiary formations. They reached their maximum

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

about the Upper Trias. They have been found in this country, England, Scotland, and Ireland, in France, Germany, Russia, Central India, &c. and wherever they occur tend to prove the stratum in which they are found not to be marine.

ēs-thēr'-ī-an, *a. & s.* [Mod. Lat. *estheria*, and Eng., &c., suff. *-an*.]

A. As adj.: Akin, pertaining, or relating to the Estheria (q. v.).

B. As subst.: A fossil crustacean of the genus *Estheria*.

ēs-thē-gi-ōm-ē-tēr, *s.* [Gr. *aisthēsis*=perception, sensibility, and *metron*=a measure.] *Surg.*: An instrument to ascertain the tactile sensibility of the human body. It has two points, adjustable as to distance, and the object is to ascertain the greatest proximity at which the points give distinct sensations. The result is indicative of a normal or abnormal condition of the surface. [NERVE-NEEDLE.]

ēs-thēt'-ic, **ēs-thēt'-ic-al**, *a.* [ÆSTHETIC.]

ēs-thēt'-ics, *s.* [ÆSTHETICS.]

***ēs-tif-ēr-ōus**, *a.* [Lat. *æstus*=heat; *fero*=to bear, and Eng. adj. suff. *-ous*.] Producing heat.

***ēs-tim-a-ble**, *a. & s.* [French, from Latin *estimabilis*, from *estimo*=to value, to estimate; Sp. *estimable*; Ital. *estimabile*.]

A. As adjective:

1. Capable of being estimated or valued; as, *estimable damage*.

2. Valuable; of a high value.

"A pound of man's flesh, taken from a man, is not so *estimable* or profitable as flesh of muttons, beefs, or goats." *Shakesp.*: *Merchant of Venice*, i. 3.

3. Worthy of esteem or regard; deserving of high estimation.

"The more *estimable*, nay the most accomplished characters."—*Hurd*: *Dialogue* 8.

***B. As subst.**: A person or thing worthy of esteem; a valuable.

"The queen of Sheba, among presents unto Solomon, brought some plants of the balsam tree, as one of the peculiar *estimables* of her country."—*Sir T. Browne*: *Miscellaneous*, p. 50.

***ēs-tim-a-ble-nēss**, *s.* [Eng. *estimable*; *-ness*.] The quality or state of being estimable or worthy of esteem.

***ēs-tim-a-blŷ**, *adv.* [Eng. *estimable*(ly); *-ly*.] In an estimable manner.

***ēs-ti-māte**, *v. t. & i.* [Lat. *estimatus*, *pa. par.* of *estimo*=to value, to estimate.]

A. Transitive:

1. To value; to adjust or determine the value of; to judge of anything by comparison with something else; to fix the worth of.

"When a man shall sanctify his house to the Lord, then the priest shall *estimate* it whether it be good or bad."—*Leviticus* xxvii. 14.

2. To compute, to reckon; as, He *estimated* the number present at 300.

¶ Crabb thus discriminates between *to estimate*, *to compute*, and *to rate*: "All these terms mark the mental operation by which the sum, amount, or value of things is obtained: *to estimate* is to obtain the aggregate sum in one's mind, either by an immediate or a progressive act; *to compute* is to obtain the sum by the gradual process of putting together items; *to rate* is to fix the relative value in one's mind by deduction and comparison; a builder *estimates* the expense of building a house on a given plan; a proprietor of houses *computes* the probable diminution in the value of his property in consequence of wear and tear; the surveyor *rates* the present value of lands or houses. In the moral acceptation they bear the same analogy to each other: some men are apt to *estimate* the adventitious privileges of birth or rank too high; it would be a useful occupation for men to *compute* the loss they sustain by the idle waste of time on the one hand, and its necessarily unprofitable consumption on the other; he who *rates* his abilities too high is in danger of despising the means which are essential to success." (*Crabb*: *Eng. Synon.*)

***ēs-ti-māte**, *s.* [Lat. *estimatus*=valuation, estimation, from *estimatus*, *pa. par.* of *estimo*=to value, to estimate.]

1. A mental valuation, computation, or calculation of the value, extent, degree, size, expense, &c., of anything; a valuing or estimating in the mind the comparative value, merits, &c., of two things.

"For who could sink and settle to that point in framing *estimates* of loss and gain?" *Wordsworth*: *Excursion*, bk. iv.

2. A statement of the probable account or cost of carrying out any work, conducting a business, &c.

***ēs-ti-mā-tion**, ***ēs-ti-ma-cion**, *s.* [Fr. *estimation*, from Lat. *estimatio*, from *estimatus*, *pa. par.* of *estimo*=to value, to estimate; Sp. *estimacion*; Ital. *estimazione*.]

1. The act of estimating, valuing, or assessing; valuation; assessment.

"If a man should sanctify unto the Lord some part of a field, the *estimation* shall be according to the seed."—*Leviticus* xxvii. 16.

2. The act of calculating, or computing the value, extent, size, number, &c., of anything; calculation, computation.

*3. Conjecture, supposition.

"I speak not this in *estimation*, As what I think might be, but what I know." *Shakesp.*: *Henry IV.*, Pt. I., i. 3.

4. Opinion, judgment.

"Abroad in the *estimations* of men."—*Barrow*: *Sermons*, vol. i., ser. 6.

5. Esteem, regard, honor, favorable opinion.

"Crimes there were laid to his charge many, the least whereof, being just, had bereaved him of *estimation* and credit with men."—*Hooker*.

***ēs-ti-mā-tive**, ***ēs-ti-ma-tive**, *a.* [Eng. *estimative*(ly); *-ive*.]

1. Having the power of estimating the value, worth, &c., of various things.

2. Imaginative.

***ēs-tōp'-pel**, ***ēs-tōp'-le**, *s.* [Eng. *estop*; *-el*.]

1. *Ord. Lang.*: A stoppage or impediment.

2. *Law*: (For def. see extract.)

"An *estoppel* is likewise a special plea in bar; which happens where a man has done some act, or executed some deed, which *estops* or precludes him from averring anything to the contrary. As where a statement of a particular fact is made in the recital of a bond or other instrument, and a contract is made with reference to that recital, it is not, as between the parties to the instrument, competent to the party bound to deny the recital."—*Blackstone*: *Comment.*, bk. iii., ch. 11.

***ēs-tōu-fad'e**, *s.* [French *étouffade*, from O. Fr. *estouffer*; Fr. *étouffer*=to stuff.]

Cook.: A mode of cooking meat slowly in a closed vessel.

***ēs-tō-vērs**, *s. pl.* [O. Fr.]

"A tendency to a recurrence of *estuarine* conditions."—*Judd*, in *Quar. Jour. Geol. Soc.*, xxxiv, pt. i., p. 680.

***es-tu-ār-y**, *es-tu-ār-i-an*, *s. & a.* [Lat. *æstuarium*=a creek; *æstuo* = to surge, to foam; *æstus*=the tide.]

A. *As substantive*:

*I. *Ord. Lang.*: A place where water, &c., boils up.

"Over the *estuary*, or in some neighboring part of the place, where the mineral water springs."—*Boyle: Works*, iv. 799.

II. *Technically*:

1. *Geog.*: An arm of the sea; the mouth of a river, &c., in which the tide meets the current, or ebbs and flows; a firth.

"The dreary strand of the *estuary* of the Laggan."—*Macaulay: Hist. Eng.*, ch. xvi.

2. *Geol.*: Most estuaries were formed at first by the combined influence of rivers seeking exit into the adjacent ocean, and tides from that ocean forcing themselves up the channel inland. The same causes which formed an estuary at first tend to keep it open. Both the tide and the river current in their mutual encounter are laden with sediment which, as long as the struggle between them is balanced, tends to be deposited, forming a bar at the river's mouth, but on the ebb of the tide the river current, hitherto dammed up as by an embankment, rushes out to sea with unchecked violence, carrying all or most of the deposited sediment to a great distance. Estuaries, though in the main keeping their channels open, yet here and there partially fill up where eddies exist. But this gain of land does not nearly compensate for the immense quantity carried out to sea. Freshwater species of animals and plants are imbedded in modern estuaries.

B. *As adjective*:

1. *Biol.*: Living in an estuary. (Often used of shells.)

"One very common *estuary* shell."—*Woodward: Mollusca* (ed. Tate), p. 48.

2. *Geol.*: Belonging to or formed in an estuary. (Used of strata.)

C. *As substantive*:

1. *On metal*: Engraving executed by a pointed tool and acid upon a prepared metallic surface previously covered with varnish. The ordinary procedure is as follows: Cover a polished metallic plate with a composition technically called ground, and consisting of asphaltum, four parts; Burgundy pitch, two parts; white wax, one part. For use this is melted and compounded, and tied up in a silk rag. The plate is heated, rubbed with the ground, which is then spread evenly, smoked, and allowed to cool. The design is traced by a pointed tool, called an etching point, which lays bare the metal wherever it goes. This finished, a wall of wax is raised around the design to hold the dilute acid which is poured on. For a copper-plate this consists of five parts water to one of nitrous acid. For steel, pyroligneous acid, one part; nitric acid, one part; water, six parts. This is poured on the plate, which it corrodes on the lines made through the ground. This is called *biting-in*. The etching is swept with a feather to remove the bubbles from the surface; in case of a steel-plate, agitation may answer the purpose. When a sufficient depth is attained for the lighter tints of the etching, the

acid is removed, the surface washed and allowed to drain dry. The parts having sufficient depth are now stopped out by a varnish of Brunswick-black. When the varnish is dry, another biting-in will deepen the lines of the parts not stopped out, and when these lines are deep enough for the second tint, the varnish is removed, the plate dried, &c. This is repeated as many times as may be necessary. The wall of wax is then removed, the surface of the plate cleaned with turpentine, and a proof taken. It may be finished by a graver, but then it partakes of the character of a line engraving. Another mode of etching is to remove lights with point and scraper, and then bite-in so as to expose the design in relief.

2. *On glass*: This art was invented by Schwanhard of Nuremberg, 1670, and originated in an accident to his spectacles, which became corroded by some drops of acid. Fluoric acid, discovered by Scheele, 1771, is now employed for biting-in the etching. The glass is covered with a resinous ground, and the design marked by an etching-point, exposing the glass. The latter is then subjected to an acid, which acts upon the silicate and eats away the glass at these points, making depressions which constitute the etching.

3. *On soft ground*: An imitation of chalk or pencil drawing, which has been abandoned since lithography has attained excellence. The soft ground is made by adding one part of hog's lard to three parts etching ground (GROUND), which is laid on the plate with the dabber in the usual way. A piece of smooth writing-paper, having the design in outline, is damped and stretched over the plate. A pencil is then used to follow the lines of the design, observing that the softer the ground the softer the pencil should be. The temperature of the season or the room will affect the character of the ground. When the paper is removed it withdraws the adhering lines of ground, and the plate is bitten-in in the usual way.

4. *Lithography*:

(1) The preparation of a lithographic stone with a weak mineral acid after the drawing or transfer has been put upon its surface; the object being to fix and render such drawings capable of receiving the ink used in printing.

(2) Etching by a needle or diamond on stone is done in two ways.

(a) [ENGRAVING.]

(b) The surface of the stone is covered with an asphaltum ground; the work is etched in, cutting away so much of the ground and exposing the stone. Acid is then applied, which eats away the stone, making a depression; this is inked, the asphaltum cleaned off, the clear spaces etched and gummed as usual in the lithographic process.

5. An impression taken from an etched plate.

***etching-figure**, *s. s. pl.*

Milton: *P. L.*, iv. 968, 997.

2. Anything which is eternal or everlasting.

*3. Eternity.

"Since eternal is at hand
To swallow time's ambitions."
Young: *Night Thoughts*, viii. 34, 35.

¶ Crabb thus discriminates between *eternal*, *endless*, and *everlasting*: "The *eternal* is set above time; the *endless* lies within time: that is properly *eternal* which has neither beginning nor end; that is *endless* which has a beginning but no end: God is therefore an *eternal* but not an *endless* being. That which is *endless* has no cessation; that which is *everlasting* has neither interruption nor cessation: the *endless* may be said of existing things; the *everlasting* naturally extends itself into futurity: hence we speak of *endless* disputes, an *endless* warfare; an *everlasting* memorial, an *everlasting* crown of glory." (Crabb: *Eng. Synon.*)

Chem.: A name sometimes given to cetyl alcohol, $C_{21}H_{43}OH$.

ē-thāl-dē-hyde, s. [English, &c., *eth(yl)*, and *aldehyde* (q. v.).]

Chem.: Also known as acetic aldehyde, CH_3COH . [ALDEHYDE.]

ē-thāne, s. [Eng., &c., *eth(er)*; -ane, a termination used to denote that the hydrocarbon belongs to the series, C_nH_{2n+2} .]

Chem.: Ethane, ethylhydride, dimethyl, C_2H_6 , or C_2H_5H , or $(CH_3)_2$. A hydrocarbon belonging to the paraffin series, obtained by the action of water, added drop by drop, to zinc ethyl, $ZnC_2H_5O + 2H_2O = 2C_2H_5H + Zn(OH)_2$; also by the electrolysis of acetic acid or acetates; by heating an excess of barium dioxide with sand and acetic anhydride, $BaO_2 + 2(CH_3CO)_2O = (CH_3)_2 + 2CO_2 + Ba(O'COCH_3)_2$. Ethane is found dissolved in raw American petroleum oil; it is a colorless, inodorous gas, which is liquefied at 4° , under a pressure of forty-six atmospheres; it is nearly insoluble in water and slightly soluble in alcohol; it burns with a bluish pale flame. With an equal volume of chlorine in diffused daylight it forms chlor-ethane, C_2H_5Cl .

*ēthe, a. [EATH.] Easy.

"A fool is ethe to beguile."

Romant of the Rose, 3,958.

*ēth-el, a. [A. S. *æthel*.] Noble.

*ēth-el-īng, s. [ATRELING.]

ē-thēne, s. [English, &c., *eth(er)*, and suff. -ene (Chem.) (q. v.).]

Chem.: C_2H_4 or $H_2C=CH_2$, ethylene, olefant gas, clayle, bicarburetted hydrogen, heavy carburetted hydrogen. A fatty hydrocarbon, belonging to the olefine series C_nH_{2n} . It is formed in the dry distillation of organic bodies; about five per cent. is contained in coal gas. Ethene is obtained by the action of nascent hydrogen, when cuprous acetylide is gently warmed with a mixture of metallic zinc and dilute ammonia. Ethene is prepared by heating on a sand bath 25 grammes of alcohol with 150 grammes of concentrated sulphuric acid in a flask of the capacity of three liters, and then gradually dropping into the mixture equal parts of alcohol and sulphuric acid, and washing the gas in H_2SO_4 , then in KHO , and again in H_2SO_4 . A small quantity of pure ethene can be obtained by heating an alcoholic solution of ethene dibromide, $(C_2H_4Br)_2$, with granulated zinc. Ethene is a colorless gas, which at 1° and a pressure of forty-one and a half atmospheres becomes liquid, burns with a white luminous flame, and explodes violently when mixed with oxygen on the application of a light or the electric spark. When it is passed through a tube heated to redness, it is decomposed, yielding CH_4 , and carbon is deposited. It is readily dissolved by sulphuric acid at 170° , and forms ethyl sulphuric acid, $C_2H_5SO_4$, which, when diluted with water and distilled, yields ethyl alcohol. It is absorbed by fuming nitric acid with the formation of oxalic acid. Chromic acid mixture at 120° converts it into aldehyde; potassium permanganate oxidizes it into oxalic and formic acids. Ethene unites at 100° with concentrated hydriodic acid to form ethyl iodide, C_2H_5I , and with hydrobromic acid to form ethyl bromide, C_2H_5Br , but it does not unite with hydrochloric acid. Ethene agitated with an aqueous solution of hypochlorous acid, $HClO$, is converted into ethene chlorhydrin, a colorless liquid, boiling at 128° . Ethene in contact with platinum black unites with hydrogen to form ethane, C_2H_6 ; it unites directly with chlorine, forming ethene dichloride or Dutch liquid (q. v.).

ēth-ēn-yl, s. [Eng., &c., *ethen(e)*, and *yl*=Gr. *hulē*=matter.]

Chem.: C_2H_5 . A triatomic fatty hydrocarbon radical derived from Ethane C_2H_6 by the abstraction of three atoms of hydrogen.

ē-thēr, æ-thēr, s. [Lat. *æther*=Gr. *aither*=the sky, the home of the gods, from *aithō*=to burn, to light up, to shine; cogn. with Lat. *æstas*=summer, *æstus*=heat.]

1. Astron. & Nat. Phil.: A medium of extreme tenuity assumed to exist all through space. It is believed to be invisible, imponderable, exceedingly elastic, and capable of undulations as it is being acted upon by light and heat. From being the medium through which heat is transmitted, it is sometimes called luminiferous ether.

¶ The spelling *æther*, and of the adj. *æthereal*, found in old works, is not extinct; Tyndall uses it.

"An almost infinitely attenuated and elastic medium, which fills all space, and which we name the *æther*."—Tyndall: *Frag of Science* (3d ed.), p. 251.

2. Chem.: The name given to organic compounds derived from alcohols by the replacement of the hydrogen atom in the hydroxyl (OH) of the alcohol by a radical. These compounds are called Oxygen Ethers, to distinguish them from Haloid Ethers, which are formed by the substitution of chlorine, &c., for hydrogen, atom for atom, in a hydrocarbon, as Ethane, $C_2H_6 + Cl_2 = HCl + C_2H_5Cl$ ethyl chloride; they are also obtained by the action of phosphorus pentachloride on aldehyde, phosphorus oxychloride, and ethylidene dichloride, and by the direct union of chlorine with olefines, as $H_2C=CH_2$ ethene $+ Cl_2 = CH_2Cl - CH_2Cl$ ethylene dichloride. The oxygen ethers are divided into simple ethers, which are the oxides of the hydrocarbon radicals, or the anhydrides of the alcohols, thus C_2H_5HO is the oxide of ethyl, C_2H_5 , or the anhydride of ethyl alcohol $2(C_2H_5HO) - H_2O = (C_2H_5)_2O$. If the ether contains two different radicals, as $CH_3O'C_2H_5$ methyl ethyl ether, it is called a Mixed Ether. The boiling-point of an ether is generally 120° less than the sum of the boiling-points of the alcohols from which it is derived. Mixed ethers are obtained by the action of an iodide of a hydrocarbon radical on a sodium alcoholate, thus CH_3I methyl iodide, $+ C_2H_5ONa$ sodium ethylate $= NaI + CH_3O'C_2H_5$ methyl ethyl ether, the same substance is obtained by the action of ethyl iodide C_2H_5I on sodium methylate, (CH_3ONa) . Compound ethers, or ethereal salts, are formed by the replacement of the hydrogen of the hydroxyl (OH) in the alcohol by an acid radical, or they may be regarded as hydrocarbon radical salts of the corresponding acids, as ethyl acetate $CH_3CO'OC_2H_5$. They are formed by the abstraction of water from an acid and an alcohol, acetic acid $CH_3COOH +$ ethyl alcohol C_2H_5OH —water H_2O , yielding ethyl acetate, $CH_3CO'OC_2H_5$. If the acid is monobasic, one molecule of water is eliminated to form a neutral ether; if dibasic, then two molecules of water, &c. Compound ethers derived from polybasic acids may be either acid ethers or neutral ethers, corresponding to acid or neutral salts.

3. Comm. & Chem.: C_2H_5O , or $C_2H_5O'C_2H_5$. Ethyl ether, ethylic ether, ethyl oxide, formerly called Sulphuric ether. Ether is obtained when sodium is dissolved in absolute alcohol, and the resulting sodium ethylate is mixed with ethyl iodide, $C_2H_5I + C_2H_5ONa = NaI + C_2H_5O'C_2H_5$. But it is prepared on a large scale by the action of sulphuric acid on alcohol, $H_2SO_4 + C_2H_5OH = H_2O + H^+C_2H_5SO_4$ ethyl sulphuric acid, and then $H^+C_2H_5SO_4 + C_2H_5OH = C_2H_5O'C_2H_5 + H_2SO_4$, so the same quantity of sulphuric acid can convert a large quantity of alcohol into ether. A mixture of 9 parts of concentrated sulphuric acid and 5 parts of 90 per cent. alcohol is heated to boiling, and then alcohol is allowed to flow gently into the flask, so that the temperature of the boiling liquid remains between 130° and 140° . The ether which distills over is shaken with milk of lime to remove traces of SO_2 , and washed several times with water to remove alcohol, and then dried with calcium chloride, and if required absolute, distilled over sodium or phosphoric anhydride P_2O_5 . Pure ether is a colorless, transparent, mobile, fragrant, neutral liquid. Specific gravity 0.736 at 0° . Its vapor is very heavy, being 2.53 times that of air, and when mixed with air explodes violently when it approaches a flame. It is dangerous to distill ether unless the distillate is collected in a flask on the floor, or the vapor will run along the table to the flame. Ether is very inflammable, and burns with a white flame. It is soluble in twelve parts of water, and thirty-six parts of ether will dissolve one part of water. Ether mixes readily with alcohol, and dissolves fats, resins, as well as bromine, iodine, many metallic chlorides, and bromides. Ether is very volatile, producing intense cold when allowed to evaporate on the skin. Pure ether is not acted on by sodium or potassium. It absorbs oxygen from the atmosphere, and is slowly converted into acetic acid. It distills at $35^\circ C$, or $96^\circ F$, and is slowly decomposed into alcohol when kept in contact with water. When ether is heated with hydriodic acid it is converted into ethyl iodide. Chlorine acts on ether, replacing the hydrogen in only one ethyl group in the following order: $CHHH'CHHO'C_2H_5$ (2:3:4:1:5), forming, lastly, pentachlor ether ether, $CCl_5O'C_2H_5$.

4. Phar.: Ether is used to form Collodion (q. v.), the Ethereal Solution of Cantharides, and *Spiritus ætheris* (Ether ten fl. ounces and rectified spirit twenty fl. ounces). Ether taken internally is a powerful diffusible stimulant, more rapid and evanescent in its action than alcohol. It is used to expel flatus from the stomach, to allay pain and cramp in that organ, and to diminish spasm. It stimulates the salivary and pancreatic secretions, and assists the digestion of fatty matters. Applied externally in the form of spray it is used to produce local insensibility from pain in small operations. Inhaled in the form of vapor it acts as an anesthetic. It is said to be safer than chloroform; it stimulates instead of depressing the heart, and its use is followed by less vomiting, but it is required in larger quantity, and is very inflammable,

If from any cause a portion of space be rendered void of this subtle existence, the medium outside the space will press it into smaller compass, and, if there be in it an atom of matter, the ether around it will become more dense under the influence of the pressure. The ethersphere is then the excess of ether about the vacant space above its original amount or quantity.

***ēth'-ic (1), *ēth'-ick (1), a.** [ETICKE.]

ēth'-ic (2), *ēth'-ick (2), ēth'-ic-al, a. [Latin *ethicus*=moral, ethic; Gr. *ethikos*, from *ethos*=custom, moral nature, habit.] Moral; treating of or relating to manners or morals; containing precepts or discourses on morality.

"Ethical means practical; it relates to practice or conduct passing into habit or disposition."—*Matthew Arnold: Literature and Dogma*, p. 20.

ēth'-ic-al-ī-ty, adv. [Eng. *ethical*; *-ly*.] In an ethical manner; according to the doctrines of morality.

ēth'-ī-clst, s. [Eng. *ethic*; *-ist*.] A writer on ethics; one learned in ethics.

ēth'-ics, *ēth'-icks, s. [ETHIC, a.] The science of morals; moral philosophy when the word moral is used in opposition to mental, instead of including it. The first to employ the Greek word *ethike*, which originally meant no more than that which arises from use or custom [ETHIC, etym.], to designate the all-important science of moral duty as based, not on changing custom, but on unchanging laws, was Aristotle, who wrote three treatises on the subject. His disciple Theophrastus followed in the same direction.

The word *ethics* may be used in a more or less comprehensive sense. In a more comprehensive sense it takes in man's moral duty, not merely to those individuals with whom he may be brought in contact, but also to the body politic of which he constitutes a part, nay even to the inferior animals. In a more limited sense it excludes politics, and Aristotle had a distinct treatise on this latter subject. One old and much accepted division of the science was into three parts: (1) the duty of a good man, (2) that of a good father, and (3) that of a good citizen and a good magistrate. Various hypotheses or theories have been propounded regarding the basis of morals. One of these, extensively embraced, refers this to the Divine will expressed in revelation; another finds it on utility to society, and as a rule considers that action or policy moral the natural tendency of which is to benefit society, and especially to produce the greatest attainable happiness to the greatest number of persons. Mr. John Stuart Mill considers ethics not a science but an art. The imperative mood he regards as characterizing art and not science. Whatever speaks in rules or precepts, not in assertions regarding matters of fact, he regards as art; and tried by this test ethics and morality are properly a portion of the art corresponding to the sciences of human nature and society; the remainder consisting of prudence and policy, and the art of education.

ē-thide, s. [Eng., &c., *eth(yl)*; suff. *-ide* (Chem.) (q. v.).]

Chem.: A name given to compounds formed by the union of an element with the monad radical ethyl C_2H_5 —e. g., Zinc Ethide, $Zn(C_2H_5)_2$, generally called Zinc Ethyl.

ēth'-ī-dēne, s. [Eng., &c., *ethid(e)*, and suff. *-ene* (Chem.) (q. v.).]

Chem.: The same as **ETHYLIDENE** (q. v.).

ē-thine, s. [Eng., &c., *eth(er)*; suff. *-ine* (Chem.) (q. v.).]

Chem.: C_2H_2 or $HC=CH$, a hydrocarbon, also called Acetylene (q. v.).

ē-thi-ōn-ē-ī-ty, s. [Eng. *ethion(ic)*; suff. *-ate* (Chem.) (q. v.).]

Chem.: A salt of ethionic acid. Ethionates are decomposed by boiling with water. The free acid decomposes in like manner, yielding sulphuric acid and isethionic acid.

e-thi-ōn'-ic, a. [Eng., &c., *ethyl*; Gr. *theion*=sulphur, and suff. *-ic*.] See the compounds.

ethionic-acid, s.

Chem.: $C_2H_4 \cdot O \cdot SO_3 \cdot OH$. Obtained by dissolving ethionic anhydride in water, also by the action of sulphuric acid on barium isethionate, then it is diluted with water and filtered, the filtrate treated with barium carbonate and again filtered, evaporated in a vacuum, stirred up with water, and then separated, $BaSO_4$ filtered off.

ethionic-anhydride, s.

Chem.: $CH_2-O-SO_2 > O$. Obtained by passing CH_2-SO_2 the vapor of sulphur trioxide, SO_3 , into anhydrous alcohol, also from the direct union of ethene, C_2H_4 , with two molecules of SO_3 . It is a deliquescent crystalline mass, melting at 80°. Also called Sulphate of Carbonyl.

Ē-thi-ōp, s. [Lat. *Æthiops*; Gr. *Aithiops*.] A native of Ethiopia or Abyssinia; an Ethiopian. (*Rare.*)

"Earn dirty bread by washing Ethiops fair."
Young: *Night Thoughts*, iv. 353.

Ē-thi-ōp-ī-an, a. & s. [Eng. *Ethiopia*; *-ian*.] **A. As adj.**: Of or pertaining to Ethiopia or its inhabitants.

B. As subst.: A native of Ethiopia.

Ē-thi-ōp'-ic, a. & s. [Eng. *Ethiopia*; *-ic*.]

A. As adj.: Pertaining to Ethiopia or Abyssinia.

B. As subst.: The language of Ethiopia.

Ē-thi-ōps, s. [Gr. *Aithiops*=an Ethiopian] [**ÆTHIOPS**.]

Old Chem.: A name given to several dark-colored compounds, specif., black protoxide of mercury.

Ethiops-martial, s.

Min.: Black oxide of iron; iron in the form of a very fine powder.

Ethiops-mineral, s.

Phar.: A medicine made by embodying equal parts of liquid quicksilver and flowers of brimstone; black sulphure of mercury.

ēth-mō-, pref. [Gr. *ethmos*=a sieve.]

Anat.: Pertaining to the Ethmoid bone (q. v.)

ethmo-cranial, a.

Anat.: Pertaining to the ethmoid bone and to the cranium.

Ethmo-cranial angle:

Anat.: The angle formed by the basicranial axis with the line of the cribriform plate. The name was first given by Professor Huxley.

ethmo-turbinals, s. pl.

Anat.: Two lateral masses, one on each side of the central vertical plate of the ethmoid bone.

ēth-mōid, a. & s. [Gr. *ethmoeidēs*=like a sieve; *ethmos*=a sieve, and *eidōs*=form, appearance; Fr. *ethmoide*.]

A. As adjective:

Anat.: Resembling a sieve; cribriform.

B. As substantive:

Anat.: The ethmoid bone (q. v.).

ethmoid-bone, s.

Anat.: One of the bones of the head, situated between the orbital processes at the root of the nose. It is of a cuboid figure, and is exceedingly light for its size, being composed of very thin plates of bone forming in part irregular cells. (*Quain*.)

ēth-mōid'-al, a. [**ETHMOID**.]

Anat.: The same as **ETHMOID** (q. v.).

ēth-mōse, s. [Gr. *ethmos*=a sieve.]

Phys.: A name sometimes applied to cellular tissue.

***ēth'-narch, s.** [Gr. *ethnarchēs*, from *ethnos*=a nation, and *archō*=to rule, to govern.] **Greek Antiq.**: The commander or governor of a province or people.

ēth-nic, ēth-nic-al, *eth-nicke, *eth-nique, a. & s. [Lat. *ethnicus*, from Gr. *ethnikos*=national; *ethnos*=a nation; Fr. *ethnique*.]

A. As adjective:

*1. Heathen, pagan; opposed both to Jewish and Christian.

2. Pertaining to races; ethnological.

"Without doubt all ethnic questions form an integral part of anthropological study."—*Prof. Turner, in Brit. Assoc. Rep.* (1871), pt. ii., p. 145.

*B. **As subst.**: A heathen, a pagan; one who is neither Jew or Christian.

***ēth'-ni-çism, *eth-ni-cisme, s.** [Eng. *ethnic*; *-ism*.] Heathenism, paganism, idolatry.

ēth-nōg'-ēn-ŷ, s. [Fr. *ethnogenie*, from Greek *ethnos*=a nation, and *genea*=birth, descent.] That branch of anthropology which treats of the origin of peoples. The French form was introduced by Ampère.

ēth-nōg'-ra-phēr, s. [Eng. *ethnograph(y)*; *-er*.] One devoted to the study of ethnography (q. v.).

ēth-nō-grāph'-ic, ēth-nō-grāph'-ic-al, a. [English *ethnograph(y)*; *-ic, -ical*.] Pertaining or relating to ethnography.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

ēth-nōg-ra-phŷ, *s.* [Gr. *ethnos*=a body of men, a nation, and *graphē*=a description.] (For def. see extract.)

"That a whole nation should have a special dress, special tools and weapons, special laws of marriage and property, special moral and religious doctrines, is a remarkable fact. It is with such general qualities of organized bodies of men that ethnography has to deal."—*Lyall: Primitive Culture*, i. 11.

ēth-nō-lōg-īc, **ēth-nō-lōg-īc-ā**, *a.* [English *ethnology*(*y*); -*ic*, -*ical*.] Relating to ethnology.

ēth-nō-lōg-īc-ā-lŷ, *a.* [Eng. *ethnological*;-*ly*.] When viewed from the ethnological standpoint; with respect to race.

"Wherever man can live he has ever been ethnologically the same."—*Notes and Queries*, Oct. 16, 1888, p. 307.

ēth-nōl-ō-gist, *s.* [Eng. *ethnology*(*y*); -*ist*.] One whose special study is ethnology; a proficient in ethnology.

"The American ethnologists animadvert on Dr. Prichard's apparent inconsistencies."—*Notes and Queries*, Oct. 16, 1888, p. 306.

ēth-nōl-ō-gŷ, *s.* [Gr. *ethnos*=a body of men, a nation, and *logos*=a discourse.] The science which treats of the various races of mankind, and attempts to trace them to their origin. It developed from ethnography, of which it is the extension, and to which it stands in a relation akin to that which geology possesses to geography. Itself has now been merged in anthropology, of which it is only one branch, though an important one. Anthropology, again, is a branch of biology.

"To give to ethnology those important details which it craves, respecting the persistence of races."—*Notes and Queries*, Oct. 16, 1888.

ē-thō-lōg-īc, **ēth-ō-lōg-īc-ā**, *a.* [Eng. *ethnology*(*y*); -*ic*, -*ical*.] Pertaining or relating to ethnology.

ē-thōl-ō-gist, *s.* [Eng. *ethnology*(*y*); -*ist*.] One who studies ethnology (q. v.).

ē-thōl-ō-gŷ, *s.* [Gr. *ethos*=an accustomed seat . . . the manners and habits of mankind, the disposition, character.] The name given by Mr. John Stuart Mill to a science which he calls the science of character, or of the formation of character. It is the science which corresponds to the art of education in the widest sense of the term, including the formation of national as well as of individual character.

"A science is thus formed, to which I now propose to give the name of *Ethology*, or the Science of Character; from the Greek *ethos*, a word more nearly corresponding to the term 'character,' as I here use it, than any other word in the same language."—*J. S. Mill: Logic*, bk. vi., ch. v.

"Psychology is the science of the elementary laws of mind; ethnology is the subordinate science which determines the kind of character produced in conformity to those general laws by any set of circumstances, physical or moral. Mr. John S. Mill considers ethics an art, and ethnology a science. [ETHICS.] (*J. S. Mill: Logic*, bk. vi., ch. v.)

***ē-thō-pō-ēt-īc**, *a.* [Gr. *ethos*=manner, habit, and *poiētikos*=making (*poiō*=to make).] Pertaining to or suitable for the formation of character.

ē-thū-ll-ā, *s.* [Etym. doubtful.]

Bot.: The typical genus of the sub-tribe Ethuleae (q. v.).

ē-thū-ll-ē-æ, *s. pl.* [Lat. *ethuli*(*a*); fem. pl. adj. suff. -*æ*.]

Bot.: A sub-tribe of composite plants, tribe Veroniceae.

ē-thū-ŷa, *s.* [Gr. *aitheusō*=to put in rapid motion, to kindle.] [ETHUSA.]

Zool.: A genus of brachyurous short-tailed Crustaceans. Example, *Ethusa mascaron*.

ē-thŷl, *s.* [Eng., &c., *eth(er)* and *yl*=Gr. *hylē*=matter, principle; Ger. *äthyl*.]

Chem.: A monad fatty hydrocarbon radical, C₂H₅; also denoted by the Symbol Eth or E.

ethyl-acetate, *s.*

1. *Chem.*: Acetic ether, C₄H₈O₂ or CH₃COOC₂H₅. It is prepared by heating concentrated sulphuric acid to 130°, and then allowing a mixture of sixty parts of glacial acetic acid and forty-six parts of 93 per cent. alcohol to run slowly into the flask. The ether distills over, and is washed with a solution of soda, and then dried over calcium chloride. Ethyl acetate is a fragrant, colorless, limpid liquid, boiling at 73°. It is soluble in seventeen parts of water; twenty-eight parts of the ether dissolves one part of water. When passed through a red-hot tube it is decomposed into acetic acid and ethene.

2. *Pharm.*: Ethyl acetate (*Æther aceticus*) is used as a stimulant and antispasmodic.

ethyl-aceto-acetate, *s.*

Inorganic Chemistry: Aceto-acetic ethyl ether, CH₃COCH₂COOC₂H₅. This substance is obtained

as the sodium compound by the action of sodium on ethyl acetate; the sodium compound is decomposed by acetic acid, and fractionally distilled. It is a colorless liquid, boiling at 180°. Its aqueous solution is colored dark violet by ferric chloride. An atom of hydrogen can be replaced by sodium, as CH₃COCHNaCOOC₂H₅.

ethyl-alcohol, *s.*

Chem.: C₂H₅OH. [ALCOHOL.] Ethyl-alcohol can be obtained from acetic acid by converting the acid into acetyl chloride by distillation with phosphorus pentachloride, and acting on a mixture of acetyl chloride and glacial acetic acid with sodium amalgam, which decomposes the acetic acid, liberating hydrogen, which acts on the acetyl chloride, CH₃COCl, converting it into aldehyde, which, by the further action of hydrogen, is converted into alcohol, and this is converted by acetyl chloride into acetic ether. This is then saponified by distilling with potash, yielding potassium acetate and ethyl-alcohol. Ethyl-alcohol has been detected in several growing plants, as in the fruit of the parsnip (*Pastinaca sativa*). It is formed during the fermentation of dough, and mostly evaporates during baking, but bread contains 0.314 per cent. of alcohol. A mixture of one part snow and two parts of 70 per cent. alcohol at 0°, lowers the temperature to -20°. To detect alcohol, oxidize with sulphuric acid and permanganate of potassium, then add sodium thiosulphate to render the solution colorless. The aldehyde formed gives a violet color on the addition of a drop of a solution of magenta. Or, warm the liquid and add a fragment of iodine, and then caustic potash till it is colorless; on cooling, it deposits a yellow powder which, under the microscope, appears as six-sided plates.

ethyl-benzene, *s.*

Chem.: C₆H₅C₂H₅. Isomeric with Xylene. A liquid hydrocarbon boiling at 134°. It is obtained by the action of sodium on a mixture of bromide of ethyl, C₂H₅Br, and bromobenzene, C₆H₅Br. Ethylbenzene when oxidized with chromic acid mixture is converted into benzoic acid, C₆H₅COOH.

ethyl-borate, *s.*

Chem.: (C₂H₅)₃BO₃, triethyl borate. Formed by the action of boron trichloride, BCl₃, on alcohol. It is a thin, limpid liquid, boiling at 119°, and decomposed by water. Its alcoholic solution burns with a flame edged with green, giving off boric oxide. Monethyl borate, C₂H₅BO₂, is a heavy liquid, decomposed when heated.

ethyl-bromide, *s.*

Chem.: C₂H₅Br, bromide of ethyl. Obtained by adding slowly four parts of bromine to a mixture of forty-five parts of alcohol, and four of amorphous phosphorus, and then distilling on a water-bath. It is a colorless liquid, boiling at 38°.

ethyl-carbinol, *s.* [NORMAL PROPYL ALCOHOL.]

ethyl-chloride, *s.*

Chem.: C₂H₅Cl. Obtained by saturating a cold solution of one part of fused ZnCl₂ in two parts of 95 per cent. alcohol with hydrochloric acid gas, and then distilling on a water bath. Ethyl-chloride is a liquid boiling at 12.5°. It burns with a green flame.

ethyl-cyanide, *s.* [PROPIONITRIL.]

ethyl-formate, *s.*

Chem.: HCOOC₂H₅, formic ether. Obtained by distilling sodium formate with ethylic alcohol and strong sulphuric acid. A liquid boiling at 54°.

ethyl-hydride, *s.* [ETHANE.]

ethyl-iodide, *s.*

Chem.: C₂H₅I, iodide of ethyl, hydriodic ether, iodethane. Ethyl-iodide is prepared by gradually adding ten parts of iodine to one part of red phosphorus and five parts of 90 per cent. alcohol, and then distilling. It is a colorless liquid, boiling at 72.5°. Heated with water to 150° in a sealed tube, it is decomposed in alcohol and hydriodic acid. By heating with excess of hydriodic acid to 150°, it is converted into ethane, C₂H₆+HI=C₂H₆+I₂.

ethyl-oxalate, *s.*

Chemistry: C₂O₄(C₂H₅)₂ or (COOC₂H₅)₂. Oxalic ether, diethyl oxalate. Prepared by digesting alcohol and dehydrated oxalic acid in a flask with an inverted condenser, or by saturating the mixture with dry hydrochloric acid. Oxalic ether is a colorless oily liquid, which boils at 186°. It is decomposed by sodium, forming ethyl carbonate, and CO is liberated. If oxalic ether is mixed with three times its weight of absolute alcohol, it yields glycolic and tartaric acids when treated with sodium amalgam. With excess of an aqueous solution of ammonia it yields oxamide (COONH₂)₂. When dry ammonia gas is passed into oxalic ether it is absorbed, and a white precipitate of oxam-ethane, the ethylic ether of oxamic acid, is formed.

ethyl-oxide, *s.* [ETHER.]

ethyl-silicate, *s.*

Chem.: Tetraethyl silicate, Si(OC₂H₅)₄. A colorless liquid, boiling at 166°. It is obtained by acting on anhydrous alcohol with tetrachloride of silicon. It burns with a white flame, and finely divided silica is given off.

ethyl-sulphide, *s.*

Chem.: Thio-ethyl ether, (C₂H₅)₂S. A colorless oily pungent liquid, boiling at 91°; it is very inflammable, and burns with a blue flame. It is obtained by passing ethyl-chloride into an alcoholic solution of potassium sulphide.

ethyl-sulphhydrate, *s.* [MERCAPTAN.]

ethyl-sulphite, *s.*

Chem.: C₄H₁₀SO₃. Obtained by the action of thionyl chloride, SOCl₂, or of sulphur dichloride, S₂Cl₂, on absolute alcohol. It is a liquid, boiling at 161°, decomposed by water into alcohol and sulphurous acid.

ethyl-sulphonic-acid, *s.*

Chem.: C₂H₅SO₃OH. Formed by the action of ethyl iodide on sodium sulphite. [ETHYL-SULPHURIC ACID, *s.*]

Chem.: Sulphovinic acid, C₂H₅SO₄. Prepared by mixing alcohol with twice its weight of concentrated sulphuric acid, and heating till the mixture boils. When cold it is diluted with water, and neutralized with carbonate of barium, and the barium sulphate filtered off; the filtrate deposits crystals of barium ethyl sulphate. The free acid can be obtained as a thick syrup by decomposing the salt by dilute sulphuric acid and evaporating under the air-pump. Ethyl sulphates are soluble in water; their solutions are decomposed when boiled; therefore the solution must be left to crystallize.

ē-thŷl-ā-mine, *s.* [Eng., &c., *ethyl*, and *amine* (q. v.).]

Chem.: NH₂C₂H₅, amido-ethane, a liquid boiling at 18°. It mixes with water in all proportions. Obtained by distilling ethyl isocyanate, OC=N₂C₂H₅, with caustic potash; by the action of nascent hydrogen on acetonitril, CH₃CN; and by heating ethyl iodide and alcohol saturated with dry ammonia gas to 100° in sealed tubes and distilling the liquid with caustic potash, when a mixture of ethylamine, di- and tri-ethylamine is obtained; the mixture is treated with oxalic ether and distilled, when tri-ethylamine, N(C₂H₅)₃, comes over. It is an oil, boiling at 89°; the residue consists of diethyl-oxamide (soluble in water), and converted into oxalate of potassium and ethylamine, NH₂C₂H₅, by boiling with caustic potash. The part insoluble in water is the ethylic ether of diethyl-oxamic acid; this distilled with caustic potash yields diethylamine, an inflammable liquid, boiling at 58°. Ethylamine is a powerful base, decomposing metallic salts. It is decomposed by nitrous acid, forming nitrous ether, and free nitrogen is liberated, NH₂C₂H₅+2HNO₂=C₂H₅NO₂+2H₂O+N₂. Ethylamine with cyanic acid forms ethyl carbamide or ethyl urea. The salts of ethylamine are generally easily soluble in alcohol. The hydrochlorate, C₂H₅NH₂HCl, crystallizes in deliquescent prisms, which melt at 80°. It forms a double salt, with platinum chloride.

ē-thŷl-āte, *s.* [English, &c., *ethyl*; -*ate* (Chem.) (q. v.).]

Chem.: The name given to compounds which are obtained by the replacing of the hydrogen in the hydroxyl in ethylic alcohol by a metal, as sodium ethylate, C₂H₅ONa.

ē-thŷl-ēne, *s.* [English, &c., *ethyl*; -*ene* (Chem.) (q. v.).]

Chem.: A symmetrical hydrocarbon dyad radical. C₂H₄, each carbon atom having an unsaturated bond. It is isomeric with the unsymmetrical dyad radical ethylidene. It is sometimes called ethene, but that name should be only used for the hydrocarbon, C₂H₄.

ē-thŷl-īc, *a.* [Eng., &c., *ethyl*; -*ic*.]

Chem.: Pertaining to, resembling, or containing ethyl (q. v.).

ethylic-ether, *s.* [ETHER.]

ethylic ortho-carbonate, *s.*

Chem.: Ortho-carbonic ether, C(OC₂H₅)₂, analogous to carbon tetrachloride CCl₄, is formed by the action of sodium ethylate on chloropierin, C(Cl₃NO₂+4NaOC₂H₅=3NaCl+NaNO₂+C(OC₂H₅)₂). It is a liquid with an ethereal odor, boiling at 159°. Heated with ammonia it yields guanidine, CN₃H₅, and ethylic alcohol, C(OC₂H₅)₂+3NH₃=CN₃H₅+C₂H₅OH.

ē-thŷl-ī-dēne, *s.* [Eng., &c., *ethyl*; Gr. *eidos*=form, appearance, and suff. -*ene* (Chem.).]

Chem.: An unsymmetrical hydrocarbon dyad radical, having two unsaturated bonds belonging to the same carbon atom. It is isomeric with the symmetrical dyad radical ethylene.

ēt-ym-lōg-ic-gist, s. [Eng. *etymology*(y); -ist; Fr. *étymologiste*.] One versed in etymology; one who studies the derivations and sources of words.

"Our etymologists seem to have been too lavish of their learning."—*Johnson: Plan of English Dictionary*.

ēt-ym-lōg-ic-gise, ***eth-i-mol-o-gise**, v. t. & i. [Eng. *etymology*(y); -ize; Fr. *étymologiser*.]

A. *Trans.*: To examine into the etymology or derivation of; to trace the etymology of.

"Phœ. Breeches, quasi bear-riches; when a gallant bears all his riches in his breeches."

"Amo. Most fortunately etymologized!"

Ben Jonson: Cynthia's Revels, iv. 2.

B. *Intrans.*: To study etymology; to search into the derivation or source of words.

ēt-ym-lōg-ic-gy, ***eth-i-mol-o-gie**, s. [Fr. *étymologie*, from Lat. *etymologia*; Gr. *etymologia*, from *etymos*=true, real, and *logos*=a word.]

1. That part of philology which deals with the origin or true sources of words.

"The explanation and etymology of those words require a degree of knowledge in all the ancient northern languages."—*Tooke: Diversions of Purley*, vol. i., ch. ix.

2. The etymon or true source of a word.

"If the meaning of a word could be learned by its derivation or etymology, yet the original derivation of words is oftentimes very dark."—*Watts: Logic*.

3. That branch of grammar which treats of the inflections and modifications of words.

ēt-ym-lōn, s. [Lat., from Gr. *etymon* (neut. of *etymos*)=true, real.]

1. The true source of a word; the root from which a word is derived.

"Blue hath its etymon from the High Dutch blaw; from whence they call himmel-blue that which we call sky-color or heaven's blue."—*Peacham*.

2. The original or primitive meaning of a word; its primary signification.

eū, pref. [Gr.] Well, happily, prosperously, safely; it is used frequently as a prefix in English with the force of well, good, easy, &c.

eū-ās-trūm, s. [Gr. *euastreros*=rich in stars; *eu*=rich or abundant in, and *aster*, *asteros*=a star.]

Bot.: A genus of Algae, sub-order Desmidiæ.

eū-bōt-rys, s. [Gr. *eubotrys*=rich in grapes; *eu*=rich or abundant, and *botrys*=a cluster or bunch of grapes.]

Bot.: A genus of Ericacæ. *Eubotrys arborea* (formerly *Lyonia arborea*) is the sorrel-tree of this country, the acid leaves of which are chewed by hunters to assuage their thirst.

eū-cair-ite, ***eū-kair-ite**, s. [Ger. *eukairit*, from Gr. *eukairos*=seasonable; *eu*=good, and *kairos*=the right point of time. So named by Berzelius, because he found it opportunely soon after the discovery of the metal selenium.]

Min.: A soft mineral easily cut by the knife; color between silver-white and lead-gray, luster metallic, structure massive and granular, or in black metallic films. Composition: Selenium, 31.6; copper, 25.3; silver, 43.1=100. Found in Sweden, Chili, &c. (*Dana*.)

eū-cāl-yn, s. [Eng., &c., *eucalyptus*; -in.]

Chem.: An unfermentable sugar, which separates in the fermentation of Melitose (the sugar of Eucalyptus). It is a thick syrup, which polarizes to the right, and does not reduce copper solution.

eū-cal-yp-tēne, s. [Eng., &c., *eucalypt(us)*; -ene (Chem.) (q. v.).]

Chem.: A terpene, $C_{10}H_{16}$, contained in the volatile oil of *Eucalyptus globulus*. Eucalyptene boils at 172°. By the action of iodine it is converted into cymene (q. v.), $C_{10}H_{14}$.

eū-ca-lŷp-tō-cri-nī-dæ, s. pl. [Modern Latin *eucalyptocrinus*(us); and Lat. fem. pl. adj. suff. -idæ.]

Paleont.: A family of Crinoideans, type *Eucalyptocrinus* (q. v.).

eū-ca-lŷp-tō-cri-nūs, s. [Gr. *eu*=well; *kalyptos*=covered, and *krinon*=a lily.] [Def.]

Paleont.: The typical genus of the family Eucalyptocrinidæ. The calyx is inverted upon itself whence the name of the genus. Range in time, Silurian to the Devonian rocks.

eū-ca-lŷp-tōl, s. [Eng., &c., *eucalypt(us)*, and Lat. *ol(eum)*=oil.]

Chem.: A volatile oil obtained from *Eucalyptus globulus*. It contains seventy per cent. of eucalyptene and thirty per cent. of cymene.

eū-ca-lŷp-tūs, s. [Mod. Lat., from Gr. *eu*=well, and *kalyptō*=to cover.]

Bot.: A genus of plants belonging to the order Myrtaceæ, or Myrtle blooms. *Eucalyptus globulus* is the blue-gum tree of Tasmania.

The leaves are about ten inches long by an inch wide, and are oddly twisted, exhaling a strange camphor-like odor. The flowers small and inodorous. It is an evergreen tree, remarkable for its rapid growth. It reaches the extraordinary maximum height of 300 feet, with a circumference of from thirty to fifty.

The timber is hard, easily worked, and very serviceable for keels of vessels, bridges, or for any purpose requiring durability. The tree supplies a medicinal preparation efficacious in throat affections and in intermittent fever. It has also a wonderful power of destroying malaria. It has been introduced into California.

It has since been planted in the South of Europe and in North and South Africa. *Eucalyptus resinifera* furnishes a kind of gum kino, occasionally sold as an astringent medicine and used in cases of mucous discharges as leucorrhœa, gonorrhœa, &c., in this country and by the natives of India. *E. resinifera* in the dry season exudes a saccharine mucous substance like manna, but less nauseous; so do other species. *E. robusta* has large cavities in the stem between the concentric zones of annual growth; these are filled with a rich vermilion-colored gum. When *E. gunnii*, the Tasmanian cedar-tree, is wounded, there comes forth in a copious stream a cool, refreshing, slightly aperient liquid, which on fermentation becomes beer. Various species of Eucalypti furnish tannin; many yield good timber. (*Lindley*, &c.)

eū-cha-ris, s. [In Greek a female name, but more commonly an adj. *eucharis*=pleasing, charming, winning. Used of Aphrodite (Venus), or of people in general.] [EUCHARIST.]

Astron.: An asteroid, the 181st found. It was discovered by Cottenot, on February 2, 1878.

eū-cha-rist, s. [Lat. *eucharistia*, from Greek *eucharistia*=a giving of thanks, the Eucharist; *eu*=well, and *charizomai*=to show favor; *charis*=favor; *chairō*=to rejoice.]

Scripture and Ecclesiology:

*1. The act of giving thanks; thanksgiving.

"Some receive the sacrament as a means to procure great graces and blessings, others as an *eucharist* and an office of thanksgiving for what they have received."—*Taylor*.

2. The Holy Communion, specially in one aspect of it, viz., the giving of thanks. On the night of the Savior's betrayal, while He and the disciples were reclining at table eating the passover, "Jesus took bread and blessed it," "and He took the cup and gave thanks," (Matt. xxvi. 26, 27; cf. also Mark xiv. 22, 23.) In Luke xxii. 19, and 1 Cor. x. 11, with which cf. 1 Cor. xi. 24, it is related that "He took the bread and gave thanks"—"gave thanks" being evidently equivalent to "blessed it" in the first two gospels, though the Greek words are different: (having) blessed it being *eulogēsas*, and having given thanks being *eucharistēsas*. Evidently the giving of thanks at the first communion was closely analogous to what is sometimes termed Grace before meat. It partly implied an acknowledgment of God's goodness in providing food, at the time represented by bread and wine, for the sustenance of man's bodily necessities, but as this was no ordinary feast, but one in which every act was symbolical, it chiefly denoted thanksgiving for the benefits derived from the approaching death of Christ, which the bread and wine so clearly prefigured.

Eucalyptus Globulus.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, here, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

eu-cha-ris-tic, eu-cha-ris-tic-al, a. [Eng. *eucharist*; -ic, -ical.]

1. Containing an expression or act of thanksgiving.

"It would not be amiss to put it into the eucharistical part of our daily devotions."—Ray.

2. Pertaining to the Holy Eucharist; used in the celebration of the Lord's Supper.

***eu-char-ist-ize, v. t.** [Eng. *eucharist*; -ize.] To bless.

"The elements being eucharistized or blessed by the prayer of the word that came from him."—Waterland: *Works*, vii. 99.

eu-cheir'-ūs, s. [EUCHIRUS.]

eu-chē-lai'-ōn, s. [Greek *euchē* = prayer, and *elaiōn* = oil.]

Gr. Church: The oil with which a penitent guilty of a mortal sin is anointed by an archbishop or bishop and seven priests, in order to gain absolution. The ceremony is preceded and followed by prayer, and is called the Sacrament of Euchelaion.

eu-cheu'-ma, s. [Greek *eu* = abundant (?), and *cheuma* = that which is poured; a flood.]

Bot.: A genus of rose-spored Algae. *Eucheuma speciosum* is the Jelly-plant of Australia. (*Treas. of Bot.*)

eu-chir'-ūs, eu-cheir'-ūs, s. [Gr. *eucheir* = with good hands; handy, active, dexterous: *eu* = well developed, and *cheir* = the hand. So called from the exceeding elongation of the anterior tibiae and tarsi.]

Entom.: The name given by Kirby to a genus of lamellicorn beetles, placed by Swainson in the family Cetonidae, sub-family Megasominae. *Eucheirus longimanus*, an East Indian species, has antennae longer than the body.

eu-chites, s. pl. [Gr. *euchomai* = to pray, and Eng., &c., pl. suff. -ites.]

Ch. Hist.: A Christian sect which arose in the latter part of the fourth century, though, as is generally the case when new sects arise, some of their tenets were older than themselves. Their name, Eucheites, was derived from their belief that there dwelt in man a demon who could only be expelled by incessant prayer and singing. They combined with this view various opinions derived partly from Manichaeism, partly from the Oriental Philosophy. After a time the term Eucheite became a vague one, applied to all who withdrew from the Catholic Church and spent much time alone in prayer. They were called also Massalians. Michael Psellus, writing about A. D. 1050, brings charges against them of causing the lights to be overturned and extinguished at their meetings, promiscuous intercourse following. Then the children born of these unions were reported to be murdered and burnt, ashes being mixed with their blood for magical purposes. The same scandalous untruths were told of the early Christians themselves, and arose through exaggeration and malignant perversion of the harmless facts that the elements in the Holy Communion symbolized the body or flesh and blood of its Divine Founder, and that the ordinance being instituted in the evening, was kept by Christians also in the evening. (*Mosheim: Ch. Hist.*, cent. iv. & xii.; *Baur: Ch. Hist.*, ii. 133.)

eu-chlān-i-dō-ta, s. pl. [Mod. Gr. *euchlanis* (genit. *euchlanidos*), and n. pl. suff. -ta.]

Zoology: A family of Rotatoria. The rotatory organs are multiple, or divided into more than two lobes; a carapace is present. There are eleven genera. [EUCHLANIDS.] (*Griffith & Henfrey.*)

eu-chlā-nis, s. [Greek *eu* = well, and *chlanis* (genit. *chlanidos*) = an upper garment of wool.]

Zool.: The typical genus of the family Euchlanidota.

eu-chlōre, a. [Gr. *eu* = well, good, and *chlōros* = green.]

Min.: Having a distinct green color.

eu-chlōr'-ic, a. [Eng. *euchlor*(e); -ic.] Of a distinct green color.

eu-chlōr'-ine, s. [Pref. *eu-*, and Eng., &c., *chlorine* (q. v.).]

Chem.: A gaseous mixture of chlorine and oxide of chlorine obtained by gently heating potassium chlorate with dilute hydrochloric acid. It is a yellow explosive gas.

eu-chōl'-ō-gy, *eu-chōl'-ō-gi-ōn, s. [Greek *eucholōgion*, from *euchē* = a prayer, and *logos* = a word, a discourse.]

Gr. Church: A book containing the order of ceremonies, ritual, and ordinances; a liturgy.

"A prayer taken out of the euchologion of the Greek Church."—Taylor: *Holy Dying*, ch. iv., § 7.

eu-chre (chre as kēr), s. [Ety. doubtful.] A game of cards, a modified form of *écarté*, all cards between the seven and the ace being discarded, commonly played in America. The highest card is the knave of trumps, technically known as the right bower, and the next the knave of the same

color, called the left bower. Some players use an odd card called the "joker" which is of the highest value, capturing either bower. There are many varieties of euchre, the French, Lap, Railroad, and two, three, four, and six-handed games.

"I thanked my new acquaintance, but the thing was impossible, as I had never played euchre."—Mayne Reid: *Quadrone*, ch. xviii.

eu-chre (chre as kēr), v. t. [EUCHRE, s.]

1. *Lit.:* To beat the dealer, when not ordered up (q. v.), by taking three out of the five tricks in a hand at euchre, thereby gaining two points.

2. *Fig.:* To beat thoroughly; to force into a situation from which there is no escape.

"'Euchred, old man!' said Tennessee, smiling."—Bret Harte: *Tennessee's Partner*.

eu-chrēs'-ta, s. [Gr. *euchrēstos* = easy to make use of; serviceable.]

Bot.: A genus of papilionaceous plants, tribe Dalbergiæ. The people of Java regard *Euchresta bergfeldia* as a specific against the poison of venomous reptiles. Lindley thinks it acts like an emetic.

eu-chrō'-ic, a. [Gr. *eu* = well; *chroia* = a color, and Eng. suff. -ic.] (See the compound.)

euchroic-acid, s.

Chem.: C₁₂H₄N₂O₈. Obtained by heating paramide with alkalis. It is a dibasic acid which crystallizes in short prisms, which are slightly soluble in water. By the action of reducing agents, such as zinc, it is converted into a dark-blue insoluble substance called euchrone. Euchroic-acid is also obtained by distilling the ammonium salt of mellitic acid C₆(CO₂H)₆.

eu'-chrō'-ite, s. [Gr. *eu* = well, good; *chroia* = color, and Eng. suff. -ite (Min.).]

Min.: A bright green orthorhombic mineral of vitreous luster; its hardness 3½ to 4; its specific gravity 3.39. Composition: Arsenic acid, 32.42 to 34.42; oxide of copper, 46.97 to 48.09; water, 18.80 to 19.31. Found at Libethen in Hungary. (*Dana.*)

eu'-chrōne, s. [Gr. *euchroos* = well colored: *eu* = well, and *chrōs* = color.]

Chem.: A dark-blue insoluble substance formed when zinc is added to an aqueous solution of euchroic-acid.

eu'-chym'-y, s. [Gr. *euchymia*, from *eu* = well, good, and *chymos* = juice, chyme; Fr. *euchymie*.]

Med.: A good state of the fluids in the body.

eu'-chyl'-si-dēr'-ite, s. [Gr. *eu* = well; *chylis* = a pouring, from *cheō* = to pour; *sideros* = iron, and -ite (Min.) (q. v.).]

Min.: The same as PYROXENE (q. v.).

eu'-clāse, s. [Gr. *euklas*; Gr. *eu* = easily, and *klao*, fut. *klaoō* = to break.]

Min.: A monoclinic green, blue, or white transparent mineral of vitreous luster, except on the cleavage face, where it is pearly; its hardness, 7½; specific gravity, 3.1. Composition: Silica, 41.63-42.22; alumina, 30.56-34.07; beryllium, 16.97-21.78; sesquioxide of iron, 0.2-2.2, &c. Found in South America and in the Ural Mountains.

***eu'-clās'-ite, s.** [Eng., &c., *euclase*(e), and suff. -ite (Min.) (q. v.).]

Min.: A name formerly given to a green apatite from Lake Baikal.

eu'-clē'-a, s. [Gr. *eukleia* = good fame, glory: *eu* = good, and *kleos* = glory. So named from the lasting beauty of its evergreen foliage.]

Bot.: A genus of Ebenaceæ. They are from Africa. The berries of various species are eaten.

eu-clī'-di-dās, s. pl. [Mod. Lat. *euclid(ium)* (q. v.), and Lat. fem. pl. adj. suff. -idae.]

Bot.: A family of Cruciferae, tribe Pleurorhizeæ.

eu-clid'-i-ūm, s. [Gr. *eu* = well, and *kleidion* = a little key; *kleidoō* = to lock up. So named because the pods are well or effectively shut.]

Bot.: The typical genus of the family Euclidæ (q. v.).

***eu'-clī-ōn'-is-me, s.** [From *Euclio*, a miser in the *Aulularia* of Plautus, and Eng. suff. -ism.] Stinginess.

"Such stinging remorse of their miserable euctionism."—Nashe: *Leuten Stufe*.

eu-cnē'-mī-dās, s. pl. [Gr. *euknēmis* (genit. *euknēmidos*) = well-greaved, well equipped with greaves: *eu* = well, and *knēmis* (genit. *knēmidos*) = a greave, a legging stretching from the knee to the ankle.]

Entom.: A family of Beetles, tribe Pentamera.

eu'-crā'-sū, s. [Gr. *eukrasia*, from *eu* = well, good, and *krasis* = a mixing; *kerannymi* = to mix.]

Med.: A well-balanced temperament.

***euc'-tic-al, a.** [Gr. *euktikos* = expressing a wish; *euktos* = wished for; *euchomai* = to pray, to wish.]

1. Containing or of the nature of a prayer or supplication.

"Sacrifices . . . expiatory, euctical, and eucharistical."—Law: *Theory of Religion*, p. 226.

2. Containing or expressive of thanksgiving.

"The euctical or eucharistical offering must consist of three degrees, or parts; the offering of the heart, of the mouth, of the hand."—Metc: *Disc. upon Offerings*, bk. i., dis. 49.

***eu-dēs'-mōn, *eu-dē'-mōn, s.** [Gr.] A good angel.

"The simple appendage of a tail will cacodemize the eudemion."—Southey: *The Doctor*; *Frag. on Beards*.

eu-dēs'-mōn'-ism, s. [Greek *eudaimōn* = happy: *eu* = well, good, *daimōn* = a spirit, and Eng. suff. -ism.] The system of philosophy which places the summum bonum in the promotion of the happiness of humanity, and teaches that the most virtuous act of which an individual is capable is to render others happy.

"Renouncing all ostentatious dallies with Eudemionism."—De Quincey: *Last Days of Kant*.

eu-dēs'-mōn'-ist, s. [Gr. *eudaimōn* = happy, and Eng. suff. -ist.] A believer in eudemionism.

eu-dēs'-mōn'-ist'-ic, a. [Eng. *eudæmonist*; -ic.] Pertaining to or of the nature of eudemionism.

"We reject the Israelitish morals as eudemionistical."—*Modern Review*, vol. ii., No. 8, p. 718 (1881).

eu-di'-a-lyte, eu-dy'-a-lyte, s. [Gr. *eudialyt*, from Gr. *eu* = easily, and *dialyō* = to part asunder, to dissolve: *eu* = well, and *lyō* = to loosen, to dissolve, in allusion to the facility with which it dissolves in acids.]

Min.: A rhombohedral red mineral of vitreous luster, translucent or nearly so; its hardness 5½; its specific gravity 2.90 to 3.01. Composition: Silica, 45.70 to 54.10; zirconia, 10.90 to 15.60; sesquioxide of iron, 6.37 to 7.86; sesquioxide of manganese, 1.15 to 2.93; lime, 9.23 to 12.06; soda, 11.40 to 13.92, &c. There are two varieties: Eudialyte proper, of which the double refraction is positive, and Eucolite in which it is negative. Found in Arkansas, North Greenland, and in Norway.

eu-di-ōm'-ē-tēr, s. [Gr. *eudios* = fine, clear (of weather), and *metron* = a measure; Fr. *eudiometre*.]

Nat. Phil.: An instrument devised for ascertaining the quantity of oxygen contained in a given bulk of ætiform fluid. The first eudiometer was constructed by Dr. Priestley, the discoverer of oxygen. His device was founded upon the idea of subjecting a measured volume of air to a substance which would absorb the oxygen of the air. For this purpose he used deutoxide of nitrogen, which has an energetic tendency to regain the oxygen of which it has been deprived, and resume its condition as nitric acid. Ure's eudiometer consists of a graduated glass siphon, whose open extremity is slightly flaring. The other end is closed, and has two platinum wires. Being filled with water or mercury, the closed leg receives a volume of gas by the ordinary means. A couple of inches of water being displaced from the open end of the tube, the mouth is closed by the thumb, and the instrument brought near to the electric conductor, a spark from which, leaping the interval between the end wires, explodes the gases. The rise of the water in the closed end indicates the volume removed, and the result is determined by reference to the graduated tube. If merely oxygen and hydrogen gases have been introduced in their proper equivalent proportions, eight of the former and one of the latter, by weight, or two volumes of hydrogen to one volume of oxygen, the result will be water without gaseous remainder.

eu-di-ō-mēt'-ric, eu-di-ō-mēt'-ric-al, a. [Eng. *eudiometrical*(y); -ic, -ical; Fr. *eudiométrique*.] Of or pertaining to eudiometers or eudiometry; performed by means of a eudiometer.

eu-di-ōm'-ē-tr'y, s. [Eng. *eudiometer*; -y; Fr. *eudiométric*.] The art, process, or practice of measuring the purity of the air by means of a eudiometer; the determining the nature and proportion of the constituents of any gaseous mixture by a eudiometer.

eu-di-ōs'-mē-s, s. [Gr. *eu* = typical; Mod. Lat. *diosma*; Lat. fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Rutaceæ, tribe Diosma.

eud'-nōph'-ite, s. [From Gr. *eu* = great, *dnophos* = gloom, in allusion to the cloudiness of the mineral, and suff. -ite (Min.) (q. v.).]

Min.: A white, grayish, or brownish orthorhombic mineral, of feeble luster, except on the cleavage faces, where it is pearly; its hardness 5½, and its specific gravity 2.27. Composition: Silica, 54.93 to 55.06; alumina, 23.12 to 25.59; soda, 8.16 to 8.29. Found on the Norwegian island Lamöe. (*Dana.*)

Eū-dōx'-i-an-s, s. pl. [For etym. see def.]

Ch. Hist.: The followers of Eudoxus, who from A. D. 356 was Bishop of Antioch, in Syria, and from 380 to his death in 370 Bishop and Patriarch of Constantinople. He was successively an Arian, a Semi-Arian, and an Aetian. Respecting the Trinity, he believed the will of the Son to be differently affected from that of the Father.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aș; expect, Xenophon, exist. ph = f. -clan, -tian = șan. -tion, -sion = șhūn; -tion, -sion = zhūn. -tious, -cious, -sious = șhūs. -ble, -dle, &c. = bel, del.

eū-dy-a-lite, *s.* [EUDIALYTE.]

eū-dyn-a-mis, *s.* [Greek *eu*=good, great, and *dynamis*=strength.]

Ornith.: A genus of Cuculidæ (Cuckoos), having a strong, thick bill. Found in Asia and Australia.

eū-dy-tēs, *s.* [Gr. *eu*=good, and *dytēs*=a diver, from *dyō*=to dive.]

Ornith.: A genus of Spheniscidæ. *Eudytes demersa* is the Jackass Penguin (q. v.).

eū-ēm-ēr-ism, **eū-hēm-ēr-ism**, *s.* [From Lat. *Euhemerus*, *Euhemerus*, *Euhemerus*; Gr. *Euhēmeros*=the philosopher whose views are described in the definition.]

Religions.: The method of interpreting myths practiced by Euhemerus of Messenia, a philosopher of the Cyrenaic sect, who lived at the time of Alexander the Great and his immediate successors. His proclivities were what would now be called strongly rationalistic. In his *Sacred History* he represented the classic gods as being nothing more than deified heroes. Jupiter, for example, was a king of Candia (Crete), who, when he lived, was a great conqueror, whom his admirers elevated after his death to the skies. The sincere adherents of the popular mythology were much scandalized to find such opinions published, and freely applied to their author the name of atheist; but many subsequent writers approved of his work. So did the early Christians; for they found that the rationalism of Euhemerus powerfully aided them in demolishing the Greek and Roman heathen faiths. Euhemerism then properly signifies the explanation of popular mythology by the hypothesis that the beings worshipped were originally eminent men, deified on their decease by their admirers, and ultimately worshipped as if from the very first they had been gods. [APOTHEOSIS, DEIFICATION.]

"By one writer it is spoken of as a piece of *euhemerism*; by another it is denounced as degrading the myth from a genuine to an artificial state."—*Cox: Tales of the Gods and Heroes*, p. 230.

eū-ēm-ēr-ist, **eū-hēm-ēr-ist**, *s.* [Gr. *Euhēmeros* [EUEHERISM], and Eng. suff. *-ism*.] A believer in the doctrine of euhemerism.

"The modern euhemerists . . . in part adopted the old interpretations, and sometimes fairly left the Greek and Roman teachers behind in the race after prosaic possibility."—*Tylor: Primitive Culture*, 2d ed. (1873), i. 279.

eū-ēm-ēr-ist-ic, **eū-hēm-ēr-ist-ic**, **eū-ēm-ēr-ist-ic-al**, **eū-hēm-ēr-ist-ic-al**, *a.* [English *euhemerist*; *-ic*, *-ical*.] Of or belonging to euhemerism or euhemerists; in the manner of euhemerists, rationalistic.

"The euhemeristic fashion of dealing with the primitive legends of human infancy."—*J. Morley: Diderot*, ch. xv.

eū-ēm-ēr-ist-ic-al-ly, **eū-hēm-ēr-ist-ic-al-ly**, *adv.* [Eng. *euhemeristic*; *-ly*.] After the manner of Euhemerus or the euhemerists; rationalistically.

eū-ēm-ēr-ize, **eū-hēm-ēr-ize**, *v. i.* [Gr. *Euhēmeros*, and Eng. suff. *-ize*.] To believe in or follow euhemerism.

eū-frā-gi-a, *s.* [Gr. *eu*=well, and Lat. *fragium*=a fracture, from *frango*=to break.]

Bot.: A sub-genus of *Bartsia*, containing *Bartsia viscosa*.

***eū-gē**, *s.* [Lat., from Gr.=well done! bravo!] Applause, acclamation.

"To solemnize the euges, the passionate welcomes of heaven poured out on penitents."—*Hammond: Works*, iv. 500.

eū-gēn-āte, *s.* [Mod. Lat. *eugen(ia)* (q. v.), and suff. *-ate* (Chem.) (q. v.).] **Chem.**: [EUGENOL.]

eū-gēn-ē-sis, *s.* [Gr. *eu*=well, and *genesis*=origin, source.] The quality of breeding well or freely; the production of young by the union of individuals of different species or stocks.

eū-gēn-ē-site, *s.* [Gr. *eu*=good, *genesis*=origin, source, and suff. *-ite* (Min.) (q. v.).] **Min.**: The same as *Selenipalladite* (q. v.).

***eū-gēn-ēt-ic**, *a.* [EUGENESIS.] Of or pertaining to eugenesis.

Eū-gē-nia (1), *s.* [So called in honor of Eugénie, Empress of the French at the time of its discovery.]

Astron.: An asteroid, the forty-fifth found. It was discovered by Goldschmidt, on June 28, 1857.

eū-gē-ni-a (2), *s.* [Mod. Latin; named after Prince Eugene of Savoy, a great patron of botany and horticulture.]

Bot.: A genus of Myrtacæ, tribe Myrtæ, containing the berried species of the order. Calyx with a rounded tube, in four divisions; petals four, inserted in the calyx; stamens many; ovary two to three-celled, each with several ovules; seeds one or two, large. About 200 species are known; they are from the tropics, especially those of America. *Eugenia jambos*, *malaccensis*, &c., produce what are

called in the East Rose Apples. The fruits of *E. cauliflora*, *E. dysenterica*, *nicotii*, and *brasiliensis*, the dried fruits of *E. acris* and *E. pimento* are made into the pepper called Allspice or Pimento. The leaves of *E. depauperata* and *E. variabilis* are used in Brazil as astringents, and the berries of *E. caryophyllus* as carminatives.

eū-gē-ni-a-crī-ni-dæ, *s. pl.* [Mod. Lat. *eugeniacrinus*], and Lat. fem. pl. adj. suff. *-idæ*.]

Palæont.: A family of Crinoidea. Range in time, from the Oolite to the Chalk.

eū-gē-ni-a-crī-nis, *s.* [Latin *eugenius*, and *crinon*=a lily.] [EUGENTIA, (CRINUM.)]

Palæont.: The typical genus of the *Eugeniocrinidæ* (q. v.).

eū-gēn-ic, *a.* [Mod. Lat. *eugen(ia)* (q. v.); *-ic*.] Obtained from or relating to cloves.

eugenic-acid, *s.*

Chem.: [EUGENOL.]

eū-gēn-in, *s.* [Mod. Lat. *eugen(ia)*; suff. *-in* (Chem.) (q. v.).]

Chem.: Clove camphor, a crystalline substance deposited from water which has been distilled from cloves. Nitric acid turns it blood red.

eū-gēn-ol, *s.* [Mod. Lat. *eugen(ia)* (q. v.), and Eng. &c. (alcohol).]

Chem.: $C_{10}H_{12}O_2$. Also called Eugenic-acid. It is contained in the volatile oil of *Caryophyllus aromaticus* (oil of cloves) and in oil of pimento. It is obtained by shaking the oil with alcoholic potash, and then a crystalline mass of potassium eugenate separates, which is washed with alcohol and decomposed by acid. Eugenol is an aromatic oil, boiling at 247°. Its alcoholic solution gives a blue color with ferric chloride; it has the property of phenol. When heated with hydriodic acid, it gives off methyl iodide. When fused with caustic potash it is converted into acetic acid and protocatechuic acid, $C_8H_6(OH)_2COOH$. The H in the (OH) in eugenol can be replaced by sodium, &c.

***eū-gēn-ŷ**, *s.* [Gr. *eugenia*; *eu*=well, good, and *genesis*=birth.] Nobleness of birth.

***eugh** (*gh* silent or guttural), *s.* [YEW.]

***eugh-en** (*gh* silent or guttural), ***ewgh-en**, *a.* [Eng. *eugh*; *-en*.] Made of yew.

eū-glē-nā, *s.* [Gr. *euglēnos*=bright-eyed; *eu*=well, bright, and *glēnē*=the pupil of the eye; the eyeball.]

Zool.: The typical genus of the family Euglenia. It is unattached, with a red eye-speck, a tail-like process, and a single flagelliform filament. The species or forms are present in some pools to such an extent as to render the water green or red, and form a brilliant pellicle on the surface. (Griffith & Henfrey.) The coloring matter is insoluble in water, but is soluble in alcohol, from which it crystallizes in octohedra.

eū-glē-ni-a, *s.* [Mod. Lat. *euglen(a)*, and Lat. neut. pl. suff. *-ia*.]

Zool.: The name given by Dujardin to a family of Infusoria, nearly the same as *Astasia* of Ehrenberg. They belong to the order Flagellata.

eū-grāt-i-ō-lē-a, *s. pl.* [Gr. *eu*=typical, and Mod. Lat. *gratiolæ* (q. v.).]

Bot.: A sub-tribe of Scrophulariads, tribe Gratiolæ.

Eū-gu-bīne, *a.* [See def.] Of or belonging to the ancient town of Eugubium (now Gubbio) in Italy. Specially applied to seven tables or tablets discovered there in A. D. 1444, which furnish materials for a comprehensive view of the ancient Umbrian language. Four of the tablets are in the Umbrian tongue, two in Latin, and one partly in Umbrian and partly in Latin. The contents of the tablets, which are still preserved at Gubbio, are directions for the performance of sacrificial rites, forms of prayer, &c.

eū-har-mōn-ic, *a.* [Gr. *eu*=well, good, and *harmonikos*=harmonic.]

Mus.: Producing perfect harmony or concord. (Used to distinguish concordant sounds from those produced by the tempered scale.)

eū-hēm-ēr-ism, *s.* [EUEHERISM.]

¶ For the cognate words see the spelling EUEM.

eū-kāir-ite, *s.* [EUCAIRITE.]

eū-kāmp-tite, *s.* [Gr. *eukampṭēs*=well-bent or curved; *eu*=well, and *kampō*=to bend, to curve.]

Min.: According to Dana, a hydrous variety of Biotite (q. v.), but the *Brit. Mus. Catal.* makes the two species distinct. *Eukamptite* is nearly black, except in thin laminae, when it is brown, red, or reddish-yellow. Its hardness is 2 to 2.5, its specific gravity 2.72. Composition: Silica, 38.13; alumina, 21.60; protoxide of iron, 19.92; protoxide of manganese, 2.61; magnesia, 13.76; water, 3.98. Found at Presburg in Hungary. (Dana, &c.)

eū-kō-lite, *s.* [EUCOLITE.]

eū-li-mā, *s.* [Gr. *eu*=great, and *limos*=hunger.] **Zool.**: A genus of gasteropodous Mollusks, family Pyramidellidæ. It has a small white polished shell, slender and elongate, with many nearly level whorls, with internal prominent ribs; apex acute; aperture pointed; outer lip thickened internally, inner one reflected over the pillar; operculum horny, sub-spiral. When the animal creeps, it places the foot much in advance of the head, the latter being so concealed within the shell that only the tentacles protrude. Forty-nine recent and forty fossil species are known. The former are from Britain, the Mediterranean, Australia, India, and the Pacific; the latter date apparently from the Carboniferous period till now. The recent species are found in the sea between five and ninety fathoms deep. (Woodward.)

eū-li-mōl-lā, *s.* [Mod. Lat., dimin. of *eulima* (q. v.).]

Zoology: A sub-genus of mollusks, genus *Chemnitzia*.

***eū-lōg-ic**, ***eū-lōg-ic-al**, *a.* [Eng. *eulog(y)*; *-ic*, *-ical*.] Containing or expressive of eulogy; of the nature of eulogy; commendatory; eulogistic.

***eū-lōg-ic-al-ly**, *adv.* [Eng. *eulogical*; *-ly*.] In manner of a eulogy; eulogistically.

"Give me leave eulogically to enumerate a few of those many attributes, which have deservedly been given that glorious planet."—*Sir T. Herbert: Travels*, p. 389.

eū-lō-gist, *s.* [Eng. *eulogy*; *-ist*.] One who eulogizes, speaks well of, or commends another for any quality, act, or performance; an encomiast.

eū-lō-gist-ic, **eū-lō-gist-ic-al**, *a.* [Eng. *eulogist*; *-ic*, *-ical*.] Containing or expressive of eulogy; commendatory, laudatory.

eū-lō-gist-ic-al-ly, *adv.* [Eng. *eulogistical*; *-ly*.] In a eulogistic manner; with commendation or eulogy.

***eū-lō-gī-um**, *s.* [Low Lat.] A eulogy (q. v.).

"T' adorn the sofa with eulogium due."

Couper: Task, iit. 12.

eū-lō-gize, *v. t.* [Eng. *eulogy*; *-ize*.] To speak of in terms of eulogy or praise; to praise, to commend.

"Those Who eulogize their country's foes."

Huddesford: Satir. Poems.

eū-lō-gŷ, *s.* [Low Lat. *eulogium*, from Gr. *eulogia*; *eulogion*, from *eu*=well, good, and *legō*=to speak; O. Fr. *euloge*, Fr. *éloge*.] Praise, encomium, panegyric; a writing or speech in praise or commendation of any person, on account of his character, services, or performances.

"Yet gnats have had, and frogs and mice, long since, Their eulogy."

Couper: Task, iit. 453.

¶ For the difference between *eulogy* and *encomium*, see ENCOMIUM.

eū-lōph-i-a, *s.* [From Greek *eulophos*=well plumed; *eu*=well, and *tophos*=the back of the neck, the crest of a helmet. So named because the labellum bears elevated lines or ridges.]

Bot.: A genus of Orchids, tribe Vandæ, family Sarcanthidæ. Salep has been made in India from a species of the genus.

eū-ly-sŷte, *s.* [Gr. *eulytia*=readiness in loosing; *eu*=well, and *lysis*=loosing, dissolving; *lyō*, first fut. *lyōō*=to untie.]

Petrol.: A gneissic rock consisting of augite, garnet, &c., found at Tunaberg in Sweden.

eū-lyte, *s.* [EULYTINE.]

Chem.: $C_8H_8N_2O_7$. Obtained with dyslyte by the action of concentrated nitric acid on citraconic acid. They are separated by fractional crystallization from alcohol. Eulyte is the more soluble. It melts at 99.5°, and dyslyte melts at 189°.

eū-ly-tine, *s.* [Gr. *eulytos*=easily dissolved or broken up; *eu*=well, *lyō*=to loose, and Eng. suff. *-ine*.]

Min.: The same as EULYTITE (q. v.).

eū-ly-tite, *s.* [Gr. *eulytin*, from Gr. *eulytos*=easy to untie, easily dissolved or fusible; suff. *-ite* (Min.) (q. v.).]

Min.: A tetrahedral mineral of resinous or adamantine luster, and dark brown, gray, grayish-white, or pale yellow color. Its hardness, 4.5; its specific gravity, 5.9 to 6. Composition: Silica, 22.23; oxide of bismuth, 69.38; phosphoric acid, 3.31; sesquioxide of iron, 2.40, &c. Found in Saxony. (Dana.)

eū-man-ite, *s.* [Greek *eu*=very, and *manos*=scanty, scarce.]

Min.: A variety of Brookite found in minute crystals at Chesterfield, Massachusetts, in an albite vein. (Dana.)

eū-mēn-ēs, *s.* [Greek *Eumenes*, as *s.*=a Greek proper name, borne by various kings; as *adj.*, *eumenes*=well disposed, gracious; *eu*=well, and *menos*=temper, disposition.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāll; trŷ, sŷrian, ō, œ=ē; ey=ā. qu=kw.

Entom.: The typical genus of the family Eumenidæ (q. v.). The genus, which is extensive, consists of large and, as a rule, gaily colored insects, with a very long petiole and a pyriform abdomen.

eū-mén-i-dæ, s. pl. [Mod. Lat. *eumen(es)* (q. v.), and Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of solitary wasps akin to the Vespidae, in which they are sometimes merged.

Eū-mén-i-dēs, s. [Gr., from *eumenēs*=well-disposed, wishing well: *eu*=well, good, and *menos*=disposition, temper.]

Gr. Myth.: Literally the gracious goddesses, a title given euphemistically to the Furies, instead of their proper name of Erinnos or Erinys.

eū-mī-mō-sē-ā, s. pl. [Gr. *eu*=typical, and Mod. Lat. *mimoseæ* (q. v.).]

Bot.: The typical tribe of the sub-order Mimoseæ (q. v.).

eū-nēc-tūs, s. [Greek *eu*=good, and *nēktos*=swimming, floating; *nēkō*=to swim.]

Zool.: A genus of Boidæ. *Eunectes murinus* is the American Anaconda, which must not be confounded with the Anaconda proper, *Python tigris*, a native of Ceylon. [ANACONDA.]

Eū-nī-çē, **Eū-nī-kē**, s. [Gr. *Eunikē*=Eunice, a Greek female proper name. Timothy's mother was so called (Acts xvi. 1, 2 Tim. i. 5; *eu*=well, good, and *nīkē*=conquest, victory.)]

1. **Astron.** (of the form Eunike): An asteroid, the 185th found. It was discovered by Peters, on March 1, 1878.

2. **Zool.** (of the form Eunice): The typical genus of the family Eunicidæ or the tribe Eunicæ (q. v.). *Eunice gigantea* is a sea centipede, sometimes as long as four feet, and consisting of above four hundred rings. It is found in the ocean adjacent to the West Indies.

eū-nīç-i-dæ, **eū-nīç-ē-ā**, s. pl. [Mod. Lat. *eunic(e)*, and Lat. fem. pl. suff. *-idæ*, or *-eæ*.]

Zool.: A family or tribe of Errant Annelids with large branchial tufts, and from seven to nine toothed jaws. [EUNICE.]

eū-nī-kē, s. [EUNICE.]

eū-nō-mī-ā, s. [Greek=(1) good order, (2) the daughter of Themis and goddess of good government; *eu*=well, good, and *nomos*=anything assigned, hence, a custom, a law; *nēmō*=to deal out, to distribute.]

Astron.: An asteroid, the fifteenth found. It was discovered by De Gasparis, July 29, 1851.

Eū-nō-mī-ān, a. & s. [Named after Eunomius. See def.]

A. As adj.: Pertaining or relating to Eunomius, his opinions, or those of his followers. Eunomius was the secretary and disciple of Aetius, whom he eclipsed in celebrity. He became Bishop of Cyzicum in A. D. 368, and died about 394.

B. As subst. (pl.): The followers of Eunomius. [A.] He held that Christ was a created being, and of a nature unlike that of the Father.

***eū-nō-mŷ**, s. [Greek *eunomia*, from *eu*=well, good, and *nomos*=law, order.] A just constitution; equal law.

eū-nō-tī-ā, s. [Gr. *eunōtos*=stout-backed: *eu*=stout, and *nōtos*, or *nōton*=the back.]

Bot.: A genus of Diatomacæ, sub-order Cymbellæ. Kützinger describes forty-four species. (Griffith & Henfrey, &c.)

eū-nūch, s. & a. [Latin *eunuchus*, from Greek *eunouchos*=one who had charge of the sleeping apartments; *eunē*=a bed, and *echō*=to have, to keep; Fr. *eunuque*.]

A. As subst.: One who is castrated or emasculated; a chamberlain.

***B. As adj.**: Unproductive.

"He had a mind wholly *eunuch* and ungenerative in matters of literature and taste."—Godwin: Mandeville, iii. 96.

***eū-nūch**, v. t. [EUNUCH.] To castrate, to emasculate, to make a eunuch of.

***eū-nūch-āte**, v. t. [Lat. *eunuchatus*, pa. par. of *eunuchō*, from *eunuchus*=a eunuch.] To make a eunuch of, to castrate.

***eū-nūch-ism**, ***eū-nūch-isme**, s. [Gr. *eunouchismos*=castration.] The state or condition of a eunuch; castration.

***eū-nūch-ize**, v. t. [English *eunuch*; *-ize*.] To emasculate.

eū-ōm-phā-lūs, s. [Gr. *eu*=wide, and *omphalos*=the navel.]

Paleont.: A genus of gasteropodous Mollusks, family Turbinidæ. The shell is depressed or discoidal; the whorls angular or coronated; the aperture polygonal; the umbilicus very large; the operculum shelly, round, multispiral. Eighty species are known, ranging from the Lower Silurian to the Trias. They are found fossil in this country

and in Europe, and Australia. (Salter & Woodward.) *E. pentagonalis* is a characteristic fossil of the carboniferous limestone; *E. rugosus* of the Wenlock limestone.

eū-ō-nŷm-ē-ā, s. pl. [Mod. Lat. *eounym(us)* (q. v.), and Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Celastracæ, having capsular fruit.

eū-ōn-ŷ-mūs, s. [Lat. *Eounyme*; Gr. *Eounomis*, the mother of the Furies, in allusion to the poisonous character of the berries.]

Bot.: Spindle-tree. A genus of trees, order Celastracæ. Calyx four to six-cleft; petals four to six; stamens four to six, inserted in a broad fleshy disc; ovary three to five-celled; style short; stigma three to five-lobed; capsule three to five-lobed; three to five-celled cells, with one to two arillate seeds. About forty species are known. The bark of *E. turgeni*, the inside of which is bright yellow, is used by the Hindoos to mark the tika on their forehead. Lindley thinks that it might be useful as a dye. It is employed in diseases of the eye. From *E. atropurpurea* is made a most reliable purgative and cholagogue medicine, which is very useful in biliary derangements and its resultant sick headache. The dose of the fluid extract is ½ to 1 teaspoonful for purgation, and 15 drops 3 times daily as a tonic for sluggish bowels.

eū-ōs-mīte, s. [Greek *euosmos*=sweet-smelling, fragrant: *eu*=good, and *osmē*=smell; Eng. suff. *-ite* (Min.) (q. v.).]

Min.: An amorphous and pitchy-looking brittle brownish-yellow mineral, transparent when in thin pieces. It is strongly electric. Composition: Carbon, 81.89; hydrogen, 11.73; oxygen, 6.38=100.

eū-ōt-ō-mōus, a. [Gr. *eu*=well, *tomē*=a cutting, *temnō*=to cut, and Eng. adj. suff. *-ous*.]

Min.: Cleaving readily; having distinct cleavages.

***eū-pa-thŷ**, s. [Gr. *eupatheia*=comfort, luxury, sensitiveness: *eu*=well, good, and *pathos*=suffering.] Right feeling.

eū-pā-tōr-i-ā-çē-ā, s. pl. [Mod. Lat. *eupatori(um)*, and Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Composite plants, sub-order Tubulifloræ.

eū-pāt-ōr-ine, s. [Mod. Lat., &c., *eupatori(um)*; *-ine* (Chem.) (q. v.).]

Chem.: An alkaloid, said by Righoni to be contained in *Eupatorium cannabinum*.

eū-pā-tōr-i-ūm, s. [Latin *eupatoria*; Greek *eupatoria*=the genus Agrimony. (See def.) Said by Pliny and others to have been named from Mithridates Eupator, King of Pontus, who used it as an antidote to poison.]

Bot.: Hemp Agrimony. A genus of Composite plants. It has much-exserted styles and perfect florets. *Eupatorium cannabinum*, the Common Hemp Agrimony, is a plant two to four feet high, having the leaves with three to five leaflets, and the heads of flowers, which are very numerous, colored pale reddish-purple, thickly crowded in terminal corymbs. It is an emetic and purgative. *E. ayapana* and *E. perfoliatum* are sudorifics. They are used in Brazil in poison-bites. Mr. Hartweg says that the vulnerary called *matica* comes from *E. glutinosum*. About 300 species are known, chiefly from America.

eū-pā-tōr-ŷ, s. [EUPATORIUM.]

Bot.: A book name given by Bentham to the botanical genus Eupatorium.

eū-pāt-rid (pl. **eū-pāt-ri-dæ**), s. [Greek *eupatridēs*=of a good or noble father; of noble birth: *eu*=well, good, and *pater*=a father.]

Gr. Antig.: A member of the Eupatridæ, or aristocracy of Athens, in whom was vested the whole power of the state.

eū-pāt-ri-dæ, s. pl. [EUPATRID.]

***eū-pēp-sī-ā**, ***eū-pēp-sŷ**, s. [Gr. *eupepsia*=good digestion: *eu*=well, good, and *pepsis*=coction, digestion; *peptō*=to cook, to digest.] Good digestion.

eū-pēp-tic, a. [Gr. *eupeptos*=(1) easy of digestion; (2) having a good digestion.] [EUPESIA.]

1. Easy of digestion.

2. Having a good digestion.

eū-phē-mā, s. [Gr. *euphēmos*=auspicious: *eu*=well, good, and *phēmē*=fame.]

Ornith.: A genus of Psittacidæ, sub-family Pezoporinæ (Parakeets or Parroquets). It contains some of the beautiful little Grass Parakeets of Australia.

eū-phē-migm, s. [Greek *euphēmos*, from *euphēmia*=the use of words of good omen: *eu*=well, and *phēmī*=to speak; Fr. *euphémisme*.]

Rhet.: The use of a delicate word or expression for one which is harsh, indelicate, or offensive to delicate ears; a softened expression: as the use of Eumenides or gracious goddesses for the Erinnos or Furies.

eū-phē-mis-tic, **eū-phē-mis-tic-al**, a. [Gr. *euphēmos*; Eng. suff. *-ism*.] Pertaining to or of the nature of euphemism; making soft or more delicate of expression.

eū-phē-mis-tic-al-ly, adv. [Eng. *euphēmistical*; *-ly*.] In a euphemistic manner; by way of euphemism.

***eū-phē-mize**, v. t. [Gr. *euphēmizō*.] To make euphemistic; to soften or render more delicate in expression.

eū-phō-nī-ā, s. [Gr. *euphōnia*=symphony: *eu*=well, good, and *phōnē*=sound, voice.]

1. **Music**:

1. A sweet sound.

2. A consonant combination of sounds.

II. **Ornith.**: A genus of Fringillidæ, sub-family Tanagrinæ (Tanagers). *Euphonia musica* is the Organist Tanager of the West Indies, a small bird which sings well. The plumage of the male is mostly black and orange.

eū-phō-nī-ād, s. [Gr. *euphōni(a)*=euphony, and Eng. suff. *-ad*.]

Music: An instrument in which are combined the characteristic tones of the organ and other instruments.

eū-phōn-ic, **eū-phōn-ic-al**, a. [English *euphony* (y); *-ic*, *-ical*.] Characterized by or pertaining to euphony; sounding agreeably; pleasing to the ear.

eū-phōn-i-cōn, s. [EUPHONIC.]

Music: A kind of upright piano.

eū-phō-nī-ōus, a. [English *euphony*; *-ōus*.] Agreeable in sound; pleasing to the ear; euphonic; smooth-sounding.

"Euphonic languages are not necessarily easy of acquirement."—Latham.

eū-phō-nī-ōus-ly, adv. [English *euphonicus*; *-ly*.] In a euphonic or melodious manner; with euphony or harmony.

***eū-phōn-ism**, s. [Eng. *euphony* (y); *-ism*.] An agreeable sound, or combination of sounds.

eū-phō-nī-ūm, s. [Gr. *euphōnos*=harmonious or pleasant in sound.] [EUPHONY.]

Music: A brass band instrument, properly belonging to a military band, but frequently introduced into the orchestra as a substitute for the third or bass trombone, to the tone of which the sound of the euphonium has not even the slightest affinity. (Stainer & Barrett.)

***eū-phō-nize**, v. t. [Eng. *euphony* (y); *-ize*.] To make harmonious or agreeable in sound.

eū-phō-nōn, s. [Gr. *euphōnos*=harmonious or pleasant in sound.]

Music: The same as EUPHONIC (q. v.).

***eū-phō-nōus**, a. [Gr. *euphōnos*.] Euphonic; pleasant to the ear; smooth-sounding.

eū-phō-nŷ, s. [Gr. *euphōnia*, from *euphōnos*=harmonious or pleasant to the ear: *eu*=well, good, and *phōnē*=a sound, a voice; Fr. *euphonie*.] An agreeable or pleasing sound or combination of sounds; a pronunciation of letters, syllables, or words which is pleasant to the ear; the contrary to harshness.

eū-phor-bī-ā, s. [Lat. *euphorbia*, *euphorbium* (Pliny); Gr. *euphorbion*=an African plant with an acrid juice; *euphorbia*=good feeding, high condition; *euphorbos*=well fed: *eu*=well, and *pherbō*=to feed, to nourish.]

Bot.: A genus of plants, the typical one of the tribe Euphorbiæ, the order Euphorbiacæ, and the alliance Euphorbiales (q. v.). Inflorescence consisting of many male and one female flower in a four-to-five lobed involucre, lobes with thick glands at the sinuses. Male flower with a pedicelled stamen and a didymous anther; female with an ovary on a lengthened pedicel, stigma lobed, capsule three-lobed, three-valved; the outer part of the fruit coriaceous, the inner hard and two-valved. About seven hundred species are known. Many species are poisonous. The Africans smear their arrows with the juice of *Euphorbia heptagona*, *E. virosa*, and *E. cereiformis*; the Brazilian Indians theirs with that of *E. cotinifolia*. The capsules of *E. lathyris* are said to

Euphorbia Amygdaloides.

1. Inflorescence. 2. Male Flower.

bōl, bōy; pōut, jōwī; cat, çell, chorus, çin, bench; go, çem; thin, çhis; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tlan = şan. -tion, -sion = şün; -çion, -çion = şün. -tious, -cious, -sious = şüs. -ble, -dle, &c. = bel, del.

intoxicant fish; *E. hibernica* and *E. piscatoria* poison them. Many have medicinal qualities. *E. esula*, *E. cyparissias*, *E. amygdaloides*, *E. helioscopia*, *E. pepulus*, *E. peplodes*, *E. palustris*, *E. ptilosa*, *E. chamaesyce*, *E. peptis*, *E. spinosa*, *E. dendroides*, *E. aleppica*, *E. apios*, and *E. lathyris* are known as purgatives; so also are *E. bursifolia* in the West Indies, *E. papillosa* (a dangerous species however) in Brazil, *E. laurifolia* in Peru, *E. portulacoides* in Chili, and *E. tirucalli* in India. The leaves of *E. neryifolia* are regarded by the native practitioners of India as a purgative and deobstruent; externally it is employed, when mixed with Margosa oil, in cases of contracted limb produced by chronic rheumatism. The roots of one of these, *E. helioscopia*, have been the basis of various quack fever mixtures. *E. parviflora* and *E. hirta* are used in India. *E. linearis* in this country, *E. canescens* in Spain, as *E. hiberna* formerly was in England, as a remedy against syphilis. *E. tribuloides* is regarded in the Canaries, of which it is a native, as a diaphoretic. The roots of *E. gerardiana*, *E. ipecacuanha*, and *E. pithusa* are emetic. *E. thymifolia* is prescribed in India for children's diarrhoea and to expel worms; so also is *E. hypericifolia* in tropical America. *E. balsamifera* is cooked and eaten; *E. mauritanica* is used as a condiment; *E. officinarum*, *E. antiquorum*, and *E. canariensis* furnish the gum resin called Euphorbium (q. v.); the juice of *E. tirucalli* is used in India as a vesicatory and the plant itself as a fence, the acidity of the juice preventing cattle from eating it. *E. phosphorea* shines in the forests of Brazil by night with a phosphorescent light.

eū-phor-bi-ā-čē-sō, s. pl. [Lat. *euphorbi(a)* (q. v.), and fem. pl. adj. suff. *-aceæ*.]
Bot.: Spurge-worts. A large and important order of Dicotyledonous Exogens, the typical one of the alliance Euphorbiales (q. v.). The species consists of trees or herbaceous plants, often abounding in acrid milk; the leaves are opposite or alternate, generally simple, and, as a rule, with stipules; the flowers are axillary or terminal, often placed within a calyx-like involucre; the calyx, if present, is inferior, with various scaly glandular or scaly internal appendages; corolla petaloid or scaly, sometimes gamopetalous; stamens definite or indefinite, distinct or monadelphous; ovary generally three-celled, but sometimes with two cells or with one, or with more than three styles generally equal in number to the cells; stigma compound or single, with several lobes; fruit generally trilocular; seeds solitary or twin, suspended often, with an aril; embryo inclosed in fleshy albumen. Jussieu and his followers considered the Euphorbiaceæ an apetalous order, exceptional genera forming petals; Lindley and his followers a polypetalous one, in many genera of which the petals are wanting. The habit of the Euphorbiaceæ is very diversified. Lindley enumerated 191 genera, and estimated the known species described or undescribed at 2,500. These have now been increased to about 3,000. Three-eighths are from tropical America; fifty from this country, outside the tropics; about one-sixth from India, many from the Cape, and about 120 from Europe. Many Euphorbiaceæ are poisonous, the special seat of the venom being in the milk; but heat can drive it away, so that the Manihot or Cassava, highly deleterious when raw, becomes wholesome by being cooked. The milk of this order furnishes caoutchouc. For the gum resin Euphorbium, see that word; for the properties of other species of the order, see Box, Bridelia, Buxus, Castor-oil, Croton, Euphorbia, Menchinal, Pedicularis, Siphonia, &c.

eū-phor-bi-ā-čē-ōūs, a. [Mod. Lat. *euphorbiaceæ* (q. v.), and Eng., &c., suff. *-ous*.]
Bot.: Of or belonging to the Euphorbiaceæ (q. v.).

eū-phor-bi-æ, s. pl. [Pl. of Latin *euphorbia* (q. v.).]
Bot.: A tribe of the sub-order Euphorbiales. It consists of herbs or shrubs with milky juice; many stamens collected into a calyx-like involucre, by some called a perianth; a solitary pistil pedicelled, three-lobed and three-celled.

eū-phor-bi-āl, a. & s. [Lat. *euphorbi(a)*, and Eng., &c., suff. *-al*.]
A. As adjective:
Bot.: Pertaining, or relating, or akin to the alliance Euphorbiales, or to the genus Euphorbia (q. v.).

B. As substantive:
Bot.: A member of the alliance Euphorbiales (q. v.).

eū-phor-bi-ā-lēs, s. pl. [Lat. *euphorbi(a)*, and pl. masc. & fem. suff. *-ales*.]
Bot.: An alliance of Dicotyledonous Exogens. It has scattered monochlamydeous flowers, superior consolidated carpels, axile placentæ, and a large embryo, surrounded by abundant albumen. It contains the five following orders: (1) Euphorbiaceæ, (2) Scapaceæ, (3) Callitrichaceæ, (4) Empetraceæ, and (5) Nepentaceæ (?). (Lindley.)

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mātē, cūb, cūre, unīte, cūr, rūle, fūl; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

eū-phor-bi-ē-sē, s. pl. [Lat. *euphorbi(a)* (q. v.), and fem. pl. adj. suff. *-eæ*.]
Bot.: A tribe of Euphorbiaceæ (q. v.). The ovule is solitary, the seeds are albuminous, the flowers monœcious, with the male and female ones mixed in a cup-shaped involucre. (Lindley.) Dr. Hooker makes the Euphorbiæ a sub-order, with the following character: Ovules one to two in each cell; raphe ventral; capsule septicidal; valves elastically breaking away from the seed-bearing axis. He divides it into two tribes, Euphorbiæ and Acalyphæ. (Hooker: *Students' British Flora*.)

eū-phor-bi-ūm, s. [Latin *euphorbium*; Gr. *euphorbion* = the euphorbia (q. v.).] An acrid poisonous, inflammable, green resin, flowing from the wounded stems of *Euphorbia officinarum*, and *E. antiquorum*, African plants, and *E. canariensis* is from the Canaries. It is gathered in leather bags. In India it is mixed with the seeds of *Sesamum orientale*, and used externally in rheumatism, and internally in cases of obstinate constipation. (Lindley.)

eū-phor-bōne, s. [Eng., &c., *euphorbia* (q. v.); -one (Chem.) (q. v.).]
Chem.: $C_{15}H_{24}O$. A substance obtained from Euphorbium. Soluble in alcohol, ether, and benzol, nearly insoluble in water, melting at 116° . It is oxidized by oxalic acid, forming nitric acid. It is a drastic purgative.

teū-phō-tide, s. [Fr., from Gr. *eu* = well; *phōs* (genit. *phōtos*) = light, and suff. *-ide*.]
Petrol.: The name given by Haüy to a rock composed of smaragdite and jade, or of diallage and feldspar. The same as DIALLAGE-ROCK (q. v.).

eū-phrā-sī-ā, s. [Gr. *euphrasia* = good cheer, from *euphrainō* = to delight; *euphrōn* = cheerful: *eu* = well, and *phrōn* = the heart, the mind.]
Bot.: Eyebright, Euphrasia. A genus of Scrophulariaceæ, tribe Euphrasieæ (q. v.). Calyx tubular, four-cleft; upper lip of the corolla two-lipped, lower one of nearly three equal lobes; capsule ovate-oblong, compressed, two-celled; seeds many, pendulous, longitudinally ribbed. *Euphrasia officinalis* is the common Eyebright (q. v.).

eū-phrā-sī-ē-sē, s. pl. [Mod. Lat. *euphrasi(a)*, and Lat. fem. pl. adj. suff. *-eæ*.]
Bot.: A tribe of Scrophulariaceæ, sub-order Rhinanthideæ. [EUPHRASIA.]

eū-phrā-sī, s. [EUPHRASIA.]
Bot.: The Eyebright (*Euphrasia officinalis*) (q. v.).

"Then purged with euphrasy and rue
The visual nerve."
Milton: P. L., xi. 414.

eū-phrō-ē, s. [Etym. doubtful.]
Naut.: A long slat of wood, perforated for the passage of the awning-cords which suspend the ridge of an awning. The euphroe (or uphroe) and its pendant cords form a crow-foot.

Eū-phrōs-ē-nē, s. [Gr.]
1. Gr. Myth.: One of the Graces, who presided at festive meetings.
2. Astron.: An asteroid, the thirty-first found. It was discovered by Ferguson, September 1, 1854.
3. Bot.: A genus of Compositæ, tribe Senecionideæ, sub-tribe Iveæ.

eū-phū-ism, s. [From *Euphuës* (Gr. *Euphuës* = of good natural parts, clever), the name of the principal character in two works, or rather of one work in two parts, written by John Lyly: the first, *Euphuës, the Anatomy of Wit*, in 1579, A. D., the second, *Euphuës and his England*, in 1580, A. D., a work full of affectation, but whose most striking characteristics were alliteration and verbal antithesis. It contains a great multitude of acute observations and profound thoughts, and was long considered a model of elegance in writing, and the highest authority in all matters of courtly and polished speech. The pedantry and tediousness of its imitators gave occasion to the present meaning of euphuism.] A pedantic affectation of elegant and high-flown language.

"The quality of style called euphuism has more or less prevailed in later periods of English literature."—Marsh: *Origin of English Language*, p. 544.

eū-phū-ist, s. [From *Euphuës* (q. v.), and Eng. suff. *-ist*.] One given to euphuism; one who makes use of a pedantic affectation of high-flown language.

"It may have suited the purposes of Sir Walter Scott, in his cleverly-drawn Sir Piercie Shafton, to ridicule the Euphuists."—C. Kingsley: *Westward Ho!* p. 275.

eū-phū-ist-ic, a. [Eng. *euphuist*; -ic.] Pertaining to euphuism or the euphuists; of the nature of euphuism.

"We have no hint of the decline of euphuistic romance."—*Saturday Review*, Feb. 17, 1883, p. 203.

A. As adjective:

Church History: Pertaining or relating to Eutyches. [B.]

B. As substantive (pl.):

Ch. Hist.: The followers of Eutyches, a presbyter and abbot of Constantinople. The general church holding that Christ possessed two natures, the Divine and the human, but only one person, Nestorius departed from what was and is still deemed "orthodox" upon the subject, by attributing to Jesus two persons instead of one. Eutyches, being very much opposed to Nestorian views, went to the opposite extreme, and declared that there was in Christ but one nature—that of the Word, which became incarnate. Having in A. D. 448 given publicity to these views, he was condemned. In the same year he appealed to a Council held at Ephesus, under the presidency of his friend Dioscorus, Bishop of Alexandria, and that assembly acquitted him of heresy. The Council of Chalcedon, considered the fourth General Council, held in 451, reversed the previous decision, and condemned Eutyches. His followers were called also Monophysites (q. v.).

eu-tých-i-án-ism, *s.* [Eng. *Eutychian*; *-ism*.] The doctrines of Eutyches; adherence to his doctrines.

eu-x-án-th-ic, *a.* [Gr. *eu*=well, good; *xanthos*=yellow, and Eng. suff. *-ic*.]

euxanthic-acid, *s.*

Chem.: $C_{12}H_{16}O_{10}$. Occurs as a magnesium salt in Purree or Indian yellow, a coloring matter imported from India. It is extracted by dilute hydrochloric acid, and exhausting by alcohol. It is soluble in hot alcohol and ether, and crystallizes in shining yellow prisms. By the action of concentrated sulphuric acid it is converted into Euxanthon, $C_{12}H_8O_4$, which sublimates in yellow needles. By the action of concentrated nitric acid it yields trinitro-resorcin.

eu-x-án-thôn, *s.* [Gr. *eu*=beautiful, and *xanthos*=yellow.]

Chem.: $C_{12}H_8O_4$. A yellow crystalline substance, insoluble in water, obtained by heating euxanthic acid with sulphuric acid.

eu-x-én-i-a, *s.* [Gr. *eu*=beautiful, and *xenos*=a guest, a friend.] [EUXENITE.]

Bot.: The typical genus of the sub-tribe Euxenice (q. v.). It consists of two Chilean shrubs with aromatic leaves.

eu-x-én-i-é-sé, *s. pl.* [Mod. Lat. *euxeni(a)*, and Lat. fem. pl. adj. suff. *-æ*.]

Bot.: A sub-tribe of Senecionideæ, type Euxenia. **eu-x-én-ite**, *s.* [Gr. *euxenos*=kind to strangers; but used by Scheerer as if it had meant a stranger, because the mineral was and is rare.]

Min.: An orthorhombic brilliant, brownish black mineral; its hardness 6.5, its specific gravity 4.60 to 4.99. Composition: Columbo-tantalite acid, 37.16 to 49.66; titanic acid, 7.94 to 16.26; alumina, 0 to 3.12; protoxide of yttrium, 25.09 to 34.53; protoxide of uranium, 5.22 to 8.45. Found in Norway. (*Dana*.)

Eux-ine, *s.* [Gr. *euxenos*; Ion. *euxenos*=kind to strangers, hospitable: *eu*=well, good, and *xenos*; Ion. *xenos*=a stranger.] The sea lying between Russia and Asia Minor, now called the Black Sea (q. v.).

eu-zé-ô-lite, *s.* [Gr. *eu*=typical, and Eng. &c., *zeolite* (q. v.).]

Mineralogy: 1. A variety of Stilbite. (*Rosseter*.)

2. A variety of Heulandite. (*Rosseter*.)

***ê-vâ-câte**, *v. t.* [Lat. *e*=out, and *vacat*=sup. of *vaco*=to be empty.] To empty out, to evacuate. Perhaps the word is only a misprint for *evacuate* (q. v.).

ê-vâc-u-ant, *a. & s.* [Lat. *evacuans*, pr. par. of *evacuo*=to empty: *e*=out, and *vacuus*=empty; Fr. *évacuant*.]

A. As adj.: Emptying, purging, purgative, provoking evacuation.

B. As subst.: A medicine or drug which provokes or promotes evacuation; a purgative, a cathartic.

ê-vâc-u-âte, ***ê-vâc-u-at**, *v. t. & i.* [Lat. *evacuatus*, pa. par. of *evacuo*=to empty out: *e*=out, and *vacuus*=empty; Sp. & Port. *evacuar*; Fr. *évacuer*.]

A. Transitive:

1. Literally:

1. To make empty; to empty.

"We tried how far the air would manifest its gravity in so thin a medium as we could make in our receiver, by evacuating it."—*Boyle*.

2. To void by any of the excretory passages; to void, to eject, to discharge.

"Boerhaave gives an instance of a patient, who, by a long use of whey and water, and garden fruits, evacuated a great quantity of black matter, and recovered his senses."—*Arbutnot*.

3. To cause to pass out by any of the excretory passages.

"White hellebore doth evacuate the offensive humors which cause diseases."—*P. Holland*: *Pliny*, bk. xxv., ch. iv.

4. To quit, to withdraw from.

II. Figuratively:

1. To strip, to divest of.

"Evacuate the Scriptures of their most important meanings."—*Coleridge*.

2. To make null and void; to annul, to nullify; to vacate.

"The defect, though it would not evacuate a marriage, after cohabitation and actual consummation; yet it was enough to make void a contract."—*Bacon*: *Henry VII*.

***B. Intrans.**: To let blood; to cause blood to flow.

"If the malady continue, it is not amiss to evacuate in a part in the forehead."—*Burton*: *Anatomy of Melancholy*, p. 403.

ê-vâc-u-â-tion, *s.* [Lat. *evacuatio*, from *evacuatus*, pa. par. of *evacuo*=to empty; Fr. *évacuation*; Sp. *evacuación*; Ital. *evacuazione*.]

1. The act of emptying or clearing of the contents.

"The parts of evacuation by letting of blood is incision or cutting the veins."—*Sir T. Elyot*: *Castel of Helth*, bk. iiii., ch. vii.

2. The act or practice of causing a discharge by any of the excretory passages.

"The usual practice of physic among us, turns in a manner wholly upon evacuation, either by bleeding, vomit, or some purgation."—*Temple*.

*3. Such a sending away as will cause a vacancy or emptiness.

"Consider the vast evacuations of men that England hath had by assistances lent to foreign kingdoms."—*Hale*: *Origin of Mankind*.

4. The act of withdrawing from or quitting; as, the evacuation of a fortress.

*5. The act of annulling, vacating, or making null and void; abolition, nullification.

"Popery hath not been able to re-establish itself in any place, after provision made against it, by utter evacuation of all Romish ceremonies."—*Hooker*: *Ecclesiastical Polity*.

6. That which is evacuated or discharged, especially a discharge by stool or other natural means.

ê-vâc-u-â-tive, *a.* [Eng. *evacuat(e)*; *-ive*; Fr. *évacuatif*.] Causing or tending to cause evacuations; purgative, cathartic, evacuant.

ê-vâc-u-â-tôr, *s.* [Eng. *evacuat(e)*; *-or*.] One who annuls, nullifies, or vacates; a nullifier, an abrogator.

"Take heed, be not too busy in imitating any father in a dangerous expression, or in excusing the great evacuations of the law."—*Hammond*: *Works*, i. 175.

ê-vâc-u-â-tôr-ý, *s.* [Eng. *evacuat(e)*; *-ory*.] A purgative or cathartic medicine; a purge.

"Oppletion [calls] for unpalatable evacuatories."—*Gentleman Instructed*, p. 309.

***ê-vâc-u-â-tý**, *s.* [Pref. *e*, and Eng. *vacuity* (q. v.).] A vacancy.

"Fit it was that so many *evacuities* should be filled up."—*Fuller*: *Church Hist.*, XI. ix. 7.

ê-vâd-a-ble, *a.* [Eng. *evad(e)*; *-able*.] That may or can be evaded or avoided; avoidable.

ê-vâ-de, *v. t. & i.* [Fr. *évider*, from Lat. *evado*=to get away from: *e*=out, away, and *vado*=to go; Sp. *evadir*; Ital. *evadere*.]

A. Transitive:

1. To escape from by artifice, craft, or stratagem; to elude.

"Bees of sense thy arts evade."

E. More: *Spider and Bee*.

2. To avoid, to decline by subterfuge or sophistry; to shirk.

"Our question thou *evadest*; how didst thou dare To break hell bounds?"

Dryden: *State of Innocence*, iii. 1.

3. To baffle, to foil; to escape the comprehension of.

"We have seen how a contingent event baffles man's knowledge, and evades his power."—*South*.

***B. Intransitive:**

1. To escape, to slip away.

"Unarmed, they might Have easily, as spirits, *evaded* swift, By quick contraction or remove."

Milton: *P. L.*, vi. 596.

2. It is sometimes followed by *from*.

"His wisdom, by often *evading* from perils, was turned rather into a dexterity to deliver himself from danger, than into a providence to prevent it."—*Bacon*: *Henry VII*.

3. To practice sophistry or evasion; to act evasively.

"The ministers of God are not to *evade* or take refuge in any of these two fore-mentioned ways."—*South*.

¶ (1) For the difference between to *evade* and to *escape*, see *ESCAPE*.

(2) 't'abb thus discriminates between to *evade*, to *equivocate*, and to *prevaricate*. "These words designate an artful mode of escaping the scrutiny of an inquirer: we *evade* by artfully turning the subject or calling off the attention of the inquirer; we *equivocate* by the use of equivocal expressions; we *prevaricate* by the use of loose and indefinite expressions: we avoid giving satisfaction by *evading*; we give a false satisfaction by *equivocating*; we give dissatisfaction by *prevaricating*. *Evading* is not so mean a practice as *equivocating*: it may be sometimes prudent to *evade* a question which we do not wish to answer; but *equivocations* are employed for the purposes of falsehood and interest; *prevarications* are still meaner; and are resorted to mostly by criminals in order to escape detection." (*Crabb*: *Eng. Synon.*)

ê-vâd-i-ble, *a.* [Eng. *evad(e)*; *-able*.] The same as *EVADABLE* (q. v.).

***ê-vâ-gâ-tion**, *s.* [Lat. *evagatio*, from *evagatus*, pa. par. of *evagor*=to wander widely; Fr. *évagation*; Sp. *evagación*.] The act of wandering or straying; an excursion.

"If the law of attraction had not been what it is, every *evagation* would have been fatal."—*Paley*: *Natural Theology*, ch. xiii.

ê-vâg-in-â-tion, *s.* [Lat. *e*=out, and *vagina*=a sheath.] The act of drawing out of a sheath; un-sheathing.

***ê-vâl-a**, [Lat. *ævum*=an age.] Of or relating to time or duration.

"Every one at all skilled in the Greek language knows, that age, and *eval*, improperly everlasting, do not convey the ideas of a proper eternity."—*Letter to the Archbishop of Canterbury* (1791), p. 67.

***ê-vâl-u-â-tion**, *s.* [Fr., from Low Lat. *evaluatio*.] An exhaustive valuation or appraising.

"The foundation must be laid for an *evaluation* of the chances."—*J. S. Mill*. (*Ogilvie*.)

***ê-vân-ê-s-çe**, *v. i.* [Lat. *evanesco*: *e*=away, and *vanesco*=to vanish (q. v.).]

1. *Lit.*: To vanish, to disappear, to be dissipated in vapor.

2. *Fig.*: To disappear in an imperceptible manner; to vanish away.

"I believe him to have *evanesced* and evaporated."—*De Quincey*. (*Webster*.)

***ê-vân-ê-s-çence**, *s.* [Lat. *evanescent*, pr. par. of *evanesco*=to vanish.]

1. *Lit.*: The act or process of gradually disappearing or vanishing from sight; a gradual disappearance from view; a state of being lost to view.

"Like light transmitted from room to room, they lose their strength and splendor, and fade at last in total *evanescence*."—*Rambler*, No. 156.

2. *Fig.*: A loss, a disappearance.

"By the sudden *evanescence* of his reward when he thought his labors almost at an end."—*Rambler*, No. 163.

ê-vân-ê-s-çent, *a.* [Lat. *evanescent*, pr. par. of *evanesco*.]

1. *Lit.*: Vanishing or disappearing gradually from sight.

"The canal grows still smaller and slenderer, so as that the *evanescent* solid and fluid will scarce differ."—*Arbutnot*.

*2. *Fig.*: Imperceptible, indistinguishable by the senses.

"The difference between right and wrong, in some petty cases, is almost *evanescent*."—*Wollaston*.

ê-v-â-n-ê-s-çên-ti, *pref.* [Lat. *evanescent* (genit. *evanescentis*)=evanescent.]

evanescenti-venose, a.

Bot.: Having such a venation that the lateral veins disappear within the margin.

***ē-vān-ēs-cent-lý, adv.** [Eng. *evanescent*; -ly.] In an evanescent or vanishing manner.

"So quickly and evanescently as to pass unnoticed."—*Chalmers: Bridgewater Treatise*, pt. ii., ch. i., p. 310.

***ē-vān-gel, *e-van-gil, *e-vaun-gile, s.** [O. Fr. *evangile*; Low Lat. *evangelium*, from Gr. *euangelion*=good tidings; *eu*=well, good, and *angelia*=tidings; *angelos*=a messenger.] [EVANGELIST.]

1. Good tidings.

"But alas! What holy angel
Brings the slave this glad *evangel*?"
Longfellow: Slave Singing at Midnight.

2. The gospel.

"Trowe hem as the *evangile*."

Romant of the Rose, 5,458.

***ē-vān-gel-l-ān, a.** [EVANGEL.] Rendering thanks for favors.

***ē-vān-gel-l-ic, *ē-vān-gel-l-ick, ē-vān-gel-l-ic-al, a. & s.** [Eng. *evangelic*; -ic, -ical; Fr. *évangélique*; Prov. *evangelic*; Sp., Port., & Ital. *evangelico*; Lat. *evangelicus*, from *evangelium*.] [EVANGEL.]

A. As adjective:

Theology, &c.:

1. Pertaining to the Gospel, or to the system of doctrine which makes the offer of the Gospel one of its most prominent tenets; earnestly proclaiming these doctrines. Previous to the formation of the Evangelical Alliance (q. v.) there was careful consideration and a generally accepted decision what doctrines should be considered the most important evangelical ones, and details of the subject are given in that article.

"Sworn to the laws of God and *evangelic* truth."—*Milton: Elkonoklastes*.

2. Pertaining to the four evangelists: as the *evangelic* history.

B. As subst.: One who holds evangelical principles. [A.]

1. *Ecclesiology, Church History, &c.*:

1. *Evangelical Alliance*: An alliance first suggested at a conference held in Liverpool, England, in October, 1845, and inaugurated at a series of meetings in London, between August 19 and September 2, 1846. The following nine tenets were adopted as the basis of union:

(1) The divine inspiration, authority, and sufficiency of the Holy Scriptures.

(2) The right and duty of private judgment in the interpretation of the Holy Scriptures.

(3) The unity of the Godhead, and the Trinity of persons therein.

(4) The utter depravity of human nature in consequence of the Fall.

(5) The incarnation of the Son of God, His work of atonement for sinners of mankind, and His mediatorial intercession and reign.

(6) The justification of the sinner by faith alone.

(7) The work of the Holy Spirit in the conversion and sanctification of the sinner.

(8) The immortality of the soul, the resurrection of the body, the judgment of the world by our Lord Jesus Christ, with the eternal blessedness of the righteous and the eternal punishment of the wicked.

(9) The divine institution of the Christian Ministry, and the obligation and perpetuity of the ordinances of Baptism and the Lord's Supper.

The Evangelical Alliance is not a federation of various churches; it is composed of individual Christians connected with different denominations. It has met repeatedly since its first formation, has done its best to foster courtesy among members of different ecclesiastical organizations, and has interfered sometimes with good effect in cases of Protestants persecuted in Roman Catholic countries, or Christians in those where Mohammedanism prevails.

2. *Evangelical Church*:

(1) *Gen.*: The Protestant Churches in Germany, as giving more prominence than some others in that region to the preaching of the Gospel, as distinguished from the administration of the sacraments.

(2) *Spec.*: A comprehensive church in Germany, created at Nassau in 1817, by the fusion of the Lutherans and the Calvinists, a union which led to others of a similar character within a brief period.

3. *Evangelical Party*: One of three leading parties in the Church of England, holding and preaching the doctrines described under EVANGELIC, 1, and EVANGELICAL ALLIANCE. Taking lower views of the exclusive claims of the Church than the High Church Party do, they are sometimes called, in opposition to them, the Low Church Party (q. v.).

4. *Evangelical Union*: A religious sect founded, in 1843, by Rev. James Morison, of Kilmarnock, Scotland, who, to do so, left the Original Secession Church. With regard to the extent of the atonement and original sin, &c., he embraced Arminian

rather than Calvinistic views, while with regard to unconditional election he remained Calvinistic. The denomination which he founded still flourishes in Scotland.

***ē-vān-gel-l-ic-al-ism, s.** [Eng. *evangelical*; -ism.] The system of doctrines called Evangelical (q. v.).

***ē-vān-gel-l-ic-al-lý, adv.** [Eng. *evangelical*; -ly.] In an evangelical manner; as if influenced by the principles of the Gospel.

"It appears that acts of saving grace are *evangelically* good, and well-pleasing to God."—*Bp. Barlow: Remains*, p. 432.

***ē-vān-gel-l-ic-al-nēss, s.** [Eng. *evangelical*; -ness.] The same as EVANGELICITY (q. v.).

***ē-vān-gel-l-ic-ism, s.** [Eng. *evangelic*; -ism.] The same as EVANGELICALISM (q. v.).

***ē-vān-gel-l-ic-l-ity, s.** [Eng. *evangelic*; -ity.] The quality of being evangelical; evangelicness.

***ē-vān-gel-l-ism, s.** [Eng. *evangel*; -ism.] Evangelistic effort; labors designed to spread the Gospel.

"Thus was the land saved from infidelity through the apostolical and miraculous *evangelism* of St. Bartholomew."—*Bacon: New Atlantis*.

***ē-vān-gel-l-ist, *e-van-gel-iste, *e-vaun-gel-ist, *e-vaun-gel-iste, *e-wan-gel-iste, s.** [Fr. *évangéliste*; from Lat. *evangelista*; Gr. *euangelistēs*, from *euangelion*=good tidings, gospel; *eu*=well, good, and *angelia*=tidings; *angelos*=a messenger.]

Ecclesiol. & Ch. Hist.:

1. *Gen.*: One who, instead of taking the responsibility of a fixed pastorate, travels from place to place preaching the gospel; a home or foreign missionary, a herald of the cross. Philip of Caesarea was an evangelist (Acts xxi. 8). Timothy was exhorted by St. Paul to "do the work of an evangelist" (2 Tim. iv. 5). The office, or at least the function, was different from that of the "apostle," the "prophet," the "pastor," and the "teacher" (Ephes. iv. 11). The early church understood the word, as is now pretty generally done, in this sense, and Eusebius, the Church Historian, referring to the time of Trajan, speaks of some who, "traveling abroad, performed the work of evangelists, being ambitious to preach Christ. Then when they had laid the foundations of the faith in foreign countries they appointed other pastors, to whom they intrusted the cultivation of the parts they had recently occupied, while they proceeded to other countries and nations."

2. *Spec.*: One of the writers of the four gospels, Matthew, Mark, Luke, and John.

***ē-vān-gel-l-ist-ā-ry, s.** [Low Lat. *evangelistarium*, from *evangelista*=an evangelist.] A book containing a selection of passages from the gospels, as for lessons, &c., in divine service.

***ē-vān-gel-l-ist-ic, a.** [Eng. *evangelist*; -ic.] Pertaining to the work of an evangelist; missionary.

***ē-vān-gel-l-iz-ā-tion, s.** [English *evangeliz(e)*; -ation.] The act of evangelizing; the preaching of the gospel.

"The *evangelization* of John Baptist was a preparation to his first coming."—*Hobbs: Christian Commonwealth*, ch. xlii.

***ē-vān-gel-l-ize, *e-vaun-gel-l-ize, *e-van-gel-l-ize, v. i. & t.** [Fr. *évangéliser*; Sp. & Port. *evangelizar*, from Lat. *evangelizo*; Gr. *euangelizo*, from *euangelion*=gospel.]

A. Intransitive:

1. *Gen.*: To preach or tell good tidings.

"Steigh up, thou that *evangelisist* (to Zion)."—*Wycliffe: Isaiah* xl. 15.

2. *Spec.*: To preach the gospel.

"He would *evangelize* to the poor."—*Porteus*, vol. ii., ser. 12.

B. Trans.: To preach the gospel to; to convert to a belief in the gospel.

"His apostles, whom he sends
To *evangelize* the nations."—*Milton: P. L.*, xii. 499.

***ē-vān-gel-l-ý, *evangelle, s.** [O. Fr. *evangile*; Prov. *evangeli*.] [EVANGEL.] The gospel.

***e-van-gil, *e-van-gile, s.** [EVANGEL.] The gospel.

"Al were it gospel the *evangile*."

Romant of the Rose, 6,101.

***ē-vā-nī-ā, s.** [Greek *evanios*=taking trouble easily; *eu*=easily, and *ania*=grief, trouble.]

Entom.: The typical genus of the family Evaniidae (q. v.).

***ē-vān-l-ā-dæ, s. pl.** [EVANIDÆ.]

***ē-vān-l-ā, a.** [Lat. *evanidus*; from *evanesco*=to vanish away.] Faint, weak, evanescent.

"The decoctions of simples, which bear the visible colors of bodies decocted, are dead and *evanid*, without the commixtion of alum, argil, and the like."—*Brouen: Vulgar Errors*, bk. vi., ch. xli.

***ē-vā-nī-l-dæ, ē-vā-nī-l-ā-dæ, s. pl.** [Mod. Lat. *evania*, and Lat. fem. pl. adj. suff. *-idæ* (q. v.).]

Entom.: A family of hymenopterous insects, tribe Entomophaga. They have the abdomen attached to the upper surface of the metathorax, and the antennæ straight.

***ē-vān-l-ish, v. i.** [Pref. *e*, and Eng. *vanish* (q. v.).] To vanish away, to disappear from sight, to evanesce. [EVANESCE.]

"My happiness *evanished* with the sleep."

Stirling: Aurora, son. 51.

***ē-vān-l-ish-mēt, s.** [Eng. *evanish*; -ment.] A vanishing or disappearing from sight; disappearance, evanescence.

"Their *evanishment* has taken place quietly."—*London Daily Telegraph*.

***ē-vān-l-ite, s.** [Named after Mr. Brooke Evans, of Birmingham, England, who carried it from Hungary to England, in 1855.]

Min.: A massive reniform or botryoidal subtransparent or translucent mineral, either colorless or white. Its hardness is 3½ to 4; its specific gravity 1.94. Composition: Phosphoric acid, 19.05; alumina, 39.31; water, 39.95. (*Dana*.)

***ē-vā-pōm-ē-tēr, s.** [Eng. *evapo(r)ation*, and *meter*.] An instrument for measuring the amount of evaporation. (*Rossiter*.) [EVAPOROMETER.]

***ē-vāp-ōr, v. i.** [Lat. *evaporor*.] To evaporate.

"Sometimes blacke clouds *evaporor* to skies."—*Sandys: Travels*, p. 243.

***ē-vāp-ōr-ā-ble, a.** [Fr.] That may or can be evaporated; capable of or liable to evaporation.

"A far more *evaporable* and dissipable kind of bodies."—*Boyle: Works*, iii. 675.

***ē-vāp-ōr-āte, v. t. & i.** [Lat. *evaporatus*, pa. par. of *evaporor*=to dissipate in vapor; *e*=out, away, and *vapor*=vapor; Fr. *évaporor*; Sp. & Port. *evaporar*.]

A. Intransitive:

1. *Lit.*: To pass or fly away in vapors or fumes; to be dissipated either in visible vapor or in particles too minute to be distinguished.

"The sweet odor thereof would otherwise *evaporate*."—*P. Holland: Flisy*, bk. xiii., ch. i.

2. *Fig.*: To escape or pass off without effect; to be dissipated.

"Our works unhappily *evaporated* into words; we should have talked less."—*More: Decay of Piety*.

B. Transitive:

I. Ordinary Language:

1. *Lit.*: To drive away in fumes or vapor; to convert into vapor; to dissipate in fumes; to vaporize.

"We perceive clearly that fire will warm or burn us, and will *evaporate* water."—*Watts: Logic*.

2. *Fig.*: To give vent to.

"My lord of Essex *evaporated* his thoughts in a sonnet to be sung before the queen."—*Wotton*.

II. Pharm. (of a liquid medicine, &c.): To transform into vapor.

¶ For the difference between to *evaporate* and to *emit*, see EMIT.

***ē-vāp-ōr-āte, a.** [Lat. *evaporatus*, pa. par. of *evaporor*.] Evaporated.

"How still the breeze! save what the filmy thread
Of dew *evaporate* brushes from the plain."

Thomson: Autumn, 1,210, 1,211.

***ē-vāp-ōr-āt-ing, pr. par., a. & s.** [EVAPORATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The same as EVAPORATION (q. v.).

evaporating-cone, s. A Belgian evaporator, consisting of a hollow cone with double walls, between which is a body of steam. Over the inner and outer surface of the cone a saccharine solution runs in a thin film, and is thereby heated. It is similar in principle to the Degrand condenser. [CONDENSER; EVAPORATOR.] It is the same in its principle of construction as certain coolers, in which a refrigerating liquid fills the jacket, over the walls of which passes the liquid to be cooled.

evaporating-furnace, s. The furnace of a boiler for cane-juice, syrup, brine, &c.

***ē-vāp-ōr-ā-tion, s.** [Lat. *evaporatio*, from *evaporatus*, pa. par. of *evaporor*; Fr. *évaporation*; Sp. *evaporacion*; Ital. *evaporazione*.]

I. Ordinary Language:

1. *Literally*:

(1) The act or process of becoming dissipated or resolved into vapor; the state of being converted into vapor, fumes, or steam.

"Evaporations are at some times greater, according to the greater heat of the sun."—*Woodward*.

bōl, bōy; pōut, jōwī; cat, cēll, chorus, chīn, bench; go, gēm; thīn, thīs; sin, aḡ; expect, Xenophon, exist, ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

(2) The act or process of resolving into vapor; the process of dissipating in fumes; vaporization.

"To expel the infection by sweat and evaporation."—Bacon: *Natural History*, § 968.

(3) The result of the act or process of evaporating. "Suffered to fume away in useless evaporations."—*Advertiser*, No. 137.

2. Fig.: A bursting out; a fuming.

"The evaporations of a vindictive spirit."—Howell.

II. Technically:

1. Chem.: Liquids evaporate at temperatures below their boiling points. The rising vapor converts sensible into latent heat, with the effect of producing cold. [HEAT.]

2. Meteor., *Physical Geog.*, & *Geol.*: Evaporation is continually taking place from every ocean, lake, river, marsh, or expanse of land not at the moment dry. The water thus raised into the sky, becomes visible as clouds, ultimately descending in rain, so that there is what may be called a natural alternation in meteorological arrangements, like the revolution of a circle any given point in the circumference of which returns at stated intervals to the spot which it occupied when note was first taken of its place. Evaporation may be perfectly visible to the eye, as it is when steam rushes from the spout of a kettle or fog rises from a lake. In most cases it is invisible; in the latter case it is called insensible evaporation. The disturbance of the level in different seas or parts of the ocean caused by evaporation is one main cause of currents.

evaporation-gauge, *s.* A graduated glass measure, with wire-gauze cover to prevent access of insects, to determine the ratio of evaporation in a given exposure.

***ē-vāp-ōr-ā-tīve**, *a.* [Lat. *evaporativus*, from *evaporatus*, pa. par. of *evaporō*; Fr. *évaporatif*; Ital. & Span. *evaporativo*.] Causing or promoting evaporation; tending or pertaining to evaporation.

ē-vāp-ōr-ā-tōr, *s.* [Eng. *evaporat(e)*; -or.] An apparatus consisting of a furnace and pan, in which vegetable juices are condensed. There are numerous varieties of evaporators. Those which boil in (partial) vacuo are known as *VACUUM-PANS* (q. v.). Some drive off a part of the aqueous liquid, and are called condensers, such as the Degrand. [CONDENSER.]

ē-vāp-ōr-ōm-ē-tēr, *s.* [Lat. *evaporō*=to evaporate, and Gr. *metron*=a measure.] An atmometer or hygroscope, for ascertaining the evaporation of liquids. It is adapted also for a rain-gauge, or to indicate the rise and fall of any body of water in a river, canal, or lock, showing the exact time at which any increase or reduction of level may have occurred.

***ē-vāp-i-ble**, *a.* [Lat. *evasus*, pa. par. of *evado*=to escape; English -able.] That may or can be evaded; evadible.

ē-vā-gion, *s.* [Lat. *evasus*, pa. par. of *evado*=to escape; Fr. *évasion*; Sp. *evasión*; Ital. *evasione*.] The act of evading, eluding, or escaping as from a question, an examination, an argument, a charge; subterfuge, equivocation, prevarication, sophistry.

"He is likewise to teach him the art of finding flaws, loopholes, and evasions."—*Spectator*, No. 305.

¶ Crabb thus discriminates between *evasion*, *shift*, and *subterfuge*: "*Evasion* is here taken only in the bad sense; *shift* and *subterfuge* are modes of *evasion*; the *shift* signifies that gross kind of *evasion* by which one attempts to *shift* off an obligation from one's self; the *subterfuge* is a mode of *evasion*, in which one has recourse to some screen or shelter. Candid minds despise all *evasions*; the *shift* is the trick of a knave; the *subterfuge* is the refuge of one's fears." (Crabb: *Eng. Synon.*)

ē-vā-sive, *a. & s.* [Fr. *évasif*, from Lat. *evasio*, pa. par. of *evado*.] [EVASION.]

A. As adjective:

1. Practicing, making use of, or given to evasion; equivocating, shuffling, prevaricating.

"Thus he, though conscious of the ethereal guest, Answered evasive of the sly request."—Pope: *Homers Odyssey*, i. 529, 530.

2. Containing an evasion; intended to evade.

"The president, completely taken by surprise, stammered out a few evasive phrases, and the conference terminated."—Macaulay: *Hist. Eng.*, ch. ix.

B. As subst.: An evasion.

"Without much trouble about precautions and evasions."—North: *Examen*, p. 90.

ē-vā-sive-lŷ, *adv.* [Eng. *evasive*; -ly.] In an evasive manner; with evasion; in an equivocating manner.

"Searching questions were put and were evasively answered."—Macaulay: *Hist. Eng.*, ch. ix.

ē-vā-sive-ness, *s.* [Eng. *evasive*; -ness.] The quality of being evasive; equivocation, prevarication.

ēve (1), **ēv-en**, ***ef-en**, ***af-en**, *s.* [A. S. *ēfen*, *ēfen*; O. S. *āvand*; O. Fris. *āvend*; Icel. *afan*, *afan*; Sw. *afan*; Dan. *afan*; O. H. Ger. *ābant*; M. H. Ger. *ābant*; Ger. *abend*; probably an extension from Goth. *af*=off, and thus meaning the decline or end.] [EVENING.]

I. Literally:

1. (Of all forms): The evening; the close or latter part of the day.

"Toward thilke stude, as the sonne draweth agen eue."—Robert of Gloucester, p. 14.

2. The day or the latter part of the day immediately preceding a church festival; the vigil or fast to be observed before a holiday.

"Clo. Was't not at Hallowmas, Master Froth?"

Froth. All-hallow eve."

Shakespeare: *Measure for Measure*, ii. 1.

II. Fig. (of the form eve): The period or point of time immediately preceding some important event.

***ēve** (2), *s.* [EAVES.]

eye-dropper, *s.* The same as EAVESDROPPER (q. v.).

***ēv-ēcke**, ***ēv-icke**, *s.* [Etym. doubtful; perhaps a corruption of *ibex* (q. v.).] A species of wild goat.

ē-vēc-tics, *s.* [EVECTION.]

Old Med.: The name given to that branch of medical science which treats of the method of acquiring a good habit of body.

ē-vēc-tion, *s.* [Lat. *evectio*, from *evectus*, pa. par. of *evaho*=to carry out; *e*=out, and *vehō*=to carry.]

*1. *Ord. Lang.*: The act of carrying or transporting; a lifting up, an exaltation.

"His evectio to the power of Egypt next to Pharaoh, signified the session of Christ at the right hand of the Father."—Pearson: *On the Creed*, Art. 5.

2. Astronomy:

(1) A periodical inequality in the movements of the moon, first discovered by Ptolemy from his personal observations about A. D. 140. It arises from an irregularity in the motion of the perigee, and from the alternate increase and diminution of the eccentricity, both dependent on the position of the perigee with respect to the sun. It sometimes increases the moon's longitude 1' 15", and sometimes diminishes it by the same amount, and is the principal inequality to be calculated in determining the course of the moon.

(2) The moon's libration. (Whewell.)

tevection of heat, *s.* The diffusion of heat by the movement of the heated particles of a fluid. Thus, if heat be applied to the under surface of a vessel containing a liquid, the lower particles of the fluid will become heated first, and ascending, diffuse the caloric which they have received. [CONVECTION.]

ēv-en, ***ev-ene**, ***ef-enn**, ***ef-ne**, ***ev-yn**, *a. & adv.* [A. S. *ēfen*, *efn*, *evin*; Icel. *jafn*; Dan. *jævn*; Dut. *even*; Goth. *ibius*; O. H. Ger. *epan*; Ger. *eben*; Sw. *jämna*; O. Fris. *ivn*.]

A. As adjective:

I. Ordinary Language:

1. Literally:

(1) Level, smooth, not rough or rugged; plain, devoid of irregularities or inequalities.

"Ther shulen beon efne and smethe weggness."

Ormulum, § 213.

(2) Level with; parallel to; in a line or level with.

"Thine enemies shall lay thee even with the ground."

—Luke xix. 44.

(3) Not having any part higher or lower than another; level.

"When Alexander demanded of one what was the fittest seat of his empire, he laid a dry hide before him, and desired him to set his foot on one side thereof; which being done, all the other parts of the hide did rise up; but when he set his foot in the middle, all the other parts lay flat and even."—Davies.

2. Figuratively:

(1) Equal, like.

"Thel ben euene with aungels."—Wycliffe: *Luke* xx. 36.

(2) Uniform, level, smooth, calm.

"Thou peple of God, be of euener inwitt."—Wycliffe: *Baruch*, iv. 5.

(3) Gentle, quiet.

"Ther come in tuelde olde men myd euene pas."

Robert of Gloucester, p. 193.

(4) Righteous, just, fair.

"To don an euene judgement."—Castel of Love, 487.

(5) Equal on both sides, not favoring either:

"Upheld by me, yet once more he shall stand On even ground against his mortal foe."

Milton: *P. L.*, iii. 178, 179.

(6) Equal in rank or station; fellow.

"His even servant fell down and prayed him."—Wycliffe.

(7) Without anything owing on either side; quit, balanced, square.

"Even reckoning makes lasting friends."—South.

(8) Full, complete.

"Let us from point to point this story know,

To make the even truth in pleasure flow."

Shakespeare: *All's Well*, v. 3.

(9) Capable of being divided by the number 2 without any remainder; opposed to odd.

"Now the number is even."—Shakespeare: *Love's Labor's Lost*, iv. 3.

(10) Plain, smooth, clear.

"To make these doubts all even."

Shakespeare: *Measure for Measure*, iii. 1.

(11) Without a flaw or blemish; pure.

"Do not stain the even virtue of our enterprise."

Shakespeare: *Julius Caesar*, ii. 1.

II. Botany:

1. The reverse of anything expressing inequality of surface.

2. (Of a surface): Not wrinkled or curled. (Paxton.)

B. As adverb:

1. In a manner equal or like to another; just as, similarly, just so; equally.

"He might even as well have employed his time . . . in catching moles."—Atterbury.

2. Exactly, directly.

"Under thi fet evene hit is at midnight."

Popular Science, 12.

3. Directly, at once.

"He went even to the emperor."

Legend of St. Gregory, 1,011.

4. Exactly, plainly.

"This yease spekes ful even."

Metrical Homilies, p. 9.

5. At the very moment, at the exact time.

"Even at this word she hears a merry horn."

Shakespeare: *Venus and Adonis*, 1,026.

6. Used to express emphatically identity of person.

"Behold I, even I, do bring a flood of waters on the earth."—Genesis vi. 17.

7. Expressing addition; but also.

"The motions of all the lights of heaven might afford measures of time, if we could number them; but most of those motions are not evident, and the great lights are sufficient, and serve also to measure even the motions of the others."—Holder.

8. So much as.

"Without loading our memories, or making us even sensible to the change."—Swift.

9. Expressing extension to some person or thing.

"I have made several discoveries which appear new even to those who are versed in critical learning."—Addison: *Spectator*.

10. Expressing concession.

11. Expressing surprise.

"Is't even so?"—Shakespeare: *Twelfth Night*, ii. 3.

¶ (1) On an even: On an equality; on par.

"We on an even lay venture souls and bodies, For so they do that enter single combats."

Carleton: *Deserving Favorite* (1629)

(2) To be even with: To be on terms of equality with; to be quits with.

"The public is always even with an author who has not a just defence for them."—Addison.

¶ (1) Crabb thus discriminates between *even*, *level*, *plain*, and *smooth*: "*Even* and *smooth* are both opposed to roughness; but that which is *even* is free only from great roughnesses or irregularities; that which is *smooth* is free from every degree of roughness, however small. *Even* is to *level*, when applied to the ground, what *smooth* is to *even*: the *even* is free from protuberances and depressions on its exterior surface; the *level* is free from rises or falls; a path is said to be *even*; a meadow is *level*; ice may be *level*, though it is not *even*, a walk up the side of a hill may be *even*, although the hill itself is the reverse of a *level*; the *even* is said of that which unites and forms one uninterrupted surface; but the *level* is said of things which are at a distance from each other, and are discovered by the eye to be in a parallel line; hence the floor of a room is *even* with regard to itself; it is *level* with that of another room. When applied figuratively, these words preserve their analogy: an *even* temper is secured from all violent changes of humor; a *smooth* speech is divested of everything which can ruffle the temper of others; but the former is always taken in a good sense, and the latter mostly in a bad sense, as evincing an illicit design or a purpose to deceive; a *plain* speech, on the other hand, is divested of

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūre, unite, cūr, rāle, fūll; trŷ, sŷrian. æ, œ = ē; ey = ā. qu = kw.

everything obscure or figurative, and is consequently a speech free from disguise and easy to be understood." (*Crabb: Eng. Synon.*)

(2) For the difference between *even* and *equal*, see *EQUAL*.

evening-hymn, evening-song, s. [*EVEN-SONG*.]

evening-primrose, s.

Bot.: The common *Oenothera* (*Oenothera biennis*). It is properly a North American plant, long cultivated in European gardens, and has become naturalized on river banks and other sandy places in England and other parts of Western Europe. It is so called, according to Prior, from its pale yellow color, and its opening at sunset, as do various other species of the genus.

evening-star, s. Specially Venus, during that portion of the year when she is visible in the evening; what the ancients called *Hesperus* or *Vesper*.

[*VENUS*.] [The term is loosely applied to any of the planets, whose position in their orbits may be such as to render them conspicuous immediately after nightfall.]

"The amorous bird of night
Sung spousal, and bid haste the *evening-star*."
Milton: P. L., viii. 519.

***ēv-en-lý, *ēv-en-lye, adv. & a.** [*A. S. evenlice*.]

A. As adverb:

1. In an even, smooth, or level manner or state; without roughness.

"A palish clearness, *evenly* and smoothly spread, not over thin and washy, but of a pretty solid consistence."—*Wotton*.

2. In an even or equal manner; equally, uniformly.

3. Without inclination toward either side; uniformly.

"The upper face of the sea is known to be level by nature, and *evenly* distant from the center."—*Brerewood*.

4. Without favoring either side; impartially, fairly, justly.

"You serve a great and gracious master, and there is a most hopeful young prince: it behooves you to carry yourself wisely and *evenly* between them both."—*Bacon: Advice to Villiers*.

5. Directly, exactly.

"The stern that thaim the gat gan schawe,

1. The state or quality of being even, level, or smooth; freedom from irregularities or roughness.

2. Uniformity, regularity.

"The other most readily yieldeth to the revolutions of the celestial bodies, and the making them with that evenness and celerity is requisite to them all."—*Grew: Cosmologia Sacra*.

3. Freedom from inclination to either side.

"A crooked stick is not straightened, unless it be bent as far on the clear contrary side, that so it may settle itself at the length in a middle estate of *evenness* between both."—*Hooker*.

*4. Impartiality, equal respect, justice.

"He sal deme the world in *evenness*."
Early Eng. Psalter, Ps. xov. 13.

5. Calmness of mind, equanimity.

"Though he appeared to relish these blessings as much as any man, yet he bore the loss of them, when it happened, with great composure and *evenness* of mind."—*Atterbury*.

***ēvēnt, s.** [*Lat. eventus, eventum*, from *eventus*, pa. par. of *evenio*=to happen, to fall out: =out, and *venio*=to come; *Fr. événement*.]

1. That which happens or falls out; an incident, an occurrence good or bad.

"Such kind of things or *events*, whether good or evil, as will certainly come to pass."—*Wilkins: Natural Religion*, bk. ii, ch. ii.

2. The consequence or result of any action; the issue, conclusion, or upshot.

"Two spears from Meleager's hand were sent,
With equal force, but various in the event."
Dryden: Meleager and Atalanta.

3. Fortune, fate.

"Full sad and dreadful is that ship's event."
Spenser: Tears of the Muses.

* (1) *Crabb* thus discriminates between *event*, *accident*, *incident*, *adventure*, and *occurrence*: "These terms are expressive of what passes in the world, which is the sole signification of the term *event*; while to that of the other terms are annexed some accessory ideas: the *incident* is a personal *event*; the *accident* an unpleasant *event*; the *adventure* an extraordinary *event*; the *occurrence* an ordinary or domestic *event*; the *event* in its ordinary and limited acceptance excludes the idea of chance; *accident* excludes that of design; the *incident*, *adventure*, and *occurrence*, are applicable in both cases. The *event* affects nations and communities as well as individuals; the *incident* and *adventure* affect particular individuals; the *accident* and *occurrence* affect persons or things particularly or generally, individually or collectively: the making of peace, the loss of a battle, or the death of a prince, are national *events*; the forming a new acquaintance and the revival of an old one are *incidents* that have an interest for the parties concerned; an escape from shipwreck, an encounter with wild beasts or savages, are *adventures* which individuals are pleased to relate, and others to

hear; a fire, the fall of a house, the breaking of a limb, are accidents or occurrences; a robbery or the death of individuals are properly occurrences which afford subject for a newspaper, and excite an interest in the reader."

(2) He thus discriminates between *event*, *issue*, and *consequence*: "The *event* respects great undertakings; the *issue* of particular efforts; the *consequence* respects every thing which can produce a consequence. Hence we speak of the *event* of a war, the *issue* of a negotiation, and the *consequences* of either." (Crabb: Eng. Synon.)

**ē-vent* (1), v. t. & i. [Fr. *éventer*=to fan; Lat. *e*=out, and *ventus*=wind.] To fan, to cool.

"A loose and roid vapor that is fit
T' event his searching beams."
Chapman: *Hero and Leander*, ecst. iii.

**ē-vent* (2), v. i. [Prof. *e*=out, and Eng. *vent* (q. v.).] To issue out, to break forth.

**ē-vent-tēr-āte*, v. t. [Lat. *eventeratus*, pa. par. of *eventero*: *e*=out, and *venter*=the belly; French *éventrer*.] To disembowel; to rip open; to eviscerate.

**ē-vent-fūl*, a. [Eng. *event*: -full.] Full of events or incidents; attended or followed by important changes or results.

"The interval between the sitting of Saturday and the sitting of Monday was anxious and eventful."—Macaulay: *Hist. Eng.*, ch. x.

**ē-vent-tī-lāte*, v. t. [Lat. *eventilatus*, pa. par. of *eventilo*=to fan, to winnow.] [VENTILATE.]

1. *Lit.*: To winnow, to fan, to sift.

2. *Fig.*: To examine, to discuss, to ventilate.

1. *Lit.*: The act of winnowing, fanning, or sifting.

2. *Fig.*: Discussion, examination, debate.

**ē-vent-trā-tion*, s. [Fr. *éventration*, *éventrer*, from Lat. *e*=out, and *venter* (genit. *ventris*)=the belly.]

Surgery:

1. A tumor produced by the relaxation of the abdominal wall, and ultimately affecting a great part of the abdominal viscera.

2. A large wound in the abdomen, through which the intestines protrude.

**ē-vent-tu-ā*, a. [Latin *eventu(s)*=an event; Eng. adj. suff. -al.]

1. Happening in consequence of any thing or act; consequential, resultant.

2. Final, conclusive, terminating, ultimate.

3. Happening or dependent upon events; contingent.

**ē-vent-tu-āl-i-tē*, s. [Eng. *eventual*; -ity.]

Phrenol.: A protuberance on the middle of the forehead, which, were it lower on the face, would be between the eyes. It is below "comparison" and above "individuality." Those who have it large are said to be fond of history, to tend to make record of events, to love incidents and anecdotes. Individuality taking cognizance of objects whose names are nouns, eventuality does so of occurrences appropriately described by verbs.

**ē-vent-tu-āl-lē*, adv. [Eng. *eventual*; -ly.] In the event; in the course of events; in the consequence or result.

"By this fortunate principle we are eventually roused from that lethargic state."—Cogan: *Ethical Treatises: The Passions*, pt. i., ch. i.

**ē-vent-tu-āte*, v. i. [Lat. *eventu(s)*=an event; Eng. suff. -ate.]

1. To issue or fall out as an event or consequence; to result.

2. To come to an issue or end; to terminate, to result.

**ē-vent-tu-ā-tion*, s. [Eng. *eventu(ate)*; -ation.] A falling out or resulting; a happening, a coming to pass.

**ē-er*, **af-re*, **av-ere*, **av-er*, **ev-ere*, adv. [A. S. *æfre*, related to A. S. *æwa*=Goth. *aiw*=ever; Lat. *ævum*; Gr. *aiōn*=an age.]

1. At all times; always.

"Heo is æc on and schal beon."—*Ancren Riwle*, p. 6.

2. At all times; continually.

"[I] ever followed min appetit."

Chaucer: *C. T.*, 6, 205.

3. At any time; at any period; on any occasion.

"No man ever yet hated his own flesh."—*Eph.* v. 29.

4. In any degree; to any extent.

5. A word of enforcement or emphasis; as, as soon as ever he had done so—i. e., immediately after he had done so.

"That purse in your hand has a twin brother, as like him as ever he can look."—*Dryden*: *Spanish Friar*, ii. 2.

¶ (1) *Ever so*: To whatever extent or degree.

(2) *For ever*:

(a) Eternally; to perpetuity.

"This is my name for ever."—*Exodus* iii. 15.

(b) For an indefinite period; during life.
(c) It is frequently reduplicated for the sake of emphasis.

"The meeting points the fatal lock discover
From the fair head, for ever and for ever."
Pope: *Rape of the Lock*, iii. 153, 154.

(3) *For ever and a day*: For ever, eternally. (Collog.)

(4) *Ever among*: Ever and anon, now and then.

"And ever among,
A maiden song
Lullay, by by, lullay."
Carol of 15th century.

(5) *Ever and anon*: Now and then, at one time and another.

"And ever and anon, with rosy red,
The bashful blood her snowy cheeks did dye."
Spenser: *F. Q.*, II. ix. 41.

¶ (1) *Ever* is largely used in composition with the sense of *always*, *continually*: as, *ever-active*, *ever-burning*, *ever-memorable*, *ever-new*, *ever-open*, *ever-waking*, *ever-wasting*, &c.

(2) It is also added to pronouns and adverbs, to give an indefinite force; as, *whoever*, *whatever*, *whomsoever*, *wherever*, *whithersoever*, &c.

**ē-ēr-last-līg*, **ev-er-last-yng*, **ev-er-last-yng*, a., s. & adv. [Eng. *ever*, and *lasting*.]

A. As adjective:

1. Ordinary Language:

I. Lasting or enduring without end; perpetual,

eternal.

"The joye of God, he sayth, is perdurable, that is to say, everlasting."—*Chaucer*: *Tale of Melibæus*.

2. Perpetual; continuing for an indefinite time.

"As their possession of the land is everlasting, so is the covenant, and they expired together."—*Bishop Taylor*: *Rule of Conscience*, bk. ii., ch. ii., rule 1.

3. Endless, continual, without intermission; as, *everlasting disputes*, *everlasting arguments*. (Collog.)

II. Botany:

1. Not changing color when dried. [EVERLASTING FLOWERS.]

2. Perennial. [EVERLASTING PEA.]

B. As substantive:

1. Ordinary Language:

1. Eternity.

"From everlasting to everlasting thou art God."—*Psalms* xc. 11.

2. (With the def. article): The Deity, the Eternal Being.

"O, that this too too solid flesh would melt, . . . Or that the Everlasting had not fixed

His canon 'gainst self-slaughter."
Shakespeare: *Hamlet*, i. 2.

II. Technically:

1. Bot. (pl.): Flowers generally belonging to the

order Composite, the flowers of which retain their color when dried. They are brought into requisition at Christmas, Easter, &c. They mostly belong to the genera *Helichrysum*, *Helipetrum*, *Antennaria*, *Gnaphalium*, &c. (*Gardeners' Chronicle*, April 15, 1876.)

2. *Fabrics*: A woolen material for shoes, &c.

*C. As adv.: Everlastingly.

ing; *eu*=well, and *ernos*=a young sprout, shoot, or scion.]

Bot.: A genus of Lichens, order *Parmeliaceæ*

(q. v.). *Evernia prunastri* is common on trees, but

does not often produce fruit. It is said to be an

astringent and a febrifuge. It can also be used for

dyeing. Formerly it was ground down with starch

to make hair-powder, and it has been used as a sub-

stitute for gum in calico-printing. *E. vulpina*, the

Ulmossa (Wolf's Cap) of the Swedes, is said by

the common people to be poisonous to wolves, but

the allegation is doubtful.

**ē-vēr-nic*, a. [Eng., &c., *Evern*(ia); -ic.] Belong-

ing to or in any way connected with the genus

Evernia (q. v.).

evernic-acid, s.

Chem.: $C_{17}H_{16}O_7$. An acid contained in *Evernia*

prunastri.

**ē-vēr-nī-nic*, a. [Mod. Latin *evern*(ia); -in

(Chem.), and suff. -ic.] For def. see the compound.

everninic-acid.

Chem.: $C_{17}H_{16}O_4$. Obtained by boiling *Evernic*

acid with baryta. It crystallizes from hot water in

needles, which melt at 157°, and is colored violet by

ferric chloride.

"That I may bear my evils alone."
 Shakespeare: *Twelfth Night*, ii. 1.

3. Depravity or corruption of heart; malignity; a wicked, depraved, or corrupt disposition.

"The heart of the sons of men is full of evil."—Eccles. ix. 3.

4. The negation or contrary of good.

"Farewell, remorse! all good to me is lost,
 Evil, be thou my good."—Milton: *P. L.*, iv. 110.

5. A malady or disease; as, the king's evil.

"What's the disease he means?
 'Tis called the evil."—Shakespeare: *Macbeth*, iv. 3.

- *3. A bad quality, an imperfection, a defect.

"The principal evils that be laid to the charge of women."—Shakespeare: *As You Like It*, iii. 2.

¶ (1) Crabb thus discriminates between *evil*, *harm*, and *misfortune*: "*Evil* in its limited application is taken for *evils* of the greatest magnitude; it is that which is *evil* without any mitigation or qualification of circumstances. The *misfortune* is a minor *evil*; it depends upon the opinion and circumstances of the individual; what is a *misfortune* in one respect may be the contrary in another. In one respect, therefore, the *misfortune* is but a partial *evil*: of *evil* it is likewise observable, that it has no respect to the sufferer as a moral agent; but *misfortune* is used in regard to such things as are controllable or otherwise by human foresight. The *evil* which befalls a man is opposed only to the good which he in general experiences; but the *misfortune* is opposed to the good fortune or the prudence of the individual. Sickness is an *evil*, let it be endured or caused by whatever circumstances it may; it is a *misfortune* for an individual to come in the way of having this *evil* brought on himself: his own relative condition in the scale of being is here referred to. The *harm* and *mischiefs* are species of minor *evils*; the former of which is much less specific than the latter, both in the nature and the cause of the *evil*. A person takes *harm* from circumstances that are not known; the *mischiefs* is done to him from some positive and immediate circumstance. . . . *Evil* and *misfortune* respect persons only as the objects: *harm* and *mischiefs* are said of inanimate things as the object." (Crabb: *Eng. Synon.*)

"Upon the wings of this faith is the soul ready to mount up toward that heaven which is open to receive it, and in that act of *evolution* puts itself into the hands of those blessed angels."—Bp. Hall: *The Christian*, § 13.

ē-vō-lūte, *s.*

[Lat. *evolutus*,

pa. par. of

evolveo=to un-

roll; *e*=out,

and *volveo*=to

roll.]

Geom.: A

curve from

which another

curve, called

the involute or

evolvent, is

described by

the end of a

thread gradu-

ally wound upon

or unwound from

the former. The

figures on the

perimeter of the

evolvent—viz., the

circle—correspond

to those marking

the evolvent.

ē-vō-lū-tion, *s.* [Lat. *evolutio*=an unrolling,

from *evolutus*, pa. par. of *evolveo*=to unroll; Fr.

évolution; Sp. *evolucion*; Ital. *evoluzione*.]

I. Ordinary Language:

1. Literally:

(1) The act of unrolling or unfolding.

"The spontaneous coagulation of the little saline bod-

ies was preceded by almost innumerable *evolutions*."—

Boyle.

(2) The series of things unrolled or unfolded.

"The whole *evolution* of ages, from everlasting to ever-

lasting."—More: *Divine Dialogues*.

2. Figuratively:

(1) An unraveling or development: as, the *evolu-*

tion of a plot.

(2) A change, an alteration.

"All the fashionable *evolutions* of opinion."—Burke:

To the Sheriffs of Bristol.

II. Technically:

1. Astron. & Geol.: The development of this world

and of the solar system, if not of all stellar systems,

from a fine mist or nebula. Prof. Huxley says:

"Nor is the value of the doctrine of evolution to

the philosophic thinker diminished by the fact that

it applies the same method to the living and the

non-living world, and embraces in one stupendous

analogy the growth of a solar system from molecu-

lar chaos, the shaping of the earth from the nebula-

ous cubhood of its youth, through innumerable

changes and immeasurable ages to the present

form, and the development of a living being from

the shapeless mass of protoplasm we term a germ."

[2.] (Prof. Huxley: *Anniversary Address*, Quar.

Jour. Geol. Soc., xxv. (1869), p. xlvii.)

2. Biology:

(1) The same as *EPIGENESIS* (q. v.).

(2) The development hypothesis, or theory (q. v.).

In its extreme form it traces both the animal and

vegetable kingdom to one very low form of life, con-

sisting of a minute cell, and supposes this cell pro-

duced by or from inorganic matter by some occult

process formerly technically denominated spontaneous

generation. Of this advanced school, Professor

Haeckel may be taken as the representative. With

a more moderate school of thought the great name

of Darwin is associated. He never withdrew, even

from the last edition of his *Origin of Species*, the

sentence in which he intimates his belief that

life may have "been originally breathed by the

Creator into a few forms or into one." A living

being of very simple and low organization once ob-

tained, all animals and plants were evolved or

developed from it by the operation of natural laws.

(For the process, see *DAEWINISM*.) Some small

Evolute.

approach to the physical structure of man is supposed to be traceable in the humble and unarmored mollusks called Ascidiæ, whence man's line of ancestry ran through the lower Vertebrate, the Monotrematous Mammals, other orders of the class, and finally the Anthropoid Apes. In this view both Darwin and Haeckel essentially agree. (See Darwin's *Descent of Man*, and Haeckel's *Evolution of Man*.) In the long series of evolutions, the continual tendency was for the simple to develop into the complex, or for an organ which at first had several functions to fulfill to become specialized. The more generalized forms are looked for in the older rocks, while as more and more recent strata are examined, the organisms met with are those highly specialized. Evolution prescribes no limits to the perfection of bodily and mental organization which the human race may ultimately reach.

"Still less is there any necessary antagonism between either of these doctrines and that of *Evolution*, which embraces all that is sound in both Catastrophism and Uniformitarianism."—Prof. Huxley: *Anniversary Address*, *Quar. Jour. Geol. Soc.*, xxv., p. xlvii.

3. *Geom.*: The opening or unfolding of a curve, and making it describe an evolute.

"The equable *evolution* of the periphery of a circle, or any other curve, is such a gradual approach of the circumference to rectitude, as that all its parts do meet together, and equally evolve or unbind; so that the same line becomes successively a less arch of a reciprocally greater circle, till at length they turn into a straight line."—Harris.

4. *Math.*: The extraction of roots from any given power; the reverse of involution (q. v.).

5. *Mil.*: The changes of position, form of drawing-up, &c., by which the disposition of troops is changed according to the necessities of defense or attack.

Ē-vō-lū-tion-āl, *a.* [Eng. *evolution*; -*al*.] The same as **EVOLUTIONARY** (q. v.).

Ē-vō-lū-tion-ār-ĭ, *a.* [Eng. *evolution*; -*ary*.] *Biol.*: Produced by or in any way pertaining to evolution.

"Constituting a break in the evolutionary chain."—*Athenæum*, March 4, 1882.

Ē-vō-lū-tion-izm, *s.* [Eng. *evolution*; -*ism*.] The theory or doctrine of evolution.

"The extreme *evolutionism* which . . . traces all existence back to a lifeless atom or germ."—*Brit. Quar. Review*, October, 1881, p. 507.

"The term was introduced by Prof. Huxley in his Presidential Address to the Geological Society in 1869. Along with it he introduced also the terms Catastrophism and Uniformitarianism, the three words being designed to discriminate the three chief schools of geological thought. (*Quar. Jour. Geol. Soc.*, vol. xxv., p. xxxix.)

Ē-vō-lū-tion-ist, *s.* [Eng. *evolution*; -*ist*.] One holding the doctrine of evolution, as distinguished from that of uniformity and that of successive catastrophes.

"Collated with the results of other evolutionists elsewhere."—*Athenæum*, March 4, 1882.

Ē-vōl-ve, *v. t. & i.* [Lat. *evolveo*=to unroll; *e*=out, and *volv*=to roll, to fold.]

A. Transitive:

*I. Literally:

1. To unfold, to unroll.

"They expand and *evolve* themselves into more distinction and evidence of themselves."—*Hale: Origin of Mankind*, p. 68.

2. To throw or send out; to emit, to diffuse.

II. Figuratively:

1. To follow through intricacies and disclose.

"There needs but to *evolve* the Philosopher's idea."—*Hurd: Universal Poetry*.

2. To develop; to bring to maturity.

B. Intrans.: To become open, disclosed, or diffused; to spread.

"Ambrosial odor

Does round the air *evolving* scents diffuse."

Prior: *Solomon*, iii. 711.

Ē-vōlved', *pa. par. & a.* [EVOLVE.]

1. *Ord. Lang.*: (See the verb.)

2. *Bot.*: Unfolded.

***Ē-vōl-ve-ment**, *s.* [Eng. *evolve*; -*ment*.] The act or process of evolving; the state of being evolved; evolution.

Ē-vōl-vent, *s.* [Lat. *evolvens*, *pa. par. of evolveo*=to unroll.]

Geom.: The involute of a curve. [INVOLUTE.]

Bot.: A genus of *Cinchonads*, tribe *Cinchonææ*, family *Hamelideæ*. It has red flowers and sweet-smelling berries. *Evosmia corymbosa* is poisonous, and according to Sir R. Schomburgk, Indians have been injured by using its wood for spits on which to roast their meat.

Ē-vō-vā-ē, *s.* [For etym. see def.]

Music: An artificial word, consisting of the vowels in *Seculorum Amen*, at the end of the Gloria Patri. It was designed to serve as a mnemonic word to enable singers to render the several Gregorian chants properly; each letter in *Evovae* standing for the syllable whence it was extracted. The author of the article in Smith's *Christian Antiquities* says that the *Evovae* must be regarded as containing the germ of the at present accepted views respecting musical accent. A modern imitation of the word was proposed by Mr. Dyce, but never came into use. It remains a mere curiosity, inasmuch as more obvious means exist of expressing accent.

***Ē-vūl-gāte**, *v. t.* [Lat. *evulgatus*, *pa. par. of evulgo*=to make common or public: *e*=out, and *vulgo*=to publish among the people; *vulgo*=the common people.] To publish, to make known, to divulge.

Ē-vūl-gā-tion, *s.* [Latin *evulgatus*, *pa. par. of evulgo*.] The act of publishing, making known, or divulging.

***Ē-vūl-ge**, *v. t.* [Latin *evulgo*.] To publish, to make public.

"Not with any intention to *evulge* it."—*Pref. to Annot. on Browne's Religio Medici*.

Ē-vūl-sion, *s.* [Lat. *evulsio*, from *evulso*, *pa. par. of evello*=to pluck out: *e*=out, and *vello*=to pluck.] The act of plucking out or off.

"The instruments of *evulsion*, compression, or incision."—*Browne: Cyrus Garden*, ch. ii.

***ew**, *s.* [A. S. *tw, eow*; O. H. Ger. *ēwa*.] The yew (q. v.).

"Fyne *ew*, popler, and lyndes faire."

2. An office in the royal household of England having charge of the linen for the sovereign's table, the laying of the cloth for meals, &c.

ewt, *s.* [EFT, *s.* NEWT.]

Ēx-, *pref.* [Latin, Gr. *ex, ek*=out.] A common prefix in English compounds. It represents (1) the Lat. *ex* with the original force of out, as in *exhale, exclude*; (2) with the force of beyond, as in *excel, exceed*; (3) it is added for emphasis. It is prefixed to titles or names of offices to signify that the person referred to has held but no longer holds the office; as, *ex-president*. In commerce it is used to signify that goods are sold or delivered from a certain vessel, as, tea sold *ex Nelson*. It becomes *ef* before *f*, as in *effuse*, and is shortened to *e* before *b, d, g, l, m, n, r,* and *v*, as in *ebullient, edit, egress, elate, emanate, enode, erode, evade*. The Greek form appears in *eccentric, ecclesiastic, eclectic*, &c. It takes the form *es-* in Old Fr. & Span., cf. *escape, escheat, escort*. In a few words it becomes *s*, as in *scald, scamper*. (*Skeat*.)

***Ēx-āc-ēr-bāte**, *v. t.* [Lat. *exacerbatus*, *pa. par. of exacerb*=to irritate: *ex*=out, fully, and *acerbus*=bitter, harsh, sour.]

1. To irritate, to exasperate; to increase the evil passions or malignity of.

2. To intensify or increase the violence of a disease.

Ēx-āc-ēr-bā-tion, *s.* [Latin *exacerbatio*, from *exacerbatus*, *pa. par. of exacerb*; Fr. *exacerbation*.]

I. Ordinary Language:

*1. The act of exacerbating, irritating, or exasperating; exasperation.

"On the same *exacerbation* he brake out into that stout piece of eloquence."—*Hammond: Works*, iv. 541.

2. Increased severity or harshness.

II. *Med.*: The height of a disease; a paroxysm; the periodical increase of remittent and continued fevers, when there is no actual cessation of the fever.

"The patient himself may strive, by little and little, to overcome the symptoms, in the *exacerbation*."—*Bacon: Nat. Hist.*, § 61.

***Ēx-āc-ēr-bēs-gence**, *s.* [Lat. *exacerbescens*, *pr. par. of exacerbesc*, an inceptive form of *exacerbo*.] Increase of irritation or violence, especially the increase of a disease or fever.

***Ēx-āc-ēr-vā-tion**, *s.* [Lat. *ex*=out, fully, and *accervatio*=a heaping up; *accervus*=a heap.] The act of heaping up.

***Ēx-āc-īn-āte**, *v. t.* [Lat. *ex*=out, away, and *acinus*=a kernel.] To remove the kernel from.

***Ēx-āc-ī-nā-tion**, *s.* [EXACINATE.] The act of removing the kernels from.

Ēx-āct', *a.* [Lat. *exactus*, *pa. par. of exigo*=to drive out, to weigh out, to measure: *ex*=out, and *ago*=to drive; Fr. *exact*; Sp. *exacto*; Ital. *esatto*.]

1. Precisely agreeing in amount, number, or degree; not differing in the least; as, the *exact* number or sum.

2. Precise; precisely fitting, proper, or suitable.

"He must seize the *exact* moment for deserting a falling cause."—*Macaulay: Hist. Eng.*, ch. ii.

3. Strictly correct, or according to rule; accurate, carefully attentive.

4. Accurate, careful, strict, precise, punctilious, particular.

"Many gentlemen turn out of the seats of their ancestors, to make way for such new masters as have been more *exact* in their accounts than themselves."—*Spectator*.

5. Strictly correct or accurate.

"What if you and I enquire how money matters stand between us?—With all my heart, I love *exact* dealing, and let Hocus audit."—*Arbutnot. John Bull*.

*Crabb thus discriminates between *exact*, *nice*, *punctual*, and *particular*: "*Exact* and *nice* are to be compared in their application, either to persons or things; *particular* and *punctual* only in application to persons. To be *exact* is to arrive at perfection; to be *nice* is to be free from faults; to be *particular* is to be *exact* in certain points. We are *exact* in our conduct or in what we do; *nice* and *particular* in our mode of doing it; *punctual* as to the time and season for doing it. It is necessary to be *exact* in our accounts; to be *nice* as an artist in the choice and distribution of colors; to be *particular*, as a man of business, in the number and the details of merchandises that are to be delivered out; to be *punctual* in observing the hour or the day that has been fixed upon. *Exactness* and *punctuality* are always taken in a good sense; they designate an attention to that which cannot be dispensed with; they form a part of one's duty; *nice*ness and *particularity* are not always taken in the best sense; they designate an excessive attention to things of inferior importance; to matters of taste and choice. When *exact* and *nice* are applied to things, the former expresses more than the latter; we speak of an *exact* resemblance, and a *nice* distinction." (*Crabb: Eng. Synon.*)

bōil, **bōy**; **pōut**, **jōwl**; **cat**, **gell**, **chorus**, **chīn**, **bench**; **go**, **gem**; **thīn**, **this**; **sin**, **ag**; **expect**, **Xenophon**, **exist**. **ph** = **f**.
-**cian**, -**tian** = **shan**. -**tion**, -**sion** = **shūn**; -**tion**, -**sion** = **zhūn**. -**tious**, -**ciuous**, -**sious** = **shūs**. -**ble**, -**dle**, &c. = **bel**, **del**.

ēx-āct', v. t. & i. [O. Fr. *exacter*, from Low Lat. *exacto*, from Lat. *exactus*, pa. par. of *exigo* = to drive out, exact.]

**ĕx-ă-mĕn*, *s.* [Lat.] [EXAMINE.] An examination, disquisition, or inquiry; scrutiny.

"Following the wars under Antony, the course of his life would not permit a punctual examen in all."—*Broune*: *Vulgar Errors*, bk. i., ch. viii.

**ĕx-ă-m-ĕ-trôn*, *s.* [Gr. *hexametros*.] Hexameter (q. v.).

**ĕx-ă-m-in-a-bil-y-tŷ*, *s.* [English *examinable*; -ity.] The quality of being examinable, or liable to be inquired into.

**ĕx-ă-m-in-a-ble*, *a.* [Eng. *examin(e)*; -able.] That may or can be examined or inquired into.

**ĕx-ă-m-y-nant*, *s.* [Latin *examinans* (genit. *examinantis*), pr. par. of *examino*=to weigh carefully.]

1. One who examines; an examiner. (*Sir W. Scott*.)

2. One who is examined; one who is under examination; an examinee.

"The examiners shall examine two at a time—the examinees shall appear before them, in classes of six at a time."—*Prideaux*: *Life*, p. 234.

**ĕx-ă-m-y-năte*, *s.* [Lat. *examinatus*, pa. par. of *examino*.] One who is examined or placed under examination; an examinee.

"In an examination where a freed servant, who having power with Claudius, very saucily had almost all the words, asked in scorn one of the examinees, who was likewise a freed servant of Scribonianus; I pray, sir, if Scribonianus had been emperor, what would you have done? He answered, I would have stood behind his chair and held my peace."—*Bacon*: *Apophthegms*.

**ĕx-ă-m-y-nă-tion*, *s.* [Fr. *examination*, from Lat. *examinatio*, from *examinatus*, pa. par. of *examino*=to weigh carefully, to examine (q. v.); Sp. *examinacion*; Ital. *esaminazione*.]

1. The act or process of examining, searching or inquiring into; a careful search or inquiry into for the purpose of ascertaining the true nature or condition of anything; especially applied to—

(1) The act or process of endeavoring to ascertain the truth of any matter by the interrogation of witnesses.

"I have brought him forth, that after examination had, I might have somewhat to write."—*Acts* xxv. 26.

(2) The process of testing the capabilities or qualifications of a candidate for any post, or the progress, attainments, or knowledge of a student: as, an examination for the Civil Service; a periodical examination of a class or school, &c.

2. The state of being examined, or of undergoing an examination.

3. Trial or assay, as of minerals, chemical compounds, &c.

† Crabb thus discriminates between *examination*, *inquiry*, *research*, *search*, *investigation*, and *scrutiny*: "*Examination* is the most general of these terms, which all agree in expressing an active effort to find out that which is unknown. The *examination* is made either by the aid of the senses or the understanding, the body or the mind; the *search* is principally a physical action; the *inquiry* is mostly intellectual; we *examine* a face or we *examine* a subject; we *search* a house or a dictionary; we *inquire* into a matter . . . To *examine* a person, is either by means of questions to get at his mind, or by means of looks to become acquainted with his person; to *search* a person is by corporeal contact to learn what he has about him. . . . *Examinations* and *inquiries* are both made by means of questions; but the former is an official act for a specific end, the latter is a private act for purposes of convenience or pleasure. Students undergo *examinations* from their teachers; they pursue their *inquiries* for themselves. A *research* is a remote inquiry; an *investigation* is a minute inquiry; a *scrutiny* is a strict examination." (*Crabb*: *Eng. Synon.*)

**ĕx-ă-m-y-nă-tŷr*, *s.* [Lat.] An examiner, an inquirer.

"Yet it is, methinks, an inference somewhat Rabbinical, and not of power to persuade a serious examiner;"—*Broune*: *Vulgar Errors*, bk. vi., ch. vi.

**ĕx-ă-mĭ-ne*, **ex-a-men*, **ex-a-mene*, **ex-a-myne*, *v. t. & i.* [Fr. *examiner*, from Lat. *examino*=to weigh carefully; *examen* (genit. *examinis*)=the tongue of a balance; for *exagmen*, from *ex*=out, and *ago*=to drive; *exigo*=to weigh out; Sp. & Port. *examinar*; Ital. *esaminare*.]

A. Transitive:

1. To inquire into the state or truth of any matter; to endeavor to ascertain the facts relating to anything; to investigate; to scrutinize; to weigh and sift the arguments relating to any matter.

"When I began to examine the extent and certainty of our knowledge, I found it had a near connection with words."—*Locke*.

2. To inspect or explore the condition or state of anything.

3. To interrogate; to question as a witness.

"Command his accusers to come unto thee, by examining of whom thyself mayest take knowledge of all these things."—*Acts* xiii. 30.

4. To submit to an examination; to try, as an offender.

"Their was our Lord examined in the night, and scourged."—*Maunderville*, p. 91.

5. To test the capabilities, qualifications of for any post; to ascertain the attainments, knowledge, or progress of by examination.

6. To test or assay, as minerals, chemical compounds, &c.

7. To test character by a moral standard.

"Examine yourselves whether ye be in the faith."—*2 Cor.* xiii. 5.

B. Intrans.: To make examination, inquiry, or research.

"Read their works, examine fair."

Lloyd: *The Author and his Friend*.

† Crabb thus discriminates between *examine*, *to explore*, and *to search*: "To *examine* expresses a less effort than *to search*, and this expresses less than *to explore*. We *examine* objects that are near; we *search* those that are hidden or removed at a certain distance; we *explore* those that are unknown or very distant." (*Crabb*: *Eng. Synon.*)

**ĕx-ă-m-y-ne*, *s.* [EXAMINE, *v.*] An examination.

**ĕx-ă-m-y-nĕs*, *s.* [Eng. *examin(e)*; -ee.] One who is subjected to, or undergoes an examination.

**ĕx-ă-m-y-nĕr*, *s.* [Eng. *examin(e)*; -er.]

1. One who examines or inquires into the truth or facts of any matter.

"So much diligence is not altogether necessary, but it will promote the success of the experiments, and by a very scrupulous examiner of things deserves to be applied."—*Newton*: *Optics*.

2. One who examines or interrogates, as a witness or an offender.

"A crafty clerk, commissioner, or examiner, will make a witness speak what he truly never meant."—*Hale*: *Law of England*.

3. One who is appointed to examine or test the capabilities, qualifications, progress, or knowledge of candidates for any office, students, &c.

**ĕx-ă-m-y-n-ĭng*, **ex-am-y-n-yng*, *pr. par.*, *a. & s.* [EXAMINE.]

A. As *pr. par.*: (See the verb.)

B. As adjective:

1. Inquiring or searching into the truth of any matter; testing.

2. Appointed, or having the power to examine; as, an examining board.

C. As *subst.*: The same as EXAMINATION (q. v.).

**ĕx-ă-m-plă-rŷ*, *a.* [English *exampl(e)*; -ary.] Serving for example or pattern; exemplary.

"We are not of opinion that nature, in working, hath before her certain exemplary draughts or patterns, which, subsisting in the bosom of the Highest, and being thence discovered, she fixeth her eye upon them."—*Hooker*: *Eccles. Polity*, bk. i., ch. iii.

**ĕx-ă-m-plĕ*, *s.* [Old Fr. *ex-ample*; Fr. *exemple*, from Lat. *exemplum* = a pattern, specimen, from *eximo*=to take out, to select as a specimen; *ex*=out, and *emo*=to buy, to take; Sp. & Port. *exemplo*; Ital. *esempio*; O. Ital. *esempio*.] [ENSAMPLE, SAM-PLĒ.]

I. Ordinary Language:

1. A small quantity of anything selected to exhibit the nature, quality, or character of the whole; a sample, a specimen.

2. A copy, model, or pattern to be imitated or worthy of imitation.

"The example and pattern of those his creatures he be-held in all eternity."—*Raleigh*: *History of the World*.

3. Any person or thing put forward or held up as a warning or admonition to others.

"Sodom and Gomorrah, giving themselves over to fornication, are set forth for an example, suffering the vengeance of eternal fire."—*Jude* 1.

4. The influence which disposes to imitation.

"When virtue is present, men take example at it; and when it is gone, they desire it."—*Wisdom*, iv. 2.

5. A precedent; whether of good or evil; an instance, either to be avoided or followed.

"Such temperate order in so fierce a course,
Doth want example."

Shakespeare: *King John*, iii. 4.

6. An instance serving to illustrate a rule, precept, position, or truth; an illustration of a general position by some particular specification; an illustrative case, instance, or quotation.

"Three examples of the like have been

Within my age. But reason with the fellow."

Shakespeare: *Coriolanus*, iv. 6.

II. Logic: The conclusion of one singular point from another; an induction of the probable future from the actual past.

† (1) Crabb thus discriminates between *example*, *pattern*, and *ensample*: "The *example* comprehends what is either to be followed or avoided; the *pattern* only that which is to be followed or copied; the *ensample* is a species of *example*, the word being employed only in the solemn style. The *example* may be presented either in the object itself, or the description of it; the *pattern* displays itself most completely in the object itself; the *ensample* exists only in the description. Those who know what is right should set the *example* of practicing it; and those who persist in doing wrong must be made an *example* to deter others from doing the same: every one, let his age and station be what it may, may afford a *pattern* of Christian virtue; our Savior has left us an *example* of Christian perfection, which we ought to imitate, although we cannot copy it; the Scripture characters are drawn as *ensamples* for our learning."

(2) He thus discriminates between *example* and *precedent*: "Both these terms apply to that which may be followed or made a rule; but the *example* is commonly present or before our eyes; the *precedent* is properly something past; the *example* may derive its authority from the individual; the *precedent* acquires its sanction from time and common consent; we are led by the *example*, or we copy the *example*; we are guided or governed by the *precedent*. affair; the latter is a public and often a national concern; we quote *examples* in literature, and precedents in law.

(3) He thus discriminates between *example* and *instance*: "The *example* is set forth by way of illustration or instruction; the *instance* is adduced by way of evidence or proof. Every *instance* may serve as an *example*, but every *example* is not an *instance*. The *example* consists of moral or intellectual objects; the *instance* consists of actions only. Rules are illustrated by *examples*; characters are illustrated by *instances*; the best mode of instructing children is by furnishing them with *examples* for every rule that is laid down; the Roman history furnishes us with many extraordinary instances of self-devotion to their country." (Crabb: *Eng. Synon.*)

ex-ca-vā-tōr, *s.* [Eng. *excavat(e)*; -*or*.]

I. *Ord. Lang.*: One who or that which excavates; specif., a laborer employed in the construction of railways. [NAVIGATOR, NAVY.]

II. Technically:

1. *Eng.*: A machine for digging earth and removing it from the hole. [This definition does not distinguish the excavator from the ditching-machine, auger, dredge, earth-borer, post-hole digger, &c. Custom, however, confines the term excavator to a narrower range.]
2. *Dentist.*: A dentist's instrument for removing the carious portion of a tooth. Excavators are of various forms and sizes, straight, curved, angular, and hooked.

***ex-cā-ve**, *v. t.* [Lat. *excavo*.] To excavate, to hollow out. (*Cockeram*.)

***ex-çē-cāte**, *v. t.* [Lat. *exceco*: *ex*=out, fully, and *cæcus*=blind.] To make blind.

B. *As subst.*: Excess.

ex-çēd, ***ex-çēad**, ***ex-çēde**, ***ex-çēde**, *v. t. & i.* [Fr. *excéder*, from Lat. *excedo*=to go out, to go beyond, to exceed: *ex*=out, and *cedo*=to go.]

A. Transitive:

1. To go beyond; to be more or greater than.
- (1) *Physically*: In size, amount, extent, &c.
"Nor did any of the crusts much exceed half-an-inch in thickness."—*Woodward: On Fossils*.

(2) *Morally*: In qualities, character, &c.

"To pass beyond the limit or bounds of."

"The charge of having exceeded the limits of his professional duty."—*Macaulay: Hist. Eng.*, ch. xiv.

3. To surpass, to excel, to transcend, to outdo.

"Solomon exceeded all the kings of the earth."—*1 Kings* x. 23.

4. To be too great for; to be or go beyond the power of; to surpass.

"To be wise and love exceeds man's might."—*Shakesp.: Troilus and Cressida*, iii. 2.

B. Intransitive:

1. To go too far; to go or pass beyond proper limits or bounds; to go to excess.

"Remembering that we speak to God, in our reverence to whom we cannot possibly exceed."—*Taylor*.

2. To go beyond any certain limit.

"Forty stripes he may give him, and not exceed."—*Deut.* xxv. 3.

*3. To bear the greater proportion; to predominate; to be greater.

ex-çēd-īng-lý, *adv.* [Eng. *exceeding*; -*ly*.] To a very great degree; very greatly; very much, extremely.

"Isaac trembled exceedingly."—*Genesis* xxvii. 33.

***ex-çēd-īng-nēss**, *s.* [Eng. *exceeding*; -*ness*.] Excess, excessiveness; greatness in length, duration, extent, or degree.

ex-çēl, *v. t. & i.* [Fr. *exceller*, from Lat. *excellere* = (1) to raise, (2) to excel: *ex*=out, fully, and *cello*=to impel; (Gr. *kellō*=to drive, to impel.)

A. Transitive:

1. To surpass in qualities; to exceed, to outdo.

"Wisdom excelleth foolishness, as far as light doth darkness."—*Bible* (1551), Eccles. ii.

2. To be too great for; to exceed or go beyond one's power.

"She opened, But to shut excelled her power."—*Milton: P. L.*, ii. 883, 884.

B. Intransitive:

1. To possess certain qualities in a degree exceeding other persons or things.

"Bid these in elegance of form excel, In color these, and those delight the smell."—*Cowper: Retirement*, 798, 794.

2. To surpass others in good or laudable acts; to be eminent or illustrious.

¶ Crabb thus discriminates between to excel, to exceed, to surpass, to transcend, and to outdo: "Excel, in its limited acceptation, conveys no idea of moral desert; surpass and excel are always taken in a good sense. It is not so much persons as things which exceed; both persons and things surpass; persons only excel. One thing exceeds another, as the success of an undertaking exceeds the expectations of the undertaker, or a man's exertions exceed his strength: one person surpasses another, as the English have surpassed all other natives in the extent of their naval power. The derivatives excessive and excellent have this obvious distinction between them, that the former always signifies exceeding in that which ought not to be exceeded; and the latter exceeding in that where it is honorable to exceed: he who is habitually excessive in any of his indulgences, must be insensible to the excellence of a temperate life. Transcend signifies climbing beyond; and outdo signifies doing out of the ordinary course: the former, like surpass, refers rather to the state of things; and outdo, like excel, to the exertions of persons: the former rises in sense above surpass; but the latter is only employed in particular cases, that is, to excel in action; excel is, however, confined to that which is good; outdo to that which is good or bad." (*Crabb: Eng. Synon.*)

ex-çel-lence, **ex-çel-len-çy**, *s.* [Fr. *excellence*, from Lat. *excellencia*, from *excellens*, pr. par. of *excellere*; Sp. *excelencia*; Port. *excelencia*; Ital. *eccellenza*.]

1. The quality or state of excelling or possessing some certain quality in an unusual or eminent degree; superiority, preëminence.

"If now thy beauty be of such esteem, Which all of so rare excellency deem."—*Drayton: Edward IV. to Mrs. Shore*.

2. That in which any person or thing excels; any valuable quality possessed in an unusual or eminent degree; an excellent quality, feature, or trait.

"The criticisms have been made rather to discover beauties and excellencies than their faults and imperfections."—*Addison*.

3. Dignity, high rank in existence.

"See the mind of beasty man, That hath so soon forgot the excellency Of his creation."—*Spenser: F. Q.*, II. ii. 87.

*4. High degree; unusual or eminent manner.

"[She] loves him with that excellency The angels love good men with."—*Shakesp.: Henry VIII.*, ii. 2.

5. A title of honor given to certain persons of high rank. It is the title given to the President of the United States, and the Governors of the various states in this country and in some other countries, to a Viceroy, a Governor-General, an Ambassador, or a Commander-in-Chief. (Used with the possessive pronouns *his*, *your*, *their*, prefixed.)

¶ Crabb thus discriminates between excellence and superiority: "Excellence is an absolute term; superiority is a relative term; many may have excellence in the same degree, but they must have superiority in different degrees: superiority is often superior excellence, but in many cases they are applied to different objects." (*Crabb: Eng. Synon.*)

ex-çel-lent, ***ex-çel-ent**, ***ex-çel-lente**, *a. & adv.* [Fr. *excellent*, from Lat. *excellens*, pr. par. of *excellere*; Sp. *excelente*; Port. *excellente*; Ital. *eccellente*.]

2. To exclude, to forbid, to interdict.

"The *excepted* tree."—Milton: *P. L.*, xi. 426.

***B. Intrans.**: To object; to take exception; to make objection. (Followed by *to* or *against*.)

"Each party having liberty *to except* to its competency, which exceptions are publicly stated."—Blackstone: *Comment.*, bk. iii., ch. 12.

ēx-ċēpt', *prep.* & *conj.* [Properly either the *pa. par.* or the imperative of the verb, the construction in the former case being similar to the Latin ablative absolute; thus, *all except one* = all, one being *excepted*. Of this we have an instance in *Shakespeare*: *Rich. III.*, v. 3:

"Richard *except*, those whom we fight against
Had rather have us win than him they follow."

A. As prep.: Besides, exclusive of; omitting; with exception of; excepting.

"A dream to any, *except* those that dream."

Cowper: *Conversation*, 483.

B. As conj.: Excepting, unless; if . . . not.

"*Except* the Lord build the house, they labor in vain that build it."—Psalm cxviii. 1.

C. As subst.: A taking out, omitting, or excluding from a number, rule, position, precept, &c.

D. As prep.: Except, omitting, with the exception of.

"People come into the world in Turkey the same way they do here; and yet, *excepting* the royal family, they get but little by it."—Collier: *On Dueling*.

ēx-ċēp'-tion, s. [Fr., from Lat. *exceptio*, from *excipio*, *pa. par.* of *excipio* = to take out, to except.]

I. Ordinary Language:

1. The act of excepting, excluding, or omitting from a number, rule, position, category, &c.; exclusion, omission.

"When God renewed this charter of man's sovereignty over the creatures to Noah and his family, we find no *exception* at all."—South.

2. The state of being excepted, excluded, or omitted from a number, rule, position, category, &c.

"There is no *exception* or pretence of privilege, which high or low, rich or poor, may or ought to usurp unto themselves."—Calvin: *Four Godly Sermons*, ser. 1.

3. That which is excepted, excluded, or omitted from a general statement, number, rule, category, &c.; that which is specified as not included in or falling under any rule, category, &c.

"That proud *exception* to all nature's laws."

Pope: *Essay on Man*, iii. 244.

4. An objection; a caveat; that which is or may be stated or put forward in opposition to any rule, statement, or position. (Followed by *to* or *against*.)

"Your assertion hath drawn us to make search whether these be just *exceptions* against the customs of our church."—Hooker: *Eccles. Polity*. (Pref.)

5. Offense, dislike, slight anger, or resentment. (To take *exception*.)

II. Law:

1. A denial of anything alleged and considered valid by the other side, either in point of law or in pleading; a denial of a matter alleged in bar to an action; a denial of the sufficiency of an answer.

2. A clause by which the grantor of a deed excepts something before granted.

¶ (1) *Bill of exceptions*:

Law: A statement of exceptions or objections on points of law taken to the directions, or decisions of a judge presiding at a trial, to be referred for consideration and decision to a superior court, or to a full bench.

"If, either in his directions or decisions, he [the judge] mistakes the law by ignorance, inadvertence, or design, the counsel on either side may require him publicly to send a *bill of exceptions*; stating the point wherein he is supposed to err. This *bill of exceptions* is in the nature of an appeal; examinable, not in the court out of which the record issues for the trial at *nisi prius*, but in the next immediate superior court, upon error brought, after judgment given in the court below."—Blackstone: *Commentaries*, bk. iii., ch. 12.

(2) *To take exception*:

(a) To make an objection, to object; to find fault; followed formerly by *against*, now by *to*.

"He gave Sir James Tirrel great thanks; but *took exception* to the place of their burial, being too base for them that were king's children."—Bacon.

(b) To take offense or umbrage; to be offended; followed by *at*: as, *to take exception at a remark*.

ēx-ċēp'-tion-ā-ble, a. [Eng. *exception*; -*able*.]

1. Liable or open to exception or objection; objectionable.

2. Exceptional, unusual.

"The only piece of pleasantry in Milton is where the evil spirits rally the angels upon the success of their artillery; this passage I look upon to be the most *exceptionable* in the whole poem."—Addison: *Spectator*, No. 279.

***ēx-ċēp'-tion-ā-ble-ness**, s. [Eng. *exceptionable*; -*ness*.] The quality or state of being exceptionable.

ēx-ċēp'-tion-āl, a. [Eng. *exception*; -*āl*.]

1. Out of the ordinary or usual course; unusual, not usual, special; forming or of the nature of an exception; unprecedented, extraordinary.

2. That may be excepted against; exceptionable.

ēx-ċēp'-tion-ā-ry, a. [Eng. *exception*; -*ary*.]

Indicating an exception.

***ēx-ċēp'-tion-ōr**, s. [Eng. *exception*; -*er*.] One who takes exceptions or objections; an objector.

"Thus much, readers, in favor of the softer spirited Christian; for other *exceptioners* there was no thought taken."—Milton: *Remonstrant's Defence*.

***ēx-ċēp'-tious**, a. [Eng. *except*; -*ious*.] Given to caviling; fond of making objections; peevish, censorious.

***ēx-ċēp'-tious-ness**, s. [Eng. *exceptionous*; -*ness*.] The quality of being exceptionous; a disposition to find or raise objections or exceptions.

ēx-ċēp'-tīve, a. [Eng. *except*; -*ive*.]

1. Including or indicating an exception.

"*Exceptive* propositions will make complex syllogisms: as, None but physicians came to the consultation: The nurse is no physician, Therefore the nurse came not to the consultation."—Watts: *Logic*, pt. iii., ch. ii.

2. Making or forming an exception; exceptional: as, an *exceptive* law.

***ēx-ċēp'-lēss**, ***ēx-ċēp'-lēsse**, a. [English *except*; -*less*.] Making or admitting of no exception; extending to all; general, universal.

ēx-ċēp'-tōr, s. [Lat.] One who makes or raises objections; an objector, a cavalier.

"The *exceptor* makes a reflection upon the impropriety of those expressions."—Burnet: *Theory of the Earth*.

"Possibly he meaneth his own dear words I have *excerpted*."—Barnard: *Life of Heylin* (1683), p. 12.

ēx-ċērpt', s. [Lat. *excerptum*, neut. of *excerptus*, *pa. par.* of *excerpo*.] An extract or selection from the works of an author, or writing of any kind.

"His commonplace book was filled with *excerpts* from the Year-books."—Campbell: *Lives of the Lord Chancellors*; Lord Commissioner Maynard.

ēx-ċērp'-ta, s. pl. [Lat., neut. pl. of *excerptus*, *pa. par.* of *excerpo*.] Excerpts, extracts.

ēx-ċērp'-tion, s. [Lat. *excerptio*, from *excerptus*, *pa. par.* of *excerpo*.]

1. The act of selecting, culling, or picking out.

2. That which is selected or picked out; an excerpt; an extract.

"Times have consumed his works, saving some few *excerptions*."—Raleigh. (Johnson.)

ēx-ċērp'-tīve, a. [Eng. *excerpt*; -*ive*.] Excerpting, selecting, picking out.

ēx-ċērp'-tōr, s. [Lat. *excerptus*, *pa. par.* of *excerpo*.] One who makes excerpts, extracts, or selections.

"I have not been surreptitious of whole pages together out of the doctor's printed volumes, and appropriated them to myself without any mark, or asterisk, as he has done. I am no such *exceptor*."—Barnard: *Life of Heylin*, p. 12.

ēx-ċēss', ***ex-ċes**, s. [O. Fr. *exce* = excess, from Lat. *excessus* = a going out; *excedo* = to go beyond, to excel; Sp. *exceso*; Port. *excesso*; Ital. *eccesso*.] [EXCEED.]

I. Ordinary Language:

1. That which exceeds any measure or limit; that which is in superabundance; that which goes beyond the common or ordinary measure, proportion, or limit.

"Less than archangel ruined, and the excess
Of glory obscured." Milton: *P. L.*, i. 593.

2. A state of being in too great quantity, degree, or amount; superabundance.

"The several rays in that white light retain their colorific qualities, by which those of any sort, whenever they become more copious than the rest, do by their *excess* and predominance cause their proper color to appear."—Newton: *Optics*.

3. Extravagance of any kind; a transgression or passing beyond due limits.

"Hospitality sometimes degenerates into profuseness; even parsimony itself, which sits but ill upon a public figure, is yet the more pardonable *excess* of the two."—Atterbury.

4. Undue or excessive indulgence of appetite or of the desires; over-indulgence.

"There will be need of temperance in diet; for the body, once heavy with *excess* and surfeits, hangs plummets on the nobler parts."—Dunbar.

II. Arith. & Geom.: The amount by which one number or quantity exceeds another; the difference between the greater of two unequal numbers and the less; thus, 6 is the excess of 8 over 2.

¶ **Spherical excess**: The excess of the sum of the three angles of a spherical triangle over two right angles, or 180°.

¶ Crabb thus discriminates between *excess*, *superfluity*, and *redundancy*: "*Excess* is that which exceeds any measure; *superfluity* and *redundancy* signify an *excess* of a good measure. We may have an *excess* of heat or cold, wet or dry, when we have more than the ordinary quantity; but we have a *superfluity* of provisions when we have more than we want. *Excess* is applicable to any object; but *superfluity* and *redundancy* are species of *excess*. . . . We may have an *excess* of prosperity or adversity; a *superfluity* of good things; and a *redundancy* of speech or words." (Crabb: *Eng. Synon.*)

ēx-ċēs'-sive, ***ex-ċes-sif**, a. [Fr. *excessif*, from Lat. *excessus*; Sp. *excesivo*; Ital. *eccessivo*.]

1. Exceeding the usual or proper limits or bounds; immoderate, extravagant, unreasonable; too great; beyond measure.

"He had, in the Convention, carried his zeal for her interests to a length which she had herself blamed as *excessive*."—Macaulay: *Hist. Eng.*, ch. xv.

fāte, fāt, fāre, āmidst, whāt, fāth; wē, wēt, hēre, camēl, hēr, thēre; plne, pīt, sīre, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trī, Sīryān. æ, œ = ē; ey = ā. qu = kw.

*2. Acting unreasonably or without proper restraint.

Crabb thus discriminates between *excessive*, *immoderate*, and *intemperate*: "*Excessive* designates excess in general; *immoderate* and *intemperate* designate excess in moral agents. The *excessive* lies simply in the thing which exceeds any given point; the *immoderate* lies in the passions which range to a boundless extent; the *intemperate* lies in the will which is under no control. Hence we speak of an *excessive* thirst physically considered; an *immoderate* ambition or lust of power; an *intemperate* indulgence, an *intemperate* warmth. *Excessive* admits of degrees; what is *excessive* may exceed in a greater or less degree; *immoderate* and *intemperate* mark a positively great degree of excess; the former still higher than the latter; *immoderate* is in fact the highest conceivable degree of excess. *Excessive* designates what is partial; *immoderate* is used oftener for what is partial than what is habitual; *intemperate* is used oftener for what is habitual than what is partial. A person is *excessively* displeased on particular occasions; an *immoderate* eater at all times, or only *immoderate* at that which he likes; he is *intemperate* in his language when his anger is *intemperate*; or he leads an *intemperate* life. The excesses of youth do but too often settle into confirmed habits of *intemperance*." (Crabb: Eng. Synon.)

ēx-čēs-sīve-lý, adv. [Eng. *excessive*; -ly.]

1. In or to an excessive degree; exceedingly; extremely; beyond measure.

"Such mosses . . . have seeds so *excessively* small."
—Ray: On the Creation, pt. ii.

*2. Vehemently, greedily. (Spenser.)

ēx-čēs-sīve-nēss, ***ex-ces-sīve-ness**, s. [Eng. *excessive*; -ness.] The state or quality of being *excessive*; excess.

"Other some so fryse through the *excessfulness* of the cold."—Golding: *Justine*, p. 8.

ēx-čhān'ge, ***es-chaunge**, v. t. & i. [O. Fr. *exchange*; Fr. *échanger*.] [CHANGE.]

A. Transitive:

1. To give or part with in return for another; to transfer to hand over for an equivalent.

"They shall not sell of it, neither *exchange* nor alienate the first fruits."—Ezekiel xlviii. 14.

2. It is now followed by *for*, but formerly *with* was also used.

"Being acquainted with the laws and fashions of his own country, he has something to *exchange* with those abroad."—Locke.

3. To give and receive reciprocally; to give and take; to interchange.

"Without *exchanging* a blow."—Macaulay: *Hist. Eng.*, ch. xvi.

4. To resign, give up, or abandon one state for another.

"Death for life *exchanged* foolishlie."
Spenser: *F. Q.*, Of Mutabilitie, vi. 6.

B. Intrans.: To make an exchange; to barter.

¶ (1) Crabb thus discriminates between *to exchange*, *to barter*, *to truck*, and *to commute*: "To *barter* is to *exchange* one article of trade for another; to *truck* is a familiar term to express a familiar action for *exchanging* one article of private property for another; *commute* signifies an *exchanging* one mode of punishment for another. We may *exchange* one book for another; traders *barter* trinkets for gold dust; coachmen or stablemen *truck* a whip for a handkerchief; the Government *commute* the punishment of death for that of banishment." (Crabb: Eng. Synon.)

(2) For the difference between *to exchange* and *to change*, see CHANGE; and for that between *to exchange* and *to interchange*, see INTERCHANGE.

ēx-čhān'ge, ***es-chaunge**, s. [O. Fr. *exchange*; Fr. *échange*.]

I. Ordinary Language:

1. The act of exchanging, or giving one thing for another; a parting with one article or commodity for an equivalent.

"They lend their corn, they make *exchanges*; they are always ready to serve one another."—Addison.

2. The act of giving and receiving reciprocally; interchange.

3. The act of giving up, resigning, or abandoning one state for another.

4. The contract by which one thing or commodity is exchanged for an equivalent.

5. The form or process of exchanging a debt or credit for another; the receiving or paying of money by bill, order, or draft. [BILL.]

"I have bills for money by *exchange*,
From Florence."
Shaksp.: *Taming of the Shrew*, iv. 2.

6. That which is given in return for something received.

"There's my *exchange*: what in the world he is
That names me traitor, villain-like he lies."
Shaksp.: *Lea*, v. 3.

7. That which is received in return for something given.

"The respect and love which was paid you by all, who had the happiness to know you, was a wise *exchange* for the honors of the court."—Dryden.

*8. Change, transmutation.

"I am much ashamed of my *exchange*."
Shaksp.: *Merchant of Venice*, ii. 6.

*9. Variety, change.

"These women all of rightwiseness,
Of choice and free election,
Must love *exchange* and doubleness."
Chaucer: *Ballade of Women*.

II. Technically:

1. Commerce:

(1) A place where merchants, brokers, &c., meet to transact business; generally contracted into 'Change.

"He that uses the same words sometimes in one, and sometimes in another signification, ought to pass, in the schools, for as fair a man, as he does in the market and exchange, who sells several things under the same name."—Locke.

(2) A bill of exchange (q. v.).

(3) The rate at which the money of one country is exchanged for that of another. [Course of Exchange.]

2. *Arith.*: A rule for ascertaining how much of the money of one country is equivalent in value to a given amount of that of another.

3. *Law*: A mutual grant of equal interests, in consideration the one for the other.

¶ (1) Arbitration of exchange: [ARBITRATION.]

(2) *Course of exchange*: The current price of a Bill of Exchange at any one place as compared with what it is at another. If for \$500 at one place exactly \$500 at the other must be paid, then the *Course of Exchange* between the two places is at par; if more must be paid at the second place, then it is above par at the other; if less, it is below it.

(3) *Theory of exchange*: A hypothesis with regard to radiant heat, devised by Prevost of Geneva, and since generally accepted. All bodies radiate heat. If two of different temperatures be placed near each other, each will radiate heat to the other, but the one higher in temperature will receive less than it emits. Finally, both will be of the same temperature, each receiving from the other precisely as much heat as it sends it in return. This scale is called the mobile equilibrium of temperature.

exchange-broker, s. A bill-broker.

exchange-cap, s. A fine quality of paper made of new stock; thin, highly calendered, and used for printing bills of exchange.

***exchange-wench**, s. One of the women who kept stalls at the London Exchange, and whose reputation was not very good. (*English Colloq.*) (Nares.)

"Now every *exchange-wench* is ushered in by them into her stalls, and while she calls to others to know what they lack, while herself lacks nothing to make her as fine as a countess."—England's Vanity (1683), p. 32.

ēx-čhān'ge-a-bil'-i-tý, s. [Eng. *exchangeable*; -ity.] The quality or state of being exchangeable.

ēx-čhān'ge-a-ble, a. [Eng. *exchangeable*; -able.]

1. That may or can be exchanged; fit or proper to be exchanged.

"The officers captured were *exchangeable* with the powers of General Howe."—Marshall.

2. Rateable, or to be valued according to what can be procured in exchange; as, the *exchangeable* value of goods.

ēx-čhān'g-ēr, s. [Eng. *exchange(e)*; -er.] One who exchanges; one who deals in money.

"Whilst bullion may be had for a small price more than the weight of our current cash, these *exchangers* generally choose rather to buy bullion than run the risk of melting down our coin, which is criminal by the law."—Locke.

***ēx-čheat**, s. [ESCHEAT.]

***ēx-čheat-ōr**, s. [ESCHEATOR.]

ēx-čhēq-uēr (q as k), ***es-čhek-er**, ***es-čhek-ere**, ***čhek-er**, s. [O. Fr. *eschequier*, *eschiquier*, from *eschec*=check (at chess); *eschecs*=chess; Low Lat. *scaccarium*= (1) a chess-board, (2) *eschequer*; *scacci*=chess.] [CHECK, CHECKER, CHESS.]

II English Law:

1. In the same sense as I. 2. [Chancellor of the Exchequer.]

¶ [Court of Exchequer.]

¶ (1) Chancellor of the Exchequer: [CHANCELLOR.]

(2) Court of Exchequer:

English Law: A court instituted by William the Conqueror, and constituting part of the Aula Regia. It was remodeled by Edward I. Its primary object was to recover debts due to the king, such as unpaid taxes, &c., to vindicate his proprietary rights against those encroaching upon them, &c. But after a time, without losing sight of the original purpose, it developed into an ordinary law court, with a legal and an equitable side, each open to all the nation. The Act 2 Vict. c. 5 transferred the equity jurisdiction to the Court of Chancery. By 36 and 37 Vict. c. 66, passed August 5, 1873, and which came into operation on November 1, 1874, the Exchequer Court became the Exchequer Sub-division of the Supreme Court of Judicature. A similar court was established in Scotland by 6 Anne c. 28.

(3) Court of Exchequer Chamber:

English Law: A court instituted in England by 31 Edw. III. to settle cases carried from the Court of Exchequer on writs of error. Subsequently an appeal in error lay to it from each of the three superior courts of Common Law, and from this court to the House of Lords. It was abolished by the Judicature Act of 1875, its jurisdiction in appeals being transferred to the Court of Appeal.

exchequer-bill, s. An instrument of credit created by the Commissioners of the British Treasury for the purpose of raising money for temporary purposes to meet the necessities of the Exchequer. Exchequer-bills form a large portion of the unfunded, or floating debt of the country. They are issued for sums of £100 each, or some multiple of £100. They last for a term of five years without renewal.

exchequer-bond, s. An exchequer-bond differs from an exchequer-bill in being issued to run for a definite period of time, in no case to exceed six years. The rate of interest payable on them is also fixed.

***ēx-čhēq-uēr** (q as k), v. t. [EXCHEQUEER, s.] (For def. see extract.)

"Among other strange verbs, the following has arisen in vulgar language—viz., to *exchequer* a man; which is, to institute a process against him, in the court of exchequer, for non-payment of a debt due to the king, and in some other cases."—Pegge: *Anecd. of the Eng. Language*.

II. Med.: To stimulate or increase the vital activity of the body, or of any of its parts.

B. Intrans.: To stimulate, to animate, to cause excitement, to give a stimulus.

"There native beauty pleases and *excites*."

Dryden: Art of Poetry, ch. 2.

† Crabb thus discriminates between *excite*, to *incite*, and *to provoke*: "To *excite* is said more particularly of the inward feelings; *incite* is said of the external actions; *provoke* is said of both. A person's passions are *excited*; he is *incited* by any particular passion to a course of conduct; a particular feeling is *provoked*, or he is *provoked* by some feeling to a particular step. Wit and conversation *excite* mirth; men are *incited* by a lust for gain to fraudulent practices; they are *provoked* by the opposition of others to intemperate language and intemperate measures. To *excite* is very frequently used in a physical acceptation; *incite* always, and *provoke* mostly, in a moral application. We speak of *exciting* hunger, thirst, or perspiration; of *inciting* to noble actions; of *provoking* impertinence, scorn, or resentment." (*Crabb: Eng. Synon.*)

ex-ci-t-éd, pa. par. & a. [EXCITE.]

"The salt and lxxivated serosity, with some portion of choler, is divided between the guts and bladder, yet it remains undivided in birds, and hath but a single descent by the guts with the exclusions of the belly."—*Browne: Vulgar Errors*.

† **Exclusion Bill:**

English Hist.: A bill designed to prevent the Duke of York, afterward James II. of England, from retaining his right of succession to the throne, the reason being that he had embraced Roman Catholicism. In 1680 it passed the House of Commons, but was rejected by the Lords, after the King, Charles II., had declared that he would never accord it the royal assent. In 1681 it was revived, but, instead of passing, it led to the dissolution of Parliament.

"Halifax had spoken with great energy against the Exclusion Bill."—*J. S. Brewer: English Studies*, p. 197.

Ėx-clŭ-gion-ŕ-y, a. [Eng. *exclusion*; -*ary*.] Tending to exclude or shut out.

Ecclesiol.: The spiritual penalty of excluding an offender from the communion and all the privileges of the Church, and from Christian society. It is founded on 1 Cor. v. In the first century, those guilty of gross sins, and who had been vainly admonished, were excommunicated. If they repented, they were again admitted to all Christian privileges, but after a second grievous fall, they were finally excluded from the ranks of the faithful. Among those on whom discipline was exercised were Christians who denied their faith for fear of their lives during persecution, returning again when the danger was over. In the third century, during the sharp Decian persecution, a controversy arose in the Church as to the treatment of these weak brethren. Cyprian, Bishop of Carthage, was for severity, and carried his point against quite a multitude of his fellow believers who were in favor of leniency. The Novatians in the third century, and the Donatists in the fourth, broke off from the Church catholic, from causes connected with the dissatisfaction they felt that the Church had, in their view, too easily restored to their old status those erring disciples. A distinction gradually arose between a lesser and a greater excommunication, the latter called also Anathema. In the middle ages, during the dominancy of the Papacy, the greater excommunication became a formidable power, and was used as a weapon wherewith to assail even kings and emperors. The first reigning prince thus excommunicated was Robert, King of France, in 998. The Pope who did the deed was Gregory V. Many other cases followed. In 1077 Gregory VII. excommunicated the Emperor Henry IV. of Germany, absolving his subjects from their allegiance, and the proud monarch had ultimately to seek reconciliation with the offended hierarchy. In 1208, Pope Innocent III. acted similarly to King John of England, the interdiction not being reversed till 1214. To omit other cases, Pope Pius VII. in 1809 excommunicated Napoleon I., and in 1860, Pope Pius IX. virtually did so to Napoleon III. and Victor Emmanuel, though not naming the delinquents.

Ėx-cŕm-mŭn-ŕ-cŕ-tŕr, s. [EXCOMMUNICATE, v.] One who excommunicates.

"Himself was one of the excommunicators."—*Frynne: Treachery and Disloyalty*, pt. 1., p. 19.

"And they all at once beganne to *excuse*."—Bible (1551): Luke xiv. 19.

¶ Crabb thus discriminates between to *excuse* and to *pardon*: "We *excuse* a small fault, we *pardon* a great fault; we *excuse* that which personally affects ourselves; we *pardon* that which offends against morals; we may *excuse* as equals; we can *pardon* only as superiors. We exercise good nature in *excusing*; we exercise generosity or mercy in *pardon*ing. Friends *excuse* each other for the unintentional omission of formalities; it is the privilege of the supreme magistrate to *pardon* criminals whose offenses will admit of *pardon*: the violation of good manners is *inexcusable* in those who are cultivated; falsehood is *unpardonable* even in a child." (Crabb: *Eng. Synon.*)

ĕx-cŭ-se, s. [EXCUSE, v.]

1. The act of excusing, apologizing, defending or justifying.

"Heaven put it in thy mind to take it hence,
That thou might'st win the more thy father's love,
Pleading so wisely in *excuse* of it."

Shakesp.: *Henry IV.*, Pt. II., iv. 5.

2. A plea offered in extenuation or justification; an apology.

"We find out some *excuses* or other for deferring good resolutions, 'till our intended retreat is cut off by death."

—Addison.

3. That which excuses or extenuates; an extenuation.

"[I] am damned without *excuse* yf I beleue them not."

—John Frith: *A Boke*, fo. 9.

4. Justification, pardon, forgiveness.

"This desire might have *excuse*."

Shakesp.: *Rape of Lucrece*, 235.

5. A pretended reason, plea, or ground; as, it was only an *excuse* to get away.

"We are unwilling and backward, imagine difficulties, contrive *excuses*."—Secker: *Sermons*, vol. i, ser. 15.

¶ For the difference between *excuse* and *pretense*, see PRETENSE.

II. Technically:

1. **Law**: To perform what is required to give validity to any legal instrument, as by signing, sealing, &c.

2. **Music**: To perform a piece.

B. Intransitive:

I. Ordinary Language:

1. To perform a duty or office; to accomplish a purpose.

"The cannon against St. Stephen's gate *executed* so well, that the portcullis and gate were broken, and entry opened into the city."—Sir J. Hayward.

2. To act, to work.

"With courage on he goes: doth *execute*

With counsel; and returns with victory."

Daniel: *Death of Earl of Devonshire*.

II. Music: To perform or play a piece of music.

¶ Crabb thus discriminates between to *execute*, to *fulfill*, and to *perform*: "To *execute* is more than to *fulfill*, and to *fulfill* than to *perform*. To *execute* is to bring about an end; it involves active measures, and is peculiarly applicable to that which is extraordinary, or to that which requires particular spirit and talents; schemes of ambition are *executed*: to *fulfill* is to satisfy a moral obligation; it is applicable to those duties in which rectitude and equity

are involved; we fulfill the duties of citizens: to perform is to carry through by simple action or labor; it is more particularly applicable to the ordinary and regular business of life; we perform a work or a task. One executes according to the intentions of others: the soldier executes the orders of his general; the merchant executes the commissions of his correspondent: one fulfills according to the wishes and expectations of others." (Crabb: *Eng. Synon.*)

ex-ê-cût-êd, pa. par. or a. [EXECUTE.]

executed-consideration, s.

Law: A consideration which is executed before the promise upon which it is founded is made.

executed-contract, s.

Law: A contract carried out at the time it is made.

"A contract may also be either executed, as if A agrees to change horses with B, and they do it immediately; in which case the possession and the right are transferred together; or it may be executory, as if they agree to change next week; here the right only vests, and their reciprocal property in each other's horse is not in possession but in action; for a contract executed, which differs in nothing from a grant, conveys a chose in possession; a contract executory conveys only a chose in action."—Blackstone: *Comment.*, bk. ii., ch. 36.

executed-estates, s. pl.

Law: Estates in possession.

executed-trust, s.

Law: A trust in which no act further than one which has been done already is requisite to give effect to the trust; as, when an estate is conveyed to the use of A and his heirs, with a simple declaration of the trust for B and his heirs. (Wharton.)

executed-use, s.

Law: The first use in a conveyance upon which the Statute of Uses operated by bringing the possession to it, the legal estate consisting of use and possession combined. (Wharton.) [USE, *Law.*]

*I. Ordinary Language:

1. One who executes, performs, or carries out any office or duty.

"Such baseness

Had ne'er like executor."—

Shakesp.: *Tempest*, iii. 1.

2. An executioner.

† In these senses pronounced as if spelled *ex-ê-cu-tur*.

II. Law: A person appointed by a testator to carry out the provisions of his will.

"An executor is he to whom another man commits by will the execution of that his last will and testament. And all persons are capable of being executors, that are capable of making wills, and many others besides; as feme-coverts, and infants. This appointment of an executor is essential to the making of a will. If the testator does not name executors, or names incapable persons, or the executors named refused to act; in any of these cases the court grants administration *cum testamento annexo* to some other person; and then the duty of the administrator is very little different from that of an executor."—Blackstone: *Comment.*, bk. ii., ch. 28.

ex-êc-u-tër-i-al, *ex-ec-u-tor-i-all, a. & s. [Eng. *executory; -al*.]

A. As adj.: Pertaining to an executor; executive.

- *1. The process of finding the root of an equation.
 2. Interpretation, specifically, Scripture interpretation.

† Biblical Exegesis:

Exegesis of Scripture: Credner indicates two kinds of it. The first of these is Grammatico-historical Exegesis—i. e., interpretation according to the grammatical signification of the words as historically ascertained or as supplemented by history. Of this he, in common with enlightened interpreters in general, approves. The second kind is Dogmatic Exegesis, which, coming to the interpretation of Scripture determined to find certain doctrines there, finds them accordingly, but often by strained and unnatural interpretations.

"The science therefore which discloses to us the tenets of Holy Writ we call *Biblical Exegesis* or interpretation."—Credner: *Preliminary Dissertation to Kittó's Cyclop. of Bibl. Literature*.

ĕx-ĕ-gĕtĕ, s. [Gr. *exēgētēs*, from *exēgeomai*=to guide, to lead; Fr. *exégète*.] One skilled or practiced in exegesis; an exegetist.

"If one be exegetical and explicative of the other."—Taylor: *Great Exemplar*, pt. i., § 2.

exegetical-theology, s. [EXEGETICS.]

ĕx-ĕ-gĕt-ic-al-ly, adv. [Eng. *exegetical*; -ly.] By way of exegesis or explanation; in an exegetical manner.

"This is not added exegetically, or by way of exposition."—Bp. Bull: *Works*, i. 200.

ĕx-ĕ-gĕt-ics, s. [EXEGETIC.] Proper scientific interpretation, especially of Scripture.
 † Hermeneutics and Exegetics are closely akin, but not identical. The former lays down the principles of Biblical interpretation; the latter deals with the practical application of the principles thus laid down. In other words, Hermeneutics is a science, Exegetics is an art.

ĕx-ĕ-gĕ-tist, s. [English *exeget(e)*; -ist.] One learned in exegetical theology; an exegete.

*ĕx-ĕl-trĕ, s. [AXLE-TREE.]

ĕx-ĕm-brĭ-ō-nāte, a. [Pref. *ex*, and English *embryonate*.]

Bot.: Not having an embryo. Used of Cryptogamic, or as Richard calls them, Inembryonate plants (q. v.). They are so designated from their not possessing a proper embryo like Phanerogams.

ĕx-ĕm-plar, *ex-em-plaire, s. & a. [French *exemplaire*, from Lat. *exemplarium*, from *exemplar*=a copy, from *exemplum*=an example, a sample.]

A. As substantive:

1. A pattern, model, or original to be copied; an idea or image formed in the mind, as of an artist, to which he conforms his work; the ideal model which he endeavors to imitate.

"Why do all our schemes of life and plans of conduct deviate so from this great exemplar?"—South: *Sermons*, vol. ii., ser. 6.

2. A noted example, specimen, or instance.

"If he intends to murder his prince, as Cromwell did, he must persuade him that he resolves nothing but his safety; as the same grand exemplar of hypocrisy did before."—South: *Sermons*, vol. i., ser. 9.

*3. A copy; as of a book or writing.

"There is no certayne auctour in the commune exemplares."—Udall: *1 Thessalonians*. (Pref.)

*B. As adj.: Exemplary; worthy of imitation.

"Let us propound to ourselves some exemplar saint."—Taylor: *Great Exemplar*; *Exhortation*.

ĕx-ĕm-plar-ly, *ex-em-plar-y-ly, adv. [Eng. *exemplary*; -ly.]

1. In a manner worthy of imitation; worthily.

"Being a person so exemplarily temperate."—Evelyn: *Memoirs* (an. 1640).

2. In a manner calculated to act as a warning to others; by way of example or warning.

"Some he punished exemplarily in this world, that we might from thence have a taste or glimpse of his future justice."—Hakewill.

*3. By way of example.

"Showing us exemplarily how as men we should behave ourselves."—Barrow: *Sermons*, vol. ii., ser. 23.

***ĕx-ĕm-plar-ly-ness, s.** [Eng. *exemplary*; -ness.] The quality or state of being exemplary or worthy of imitation.

"In Scripture we find several titles given to Christ, which import his exemplariness as of a prince and a captain, a master and a guide."—Tillotson.

***ĕx-ĕm-plār-ly-ty, s.** [Eng. *exemplar*; -ity.]

1. The quality of being exemplary; exemplariness; worthiness of imitation.

"Thou shalt escape better than any party of men, by reason of thy conspicuous innocence, sincerity, and exemplarity of life."—More: *On the Seven Churches*, p. 183.

2. The quality of acting as an example, model, or pattern.

"Of some performances of our Savior no other, or no so probable, an account can be given, as that they were done for exemplarity."—Barrow: *Sermons*, vol. iii., ser. 3.

3. The quality or state of acting as a warning or caution.

"It ought not at all to be inflicted but for terror and exemplarity."—Taylor: *Rule of Conscience*, bk. iv., ch. i.

ĕx-ĕm-plār-ty, a. & s. [Eng. *exemplar*; -y. Fr. *exemplaire*, from Lat. *exemplaris*, from *exemplum*.]

A. As adjective:

*1. Fitted to stand as an exemplar or model for imitation; of the nature of a model or pattern.

"We are not of opinion, therefore, as some are, that nature in working hath before her certain exemplary draughts or patterns."—Hooker: *Ecclesiastical Polity*, bk. i., ch. iii.

2. Serving or worthy to stand as a model or pattern for imitation; worthy of imitation; excellent.

"The other virtuous personages are, in their degree, as worthy and as exemplary as the principal."—Guardian, No. 140.

*B. Intrans.: To take exercise; to use action or exertion; to practice.

"The Lacedaemonians were remarkable for the sport, and Alexander the Great frequently exercised at it."—*Broome*.

¶ (1) Crabb thus discriminates between to exercise and to practice: "These terms are equally applied to the actions and habits of men; but we exercise in that where the powers are called forth; we practice in that where frequency and habitude of action is requisite. we exercise an art; we practice a profession: we may both exercise or practice a virtue; but the former is that which the particular occurrence calls forth, and which seems to demand a peculiar effort of the mind; the latter is that which is done daily and ordinarily: thus we in a peculiar manner are said to exercise patience, fortitude or forbearance; to practice charity, kindness, benevolence, and the like . . . The health of the body and the vigor of the mind are alike impaired by the want of exercise; in every art practice is an indispensable requisite for acquiring

perfection: the exercise of the memory is of the first importance in the education of children; constant practice in writing is almost the only means by which the art of penmanship is acquired."

(2) He thus discriminates between to exercise and to exert: "The employment of some power or qualification that belongs to one's self is the common idea conveyed by these terms; but exert may be used for what is internal or external of one's self; exercise only for that which forms an express part of one's self: hence we speak of exerting one's strength, or exerting one's voice, or exerting one's influence: of exercising one's limbs, exercising one's understanding, or exercising one's tongue. Exert is often only used for an individual act of calling forth into action; exercise always conveys the idea of repeated or continued exertion." (*Crabb: Eng. Synon.*)

Ēx-ēr-ċis-ēr, s. [Eng. *exercis(e)*; -er.]

1. To be; to have an actual being or existence, whether material or spiritual.

"Whatever *exists* has a cause, a reason, a ground of its existence."—Clarke: *On the Attributes*, prop. 1.

2. To continue to have life or animation; to live; as, Fishes cannot *exist* out of the water.

3. To continue to be.

¶ (1) Crabb thus discriminates between *to exist* and *to live*: "Existence is the property of all things in the universe; life, which is the inherent power of motion, is the particular property communicated

by the Divine Being to some parts only of His creation: *exist*, therefore, is the general, and *live* the specific, term: whatever *lives*, *exists* according to a certain mode; but many things *exist* without *living*: when we wish to speak of things in their most abstract relation, we say they *exist*; when we wish to characterize the form of *existence*, we say they *live*." (Crabb: *Eng. Synon.*)

(2) For the difference between *to exist* and *to be*, see BE.

ēx-ist-ēnçe, s. [Low Lat. *existentia*, from Lat. *existens*, *existens*, pr. par. of *existo*, *existito*; Fr. *existence*; Sp. & Port. *existencia*; Ital. *esistenza*.]

1. The state of being or existing; the state of having a being; continuance of being.

"The metaphysicians look upon *existence* as the formal and actual part of a being."—H. More: *Antidote against Atheism* (App.), ch. iv.

2. Occurrence, happening; as, the *existence* of troubles, quarrels, &c.

*3. That which exists; an entity; a being, a creature.

"Somebody has taken notice that we stand in the middle of *existence*."—Tatler.

*4. Reality, fact.

"Him that is fr end in *existence*
From him that is by appearance."
Romaine of the Rose, 5,552.

***ēx-ist-ēn-çy**, s. [Low Lat. *existentia*.] Existence, being.

ēx-ist-ēnt, a. [Lat. *existens*, *existens*, pr. par. of *existo*, *existito*.] Existing, being; having being or existence.

"They have no real *existent* nature at all."—Law: *Enquiry*; *Of Space*, ch. i.

ēx-is-tēn-tial (tial as shāl), a. [Eng. *existent*; -ial.] Of, pertaining to, or consisting in existence.

"The being deprived of that *existential* good."—Bp. Barlow: *Remains*, p. 483.

ēx-is-tēn-tial-lŷ (tial as shāl), adv. [Eng. *existential*; -ly.] In the way of or by means of existence; in an existing state.

"Whether God was *existentially* as well as essentially intelligent."—Coleridge (Webster).

ēx-ist-ŷ-ble, a. [Eng. *exist*; -able.] Capable of existing or of existence.

"All corporeal and sensible perfections are in some way *existible* in the human mind."—Greer.

ēx-ist-mā-tion, s. [Latin *existimatio*, from *existimatus*, pa. par. of *existimo*=to judge, to esteem: *ex*=out, and *estimo*=to value, to esteem.] Opinion, esteem, estimate.

"Men's *existimatio* follows us according to the company we keep."—Spectator, No. 456.

ēx-ŷt, s. [Lat. =he (or she) goes out, 3d pers. sing. pr. indic. of *exeo*=to go out: *ex*=out, and *eo*=to go.] [EXEUNT.]

1. The term used in dramatic literature to mark the time when a player leaves the stage; a direction in a play for an actor to retire from the stage.

"They have their *exits* and their entrances."
Shaksp.: *As You Like It*, v. 1.

2. Departure (especially departure from this life); decease.

"Sighs for his *exit*, vulgarly called death."
Cowper: *Hope*, 90.

3. A passage or passing out of any place.

"In such a puerous substance as the brain, they might find an easy either entrance or *exit* almost everywhere."—Glanvill.

4. A passage; the way by which a passage or departure is made out of any place.

"The landward *exit* of the cave."
Tennyson: *Sea Dreams*, 94.

¶ In the last two meanings the word is directly from Lat. *exitus*=a going out, an outlet.

¶ Crabb thus discriminates between *exit* and *departure*: "Both these words are metaphorically employed for death, or a passage out of this life: the former is borrowed from the act of going off the stage; the latter from the act of setting off on a journey. The *exit* seems to convey the idea of volition; for we speak of making our *exit*: the *departure* designates simply the event; the hour of a man's *departure* is not made known to him. When we speak of the *exit*, we think only of the place left; when we speak of *departure*, we think of the place gone to: the unbeliever may talk of his *exit*; the Christian most commonly speaks of his *departure*." (Crabb: *Eng. Synon.*)

ēx-ŷ-tēl-ite, **ēx-ŷ-tēle**, s. [Fr. *exitèle*, from Gr. *exitēlos*=going out, disappearing, fading; *exienai*=to go out.]

Min.: The same as VALENTINITE (q. v.).

***ēx-ŷ-tial** (tial as shāl), ***ēx-ŷ-tiall**, a. [Lat. *exitialis*, from *exitium*=destruction.] Destructive, fatal, ruinous, hurtful.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aq; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tŷon, -çion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

***ēx-l-tious**, *a.* [Lat. *exitiosus*, from *exitium*.] The same as **EXITIAL** (q. v.).

ēx-l-tūs, *s.* [Lat. = a going out, an issue.] [**EXIT**.]

Law:

1. Issue, offspring.
2. Yearly rents or profits of land.

ēx-lē-gō, *phr.* [Lat. = out of the law.] Arising from law.

***ēx-lēx**, *s.* [Lat. *ex* = out, away, and *lex* = law.] An outlaw.

ēx mēr-ō-mō-tū, *phr.* [Lat.] Of one's own motion.

ēx nē-çēs-sī-tā-tē, *phr.* [Lat.] Of or from necessity; from the necessity of the case.

ēx-ō, *pref.* [Gr. *ex* (prep.) = out of; *exō* (adv.) = without, on the outside.] A common prefix in words taken from the Greek, and having the force of without, on the outside.

ēx-ōc-īp-l-tā, *s.* [Lat. *ex* = out of, and Eng., &c., *occipital* (q. v.).]

1. *Anat. (pl.)*: Condylloid portions of the occipital bone. (*Quain*.)

2. *Comp. Anat.*: The lateral parts of the first cranial segment, corresponding with the order of the *foramen magnum* in man. (*Huxley*.)

ēx-ōc-ō-tūs, *s.* [Lat. *exocœtus*; Gr. *exōkoitos*, as *adj.* = sleeping out; as *s.* = a fish that comes upon the beach to sleep; *exō* = without, and *koitos* = a bed; sleep.]

Ichthy.: A genus of Scomberosocidae. Body moderately compressed, with large pectoral fins, the rays of which are stout and firm; the arm bone or radius of this fin also large. (*Couch*.) *Exocœtus exiliens* is the Greater Flying-fish. [**FLYING-FISH**.]

ēx-ōc-u-lā-tion, *s.* [Lat. *ex* = out of, and *oculus* = an eye.] The act of putting out an eye.

"Examples of exoculation."—*Southey*: *Roderick*, ii. (Note.)

***ēx-ōde**, *s.* [**EXODUS**.]

1. *Ordinary Language*:

1. A going out, a departure, an exodus.
2. A catastrophe, a finale.

II. *Old Drama*:

1. *Greek*: The concluding part of a play.
2. *Roman*: A farce or satire; the last of the three pieces generally played.

ēx-ōd-īc, *a.* [Eng. *exod(us)*; -ic.]

*1. *Ord. Lang.*: Pertaining to an exodus or departure.

2. *Physiol.*: Conducting influence from the spinal marrow. (Used specially of the motor nerves.)

ēx-ō-dī-ūm, *s.* [Lat., from Gr. *exodion*.] An afterpiece in a theater, usually played after tragedies; a farce. (*P. Holland*: *Livius*, p. 251.)

ēx-ō-dūs, **ēx-ō-dy**, *s.* [*Eccles.* Lat. *Exodus*; *Eccles.* Gr. *Exodos*; Class. Gr. *exodos* = a going out, a marching out, a way out; *ex* = out of, and *hodos* = a way, a path, a road.]

1. *Ordinary Language*:

1. *Literally*: (1) The departure of the Israelites from Egypt, often called, by way of preeminence, The Exodus. (2) The book giving the narrative of the departure described under (1). [II.]

2. *Fig.*: Departure on a large scale.

II. *Script. Canon*: The second book of the Old Testament, in the Hebrew Bible, the Septuagint, the Vulgate, and the English and other modern versions of Scripture. The name is the Latinized form of the Greek word *Exodos*, given it in the Septuagint. The Hebrews designate it by its initial words, *Veelleh Shemoth*, sometimes curtailed into *Shemoth*. It is a continuation of Genesis, narrating the oppression of the Israelites reduced to bondage by "a new king," "which knew not Joseph," the birth and training of Moses, his appointment as leader of the people, the ten plagues, the institution of the passover, the departure of the children of Israel from the land of bondage, the destruction of Pharaoh and his army, the moral law and a multitude of other enactments, the construction of the tabernacle, the ark, and the altars, and the consecration of Aaron and his sons to the priestly office.

Hales, following the Septuagint, places the Israelite exodus from Egypt in B. C. 1648. Usher, calculating from the numbers in the Hebrew Bible, fixes it in B. C. 1491, and Bunsen considers it to have been about B. C. 1320. Josephus, in his *First Book against Apion*, quotes two stories from Manetho, the one regarding Shepherd Kings, whom the Jewish historian believes to have been the Israelites, a view now rejected, and the other, what seems to be the Egyptian account of the exodus. According to this second narrative, there were certain lepers sent to work in quarries by King Amenophis, but afterward given by him the city of Avaris as a habitation. These, under the leadership of an Egyptian

of Heliopolis, Osarsiph, a priest of Osiris, who afterward took the name of Moses, rejected the Egyptian gods, and with the aid of shepherds from Jerusalem, oppressed the Egyptians, but were afterward defeated and driven out of the land by Amenophis and his son Ramses. Amenophis is identified by Egyptologists with Menephtha, or Menophtha, son of Ramses II. (Miamum), who began to reign between B. C. 1340 and 1323. Kuenen, like Bunsen, therefore fixes the exodus from Egypt about B. C. 1320. The great oppressor of the Israelites would in that case be Ramses II., father of Menephtha, and it is noteworthy that one of the treasure cities built for the king by the Jewish slaves was called Raames (Exod. i. 11.).

The Jewish, and till lately nearly the whole Christian church, has unquestioningly accepted the tradition that Moses, under the influence of inspiration, penned the book of Exodus. Various Biblical critics, in Europe and this country, have of late rejected this view. Bishop Colenso in the sixth and last part of his work on the Pentateuch, assigns the composition of Exodus to four persons, the Elohist, the Jehovist, the Deuteronomist, and the Later Legislator. The Elohist is credited with only i. 1-7. 13, ii. 23-25, vi. 2-5. He is supposed to have been Samuel the Prophet, and to have written about B. C. 1100-1060. To the Jehovist, or Jehovists, whose production is designated "The Original Narrative," are assigned a great part of chapters i.-xiv. ch. xxxi. of which only a fragment remains, and ch. xxxii.-xxxiv. He is believed to have lived between B. C. 1060 and 1010. But ch. xvi is reduced to a fragment. The narrative in ch. xii. of the institution of the Passover is assigned to the Deuteronomist, who was, it is said, probably Jeremiah, to whom also the insertion from Deuteronomy of the ten commandments is alleged to be due. Finally, the Levitical Legislation, including the directions for building the tabernacle, is relegated to a priestly circle of composers between B. C. 600 and 450. The Levitical worship is supposed not to have been carried out till the second temple was built. Kuenen brings down most of the older parts of the Pentateuch to B. C. 750, or at most 800 B. C.

***ēx-ōf-ī-cial** (*cial* as *shāl*), *a.* [Pref. *ex*, and Eng. *offici-*.] Proceeding from office or authority.

ēx-ōf-ī-cl-ō (or *cl* as *shl*), *phr.* [Latin.] By virtue of office or position, and without special appointment. It is also used adjectively: as, an *ex-officio* member of a board.

ex-officio information, *s.*

Law: Information filed in a law court by the Prosecuting or Commonwealth's Attorney, in virtue of his office, at the instance of the State, when a great danger has arisen, or a serious affront to the peace and dignity of the commonwealth taken place. [**INFORMATION**.]

ēx-ō-g-a-mōus, *a.* [Eng. *exogam(y)*; -ous.] In any way connected with or relating to exogamy; practicing exogamy. [**MARRIAGE**.]

"It is conceivable that the difference between endogamous and exogamous tribes may have been due to the different proportion of the sexes; those races tending to become exogamous where boys prevail; those, on the other hand, endogamous where the reverse is the case."—*Lubbock*: *Origin of Civilization*, ch. iii.

ēx-ō-g-a-my, *s.* [Gr. *exō* = without, and *gamos* = marriage.] The custom prevalent among some uncivilized peoples, which forbids a man to marry a woman of his own tribe, and compels him to seek a wife from another tribe. This often impels a savage to obtain a wife by stratagem or force.

ēx-ō-gās-trī-tis, *s.* [Pref. *exo-*, and Eng., &c., *gastritis* (q. v.).]

Pathol.: Inflammation of the external membrane of the stomach.

ēx-ō-gēn, *s.* [Gr. *exō* = without, and *gennaō* = to engender, to produce.]

1. *Sing.*: A plant, the stem of which increases in thickness by the addition of fresh layers arranged externally around those previously existing. The structure is best seen in the stems of trees belonging to this sub-kingdom. A stem of this type has a central pith surrounded by as many concentric layers of wood as the tree is years old, the whole defended externally by a hollow cylindrical sheath of bark. From the central pith to this bark run a series of radii to the circumferential bark, which are called medullary rays. These peculiarities in the stem are uniformly associated with others in the seed.

There are in exogens two seed-leaves, or cotyledons, as they are called [**COTYLEDON**], and the plants themselves are in consequence called Dicotyledons (q. v.). The leaves,

with a few exceptions, are reticulated. The number five, and after it four, with their multiples, are the most common in the several parts of the flower. The germination is exorhizal, and the point of the radicle itself becomes the first root. In all these respects Exogens differ from Endogens (q. v.). Our common forest and fruit trees, the Pine order excepted, are Exogens. The Coniferae, or Pine order, have wood essentially exogenous, only there are no open vessels in a cross section, while in the vertical one are seen discs or disciform markings. The Winteræ, a section of Magnoliaceæ, have the same structure.

2. *Pl. (exogens)*: A sub-kingdom or class of plants presenting the characteristics enumerated under No. 1. Lindley prefers to call it a class, and divides it into four sub-classes, these again having under them many alliances, the latter divided into orders:

Sub-class I.—*Diclinous Exogens*.—Alliances: (1) Amentales, (2) Urticales, (3) Euphorbiales, (4) Quernales, (5) Caryales, (6) Menispermiales, (7) Cucurbitales, and (8) Papayales.

Sub-class II.—*Hypogynous Exogens*.—Alliances: (1) Violales, (2) Cistales, (3) Malvales, (4) Sapindales, (5) Guttiferales, (6) Nymphales, (7) Ranales, (8) Berberales, (9) Ericales, (10) Rutales, (11) Geraniales, (12) Silenales, (13) Chenopodiales, and (14) Piperales.

Sub-class III.—*Perigynous Exogens*.—Alliances: (1) Ficoidales, (2) Daphnales, (3) Rosales, (4) Saxifragales, (5) Rhamnales, (6) Gentianales, (7) Solanales, (8) Cortusales, (9) Echiatales, (10) Bignoniales.

Sub-class IV.—*Epygynous Exogens*.—Alliances: (1) Campanales, (2) Myrtales, (3) Cactales, (4) Grossales, (5) Cinchonales, (6) Umbellales and Asarales. (See these words.)

In an earlier work by the same author, *Lindley's Natural System of Botany*, Exogens were divided into Polypetalæ, Monopetalæ, and Apetalæ. Mr. McNab adopts the following classification, modified from Prantl and Luerssen:

Sub-class I.—*Choripetalæ*.—Petals never united, flowers often mono-achlamydeous. (1) Jussifloræ, (2) Terebinthinae, (3) Tricoccae, (4) Aphanocyclus, (5) Eucalyptæ, (6) Centrospermae, (7) Calycifloræ.

Sub-class II.—*Gamopetalæ*.—Petals united into a tube, or at least united at the base, scarcely quite separate, rarely wanting (1) Isocarpeæ, (2) Anisocarpeæ.

Palæobotany: The Exogens are first met with in the Cretaceous rocks, and exist in all the divisions of the Tertiary. But their identification is very difficult, especially when founded on fragments of leaves, or other parts, not in any way connected with fructification.

***ēx-ō-g-ēn-ite**, *a.* [Eng., &c., *exogen*, and suff. -ite (*Palæont.*) (q. v.).]

Palæont.: A fossil exogen, the order of which is unknown.

ēx-ō-g-ēn-ōus, *a.* [Eng., &c., *exogen* (q. v.), and suff. -ous.]

Botany:

1. *Of wood*: Having developed in such a way that, when fresh layers are deposited, they are added to the outside of that previously existing.

2. *Of Botanical Classification*: Pertaining or relating to the sub-kingdom or class of Exogens.

ēx-ō-gēns, *s.* [**EXOGEN**, 2.]

ēx-ō-gō-nī-ūm, *s.* [Gr. *exō* = outside, and *gonē* = that which engenders, because the stamens are exserted.]

Bot.: A genus of Convolvulaceæ, tribe Convolvuleæ. *Exogonium purga*, a beautiful twiner, with long purple flowers, furnishes the best jalap. (*Lindley*.)

ēx-ō-gyr-ā (*gyr* as *gīr*), *s.* [Gr. *exō* = outside, and *gyros* = a ring, a circle. So named because the beaks are reversed, that is, turned to the posterior side of the shell.]

Palæont.: A sub-genus of Gryphæa. Known species 46, ranging from the Oolite to the Chalk. They are found in the rocks of the United States and of Europe. (*Woodward*.)

***ēx-ō-lēte**, *a.* [Lat. *exoletus*, pa. par. of *exolesco* = to grow out of date or use; *ex* = out, and *olesco* = to grow.]

1. *Obsolete*; out of date, out of use.

2. *Old*, flat, wanting in freshness.

***ēx-ō-lū-tion**, *s.* [Lat. *exolutio*, *exolutio*, from *exolutus*, *exolutus*, pa. par. of *exsolvo* = to loose, to pay; *ex* = out, and *solvo* = to loose, to pay.] Laxation of the nerves.

***ēx-ō-lū-ve**, *v. t.* [Lat. *exolvo*, *exsolvo*.] To loose, to pay.

***ēx-ō-mō-lō-gē-sis**, *s.* [Gr., from *exomologēmai* = to confess.] A common or general confession.

ēx-ōm-phā-lōs, *s.* [Greek *exō* = without, and *omphalos* = the navel.]

Pathol.: Hernia occurring at or near the navel; umbilical hernia.

ēx-ōn, *s.* [O. Fr. *exoiné* = excused.] [**ESSEIGN**.] One of four officers of the yeomen of the English royal body-guard; an exempt.

Exogen.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēr; pine, pit, sire, sir, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

ĕx-ôn-êr-âte, v. t. [Lat. *exoneratus*, pa. par. of *exonero*; *ex*=out, and *onus* (genit. *oneris*)=a burden, a load; Fr. *exonérer*; Sp. *exonerar*.]

*I. *Lit.*: To unload, to disburthen; to free or relieve of a burden; to discharge.

"Vessels which afterward all exonerate themselves into one common ductus."—Ray: *Creation*, pt. ii.

II. *Figuratively*:

1. To relieve or free from a charge or blame; to clear from an imputation; to acquit, to exculpate, to absolve.

"The debt thus exonerated of so great a weight of its odium."—Burke: *Nabob of Arcot's Debts*.

2. To relieve from a duty, obligation, or liability. ¶ Crabb thus discriminates between *exonerate* and *exculpate*: "The first is the act of another: the second is one's own act: we *exonerate* him upon whom a charge has lain, or who has the load of guilt; we *exculpate* ourselves when there is any danger of being blamed; circumstances may sometimes tend to *exonerate*; the explanation of some person is requisite to *exculpate*: in a case of dishonesty the absence of an individual at the moment when the act was committed will altogether *exonerate* him from suspicion; it is fruitless for any one to attempt to *exculpate* himself from the charge of dishonesty who is detected in conniving at the dishonesty of others." (Crabb: *Eng. Synon.*)

ĕx-ôn-êr-â-tion, s. [Latin *exoneratio*, from *exoneratus*, pa. par. of *exonero*; Fr. *exonération*; Sp. *exoneración*.]

*1. The act of disburdening, freeing, or relieving from a burden; the state of being exonerated or relieved of a burden.

2. The act of relieving or clearing from blame, obligation, duty, &c.

"The body is adapted unto eating, drinking, nutrition, and other ways of repletion and exoneration."—Grew: *Cosmologia Sacra*, bk. iii., ch. iv.

ĕx-ôn-êr-â-tive, a. [English *exonerat(e)*; -ive.] Tending to exonerate or relieve; exonerating.

ĕx-ôn-êr-â-tôr, s. [Lat.] One who exonerates another.

ĕx-ôn-ship, s. [Eng. *exon*; -ship.] The office or post of an exon of the royal English body-guard.

ĕx-ôph-a-gôus, a. [English *exophag(y)*; -ous.] Practicing exophagy.

"But, as a rule, cannibals are *exophagous*, and will not eat the members of their tribe, whom they also refuse to marry."—London *Daily News*.

ĕx-ôph-a-gy, s. [Gr. *exô*=without, externally, and *phagên*=to eat.] That kind of cannibalism in which only persons of a different tribe are eaten.

"It would be interesting if we could ascertain that the rules of *exophagy* and *exogamy* are co-extensive among cannibals."—London *Daily News*.

ĕx-ô-phlô-ûm, s. [Gr. *exô*=outside, and *phloios*=the rind or bark of trees.

Bot.: The same as *EPHLOÏUM* (q. v.).

ĕx-ôph-thâl-mia, s. [Greek *exophthalmos*=with prominent eyes; *ex*=out, and *ophthalmos*=the eye; Fr. *exophthalmie*.]

Surg.: Dislocation of the eye, the distension of the globe so that it rises from its orbit and cannot be covered by the palpebre.

ĕx-ôph-thâl-mic, a. [Eng. &c., *exophthalm(ia)*; -ic.] Resembling exophthalmia (q. v.).

exophthalmic-goitre, s. [BRONCHOCELE.]

ĕx-ôph-ÿl-loûs, **ĕx-ô-phÿl-loûs**, a. [Gr. *exô*=outside; *phyllon*=a leaf, and Eng. &c., suff. -ous.]

Bot. (of leaves): Not evolved from a sheath, but outside all such protection. Used of dicotyledons as distinguished from monocotyledons, the leaves of which are evolved from a sheath. The term *exophyllous* was introduced by Dumortier.

ĕx-ôp-â-dite, s. [Gr. *exô*=outside; *pous* (genit. *podos*)=a foot, and suff. -ite.]

Comp. Anat.: The outer of the two secondary joints into which the typical limb of a crustacean is divided. (Nicholson.)

***ĕx-ôp-tâ-ble**, a. [Lat. *exoptabilis*.] Worthy of being greatly desired; highly desirable.

***ĕx-ôp-tâ-tion**, s. [Lat. *exoptatus*, pa. par. of *exopto*=to wish or long for; to choose; *ex*=out, fully, and *opto*=to wish for.] An earnest desire or longing for anything.

ĕx-ôp-tile, s. [Gr. *exô*=outside, and *ptilon*=a feather, a leaf; because the plumula is naked.]

Bot. (pl.): A name given by Lestiboudois to Dicotyledons.

ĕx-ô-r-a-ble, a. [Lat. *exorabilis*, from *exoro*=to move by entreaty; *ex*=out, and *oro*=to beg, pray; Fr. & Sp. *exorable*.] That may or can be moved by entreaty.

***ĕx-ô-râ-te**, v. t. [Lat. *exoratus*, pa. par. of *exoro*.] To obtain by entreaty.

***ĕx-ô-râ-tion**, s. [Lat. *exoratio*, from *exoratus*, pa. par. of *exoro*.] A prayer or entreaty to beg off anything.

ĕx-ôr-bit-ân-ce, **ĕx-ôr-bit-ân-cy**, s. [Latin *exorbitans*, pr. par. of *exorbito*.] [EXORBITANT.]

1. The act of going out of the track or course prescribed; a divergence, a deviation.

"Since I cannot guess at my own public *exorbitances*."—Sp. Hall: *Letter to Mr. H. S.*

2. An enormity, a gross deviation from rule or right; boundless depravity, extravagance.

"The reverence of my presence may be a curb to your *exorbitancies*."—Dryden: *Spanish Friar*, iii. 1.

ĕx-ôr-bit-ant, a. [Fr., from Lat. *exorbitans*, pr. par. of *exorbito*=to go out of the track; *ex*=out, away, and *orbita*=a track; Sp. *exorbitante*; Ital. *esorbitante*.]

*I. *Lit.*: Going out of or departing from the right track.

II. *Figuratively*:

*1. Deviating from the course appointed, or rule established; overstepping rule or propriety.

"These phenomena are not peculiar to earthquakes in our times, but have been observed in all ages, and particularly those *exorbitant* commotions of the waters of the globe."—Woodward: *Natural History*.

*2. Anomalous; not coming under any settled rule or method.

"The Jews, who had laws so particularly determining in all affairs what to do, were notwithstanding continually injured with causes *exorbitant*, and such as their laws had not provided for."—Hooker.

3. Enormous, extravagant, excessive; out of all bounds or reason; as, the charges were *exorbitant*.

ĕx-ôr-bit-ant-ly, adv. [Eng. *exorbitant*; -ly.] In an *exorbitant*, excessive, or extravagant manner.

"She implored his grace not to think her so *exorbitantly* and vainly ambitious to wish herself a queen."—Str. O. Buck: *Hist. Richard III.*, p. 117.

***ĕx-ôr-bl-tâ-te**, v. i. [Lat. *exorbitatus*, pa. par. of *exorbito*=to go out of the track.]

1. *Lit.*: To go out of the track or course prescribed.

"The planets . . . sometimes have *exorbitated* beyond the distance of Saturn."—Bentley: *Sermons*, 8.

2. *Fig.*: To deviate, to wander, to go astray.

"He did *exorbitate* and swerve from the way of honesty."—P. Holland: *Plutarch*, p. 669.

***ĕx-ôr-çis-â-tion**, ***ĕx-ôr-cis-a-cioun**, s. [Eng. *exorcis(e)*; -ation.] The act of exorcising, exorcism, conjuration.

ĕx-ôr-çise, ***ĕx-ôr-çize**, v. t. [Low Lat. *exorcizo*, from Gr. *exorkizô*=to drive away by adjuration; *ex*=out, away, and *horkizô*=to adjure; *horkos*=an oath; Fr. *exorciser*; Sp. *exorcisar*; Ital. *esorcizzare*.]

1. To drive away evil spirits from by the use of adjurations, prayers, and ceremonies; to free from unclean spirits.

"Do all you can to *exorcise* crowds, who are in some degree possessed as I am."—Spectator, No. 402.

2. To purify from unclean spirits by the use of adjurations, prayers, and ceremonies.

"And *exorcise* the beds, and cross the walls."

Dryden: *Wife of Bath's Tale*, 31.

*3. To raise, to call up.

"He impudently *exorcizeth* devils in the church."—Prynne: *I Histro-Mastix*, vi. 12.

ĕx-ôr-çis-êr, s. [Eng. *exorcis(e)*; -er.]

1. One who exorcises or expels unclean spirits by exorcisms.

"Things which they had seen done in their own times by professed *exorcisers*."—Horsley: *Sermons*, vol. i., ser. 10.

*2. One who has power to call up spirits.

"No *exorciser* harm thee,

Nor no witchcraft charm thee."

Shakespeare: *Cymbeline*, iv. 2.

***ĕx-ôr-çism**, ***ĕx-ôr-clisme**, s. [Low Latin *exorcismus*, from Gr. *exorkismos*, from *exorkizô*; Fr. *exorcisme*; Sp. *exorcismo*; Ital. *esorcismo*.]

1. The act or practice of expelling unclean spirits from persons or places by means of adjuration, prayer, and ceremonies; the form of adjuration or prayer used in exorcising spirits.

"Tol what ausilen incantacions
Of *exorcismes* and conjuracions?"

Lydgate: *Story of Thebes*, pt. iii.

¶ In the third century no applicant for Christian baptism was admitted to the sacred font till the exorcist had declared him free from bondage to the Prince of Darkness and now a servant of God.

2. The act of raising spirits by charms or conjuring; the form or charm used in raising spirits.

"Will his lordship behold and hear our *exorcismes*?"

Shakespeare: *Henry IV.*, Pt. II., i. 4.

ĕx-ôr-çist, s. [Low Lat. *exorcista*, from Gr. *exorkistês*, from *exorkizô*; Fr. *exorciste*; Sp. *exorcista*; Ital. *esorcista*.]

I. *Ordinary Language*:

1. One who exorcises or expels unclean spirits by exorcisms.

"Then certain of the vagabond Jews, *exorcists*, took upon them to call over them which had evil spirits."—Acts xix. 13.

2. One who raises spirits; an enchanter, a conjurer.

"Thou, like an *exorcist*, has conjured up
My mortified spirit."

Shakespeare: *Julius Caesar*, ii. 1.

II. *Roman Theol.*: The second of the Minor Orders (q. v.). The exorcist at his ordination received a book of exorcisms, as significant of his office. The power of exorcism, now rarely exercised, has long been transferred to the priesthood.

¶ The exorcists came into existence as church officers in the third century, chiefly from the adoption by the Christians of the Neo-Platonic doctrine that evil spirits are very prone to lodge themselves within the human body, and that sin is committed, not so much through human passion as because of the seduction of foul fiends.

ĕx-ôr-di-âl, a. [Lat. *exordi(um)*, and Eng. adj. suff. -al.] Of or pertaining to an exordium; introductory; initial.

"This is seen in some of his *exordial* invocations in the *Paradise Lost*."—Warton: *Preface to Milton's Smaller Poems*.

ĕx-ôr-di-ûm, s. [Lat., from *exordior*=to fix the web, to begin a web, hence to begin generally; *ex*=out, and *ordior*=to begin to weave.] A beginning of anything; specifically, the introductory or promissal part of a composition or discourse; a preface.

"This whole *exordium* rises very happily into noble language and sentiment."—Addison: *Spectator*, No. 303.

***ĕx-ôr-gân-ic**, a. [Prof. *ex*, and Eng. *organic* (q. v.).] Having ceased to be organic; no longer organic or organized.

ĕx-ô-rhîz, **ĕx-ô-rhî-zâ**, s. [Gr. *exô*=outside, and *rhiza*=a root.]

Bot.: A plant in which the radicle is not enveloped in a sheath but is naked. [EXORHIZÆ.]

ĕx-ô-rhî-zâ, **ĕx-ô-rhî-zê-â**, s. pl. [EXORHIZÆ.] [See def.]

Bot.: The name given by Richard to what are more commonly called Exogens. The term is used because in germination the radicles have no sheaths at their base, but appear at once. Richard termed them also *Synrhizæ*.

ĕx-ô-rhîz-âl, a. [Mod. Latin *exorhiza*; Eng. &c., suff. -al.]

Bot.: A term applied when the radicle of a germinating seed lengthens by its extremity which itself becomes the first root, lateral shoots not being put forth till subsequently, and even then slowly; ranked under or akin to the Exorhizæ (q. v.).

ĕx-ô-rhî-zê-â, s. pl. [EXORHIZÆ.]

ĕx-ô-rhîz-ôis, a. [English, &c., *exorhiz*; -ous.] The same as EXORHIZAL (q. v.).

***ĕx-ôr-nâ-tion**, s. [Lat. *exornatio*, from *exornatus*, pa. par. of *exorno*; *ex*=out, fully, and *orno*=to adorn; Sp. *exornacion*.] Ornament, decoration, embellishment.

"*Exornation* is a gorgeous beautifying of the tongue with borrowed words, and change of sentence."—Wilson: *Arte of Rhetorique*, p. 172.

***ĕx-ôr-t-ive**, a. [Lat. *exortivus*=pertaining to the rising of a star, &c.; *exorior*=to rise out; *ex*=out, and *orior*=to rise.] Rising; pertaining or relating to the east.

***ĕx-ôs-cu-lâte**, v. t. [Lat. *exosculatus*, pa. par. of *exosculor*; *ex*=out, fully, and *osculor*=to kiss.] To kiss often and fondly.

ĕx-ô-skêl-ê-tôn, s. [Gr. *exô*=outside, and Eng. skeleton.]

Comp. Anat.: The external skeleton, the only one existing in most invertebrate animals. It is formed by a hardening of the integument. The same as DERMO-SKELETON (q. v.).

ĕx-ôs-mic, a. [Eng. &c., *exosm(ose)*; -ic.] The same as EXOSMOTIC (q. v.).

ĕx-ôs-môse, s. [Gr. *ôsmos*=a thrusting; *ôtheô*=to thrust.]

Anat., Bot., & Physics: The name given by Dutrochet to the phenomenon by which, when two fluids of unequal density are separated by an organic membrane or by any thin and porous partition, the two fluids will mutually pass through the pores of the intervening barrier to commingle till they constitute on both sides of it a fluid of the same density. The passage from inside a membranous sac or inclosed place to the outside is called Exosmose. It is opposed to the contrary movement which is termed Endosmose (q. v.).

bôll, bôÿ, pôüt, jôwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shân. -tion, -sion = shûn; -tîon, -sion = zhûn. -tious, -cious, -sious = shûs. -ble, -dle, &c. = bəl, dəl.

ĕx-ôs-mô-sis, s. [EXOSMOSE.]

ĕx-ôs-môt-ic, a. [Eng. &c., exosmo(se), and suff. -tic.] Pertaining or relating to exosmosis.

ĕx-ô-spêrm, s. [Gr. exô=outside, and sperma=seed.]

Bot.: The outer coating of a spore. Better called Exospore (q.v.).

ĕx-ô-spôre, s. [Gr. exô=outside, and sporos=a sowing, seed.]

Botany:

1. The outermost of three coats in the spore of an equisetum.

2. A dark outer layer in the cell-wall of a zygo-spore. It is used spec. of this structure in the fungoid genus Mucor, which is propagated sexually by conjugation as well as in the normal way.

ĕx-ô-spôr-ôus, a. [Pref. exo-; Eng. &c., spor(e), and suff. -ous.] Having naked spores.

*ĕx-ôs-sâte, v. t. [Latin exossatus, pa. par. of exosso=to deprive of bones; ex=out, away, and os (genit. ossis)=a bone.] To deprive of bones.

ĕx-ôs-sâte, ĕx-ôs-sât-êd, a. [Lat. exossatus.] Deprived of bones.

*ĕx-ôs-sâ-tion, s. [Lat. exossatus, pa. par. of exosso: ex=out, away, and os (genit. ossis)=a bone.] The act of depriving of bone or bony matter; the state of being without bone or bony matter.

"Experiment solitary touching exossation of fruits."—Bacon: *Natural History*, § 854.

*ĕx-ôs-sê-ôus, a. [Lat. exossis, exossus, from ex=without, and os (genit. ossis)=a bone.] Without bone, wanting bones, boneless.

"Thus we daily observe in snails and soft exosseous animals."—Browne: *Vulgar Errors*, bk. iii., ch. xiii.

ĕx-ô-stêm-ma, s. [Greek exô=without, and stemma=a crown; because of the exerted stamens.]

Bot.: A genus of Cinchonads, family Cinchonideæ. *Exostemma caribæum* is the *Quinquina piton*, or Seaside Beech of the West Indian Islands and Mexico. *E. floribunda* is the *Quinquina* of St. Lucia. These, with other species, can be used as febrifuges, like Cinchona, to which they are closely allied, though they contain no cinchonine or quinine.

ĕx-ô-stôme, s. [Gr. exô=outside, and stoma=a mouth.]

Bot. (of an ovule): The name given by Mirbel to the aperture in the outer integument of an ovule.

ĕx-ôs-tô-sis, s. [Gr. exostosis: exô=outside, and osteon=a bone.]

1. Med. (pl.): Tumors of a bony nature, growing upon and arising from a bone. Sir Astley Cooper described two forms: (1) Periosteal, in which bony matter is deposited between the periosteum and the surface of the bone; (2) Medullary, by which growth from the medullary texture the bone is expanded, absorbed, and destroyed, so that ultimately the tumor protrudes. Exostoses chiefly affect the long bones, and are always immovable. They are also divided into cartilaginous, fungous, ivory, &c.

2. Bot.: Hard matter of wood projecting like warts or tumors from the stem or roots of a plant. They have sometimes an abortive bud as their center.

"It was clearly not a case of exostosis, depending on an imperfectly developed bud."—Gardeners' Chronicle, No. 403, p. 372 (1881).

ĕx-ô-têr-ic, ĕx-ô-têr-ic-al, a. [Gr. exôterikos=external; from exôterô, comp. of exô=outside, without; Fr. exotérique.]

1. External, public; fit to be imparted to the public; capable of being readily and fully comprehended; the opposite to esoteric or secret.

"Aristotle was wont to divide his lectures and readings into acroamatical and exoteric. Some of them contained little choice matter, and they were read privately to a select auditory; others contained but ordinary stuff, and were promiscuously and in public exposed to the hearing of all that would."—Hales: *Remains*, p. 148.

*2. Not admitted to the knowledge of the more secret or abstruse doctrines.

"He divided his disciples into two classes, the one he called esoteric, the other exoteric. For to those he intrusted the more perfect and sublime doctrines—to these he delivered the more vulgar and popular."—Warburton: *Divine Legation*, bk. iii., s. 3.

ĕx-ô-têr-ic-âl-lý, adv. [Eng. exoterical; -ly.] In an exoteric manner; publicly.

"How they like each other exoterically."—Mortimer Collins: *Sweet and Twenty*, bk. ii., ch. vii.

ĕx-ô-têr-ic-izm, s. [Eng. exoteric; -ism.] Exoteric doctrines or principles.

ĕx-ô-têr-ics, s. [EXOTERIC, a.] The lectures of Aristotle on rhetoric, to which all were admitted.

"It is then evident from these passages that, in his exoterics he gave the world both a beginning and an end."—Warburton: *Divine Legation*, bk. iii. (Note F.)

*ĕx-ô-têr-ý, s. [EXOTERIC, a.] What is exoteric, obvious, simple, or common.

"Reserving their esoterics for adepts, and dealing out exoterics only to the vulgar."—Search: *Freewill*, c. p. 172. (Note.)

ĕx-ô-thê-çl-úm (or çl as shí), s. [Gr. exô=outside; Lat. dim. of theca=a case; Gr. thêkê=a box.]

Bot.: The exterior layer of the wall of an anther. It is composed of true epidermis, and often pierced with stomata.

ĕx-ô-ic, *ĕx-ô-t-ick, a. & s. [Lat. exoticus, from Gr. exôtikos=foreign; exô=without, outside; Fr. exotique; Sp. exotico; Ital. esotico.]

A. As adj.: Foreign, not native; introduced from a foreign country; not produced at home. (Ord. Lang. & Bot.)

"Who make exotie customs native arts."—Curtwright: *Death of Lord Bayning*.

B. As substantive:

1. Ord. Lang.: Anything foreign or not native; anything introduced from a foreign country.

"Claudian was seated on the other summit, which was barren, and produced, on some spots, plants that are unknown to Italy, and such as the gardeners call exotics."—Addison: *Guardian*.

2. Bot.: A plant not a native of the United States, but introduced into gardens, green-houses, or hot-houses, from some foreign country.

ĕx-ô-t-ic-al, *ex-ot-ic-al, a. [Eng. exotie; -al.] The same as EXOTIC (q.v.).

"Misshappen clothes, or exotical gestures, or new games."—Bishop Hall: *Letter to the Earl of Essex*, ep. 8.

ĕx-ô-t-ic-al-nêss, s. [Eng. exotical; -ness.] The quality or state of being exotic.

ĕx-ô-t-ic-izm, s. [Eng. exotie; -ism.]

1. The state of being exotic.

2. Anything exotic; as a foreign word or idiom.

ĕx-pând, v. t. & i. [Lat. expando=to spread out; ex=out, and pando=to spread; O. F. expandre; Fr. épandre; Ital. espandere, spandere.]

A. Transitive:

1. Ordinary Language:

1. To open; to spread or lay open.

"Then with expanded wings he steers his flight Aloft, incumbent on the dusky air."—Milton: *P. L.*, l. 226.

*2. To spread or diffuse in every direction.

"An animal growing, expands its fibres in the air, as a fluid."—Arbutnot: *On Air*.

3. To distend, to swell out; to cause to increase in bulk: as, to expand the chest by inspiration, to expand iron by heat, &c.

"Bodies are not expandible in proportion to their weight, or to the quantity of matter to be expanded."—Grew: *Cosmologia Sacra*, bk. i., ch. iii.

4. To widen, to enlarge, to extend, to increase.

"Along the stream of time thy name Expanded flies."—Pope: *Essay on Man*, iv. 382.

II. Math.: To develop and express at length an expression indicated in a contracted form.

B. Intransitive:

1. To become opened, or spread open; to open, as, Flowers expand in spring.

2. To become distended or enlarged in bulk; to increase, as, Iron expands with heat.

"Like rising flames expanding in their height."—Dryden: *Epitaph on Sir Palmes Fairborne*.

For the difference between to expand and to dilate, see DILATE; for that between to expand and to spread, see SPREAD.

ĕx-pând-ing, pr. par., a. & s. [EXPAND.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or state of opening, spreading, dilating, or extending; expansion.

expanding-alloy, s. An alloy which expands in cooling. Such an alloy always contains bismuth, and usually antimony. Type-metal is a familiar instance.

expanding-ball, s.

Gun.: A ball having a hollow conical base, affording a relatively thin body of metal, which is expanded by the force of the explosion, driving it closely against the bore of the gun and into the rifling, preventing windage.

expanding-bit, expanding center-bit, s. A boring tool of which the diameter is adjustable.

expanding-drill, s. A drill having a pair of bits which may be diverged at a given depth to widen a hole at a certain point; used in drills for metal and for rock-boring.

expanding-mandrel, s. A mandrel having fins expandible in radial slots to bind against the inside surface of rings, sleeves, or circular cutters placed thereon.

expanding-plow, s. A plow having two or more shares, which may be set more or less distant, according to the distances between the rows at which different crops are planted.

expanding-pulley, s. A pulley whose perimeter is made expandible, as a means of varying the speed of the belt thereon. [EXPANSION-DRUM.]

expanding-reamer, s. A reamer which has a bit or bits extensible radially after entering a hole, so as to enlarge the hole below the surface.

*ĕx-pân-se, v. t. [Lat. expansus, pa. par. of expando.] To expand, to spread, to open.

"Beleroophon's horse, framed of iron, was placed between two loadstones, with wings expanded, pendulous in the air."—Browne: *Vulgar Errors*, bk. ii., ch. iii.

ĕx-pân-se, *ex-pance, s. [Lat. expansus, pa. par. of expando.] That which is expanded or spread out; a wide, open stretch or extent of space or body.

"O where dost thou lie, my Fatherland, in the ocean's broad expanse?"—Grant Allen: *Atys*.

ĕx-pân-s-i-bil-i-tý, s. [Fr. expansibilité.] The quality of being expandible; capability of expansion or extension in bulk or surface.

"Else all fluids would be alike in weight, expandibility, and all other qualities."—Grew.

ĕx-pân-s-i-ble, a. [Fr., from Lat. expansus.] Capable of being expanded or extended in size or surface; capability of expansion.

"All have springiness in them, and be readily expandible on the score of their native structure."—Boyle: *Works*, v. 614.

ĕx-pân-s-i-ble-nêss, s. [Eng. expandible; -ness.] The quality of being expandible; expansibility.

*ĕx-pân-s-i-bly, adv. [Eng. expansible; -ly.] In an expandible manner.

ĕx-pân-s-ile, a. [Lat. expans(us), pa. par. of expando, and Eng. adj. suff. -ile.] Capable of expansion; expandible.

expandible-power, s.

Physiol.: Capability possessed by various organs of the body, as, for instance, the retina of the eye, of expanding under influence of some kind operating upon them.

ĕx-pân-s-ion, s. [Lat. expansio, from expansus, pa. par. of expando; Fr. & Sp. expansion; Ital. espansione.]

I. Ordinary Language:

1. The act of expanding, spreading out, or opening.

The easy expansion of the wing of a bird, and the lightness, strength, and shape of the feathers, are all fitted for her better flight."—Grew.

2. The state of being expanded, spread out, or extended in bulk or surface; extension, distension, dilatation, enlargement.

"Tis demonstrated that the condensation and expansion of any portion of the air is always proportional to the weight and pressure incumbent upon it."—Bentley.

3. Extent or space over which anything is extended; expanse.

"The capacious mind of man cannot be confined by the limits of the world: it extends its thoughts even beyond the utmost expansion of matter, and makes excursions into that incomprehensible inane."—Locke.

*4. Space, immensity.

"Distance or space, in its simple abstract conception, I call expansion, to distinguish it from extension, which expresses this distance only as it is in the solid parts of matter."—Locke: *Human Understanding*, bk. ii., ch. xv., § 1.

II. Technically:

1. Comm.: Increase in trade or liabilities; an increase in the issue of bank-notes.

2. Math.: The development and expressing at length of an expression indicated in a contracted form; as the expansion of $(a+b)^3$ is $a^3+3a^2b+3ab^2+b^3$.

3. Nat. Phil.: The increase of bulk or surface which a body undergoes from the recession from any cause of its particles from one another, so that it occupies a greater space, while the weight remains the same. Heat is the most common cause of expansion.

4. Shipbuild.: The expansion of the skin of a ship, or rather of a network of lines on that surface, is a process of drafting to facilitate the laying-off of the dimensions and positions of the pieces of which that skin is to be made, whether timber planks or iron plates. It consists in covering the surface with a network of two sets of covers, which cross each other so as to form four-sided meshes; then conceiving the sides of those meshes to be inextensible strings, and drawing the network as it would appear if spread flat upon a plane. By this operation the meshes are both distorted and altered in area; the curves forming the network preserve their true lengths, but not their true angles of intersection;

fâte, fât, färe, amidst, whât, fáll, father; wê, wât, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrk, whô, sôn; mâte, cûb, cûre, unite, cûr, râle, fûll; try, Sýrian. æ, œ = é; ey = â. qu = kw.

and all other lines on the surface are altered both in length and in relative angular position. The process is applied to surfaces not truly developable. [DEVELOPMENT.]

5. *Steam*: The increase in bulk of steam in a cylinder. The method of working steam expansively was invented by Watt, and was the subject-matter of his patent of 1782. By it the supply of steam from the boiler to the cylinder is cut off when the latter is only partially filled, the remainder of the stroke of the piston being completed by the expansion of the steam already admitted.

expansion-curb, *s.* A contrivance for curbing or counteracting expansion and contraction from heat.

expansion-drum, *s.* An arrangement by which an occasional change of speed may be effected. The diameter of one of the drums is made variable, and the belt is kept strained by means of a weighted roller. [EXPANDING-PULLEY.]

expansion-engine, *s.* A steam-engine in which the steam is worked expansively. [EXPANSION, II. 5.]

expansion-gear, *s.*

Steam-engine: The apparatus by which access of steam to the cylinder is cut off at a given part of the stroke; a cut-off. A variable cut-off is one which is capable of being adjusted while the engine is in motion, to cut off at any given portion of the stroke, within a given range, as the requirements of the work may indicate. A fixed expansion is one arranged to cut off at a determinate part of the stroke. An automatic expansion is one which is regulated by the governor, and varies with the amount of power required. [EXPANSION-VALVE.]

expansion-joint, *s.*

Steam-engine:

1. A stuffing-box joint used when a straight metal pipe, which is exposed to considerable variations of temperature, has no elbow or curve in its length to enable it to expand without injury. The end of one portion slips within the other like a telescope. Known also as a faucet-joint.

2. An elastic copper end to an iron pipe to allow it to expand without injury.

3. An attachment of a boiler in its framing to allow the former to expand without affecting the framing.

expansion-valve, *s.*

Steam-engine: A valve arranged to cut off the connection between the boiler and cylinder at a certain period of the stroke of the piston, in order that the steam may act expansively during the remainder of the stroke.

ex-pān'-sive, *a.* [Fr. *expansif*; Sp. *expansivo*, from Lat. *expansus*, *pa. par.* of *expando*.]

I. Literally:

1. Having the power or property of expanding, extending, or distending any body; as, the *expansive* power of heat.

2. Having the quality or property of becoming expanded, extended, or distended; *expansible*.

"The *expansive* atmosphere is cramped with cold." Thomson: *Spring*, 28.

3. Expanding, spreading, or extending.

"By increase of swift *expansive* light." Davenant. Gondibert, bk. II., c. 1.

II. Figuratively:

1. Extending widely; wide, large.

"A more *expansive* and generous compassion for the fate of cities."—Eustace: *Tour through Italy*, ch. x.

2. Free-spoken, open, frank.

"Reserved people often really need the frank discussion of their sentiments and griefs more than the *expansive*."—C. Brontë: *Jane Eyre*, ch. xxii.

ex-pān'-sive-ly, *adv.* [Eng. *expansive*; *-ly*.] In an expansive manner; by expansion.

ex-pān'-sive-ness, *s.* [Eng. *expansive*; *-ness*.] The quality of being expansive; expansibility.

ex-pān-siv'-it-ty, *s.* [Eng. *expansiv(e)*; *-ity*.] Expansiveness.

"Offenses (of elasticity or *expansivity*) have accumulated to such height."—Carlyle: *Miscell.*, iv. 87.

***ex-pān'-sūm**, *s.* [Lat., neut. sing. of *expansus*, *pa. par.* of *expando*.] An expanse.

"The light of the world in the morning of creation was spread abroad like a curtain and dwelt nowhere, but filled the *expansum*."—J. Taylor: *Miracles of the Divine Mercy*.

***ex-pān'-sure** (*sure* as *shūr*), *s.* [English *expans(e)*; *-ure*.] An expanse, an extent.

ex pā-r'tē, *phr.* [Latin.] Proceeding from or made by one side only: as, an *ex parte* statement. Specif., in law applied to any step taken on behalf of one of the parties to a suit in the absence of the other: as, an *ex parte* application or hearing. Thus the hearing of evidence by grand juries is *ex parte*.

ex-pā'-ti-āte (ti as shī), **ex-pa-ci-ate*, *v. i. & t.* [Lat. *expatiatus*, *pa. par.* of *expatior*, *expatiator*=to wander: *ex*=out, and *spatior*=to wander, to roam; *spatium*=space.]

A. Intransitive:

*I. Lit.: To wander at large; to roam or rove without restraint.

"With wonder seized, we view the pleasing ground, And walk delighted, and *expatiate* round." Pope: *Homer's Odyssey*, ix. 176, 177.

II. Figuratively:

*1. To roam, to wander, to range.

"Religion contracts the circle of our pleasures, but leaves it wide enough for her votaries to *expatiate* in."—Addison: *Spectator*, No. 494.

2. To enlarge in language; to dilate; to discuss or treat a subject copiously or diffusely.

"It will be too long to *expatiate* upon the sense all mankind have of Fame."—Steele: *Spectator*, No. 218.

*B. Trans.: To allow to range or wander; to let loose.

"Make choice of a subject, which, being of itself capable of all that colors and the elegance of design can possibly give, shall afterward afford an ample field of matter wherein to *expatiate* itself."—Dryden: *Dufresnoy's Art of Painting*.

ex-pā'-ti-ā-tion (ti as shī), *s.* [Lat. *expatiatus*, *expatiatus*, *pa. par.* of *expatior*, *expatiator*.]

*1. The act of wandering, roaming, or roving at large.

"There are no other errors or manifest *expatiations* in Heaven, save those of the seven planets."—Bacon: *On Learning* (G. Wats.), bk. II., ch. xiii.

2. The act of expatiating, dilating, or enlarging upon any subject in language.

"Take them from the devil's latitudes and *expatiations*."—Farindon: *Sermons*, p. 2.

***ex-pā'-ti-ā-tōr** (ti as shī), *s.* [Eng. *expatiat(e)*; *-or*.] One who expatiates or enlarges upon any subject or matter in language.

"The person, intended by Montfaucon as an *expatiator* on the word 'endovellicus', I presume is Thomas Reinecius."—Pegge: *Anonym.*, p. 201.

***ex-pā'-ti-ā-tōr-ry** (ti as shī), *a.* [Eng. *expatiat(e)*; *-ory*.] Expatiating; amplificatory, diffuse, copious.

ex-pā'-tri-āte, *v. t.* [Low Lat. *expatriatus*, *pa. par.* of *expatrio*=to banish: *ex*=out, away, and *patria*=one's country; *pater*=a father; Fr. *expatriar*; Sp. *expatriare*.]

1. To banish, to exile; to drive into banishment; to expel.

"That inextinguishable hatred which glowed in the bosom of the persecuted, dragoned, *expatriated* Calvinist of Languedoc."—Macaulay: *Hist. Eng.*, ch. xiv.

2. Reflex.: To withdraw from one's country voluntarily; to renounce the rights of citizenship in one's own country, and become a citizen of another.

ĕx-pĕr-i-ĕnce, *s.* [Fr. *expérience*, from Lat. *experientia*=a proof or trial, from *experiens*, pr. par. of *experior*=to try, to make trial of; *ex*=out, fully, and *perior*=to go through (seen in the pa. par. *peritus*); *per*=through; Sp. & Port. *experencia*; Ital. *esperienza*, *esperienza*.]

*1. Proof, trial, experiment.

"She caused him to make experience
Upon wild beasts, which she in woods did find."

Spenser: *F. Q.*, v. i. 7.

2. Frequent or repeated trial, test, proof, or practice; observation of facts or events happening under similar circumstances.

"Experience . . . is right ynough for me,
To speke of wo that is in mariage."

Chaucer: *C. T.*, 5,583.

3. The knowledge gained by observation or trial; practical knowledge of, skill in, or acquaintance with, any matter by personal trial, proof, or observation.

"They are valiant, bold, and of great experiences."—*Holinshead: Conquest of Ireland*, bk. ii., ch. xl.

4. An individual instance of trial or observation.

¶ Crabb thus discriminates between *experience*, *experiment*, *trial*, and *proof*: "By all the actions implied in these terms, we endeavor to arrive at a certainty respecting some unknown particular: the *experience* is that which has been tried; the *experiment* is the thing to be tried; the *experience* is certain, as it is a deduction from the past for the service of the present; the *experiment* is uncertain, and serves a future purpose: *experience* is an unerring guide, which no man can desert without falling into error; *experiments* may fail, or be superseded by others more perfect. *Experience* serves to lead us to moral truth; the *experiment* aids us in ascertaining speculative truth: we profit by *experience* to rectify practice; we make *experiments* in theoretical inquiries. *Experiment* is employed only in matters of an intellectual nature; the *trial* is employed in matters of a personal nature; the *proof* is employed in moral subjects; we make an *experiment* in order to know whether a thing be true or false; we make a *trial* in order to know whether it be capable or incapable, convenient or inconvenient, useful or the contrary; we put a thing to the *proof* in order to determine whether it be good or bad, real or unreal." (Crabb: *Eng. Synon.*)

ĕx-pĕr-i-ĕnce, *v. t.* [EXPERIENCE, *s.*]

1. To make trial or proof of; to try, to practice; to gain a practical knowledge of or acquaintance with anything by personal trial or observation.

**ēx-plāin*, *v. t. & i.* [O. Fr. *explainer*, from Latin *explano*=to make flat or plain, to explain: *ex*=out, fully, and *piano*=to make flat or plain; *planus*=flat; Sp. & Port. *explanar*; Ital. *spianare*.]

A. *Transitive*:

*1. *Lit.*: To make flat or plain; to flatten or spread out.

"The horse-chestnut is turgid with buds, and ready to explain its leaf."—Evelyn: *Letter to Sec. Royal Soc.*

2. *Fig.*: To make plain, clear, or intelligible; to free from obscurity or difficulty; to illustrate by notes or commentaries; to expound.

"The Papists would explain some of them one way, and the Reformers another."—Locke: *Vindication of Christianity*.

B. *Intrans.*: To give explanation; to make things clear, plain, or intelligible.

¶ (1) Crabb thus discriminates between to *explain*, to *expound*, and to *interpret*: "To *explain* is generic, the rest are specific: to *expound* and *interpret* are each modes of *explaining*. Single words or sentences are *explained*; a whole work, or considerable parts of it, are *expounded*; the sense of any writing or symbolical sign is *interpreted*. It is the business of the philologist to *explain* the meaning of words by a suitable definition; it is the business of the divine to *expound* Scripture; it is the business of the antiquarian to *interpret* the meaning of old inscriptions on stones, or of hieroglyphics on buildings. An *explanation* serves to assist the understanding, to supply a deficiency, and remove obscurity; an *expounding* is an ample *explanation*, in which minute particulars are detailed, and the connection of events in the narrative is kept up; it serves to assist the memory and awaken the attention: both the *explanation* and *exposition* are employed in clearing up the sense of things as they are, but the *interpretation* is more arbitrary; it often consists of affixing or giving a sense to things which they have not previously had: hence it is that the same passages in authors admit of different *interpretations*, according to the character or views of the commentator."

(2) He thus discriminates between to *explain*, to *illustrate*, and to *elucidate*: "To *explain* is simply to render intelligible; to *illustrate* and *elucidate* are to give additional clearness: every thing requires to be *explained* to one who is ignorant of it; but the best informed will require to have abstruse subjects *illustrated*, and obscure subjects *elucidated*. We always *explain* when we *illustrate* or *elucidate*, and we always *elucidate* when we *illustrate*, but not *vice versa*. We *explain* by reducing compounds to simples, and generals to particulars; we *illustrate* by means of examples, similes, and allegorical figures; we *elucidate* by commentaries, or the statement of facts. Words are the common subject of *explanation*: moral truths require *illustration*; poetical allusions and dark passages in writers require *elucidation*." (Crabb: *Eng. Synon.*)

**ēx-plāin-a-ble*, *a.* [Eng. *explain*; -*able*.] That may or can be explained; capable of explanation.

"It is symbolically *explainable*, and implieth purification and cleanness."—Browne: *Vulgar Errors*, bk. v., ch. xxi.

**ēx-plāin-ēr*, *s.* [Eng. *explain*; -*er*.] One who explains; an interpreter, an expounder, a commentator.

"Unless he can show his authority to be the sole expounder of fundamentals."—Locke: *Vindication of Christianity*.

**ēx-plā-nāte*, *a.* [Lat. *explanatus*, pa. par. of *explano*.]

Entom.: Having the sides of the prothorax so depressed and dilated as to form a broad margin. (*Mourner*.)

**ēx-plā-nā-tion*, *s.* [Lat. *explanatio*, from *explanatus*, pa. par. of *explano*; Sp. *explanacion*; Ital. *spianazione*.]

1. The act of explaining, interpreting, or making clear; exposition, illustration, interpretation.

2. The exposition or interpretation given; the sense or definition given by an explainer or interpreter.

"Before this *explanation* be condemned, and the bill found upon it, some lawyers should fully inform the jury."—Swift.

3. A declaration or statement of the reason, grounds, or meanings of one's actions, words, motives, &c., with a view to remove misunderstanding or to reconcile differences; hence, a reconciliation, an agreement, a good understanding.

"The King was far too angry and dull to listen to *explanations*."—Macaulay: *Hist. Eng.*, ch. viii.

4. That which explains or accounts for anything. ¶ For the difference between *explanation* and *definition*, see *DEFINITION*.

**ēx-plān-a-tōr-i-nēss*, *s.* [Eng. *explanatory*; -*ness*.] The quality of being explanatory.

**ēx-plān-a-tive*, *a.* [Lat. *explanatus* (us), pa. par. of *explano*, and Eng. adj. suff. -*ive*.] Explanatory.

**ēx-plān-a-tōr-ŷ*, *a.* [Lat. *explanatorius*, from *explanatus*, pa. par. of *explano*.] Containing an explanation; serving to explain.

"Had the printer given me notice, I would have printed the names, and writ *explanatory* notes."—Swift.

¶ Crabb thus discriminates between *explanatory*, *explicit*, and *express*: "The *explanatory* is that which is superadded to clear up difficulties or obscurities. A letter is *explanatory* which contains an *explanation* of something preceding, in lieu of anything new. The *explicit* is that which of itself obviates every difficulty: an *explicit* letter, therefore, will leave nothing that requires *explanation*: the *explicit* admits of a free use of words: the *express* requires them to be unambiguous. A person ought to be *explicit* when he enters into an engagement: he ought to be *express* when he gives commands." (Crabb: *Eng. Synon.*)

**ēx-plāte*, **ēx-plēat* (1), *v. t.* [Pref. *ex*, and Eng. *plat* (q. v.).] To unfold, to explain.

**ēx-plēte*, **ēx-plēat* (2), *v. t.* [Lat. *expletus*, pa. par. of *expleo*=to fill up, to accomplish: *ex*=out, fully, and *pleo*=to fill.] To fulfill, to accomplish.

**ēx-plē-tion*, *s.* [Latin *expletio*, from *expletus*, pa. par. of *expleo*.] Fulfillment, accomplishment.

**ēx-plē-tive*, *a. & s.* [Latin *expletivus*=a filling up, from *expletus*, pa. par. of *expleo*; Fr. *expletif*; Sp. & Port. *expletivo*; Ital. *espletivo*.]

A. *As adj.*: Filling up; added or introduced to fill a vacancy; superfluous.

"He useth them as *expletive* phrases to plump his speech."—Burnet: *Hist. Reformation*, vol. I., bk. iii. (an. 1538).

B. *As substantive*:

1. A word introduced to fill a vacancy, though not necessary to the sense.

"While *expletives* their feeble aid do join,
And ten low words oft creep in one dull line."
Pope: *Essay on Criticism*, 346, 347.

2. A curse, an oath.

*3. A kickshaw.

"With other ornamental *expletives* of the same kind."—Graves: *Spiritual Quixote*, bk. ix., ch. xv.

**expletive-stone*, *s.*

Masonry: A stone used for filling an empty space.

**ēx-plē-tive-lŷ*, *adv.* [Eng. *expletive*; -*ly*.] In manner of an expletive.

**ēx-plē-tōr-ŷ*, *a.* [Latin *expletus* (us), pa. par. of *expleo*, and Eng. adj. suff. -*ory*.] Serving or intended to fill up; expletive.

**ēx-plīc-a-ble*, *a.* [Lat. *explicabilis*, from *explico*=to explain; Fr. & Sp. *explicable*.] That may or can be explained, made, or accounted for; capable of being explained; explainable.

"Evidently credible and in some kind *explicable*."—Hale: *Origin of Blanket*, p. 34.

**ēx-plīc-a-ble-nēss*, *s.* [Eng. *explicable*; -*ness*.] The quality or state of being explicable or explainable.

**ēx-plī-cāte*, *v. t.* [EXPLICARE, *a.* French *expliquer*; Sp. *explicar*.]

1. To unfold, to open, to expand.

"They *explicate* the leaves, and ripen food
For the silk laborers of the mulberry wood."
Blackmore: *Creation*.

2. To unfold the meaning of; to explain, to make clear; to free from obscurity or difficulties.

"Although the truths may be elicited and *explicated* by the contemplation of animals, yet they are more clearly evidenced in the contemplation of man."—Hale: *Origin of Mankind*.

**ēx-plī-cāte*, *a.* [Lat. *explicatus*, pa. par. of *explico*=to unfold: *ex*=out, away, and *plico*=to fold; *plica*=a fold.] Explicated, explained; made clear or plain.

"Thus was the mystery made *explicate*."—Bp. Taylor: *Great Exemplar*, pt. i. § 6.

**ēx-plī-cā-tion*, *s.* [Lat. *explicatio*, from *explicatus*, pa. par. of *explico*; Fr. *explication*; Sp. *explicacion*; Ital. *esplicazione*.]

I. *Lit.*: The act of opening, unfolding, or expanding.

II. *Figuratively*:

1. The act of unfolding the meaning of; explaining or interpreting; explanation.

2. The explanation or sense given by an explainer or interpreter.

**ēx-plī-cā-tive*, *a.* [Fr. *explicatif*; Sp. *explicativo*; Ital. *esplicativo*, from Lat. *explicatus*, pa. par. of *explico*.] Explanatory: serving to explain or make clear.

**ēx-plī-cā-tōr*, *s.* [Lat., from *explicatus*, pa. par. of *explico*.] One who explains or makes clear; an explainer, a commentator.

**ēx-plī-cā-tōr-ŷ*, *a.* [Lat. *explicatus* (us), pa. par. of *explico*; Eng. adj. suff. -*ory*.] Serving to explain or interpret; explicative, explanatory.

**ēx-plīc-īt*, **ēx-plīc-ite*, *a.* [Lat. *explicitus*, old pa. par. of *explico*=to unfold, to explain; Fr. *explicit*; Sp. *explicito*.]

1. Plain, clear; not obscure or ambiguous; plainly or clearly stated; express.

"No words can be more *explicit*."—Knox: *Christian Philosophy*, § 53.

2. Plain, open, unreserved, outspoken. (Used of persons.)

¶ For the difference between *explicit* and *explanatory*, see *EXPLANATORY*.

**explicit-function*, *s.*

Math.: A function whose value is expressed directly in terms of the variable; thus, in the equation

$$y = ax^2 + bx^{\frac{1}{2}} + c,$$

y is an *explicit function*. The term stands opposed to *implicit function*, in which the relation between the function and variable is not directly stated; as, for example, in the equation

$$y^2 - 2px = 0,$$

in which *y* is an *implicit function* of *x*.

**ēx-plīc-īt*, *a. & s.* [A contraction of Lat. *explicitus*=unrolled, finished.] A term formerly written at the end of books, and equivalent to "the end," or "finis."

**ēx-plīc-īt-lŷ*, *adv.* [English *explicit*; -*ly*.] Plainly, openly, clearly, expressly; without disguise or reservation; directly.

"This querulous humor carries an implicit repugnance to God's disposals; but where it is indulged, it usually is its own expostor, and *explicitly* avows it."—Government of the Tongue.

**ēx-plīc-īt-nēss*, *s.* [Eng. *explicit*; -*ness*.] The quality of being explicit; plainness, directness, or clearness of language.

"The knowledge of this article was by no means received with that *explicitness* in the ancient Jewish Church that it is now in the Christian."—South: *Sermons*, vol. iv., ser. 7.

**ēx-plō-de*, *v. t. & i.* [O. Fr. *exploder*, from Lat. *explodo*=to drive out by a clapping of hands: *ex*=out, and *plando*=to applaud.]

A. *Transitive*:

*1. To drive off the stage with hooting and clapping; hence, to reject with noise; to express disapprobation of noisily.

"Him old and young
Exploded, and had seized with violent hands,
Had not a cloud descending snatched him thence
Unseen amid the throng."—Milton: *P. L.*, xi. 669.

bōil, bōy; pōut, jōwī; cat, çell, chorus, çhīn, bench; go, gem; thin, thīs; sin, ag; expect, Xenophon, exist. ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

2. To reject, to drive into disrepute or contempt; to cry down, to condemn: as, an *exploded* theory or doctrine.

"There is pretended, that a magnetical globe or terrerella, being placed upon its poles, would have a constant rotation; but this is commonly *exploded*, as being against all experience."—*Wilkins*.

*3. To drive out with violence and noise.

"But late the kindled powder did *explode*
The massy ball, and the brass tube unload."
Blackmore: Creation.

4. To cause to explode or burst with a loud report.

B. Intransitive:

*1. To hoot or cry down; to express disapprobation, dislike, or disgust noisily.

"Thus was the applause they meant
Turned to *exploding* hiss." *Milton: P. L., x. 546.*

2. To burst with a loud report, to detonate.

3. To burst out in fury or fierceness: as, His wrath *exploded*.

ex-plōd-ēr, s. [Eng. *explod(e); -er.*]

*1. One who rejects or decries; one who expresses disapprobation or dislike.

"Scandalous *exploders* of the doctrine of passive obedience."—*South: Sermons*, vol. vi., ser. 7.

2. One who or that which explodes, or causes an explosion.

*ex-plōit, *es-plōit, *es-plōite, s.* [O. Fr. *exploit, espleit, exploit*; Fr. *exploit*, from Lat. *explicium*=a thing settled, ended, or displayed, neut. sing. of *explicatus*, pa. par. of *explico*=to unfold.] A deed or act of an heroic or remarkable character; a feat, a great or noble achievement.

"Impatient for *exploits*,
His eager eyes upcast, he soars in thought
Above all height." *Dyer: Ruins of Rome.*

¶ For the difference between *exploit* and *deed*, see **DEED**.

*ex-plōit, *espleiten, *exployt, v. t.* [O. Fr. *exploiter, espleiter, exploicter*; Fr. *exploiter*.] [*EX-PLŌIT, s.*]

*1. To perform, to achieve.

"Saruine and tell the western world
What we *exploited* have."
Warner: Albions England, bk. iii., c. 16.

2. To utilize; to make use of for one's own profit.

"To prevent the Egyptian nation from being *exploited* by a ring of European financiers."—*Pall Mall Gazette*.

ex-plōi-tā-tion, s. [Fr.] The act or process of utilizing or employing with success; utilization, utility, profit.

"Establishing ourselves in it by force, and pocketing the money that we can raise—this is what may be termed a policy of *exploitation*."—*London Daily Telegraph*.

**ex-plōi-tūre, s.* [Eng. *exploit; -ure.*] An exploit, a deed, an achievement.

**ex-plōr-āte, v. t.* [Lat. *exploratus*, pa. par. of *exploro*.] To explore, to search out, to try or find by searching.

ex-plōr-ā-tion, s. [Fr., from Lat. *exploratio*, from *exploratus*, pa. par. of *exploro*; Sp. *exploración*; Ital. *esplorazione*.] The act of exploring; close and careful search, examination, or investigation: as, the *exploration* of a country, the *exploration* of doctrines.

**ex-plōr-ā-tive, a.* [Eng. *explorat(e); -ive.*] Tending to exploration; exploratory, exploring.

**ex-plōr-ā-tōr, s.* [Lat.; Fr. *explorateur*; Sp. *explorador*.] An explorer; one who explores, searches, or investigates closely.

ex-plōr-ā-tōr-ŷ, a. [Lat. *exploratorius*, from *exploratus*, pa. par. of *exploro*.] Pertaining or serving to exploration; searching, examining, investigation.

"This your employment is, for the present, merely *exploratory* and provisional."—*Reliquiae Wottonianae*, p. 496.

ex-plōre, v. t. & i. [French *explorer*, from Lat. *exploro*=to examine, to investigate, to explore: *ex*=out, and *ploro*=to make to flow, to weep; Sp. *explorar*; Ital. *esplorare*.]

A. Transitive:

1. To search or seek into; to investigate, to inquire into.

"I came no spy,
With purpose to *explore* or to disturb
The secrets of your realm."
Milton: P. L., ii. 971.

*2. To search or seek for or after.

"*Explores* the lost, the wandering sheep directs."
Pope: Messiah, 51.

3. To travel or range over for the purpose of ascertaining the nature, physical features or extent of.

4. To search or try by any means; to examine into closely.

"Abdiel that sight endured not where he stood . . .
And thus his own undaunted heart *explores*."
Milton: P. L., vi. 113.

*5. To try the qualities or powers of.

"Hark! his hands the lyre *explore*."
Gray: Progress of Poesy.

B. Intrans. To make explorations; to search, to investigate.

¶ For the difference between *explore* and *to examine*, see **EXAMINE**.

**ex-plō-re-mēt, s.* [Eng. *explore; -ment*.] The act of exploring; exploration, search, investigation.

ex-plōr-ēr, s. [Eng. *explor(e); -er.*]

1. One who explores, searches, or investigates.

2. (Spec.): An apparatus by which the bottom of a body of water is examined, when not beyond a certain depth. In one form it is called a submarine telescope; in other forms it is a diving-bell, submarine boat, &c.

ex-plōr-īng, pr. par., a. & s. [*EXPLORE.*]

A. As pr. par.: (See the verb.)

B. As adj.: Designed for or employed in exploration; as, an *exploring* party.

C. As subst.: The same as *EXPLORATION* (q. v.).

ex-plō-sion, s. [Lat. *explosio*, from *explosus*, pa. par. of *explodo*=to explode; Fr. & Sp. *explosion*; Ital. *esplosione*.]

1. Lit.: A bursting or exploding with a loud report; a bursting or sudden expansion of any elastic fluid with force and a loud report; a sudden or loud discharge.

"In *explosion* vast
The thunder raises his tremendous voice."
Thomson: Summer, 1,130.

2. Fig.: A violent outburst of rage or passion.

"But now the *explosion* was terrible."—*Macaulay: Hist. Eng.*, ch. xiii.

¶ For the difference between *explosion* and *eruption*, see **ERUPTION**.

ex-plō-sive, a. & s. [Fr. *explosif*.]

A. As adjective:

1. Ord. Lang.: Bursting or driving with great force and noise; causing explosion: as, the *explosive* force of gunpowder, &c.

"These minerals constitute in the earth a kind of natural gunpowder, which takes fire; and by the assistance of its *explosive* power, renders the shock greater."—*Woodward*.

2. Philol.: Not continuous; forming a complete vocal stop; as, an *explosive* consonant.

B. As substantive:

1. Ord. Lang.: Anything liable to or causing explosions; an explosive agent. Such are gunpowder, dynamite, gun-cotton, nitro-glycerine, &c. (q. v.)

2. Philol.: A mute or non-continuous consonant, as *k, t, b.*

explosive-ball, s. One having a bursting-charge which is ignited on concussion or by a time-fuse. [*SHELL.*]

ex-plō-sive-lŷ, adv. [Eng. *explosive; -ly*.] In an explosive manner; by way of explosion.

**ex-pō-ll-ā-tion, s.* [Lat. *expoliatio, expoliatio*, from *expoliatus, expoliatus*, pa. par. of *expolio*, *expolio*=to plunder, to pillage: *ex*=out, fully, and *polio*=to plunder, to spoil.] The act of spoiling, robbing, or plundering; spoliation.

**ex-pō-lish, v. t.* [Pref. *ex* (intens.), and Eng. *polish* (q. v.); Lat. *expolio*.] To polish with extra care.

**ex-pō-ne, v. t.* [Lat. *expono*=to set out; to expose: *ex*=out, and *pono*=to place.]

1. To expose to danger.

2. To explain, to expound.

3. To characterize, to represent.

ex-pōn-ēt, s. [Lat. *exponens*, pr. par. of *expono*.]

I. Ordinary Language:

1. Literally:

(1) One who expounds or explains anything; an explainer, an expositor; as, the *exponent* of a doctrine or theory.

(2) In the same sense as II.

2. Fig.: One who stands or is set forward as the index or representative of a party, sect, &c.; one who assumes or undertakes a character.

"One or two characters were imperfectly rendered by the *exponents*."—*Athenæum*.

II. Alg.: A number written to the right of and above a quantity to show how many times it is to be taken as a factor; thus, in the expression a^3 , the number 3 is an exponent, and shows that a is to be taken three times as a factor. The expression a^3 is equivalent to $a \times a \times a$, and is read *a cube*. The exponent is properly the exponent of the power, but for simplicity it is often called the exponent of the quantity. The term is applied to any quantity written on the right of and above a quantity,

whether it be entire or fractional, negative or positive, constant or variable; thus, in the expression a^3 , $a^{\frac{1}{2}}$, a^{-3} , a^x , $a^{\sqrt{-1}}$, $a^{\frac{1}{3}}$, $a^{-\frac{1}{3}}$, x and v^{-1} are called exponents. The exponent of the ratio or proportion between two numbers or quantities is the quotient arising when the antecedent is divided by the consequent; thus, 8 is the exponent of the ratio of 40 to 5, since $\frac{40}{5}=8$.

ex-pō-nē-tial (tial as *shāl*), *a.* [English *exponent; -ial*; Fr. *exponentiel*.]

Alg.: Pertaining to an exponent or exponents; involving variable exponents; as, an *exponential* expression.

exponential-curve, s. (See **extract**.)

"*Exponential curves* are such as partake both of the nature of algebraic and transcendental ones. They partake of the former, because they consist of a finite number of terms, though those terms themselves are indeterminate; and they are in some measure transcendental, because they cannot be algebraically constructed."—*Harris*.

exponential-equation, s.

Alg.: An equation in which the unknown quantity enters an exponent; thus, $a^x=b$ is an exponential equation.

exponential-function, s.

Alg.: A function in which the variable enters an exponent; thus, in the equation $y=a^x$, y is an exponential function of x .

exponential-series, s.

Alg.: A series derived from the development of exponential equations or quantities.

ex-pōrt, v. t. & i. [Lat. *exporto*=to carry out; *ex*=out, and *porto*=to carry; Fr. *exporter*; Ital. *esportare*.]

A. Transitive:

*1. To take away.

"Glorious followers . . . taint business through want of secrecy, and *export* honor from a man, and make him a return in envy."—*Bacon: Essays; Of Followers*.

2. To carry or send abroad or to foreign countries, as wares in commerce; to furnish for exportation.

"These are the manufactures we *export*."
Dryden: Hind and Panther, ii. 564.

B. Intrans. To send out commodities to foreign countries in way of traffic.

"By *exporting* to a greater value than it imported."—*Smith: Wealth of Nations*, bk. iv., ch. i.

ex-pōrt, s. [*EXPORT, v.*]

1. The act of exporting; exportation.

2. That which is exported; a commodity exported in way of traffic to foreign countries.

3. The whole quantity or value of goods exported.

"The ordinary course of exchange being an indication of the ordinary state of debt and credit between two places, must likewise be an indication of the ordinary course of their *exports* and *imports*."—*Smith: Wealth of Nations*, bk. iv., ch. iii.

export-trade, s. Trade in connection with goods or produce sent abroad.

In order to preserve equality among the States, in their commercial relations, the Constitution of the United States provides that "no tax or duty shall be laid on articles exported from any State."—Art. I, § 9. And to prevent a pernicious interference with the commerce of the nation, the 10th section of the 1st article of the Constitution contains the following prohibition: "No State shall, without the consent of Congress, lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws; and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the treasury of the United States; and all such laws shall be subject to the revision and control of the Congress." (*Bouvier*.)

ex-pōrt-a-ble, a. [Eng. *export; -able*.] That which may or can be exported; fit for exportation.

ex-pōr-tā-tion, s. [Fr., from Lat. *exportatio*, from *exportatus*, pa. par. of *exporto*.]

*1. The act of carrying or taking out or away.

2. The act or practice of exporting goods for sale; the act of sending or conveying to foreign countries commodities in the way of traffic.

"To increase as much as possible the *exportation* of the produce of domestic industry."—*Smith: Wealth of Nations*, bk. iv., ch. i.

ex-pōrt-ēr, s. [Eng. *export; -er*.]

*1. One who carries or takes out or away.

2. One who exports commodities to foreign countries in way of traffic; in contradistinction to the importer, who brings them in from foreign countries.

"Money will be melted down or carried away in coin by the *exporter*, whether the pieces of each species be by the law bigger or less."—*Locke: Concerning the Value of Money*.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; plne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; trŷ, sŷrian. æ, œ = ē; ey = ā. qu = kw.

***ĕx-pōs'-al**, *s.* [Eng. *expos(e)*; -*al*.] The act of exposing; exposure.

"In a great measure owing to the common *exposal* of our wit."—*Advice to a Young Poet*.

ĕx-pō'se, *v. t.* [Fr. *exposer*=to lay out, to expose: *ex*=out, and *poser*=to set, to place.]

1. To set or cast out or away.

"Helpless and naked on a woman's knees,
To be exposed or reared as she may please."

Erior: Solomon, iii. 56, 57.

2. To set out or put forward as for sale; to exhibit.

3. To set in some public place to be seen by all.

"He was then carried to the market place, and exposed during some time as a malefactor."—*Macaulay: Hist. Eng.*, ch. xiii.

4. To lay bare or open; to leave uncovered; to disclose.

"As he lifted his arm, his cuirass rose, and exposed the lower part of his left side."—*Macaulay: Hist. Eng.*, ch. xiii.

5. To disclose; to lay open; to make public; to detect and make known: as, to expose a fraud.

6. To make liable or subject; to subject, to place or set in the way of; to lay open.

"They had been exposed to daily affronts, such as might well have roused the choler of the humblest plebeian."—*Macaulay: Hist. Eng.*, ch. xii.

7. To lay open, to present, as for examination; to submit.

"Those who seek truth only, freely *expose* their principles to the test, and are pleased to have them examined."—*Locke*.

8. To put in danger; to endanger.

"The *exposing* himself notoriously did change the fortune of the day, when his troops began to give ground."—*Clarendon*.

9. To put in the power of anything.

"He would not to the seas *expose* his wife."

Dryden: Ceyx and Alcione.

10. To hold up to censure or ridicule, by disclosing the faults of; to show the folly, ignorance, or wickedness of.

"Like Horace, you only *expose* the follies of men without arraigning their vices."—*Dryden: Juvenal (Dedic.)*.

ĕx-pō'se, *s.* [Fr., *pa. par.* of *exposer*.]

1. A formal declaration or recital by an individual or government of the causes and grounds of acts performed.

2. An exposure; specif., the exposure or disclosure of something which it is desired to keep secret.

ĕx-pō'sed, *pa. par. & a.* [EXPOSE, *v.*]

A. As *pa. par.*: (See the verb.)

B. As adjective:

1. Set out, exhibited, disclosed.

2. Open, unsheltered, unprotected, liable: as, an exposed situation.

***ĕx-pō's-ĕd-nĕss**, *s.* [Eng. *exposed*; -*ness*.] The quality or state of being exposed, unsheltered, or unprotected; liability, exposure.

"So that on the whole the *exposedness* to guilt or blame is left just as it was."—*Edwards: On the Will*, pt. iii., § 3.

ĕx-pō's-ĕr, *s.* [Eng. *expos(e)*; -*er*.]

1. *Ord. Lang.*: One who or that which exposes.

2. *Entom. (pl.)*: The name given by Edward Newman, F. L. S., F. Z. S., to the butterflies called by him *Detegentes*, which, when in the chrysalis state, are exposed to the full influence of the weather. [DIURNA.]

ĕx-pō'si-tion, *s.* [Fr., from Lat. *expositio*, from *expositus*, *pa. par.* of *expono*; Sp. *exposicion*; Ital. *esposizione*.]

*1. The act of exposing, laying open or bare, or displaying to public view.

*2. The situation in which anything is placed with respect to the sun or air; aspect, exposure.

"Water he chooses clear, light, without taste or smell; drawn from springs with an easterly *exposition*."—*Arbuthnot*.

3. An explanation or interpretation; the act of expounding or setting out the meaning or sense of an author or work.

"Your *exposition* on the holy text."

Shakesp.: Henry IV., Pt. II., iv. 2.

4. A work containing explanations or interpretations of an author or a work; a commentary.

5. An exhibition or show, as of the products and manufactures of a country.

"In recent years, the various great nations or their constituent communities of people have from time to time held exhibitions showing the progress made by themselves, and in many instances that made by their cooperating neighbors, who accepted invitations to participate in such exhibitions. The most prominent of the earlier exhibitions in this country was that held in the Crystal Palace, New

York City, which, after a successful career of several years, was burned. In 1876 a more ambitious effort was made at the Philadelphia Centennial. Among European nations the spirit of enterprise was particularly active, and several notable exhibitions have been held in London, Vienna, Paris, and other cities, especially remembered among these being the Parisian Exposition of 1889. But it remained for American enterprise, and particularly for the most enterprising of all the cities of this country, to inaugurate a movement that resulted in the gathering together and offering for the inspection of all the earth the Exposition *par excellence*, before the glories of which the achievements of all others pale into insignificance. The World's (Columbian) Exposition was designed to commemorate the discovery of the Western Hemisphere, and as that event had contributed to affect the fortunes of all the earth, the entire human race was invited to participate, and the invitation was almost unanimously accepted. This great pageant of the earth's progress began on the first day of May, 1893, and closed October 31st of the same year. The expenses of the entire enterprise footed up to more than twenty-six millions of dollars, and the number of people who attended during the six months of its continuance was more than twenty-seven and a half millions. On one occasion (Chicago day) there were within the grounds over 700,000 persons—the largest number ever in attendance anywhere for a similar purpose. During the progress of the Exposition various congresses were held to consider an almost infinite number of subjects, and to demonstrate the progress of man in all points other than those set forth by the wonderful material evidences to be seen in the great buildings of the several departments. These buildings were erected in Jackson Park, a large body of public land belonging to the city of Chicago, and it is doubtful if anywhere on earth a more fitting site could have been found. The fame of the "White City," as the Exposition buildings were collectively called, went abroad over all the earth, and the World's Columbian Exposition forms an epoch from which all the participating nations can reckon time.

ĕx-pō's-i-tive, *a.* [Lat. *exposit(us)*, *pa. par.* of *expono*, and Eng. adj. suff. -*ive*.] Serving to expose or explain; expository, explanatory, exegetical.

"The opinion of Durandus is to be rejected, as not *expositive* of the Creed's confession."—*Pearson: On the Creed*, art. 5.

ĕx-pō's-i-tōr, ***ĕx-pos-i-tour**, ***ĕx-pos-y-tour**, *s.* [Lat., from *expositus*, *pa. par.* of *expono*.] One who expounds or explains; an interpreter, an expounder, an explainer, a commentator.

"Predictions which by all *expositors* are understood of the Messiah."—*Horsley: Dissert. on the Prophecies*.

ĕx-pō's-i-tōr-ŷ, *a.* [Eng. *expositor*; -*y*.] Serving or tending to expose, explain, or illustrate; explanatory.

"This book may serve as a glossary or *expository* index to the poetical writers."—*Johnson: Preface to his Abridged Dictionary*.

ĕx pōst fāc-tō, *phr.* [Latin, lit.=from or by something done after.] Done after anything; from, or by, an after act.

***Ēx post facto law**: A law which operates by after enactment; one which has a retrospective effect; one which visits with criminal punishment that which was not a crime before its passing.

The Constitution of the United States, Art. I., sec. 10, forbids the States to pass any *ex post facto* law.

ĕx-pō's-tu-lāte, *v. t. & i.* [Lat. *expostulatus*, *pa. par.* of *expostulo*=to demand urgently: *ex*=out, fully, and *postulo*=to ask.]

***A. Transitive:**

1. To argue, to discuss, to reason about.

"I cannot now stay to *expostulate* the case with them."—*Ashton: Danger of Hypocrisy (1673)*, p. 17.

2. To call in question. (*Massinger: Maid of Honor*, iii. 1.)

***B. Intrans.**: To reason earnestly with any one, calling in question the propriety of his conduct, words, &c., and urging him to alter, desist, or make redress; to remonstrate. (Followed by *with*.)

"Impatient to the gods they raise their cry,
And thus *expostulate* with those on high."

Rome: Lucan, ii. 65, 66.

*Crabb thus discriminates between *expostulate* and *remonstrate*: "We *expostulate* in a tone of authority; we *remonstrate* in a tone of complaint. He who *expostulates* passes a censure, and claims to be heard; he who *remonstrates* presents his case and requests to be heard. *Expostulation* may often be the precursor of violence; *remonstrance* mostly rests on the force of reason and representation: he who admits of *expostulation* from an inferior undermines his own authority; he who is deaf to the *remonstrances* of his friends is far gone in folly: the *expostulation* is mostly on matters of personal interest; the *remonstrance* may as often be made on matters of propriety." (*Crabb: Eng. Synon.*)

ĕx-pō's-tu-lā-tion, *s.* [Lat. *expostulatio*, from *expostulatus*, *pa. par.* of *expostulo*.]

1. *Ord. Lang.*: The act of expostulating or remonstrating; a pressing or urging of reasons in opposition to any act or proposed act, on the ground of its impropriety; remonstrance.

"The Long Parliament had . . . in spite of the philosophical and eloquent *expostulation* of Milton, established and maintained a censorship."—*Macaulay: Hist. Eng.*, ch. ii.

2. *Rhet.*: An address containing an expostulation.

ĕx-pō's-tu-lā-tōr, *s.* [Eng. *expostulat(e)*; -*or*.] One who expostulates or remonstrates with another.

ĕx-pō's-tu-lā-tōr-ŷ, *a.* [Eng. *expostulat(e)*; -*ory*.] Containing or consisting of expostulations; of the nature of an expostulation.

"This fable is a kind of *expostulatory* debate between Bounty and Ingratitude."—*L'Estrange*.

ĕx-pō-sure (*s* as *zh*), *s.* [Eng. *expos(e)*; -*ure*.]

1. The act of exposing, abandoning, or casting out to chance.

2. The act of exposing, setting out, or laying open.

3. The act of exposing, laying open, or making liable or subject to anything.

4. The state of being exposed, laid open, or made liable or subject to anything: as danger, cold, or any inconvenience.

"Ajax sets Thersites

To weaken and discredit our exposure."

Shakesp.: Troilus and Cressida, i. 3.

*5. The situation in which any place lies with respect to the points of the compass; exposition; aspect.

"Set such plants as will not endure the house in pots, two or three inches lower than the surface of some bed, under a southern *exposure*."—*Evelyn*.

ĕx-pōund, ***ĕx-pone**, ***ĕx-poun-en**, ***ĕx-pown-en**, *v. t.* [O. Fr. *expondre*, from Lat. *expono*=to lay or set forth, to explain: *ex*=out, and *pono*=to place.] [EXPONE.]

*1. To lay open: to examine, to search.

"He *expounded* both his pockets."

Butler: Hudibras, pt. ii., c. iii.

2. To explain, to interpret, to comment on; to show the meaning of.

"His disciples came to him, and said, 'Expound to us the parable of the tares of the feld.'"
—*Wycliffe: Matthew* xii. 35.

*For the difference between *to expound* and *to explain*, see EXPLAIN.

ĕx-pōund-ĕr, *s.* [Eng. *expound*; -*er*.] One who expounds, explains, or interprets; an explainer, a commentator.

"But for all yt ye *expounders* do differ in the declaration of the metaphor."—*Calvine: Short Declaration upon Psalm lxxviii*.

***ĕx-poune**, ***ĕx-poun-en**, ***ĕx-pown-en**, *v. t.* [EXPOUND.]

ĕx-prĕss, *v. t.* [O. Fr. *exprimer*; Fr. *exprimer*; Sp. *expresar*; Port. *expressar*; Ital. *esprimere*, from Lat. *expressus*, *pa. par.* of *exprimo*.] [EXPRESS, *a.*]

1. *Lit.*: To press or squeeze out; to force out by squeezing or pressure.

"Among the watry juices of fruit are all the fruits out of which drink is expressed; as the grape and the apple."
—*Bacon*.

II. Figuratively:

1. To extort, to bring out, to elicit.

"Halters and racks cannot *express* from thee
More than thy deeds; 'tis only judgment waits thee."
—*Ben Jonson*.

2. To declare, to intimate, to indicate, to make known, to show plainly in words; to declare, to give utterance to.

"True wit is nature to advantage drest,
What oft was thought, but ne'er so well *expressed*."

Pope: Essay on Criticism, 297, 298.

3. To show, manifest, declare, indicate, or exhibit in any way.

"My song the workings of her heart *expressed*."

Wordsworth: On the Affections.

4. To exemplify; to exhibit, to manifest.

"The people asked him . . . in what manner they should *express* their repentance."
—*Sharp: Sermons*, vol. i., ser. 4.

5. To set down in writing; to compose, to indite.

"Her letters were so well *expressed* that they deserved to be well spelt."
—*Macaulay: Hist. Eng.*, ch. xi.

6. With the reflexive pronoun: To declare or speak one's opinions or feelings in words.

"Mr. Phillips did *express himself* with much indignation against me one evening."
—*Pope*.

*7. To mark, to set down, to stamp.

*8. To denote, to designate, to mark or point out.

"Moses and Aaron took these men *expressed* by their names."
—*Numbers* i. 17.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sīon = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

9. To declare: as, He *expressed* himself greatly pleased.

*10. To furnish, present, or offer a copy, representation, or resemblance of; to resemble, to be like.

"So kids and whelps their sires and dams express."
Dryden: *Virgil*; Ec. i. 32.

*11. To represent, to imitate; to form a likeness of.

"Each skillful artist shall express thy form
In animated gold."
Smith: *Phædra and Hippolitus*.

*12. To send by express: to dispatch by special messenger or means of conveyance.

*1. Crabb thus discriminates between *to express*, *to declare*, *to signify*, *to testify*, and *to utter*. "To *express* is the simple act of communication resulting from our circumstances as social agents; to *declare* is a specific and positive act that is called for by the occasion: the former may be done in private, the latter is always more or less public. An *expression* of one's feelings and sentiments to those whom we esteem is the supreme delight of social beings; the *declaration* of our opinions may be prudent or imprudent, according to circumstances. Words, looks, gestures, or movements serve to *express*; actions as well as words may sometimes *declare*. . . . To *express* and to *signify* are both said of words; but *express* has always regard to the agent, and the use which he makes of the words. *Signify* has respect to the things of which the words are made the usual signs: hence it is that a word may be made to *express* one thing, while it *signifies* another; and hence it is that many words, according to their ordinary *signification*, will not *express* what the speaker has in his mind, and wishes to communicate. To *signify* and *testify*, like the word *express*, are employed in general for any act of communication otherwise than by words; but *express* is used in a stronger sense than either of the former. The passions and strongest movements of the soul are *expressed*; the simple intentions or transitory feelings of the mind are *signified* or *testified*. *Utter*, from the preposition *out*, signifying to bring out, differs from *express* in this, that the latter respects the thing which is communicated, and the former the means of communication. We *express* from the heart; we *utter* with the lips: to *express* an uncharitable sentiment is a violation of Christian duty; to *utter* an unseemly word is a violation of good manners: those who say what they do not mean, *utter* but do not *express*; those who show by their looks what is passing in their hearts, *express* but do not *utter*. *Express* may be said of all sentient beings, and, by a figure of speech, even of those which have no sense; *signify* is said of rational agents only. The dog has the most *expressive* mode of showing his attachment and fidelity to his master; a *significant* look or smile may sometimes give rise to suspicion, and lead to the detection of guilt. To *signify* and *testify*, though closely allied in sense and application, have this difference, that to *signify* is simply to give a sign of what passes inwardly, to *testify* is to give that sign in the presence of others." (Crabb: *Eng. Synon.*)

EX-PRESS, ***EX-PRESSE**, *a., adv. & s.* [Fr. *expres*, from Lat. *expressus*=distinct, plain, *pa. par. of expimo*=to press out: *ex*=out, and *primo*=to press; Sp. *expreso*; Port. *expreso*; Ital. *espresso*.]

A. As adjective:

I. Ordinary Language:

1. Exactly like or resembling, as though pressed from a die.

"Of his presence many a sign
Still following thee, still compassing thee round
With goodness and paternal love; his face
Express." Milton: *P. L.*, xi. 351-4.

2. Expressed or declared in plain or direct language; plain, clear, explicit, not ambiguous.

"All the gazers on the skies,
Read not in fair heaven's story,
Expresser truth, or truer glory."
Ben Jonson: *Epigram* 40.

3. Traveling at a special or extraordinary speed: as, an *express* train.

II. Law: That which is not left to implication, but is plainly stated: as, an *express* condition, an *express* contract.

***B. As adverb:**

1. Expressly, plainly, directly.

"As yet is proudest *expresse* in his profecies."
E. Eng. Allit. Poems, ii. 1, 158.

2. Intended, said, or done for a particular purpose or end; specially.

"A messenger sent *express* from the other world."—Atterbury.

C. As substantive:

*1. An exact representation or copy; a clear or distinct declaration.

"The only remanent *express* of Christ's sacrifice on earth."—Jer. Taylor.

2. A messenger sent out on a special or particular errand or occasion; a courier.

"The king sent an *express* immediately to the marquis."—Clarendon.

3. A regular and systematic provision for the speedy transmission of persons, parcels, mails, &c.; specif., a vehicle or train which travels at a specially high rate, stopping only at the more important towns.

4. A message sent by an express.

"I am content my heart should be discovered to the world, without any of those popular capitulations which some men use in their speeches and *expresses*."—King Charles: *Elton Basilike*.

***EX-PRESS-AGE** (age as *ig*), *s.* [Eng. *express*; -age.] The charge for sending or carrying anything by express; the business of carrying expresses.

EX-PRESSED, *pa. par. or a.* [EXPRESS, *v.*]

A. As *pa. par.*: (See the verb.)

B. As adjective:

1. Squeezed or pressed out; uttered, declared, set down in writing.

2. Openly or plainly declared; not implied.

"Prayer is the soul's sincere desire,
Unuttered or expressed."
James Montgomery.

EXPRESSED-OILS, *s. pl.*

Chem.: Oils obtained from bodies only by subjecting the latter to pressure.

***EX-PRESS-ED-LY**, *adv.* [Eng. *expressed*; -ly.] Expressly.

***EX-PRESSE-LY**, *adv.* [EXPRESSLY.]

EX-PRESS-ÉR, *s.* [Eng. *express*; -er.] One who expresses.

EX-PRESS-IBLE, *a.* [Eng. *express*; -able.]

*1. That may or can be obtained or drawn out by squeezing or pressure.

2. That may or can be expressed, uttered, declared, or represented.

"There is a diphthong composed of our first and third vowels, and *expressible* therefore by them."—Sir W. Jones: *Orthography of Asiatic Words*.

EX-PRESS-ION, *s.* [Fr. from Lat. *expressio*=a pressing or squeezing out, from *expressus*, *pa. par. of expimo*=to squeeze out; Sp. *expresion*; Ital. *espressione*.]

I. Ordinary Language:

1. The act or process of squeezing, pressing, or forcing out by pressure.

"The juices of the leaves are obtained by *expression*: from this juice proceeds the taste."—Arbuthnot.

2. The act or process of extracting, extorting, or eliciting by pressure or force.

3. The act of expressing, uttering, declaring; declaration, utterance, representation.

"It was the extemporaneous *expression* of the new king's feelings."—Macaulay: *Hist. Eng.*, ch. iv.

4. Representation by words; style of language.

5. The words or language in which a thought is expressed; phraseology, phrase, mode of speech.

"But ill *expressions* sometimes give alloy
To noble thoughts." Buckingham.

6. Power or capability of being expressed in words.

"It looks amazing even beyond *expression*."—Dampier: *Voyages*, vol. ii., pt. iii., p. 71.

7. Cast of countenance or features, as *expressive* of character, feeling, or emotion; that transient change which takes place in the permanent form of a face or figure, while under the influence of various emotions.

II. Technically:

1. *Alg.*: The representative of a quantity written in algebraic language—that is, by the aid of symbols. Thus x^2+3y is the *expression* of the two quantities denoted by nine times x^2 and three times y . In general, any quantity or relation denoted by algebraic symbols is an algebraic *expression*. It is also called a *Function* (*q. v.*).

2. *Fine Arts*: The natural and lively representation or suggestion of any state or condition, as, in a picture, by the character of the landscape, the grouping of the figures, &c.; more specifically the conformation of the human features, as the eyes, mouth, &c.; that power or quality in a work of art which suggests an idea.

3. *Music*: The power or act of rendering music so as to make it the vehicle of deep and pure emotion; the spirit of music, as opposed to the mere mechanical production of sound. In rendering works of a high class, a true *expression* involves the merging of the artist's personality in an enthusiastic effort to carry out the highest extent, the fullest meaning of the composer. Hence the difficulty of giving a reading of classical works which shall satisfy those critics who have formed their own ideal of the author's conceptions. Compositions of a low order

often achieve great popularity owing to their clever treatment by practiced artists, who know how to create an artificial interest in such a work, which its internal merit does not warrant. (Stainer & Barrett.)

4. *Rhet.*: Elocution, diction; the particular manner or style of utterance appropriate to the subject and sentiment.

*1. For the difference between *expression* and *word*, see *WORD*.

EXPRESSION-STOP, *s.*

Music: In a cabinet organ the *expression-stop*, when drawn, closes the waste-valve of the bellows. Any alteration of the pressure of the feet on the wind-pedals causes therefore a corresponding alteration of the power of the tone produced. Hence, by a proper sympathy between the pressure of the foot and the force of sound required, the most delicate contrasts of light and shade can be obtained. (Stainer & Barrett.)

EX-PRES-SION-AL, *a.* [Eng. *expression*; -al.] Of or pertaining to *expression*; having the power of *expression*; specifically, in the fine arts, having the power or quality of embodying ideas or emotions in sensible form; representing clearly any conception or emotion.

"To enumerate and criticise all the verbal and *expressional* solecisms."—Hall: *Modern English*, p. 36.

EX-PRES-SION-LESS, *a.* [Eng. *expression*; -less.] Destitute or devoid of *expression*.

"Their depth of *expressionless* calm."—Miss Brontë: *Villette*, ch. xx.

EX-PRES-SIVE, *a.* [Fr. *expressif*; Sp. *expresivo*, Port. *expressivo*; Ital. *espressivo*.]

1. Serving to express, utter, declare, or represent. (Followed by *of*.)

"He was tall, lean, pale, with a haggard, eager look, *expressive* at once of lightness and of shrewdness."—Macaulay: *Hist. Eng.*, ch. xi.

2. Full of *expression*; vividly indicating any conception or emotion.

"Through her *expressive* eyes her soul distinctly spoke."—Littleton: *To Miss Lucy Fortescue*.

*3. *Expressible*. (Fuller: *Good Thoughts*, p. 181.)

*1. For the difference between *expressive* and *significant*, see *SIGNIFICANT*.

EX-PRES-SIVE-LY, *adv.* [Eng. *expressive*; -ly.] In an *expressive* manner; with *expression*, clearly, fully, plainly.

"Nature also is most *expressively* set forth with a biformed body."—Bacon: *On Learning*, bk. ii., ch. xiii. (Wats.)

EX-PRES-SIVE-NESS, *s.* [Eng. *expressive*; -ness.] The quality of being *expressive*; the power or quality of *expressing* or representing vividly to the senses; power or force of representation.

"The murrain at the end has all the *expressiveness* that words can give it."—Addison: *On Virgil's Georgics*.

EX-PRES-SÍ-VŌ, *es-pres-sí-vŏ*, *adv.* [Ital. *espressivo*.]

Music: With *expression*.

***EX-PRESS-LESS**, *a.* [Eng. *express*; -less.] Inexpressible.

EX-PRESS-LY, ***EX-PRESSE-LY**, ***EX-PRESSE-LYE**, *adv.* [Eng. *express*; -ly.] In an *express*, clear, or distinct manner; plainly, directly, pointedly; in direct terms.

"An alternative *expressly* proposed to them."—Burke: *Regicide Peace*.

***EX-PRESS-MENT**, ***EX-PRESSE-MENT**, *s.* [Eng. *express*; -ment.] The act of *expressing*; *expression*, declaration.

"When the tyme convenient of the *expressment* of them shall come."—Fabyan: *Works*, vol. i., ch. xxxvii.

EX-PRESS-NESS, ***EX-PRESS-NESS**, *s.* [Eng. *express*; -ness.] The quality or state of being *express*; plainness, directness.

"The terms of the question want somewhat of *expressness*."—Hammond: *Works*, i. 709.

***EX-PRES-SURE** (sure as *shür*), *s.* [Eng. *express*; -ure.]

1. The act or process of *expressing* or *squeezing* out; *expression*.

2. The act of orally *expressing* or uttering; utterance.

3. Facial *expression*, character.

4. Mark, impression.

"The *expressure* that it bears, green let it be."
Shakesp.: *Merry Wives of Windsor*, v. 5.

ex-prō-fēs-sō, *phr.* [Lat.] By profession; professedly.

***ex-prō-mis-sion**, *s.* [Lat. *expromissio*.]

Law: The act by which a creditor accepts a new debtor, who becomes bound instead of the old, the latter being released.

***ex-prōm-is-sōr**, *s.* [Latin, from *expromissus*, *pa. par.* of *expromitto*.]

Law: One who alone becomes bound for the debt of another for whom he becomes substitute, as distinguished from a surety who is bound together with the debtor.

ex-prō-pri-āte, *v. t.* [Lat. *ex=*out, fully, and *proprio=*to make one's own; *proprius=*one's own; Fr. *exproprier*.] To give up possession of or claim to; to make no longer one's own; to disengage or set free from appropriation.

ex-prō-pri-ā-tion, *s.* [Fr., from Lat. *expropriatus*, *pa. par.* of *expropriare*.]

1. The act of disengaging from appropriation; a ceasing to hold or claim as one's own; of giving up of a claim to the exclusive property in.

2. The act of dispossessing an owner of his property, either wholly or in part.

¶ *Expropriation of the Franciscans*:

Ch. Hist.: The renunciation of all property by the Franciscans, whether in their individual or in their corporate capacity. This was in conformity with the severe rule of their founder. In 1322 Pope John XXII. decided that the Church of Rome might hold property, which the Franciscans were permitted to use, a relaxation which gave great offense to the more rigid members of the Order. (*Mosheim: Ch. Hist.*, cent. xiii., pt. ii., ch. ii., § 31; cent. xiv., pt. ii., ch. ii., § 28, 29.)

***ex-pu-āte**, *a.* [Lat. *expuatus*, *pa. par.* of *expuare*: *ex=*out, and *puare=*to spit.] Spit out, ejected.

***ex-pugn** (*g* silent), ***ex-pugne**, *v. t.* [Lat. *expugno*: *ex=*out, fully, and *pugno=*to fight; O. Fr. *expugner*.] To conquer; to take by assault; to vanquish.

"The most effectual and powerful agents in conquering and expunging that cruel enemy."—*Evelyn: Discourse of Saltes*.

***ex-pūg-na-ble**, *a.* [Lat. *expugnabilis*, from *expugno*.] That may or can be conquered or vanquished.

***ex-pūg-nānce**, *s.* [Lat. *expugnans*, *pr. par.* of *expugno*.] Capture, taking by siege.

1. The act of expelling or driving out; a driving away by force.

"The perseverance in enmity shall be punished by the governors with expulsion."—*Coveley: Essays; College*.

2. The state of being expelled or driven out.

"To what end had the angel been sent to keep the entrance into Paradise, after Adam's expulsion, if the universe had been Paradise?"—*Ruleigh: History*.

ex-pūl-sive, *a.* [Fr. *expulsif*; Sp. & Port. *expulsivo*; Ital. *espulsivo*.] Having the power or property of expelling; tending or serving to expel.

"If the member be dependent, by raising of it up, and placing it equal with, or higher than the rest of the body, the influx may be restrained, and the part strengthened by expulsive bandages."—*Wiseman*.

ex-pūnc-tion, *s.* [Lat. *expunctio*, from *expunctus*, *pa. par.* of *expungo*.] The act of expunging, blotting out, or effacing; erasure; the state of being expunged or blotted out.

ex-pūn-ge, *v. t.* [Lat. *expungo=*to prick out; *ex=*out, and *pungo=*to prick.]

1. To blot or rub out, to efface, to erase.

"The reasons given in some of their protestations were thought to be so injurious to the house that they were by vote ordered to be expunged."—*Burnet: Hist. Own Time* (an. 1701).

2. To efface, to obliterate, to wipe out, to destroy. "In order to expunge the memory of their perfidy."—*Burke: Regicide Pease*, lett. 3.

¶ For the difference between to expunge and to blot out, see **BLOT**.

ex-pūr-gāte, *v. t.* [Lat. *expurgatus*, *pa. par.* of *expurgo*: *ex=*out, fully, and *purgo=*to make clean; *purus=*pure, clean, and *ago=*to make; Sp. & Port. *expurgar*; Ital. *espurgare*; Fr. *expurger*.]

*1. To purge, to clear, to make clean, to purify.
2. To clear or free from anything offensive, obscene, or noxious. (Used especially of books.)

"Juan was taught from out the best edition, Expurgated by learned men."

Byron: Don Juan, i. 44.

ex-pūr-gā-tion, *s.* [Lat. *expurgatio*, from *expurgatus*, *pa. par.* of *expurgo*; Fr. *expurgatio*; Sp. *expurgación*; Ital. *espurgazione*, *spurgazione*.]

1. The act of purging or cleansing; the state of being purged or cleansed.

2. Purification or clearing from anything offensive, noxious, or obscene.

"Wise men know, that arts and learning want expurgation; and if the course of truth be permitted to itself, it cannot escape many errors."—*Brownie: Vulgar Errors*. (To the Reader.)

ex-pūr-gā-tor, *s.* [Lat., from *expurgatus*, *pa. par.* of *expurgo*.] One who expurgates or purifies.

ex-pūr-gā-tōr-i-āl, *a.* [Eng. *expurgator*; *-iāl*.] That expurgates or purifies; expurgatory.

***ex-pūr-gā-tōr-i-ōus**, *a.* [Low Lat. *expurgatorius*.] Expurgatory, expurgating. [INDEX.]

ex-pūr-gā-tōr-ŷ, *a.* [Low Lat. *expurgatorius*; Fr. *expurgatoire*; Sp. *expurgatorio*; Ital. *espurgatorio*.] Serving to expurgate or purify from anything offensive or noxious.

"Speak of me as I am: nothing *extenuate*."
Shakesp.: Othello, v. 2.

B. *Intrans.*: To become more thin, lean, or slender; to become attenuated.

¶ Crabb thus discriminates between *extenuate* and *palliate*: "To *extenuate* is simply to lessen guilt without reference to the means; to *palliate* is to lessen it by means of art. To *extenuate* is rather the effect of circumstances; to *palliate* is the direct effort of an individual. Ignorance in the offender may serve as an *extenuation* of his guilt, although not of his offense; it is but a poor *palliation* of a man's guilt to say that his crimes have not been attended with the mischief which they were calculated to produce." (*Crabb: Eng. Synon.*)

**ĕx-tĕn-u-āte, a.* [Lat. *extenuatus*, pa. par. of *extenuo*=to make thin: *ex*=out, fully, and *tenuo*=to make thin; *tenuis*=thin.] Thin, lean, slender, attenuated.

êx-trân'-ê-ous, a. [Lat. *extraneus*, from *extra*=without, beyond; Sp. *extraño*; Port. *estranho*.] Foreign; not belonging to a thing; not intrinsic; external, not essential.

"Relation is not contained in the real existence of things, but something extraneous and superinduced."—*Locke.*

† Crabb thus discriminates between *extraneous*, *extrinsic*, and *foreign*: "The *extraneous* is that which forms no necessary or natural part of anything; the *extrinsic* is that which forms a part or has a connection, but only in an indirect form; it is not an inherent or component part: the *foreign* is that which forms no part whatever, and has no kind of connection. *Extraneous* and *extrinsic* have a general and abstract sense; but *foreign* has a particular signification; they always pass over to some object either expressed or understood: hence we say *extraneous* ideas, or *extrinsic* worth; but that a particular mode of acting is *foreign* to the general plan pursued. Anecdotes of private individuals would be *extraneous* matter in a general history; the respect and credit which men gain from their fellow-citizens by an adherence to rectitude is the *extrinsic* advantage of virtue; it is *foreign* to the purpose of one who is making an abridgment of a work to enter into details in any particular part." (*Crabb: Eng. Synon.*)

extraneous modulation, s.

Music: A modulation to an extreme or unrelated key. (*Stainer & Barrett.*)

êx-trân'-ê-ous-lý, adv. [Eng. *extraneous*; -ly.] In an extraneous manner.

êx-tra-or-din-a-rî-lý, adv. [Eng. *extraordinary*; -ly.] In an extraordinary manner or degree; in a manner or degree out of the ordinary or usual course; remarkably, uncommonly.

"An ordinance immediately and extraordinarily revealed from God."—*Warburton: Alliance between Church and State*, bk. i. (Notes.)

êx-tra-or-din-a-rî-nêss, *êx-tra-or-din-a-rî-nêss, s. [Eng. *extraordinary*; -ness.] The quality of being extraordinary, unusual, or out of the common; uncommonness, remarkableness.

"I choose some few either for the extraordinariness of their guilt, or the frequency of their practice."—*Government of the Tongue.*

êx-tra-or-din-a-rý, *êx-tra-or-din-a-rî, *êx-tra-or-din-a-rîe, a., adv. & s. [Lat. *extraordinarius*, from *extra*=beyond, and *ordinarius*=ordinary (q. v.); Span. & Port. *extraordinario*; Italian *extraordinario*; Fr. *extraordinaire*.]

A. As adjective:

1. Beyond or out of the ordinary or common course or order; unusual; not usual, customary, regular, or ordinary.

"The Indians worshiped rivers, fountains, rocks, or great stones, and all things which seemed to have something extraordinary in them."—*Stillingfleet.*

2. Of an uncommon or unusual degree or kind; remarkable, uncommon; rare, eminent; wonderful.

"The house was built of fair and strong stone, not affecting so much any extraordinary kind of fineness, as an honorable representing of a firm stateliness."—*Stidney.*

3. Special; sent or appointed for a special purpose or occasion; as, an ambassador *extraordinarius*.

*4. Foreign; mercenary.

"Soldiers of another country that come to serve for pay: *extraordinarie* soldiers."—*Nomenclator.*

*5. *As adv.*: Extraordinarily, uncommonly, remarkably.

"They have extraordinary good eyes, and will discern a sail at sea farther, and see any thing better, than we."—*Dampier: Voyages* (an. 1681).

*6. *As subst.*: Anything extraordinary, unusual, or out of the ordinary course, order, or kind.

"All the *extraordinaries* in the world, which fall not by no steady rules and causes, I style prodigies preternatural."—*J. Spencer: On Prodiges*, p. 163.

† Crabb thus discriminates between *extraordinary* and *remarkable*: "These words are epithets both opposed to the ordinary; and in that sense the *extraordinary* is that which in its own nature is remarkable: but things, however, may be *extraordinary* which are not *remarkable*, and the contrary. The *extraordinary* is that which is out of the ordinary course, but it does not always excite remark, and is not therefore *remarkable*, as when we speak of an *extraordinary* loan, an *extraordinary* measure of government: on the other hand, when the *extraordinary* conveys the idea of what deserves notice, it expresses much more than *remarkable*. There are but few *extraordinary* things, many things are *remarkable*: the *remarkable* is eminent; the *extraordinary* is supereminent; the *extraordinary* excites our astonishment; the *remarkable* only awakens our interest and attention. The *extraordinary* is unexpected; the *remarkable* is sometimes looked for." (*Crabb: Eng. Synon.*)

extraordinary ray, s.

Optics: One of the two rays resulting from double refraction.

êx-tra-pa-rô-chî-al, a. [Pref. *extra*, and Eng. *parochial* (q. v.).] Beyond, outside of or not reckoned within the limits of any parish.

"She was so expensive, that the income of three dukes was not enough to supply her extravagance."
—Arbuthnot.

- *8. A caprice.

"Blaismond was then in his extravagancies."
—Comteal *Hist. of Franoion* (1655).

ĕx-trāv-a-gant, *a. & s.* [Fr., from Low Latin *extravagans*, from *extra*=beyond, without, and *vagor*=to wander; Sp. *extravagante*; Ital. *extravagante*.]

- A. As adjective:*

- *1. Wandering out of due bounds or limits.

"The extravagant and erring spirit hies
To his confine."
Shakesp.: *Hamlet*, i. 1.

- *2. Wandering, digressing, circuitous.

"I greatly admired the extravagant turnings, insinuations, and growth of certain birch trees among the rocks."
—Evelyn: *Memoirs*.

3. Not keeping within due bounds; unrestrained, wild, irregular.

"There appears something nobly wild and extravagant in great natural geniuses."
—Addison.

4. Excessive, exceeding due bounds.

"They fined Dr. Mainwaring £1,000 for a foolish and extravagant sermon upon monarchy."
—J. S. Brewer: *English Studies*, p. 82.

5. Wasteful, profuse, prodigal, or lavish in expenditure.

"An extravagant man, who has nothing else to recommend him but a false generosity."
—Addison: *Spectator*.

6. Wasteful, excessive, profuse, prodigal; as, His expenditure is extravagant.

- *7. Wild or foolish in fancies or thoughts.

"Shall I be so extravagant to think
That happy judgments and composed spirits,
Will challenge me for taxing such as these?"
B. Jonson: *Every Man out of his Humor*. (Induct.)

B. As substantive:

- *I. Ordinary Language:

1. One who is bound by no general rules; one who goes to excess.

"The extravagants among us may be really distracted in the affairs of religion."
—Glanvill: *Essays*, iv.

2. One who is extravagant in his expenditure; a wasteful or prodigal person.

"The wild extravagant, whose thoughtless hand
With lavish, tasteless pride commits expense."
Doddsley: *Pain and Patience*.

II. *Ch. Hist.* (*pl. Extravagants*): A collection of opinions, decrees, &c., constituting part of the canon law, and published after the Clementines. Twenty of these, the first published, were called *Extravagantes Joannis*, having been sent forth in A. D. 1317, by Pope John XXII. To these have been added five books containing decrees by subsequent popes, called *Extravagantes Communes*. These brought down the collection to the year 1483. The reason why they were called Extravagants was that in place of being digested or arranged with the other papal constitutions, they were in a manner detached from these and stood apart.

"Twenty constitutions of Pope John XXII. are called the extravagants; for that they being written in no order or method, vagantur extra corpus collectionum canonum."
—Ayliffe: *Pargeron*.

Crabb thus discriminates between *extravagant*, *lavish*, *profuse*, and *prodigal*: "The idea of using immoderately is implied in all these terms, but *extravagant* is the most general in its meaning and application. The *extravagant* man spends his money without reason; the *prodigal* man spends it in excesses. . . . One may be *extravagant* with a small sum where it exceeds one's means; one cannot be *prodigal* without great property."

Extravagant and *prodigal* serve to designate habitual as well as particular actions; *lavish* and *profuse* are employed only of that which is particular: hence we say to be *lavish* of one's money, one's presents, and the like; to be *profuse* in one's entertainments, both of which may be modes of *extravagance*. An *extravagant* man, however, in the restricted sense, mostly spends upon himself to indulge his whims and idle fancies; but a man may be *lavish* and *profuse* upon others from a misguided generosity. In a moral use of these terms, a man is *extravagant* in his praises who exceeds either in measure or application; he is *prodigal* of his strength who consumes it by an excessive use; he is *lavish* of his compliments who deals them out so largely and promiscuously as to render them of no service; he is *profuse* in his acknowledgments who repeats them oftener, or delivers them in more words than are necessary. *Extravagant* and *profuse* are said only of individuals; *prodigal* and *lavish* may be said of many in a general sense." (Crabb: *Eng. Synon.*)

ĕx-trāv-a-gant-lŷ, *adv.* [Eng. *extravagant*; *-ly*.]

1. In an extravagant manner; wildly; without restraint.

"Mankind hath been more extravagantly mad in many tenets about religion than in anything else whatsoever."
—Glanvill: *Sermons*, No. 2.

2. In an unreasonable or excessive manner or degree; excessively; to excess; beyond due limits.

"The king was not well pleased with this act, as being extravagantly severe."
—Burnet: *Hist. Own Time*, an. 1670.

1. Last, farthest, utmost, outermost.

"The hairy fool
Stood on the extremest verge of the swift brook."
Shakesp.: *As You Like It*, ii. 1.

2. Last in point of time; as, the extreme moments of life.

"The extreme parts of time."
Shakesp.: *Love's Labor's Lost*, v. 2.

3. Last; beyond which there is no recursus.

"I go the extremest remedy to prove,
To drink oblivion, and to drench my love."
Dryden: *Theocritus*; *Idyll.* xxiii.

4. Pressing in the utmost degree; utmost, greatest, most violent.

"The extremest hardships and difficulties that ever happen to any man."
—Sharp: *Sermons*, vol. iii., ser. 15.

5. Most intense or severe; as, extreme cold.

- *6. Exceedingly strict, rigorous, or severe.

"If thou, Lord, wilt be extreme to mark what is done amiss, O Lord, who may abide it?"
—Psalm cxxx. 13. (Prayer Book.)

7. Carrying principles to the uttermost or to excess; holding the strongest views.

"There were laid on the table two manifestoes, one from the left, or extreme liberal party in the Synod."
—British Quarterly Review (1873), vol. lvii., p. 437.

8. Carried to excess or to extremes; ultra: as, He holds extreme opinions.

- II. Music:

1. Outside; as, extreme parts, the highest and lowest parts in part-music.

2. Expanded to its farthest limit: as, extreme intervals, intervals greater than major or normal: *e. g.*, c to g sharp an extreme fifth. Such intervals are called also augmented, superfluous, or sharp.

3. Not closely related; a modulation into an extreme key is one into any key other than its own relative minor, its dominant and sub-dominant, and their relative minors.

4. An old term for any key having more than three sharps or flats.

- *B. As adv.: Extremely.

"This last fifteen years have been extreme bad for the graziers."
—Warburton: *Life*. (Appendix.)

- C. As substantive:

- I. Ordinary Language:

1. The utmost, farthest, or outermost point or verge of anything; the extremity.

"About midway between the extremes of both promonories."
—Dampier: *Voyages*, vol. ii., pt. iii., p. 9.

2. The utmost point, stage, or degree that can be supposed or endured.

"And feel by turns the bitter change
Of fierce extremes, extremes by change more fierce."
Milton: *P. L.*, iii. 598, 599.

bōl, bōy; pōut, jōwl; cat, cĕll, chorus, ġhin, bench; go, ġem; thĭn, thĭs; sĭn, aġ; expect, Xenophon, exist. ph = f. -cian, -tĭan = shān. -tion, -sion = shŭn; -tion, -ģion = zhŭn. -tious, -cious, -sious = shŭs. -ble, -dle, &c. = bĕl, dĕl.

3. Excess; the farthest point or degree to which anything can be carried.

"Avoid extremes, and shun the faults of such
Who still are pleased a too little, or too much."
Pope: *Essay on Criticism*, 384, 385.

4. Extremity of suffering, misery, or distress.

"Tending to some relief of our extremes."
Milton: *P. L.*, x. 976.

II. Technically:

1. *Logic*: Either of the extreme terms of a syllogism; that is, either the predicate or subject.

"The syllogistical form only shows, that if the intermediate idea agree with those it is on both sides immediately applied to, then those two remote ones, or as they are called, *extremes*, do certainly agree."—Locke.

2. *Math.*: Either of the first and last terms of a proportion, the remaining two being the means. Also in a limited progression, either arithmetical or geometrical, the first and last terms are called *extremes*.

¶ For the difference between *extreme* and *extremity*, see EXTREMITY.

(1) *Extreme and mean ratio*:

Geom.: The ratio where a line is divided in such a manner that the greater segment is a mean proportional between the whole line and the lesser segment; that is, that the whole line is to the greater segment, as that greater segment is to the less.

2. *Chord of the extreme sixth*:

Music: A chord of modern growth, so called because the interval of an extreme or augmented sixth is contained in it, either directly or by inversion. (*Stainer & Barrett.*)

(3) *Extremes of an interval*:

Music: The two sounds most distinct from each other.

extreme unction, s.

1. *Ecclesiast.*: Application of sacred oil to the eyes, the ears, the nostrils, the mouth, the hands, and the feet of a person dangerously ill, the ceremony being designed to symbolize the application of the oil of grace to the soul.

2. *Ch. Hist.*: In James v. 14, 15, the following injunction is given: "Is any sick among you? let him call for the elders of the church; and let them pray over him, anointing him with oil in the name of the Lord: and the prayer of faith shall save the sick, and the Lord shall raise him up; and if he have committed sins, they shall be forgiven him." Here the anointing and prayer take place in connection with serious sickness, which they are designed to heal, while there is also a spiritual element, the forgiveness of sins. Though little is said on the subject in Church history, these directions were without doubt duly followed in the Christian Church generally in the early centuries, and they have been carried out quite recently, and still are so by the "Peculiar People" (q. v.). In the seventh century the rite became prominent, and was the subject of careful consideration in the twelfth, stress being laid on the spiritual rather than on the curative effects of the ceremony. In the Council of Florence, A. D. 1439 to 1442, under the auspices of Pope Eugenius IV., it was raised to the dignity of a sacrament, and the Council of Trent, between A. D. 1545 and 1563, confirmed the decision. It is now administered as an ordinance, preparing a dying person for the future state of existence rather than with a hope of removing his malady and "raising him up" for further service in this world. Extreme unction is firmly rooted in the Roman Church, but is almost universally disused among Protestants.

**Ex-trê-me-lêss*, a. [Eng. *extreme*; -less.] Having no extremes or extremities; boundless, limitless, infinite.

Ex-trê-me-ly, **ex-treame-ly*, adv. [Eng. *extreme*; -ly.] In an extreme degree; to the utmost point or degree; very greatly, exceedingly.

**Ex-trêm-ist*, s. [Eng. *extrem(e)*; -ist.] One who holds extreme doctrines or opinions; one who is extreme in his views.

Ex-trêm-i-tý, s. [Fr. *extrêmité*, from Lat. *extrêmitas*, from *extremus*; Sp. *extremidad*; Ital. *estremità*.]

I. Ordinary Language:

1. The utmost, farthest, or extreme point; the verge, the point or border which forms the termination of anything.

"Petrarca's villa is at the *extremity* farthest from Padua."—Eustace: *Classical Tour*, vol. i., ch. iv.

2. The utmost parts; the parts farthest removed from the middle.

"The extremity of pain often creates a coldness in the extremities, but such a sensation is very consistent with an inflammatory distemper."—Arbuthnot: *On Diet.*

3. The remotest or farthest parts or regions.

"They sent fleets out of the Red Sea to the *extremities* of Æthiopia, and imported quantities of precious goods."—Arbuthnot.

4. The points in the utmost degree of opposition, or at the utmost distance from each other.

"Made up of all the worst *extremities*
Of youth and age." Denham: *Sophy*, i. 1.

5. The highest or utmost degree; the extreme point, as of pain, suffering, heat, cold, &c.

"Whether the *extremity* of bodily pain were not the greatest evil that human nature was capable of suffering."—Ray: *On the Creation*. (Epist. Dedic.)

6. A condition or position of the greatest distress, difficulty, or danger.

"Even in that *extremity* the Mendip miners stood bravely to their arms, and sold their lives dearly."—Macaulay: *Hist. Eng.*, ch. v.

7. The worst or lowest degree or kind.

"The world is running mad after farce, the *extremity* of bad poetry; or rather the judgment that is fallen on dramatic writing."—Dryden: *Cleomenes*. (Pref.)

II. *Zool. (pl.)*: The limbs, i. e., the legs and arms, because they terminate the body in the particular direction in which they are extended.

¶ Crabb thus discriminates between *extremity* and *extreme*: "*Extremity* is used in the proper or the improper sense; *extreme* in the improper sense: we speak of the *extremity* of a line or an avenue, the *extremity* of a dress, but the *extreme* of the fashion. In the moral sense, *extremity* is applicable to the outward circumstances; *extreme* to the opinions and conduct of men: in matters of dispute between individuals it is a happy thing to guard against coming to *extremities*; it is the characteristic of volatile tempers to be always in *extremes*, either the *extreme* of joy or the *extreme* of sorrow." (Crabb: *Eng. Synon.*)

(2) For the difference between *extremity* and *end*, see END.

**Ex-tric-a-ble*, a. [Eng. *extric(ate)*; -able.] That may or can be extricated or disentangled.

"Germ above roundish-egged, very villous, scarce extricable from the calyx enclosing and grasping it."—Sir W. Jones: *Select Indian Plants*. (Richardson.)

**Ex-tri-câte*, v. t. [Lat. *extricatus*, pa. par. of *extrico*: *ex*=out, from, and *trico*=trifles, impediments.]

1. To disentangle, to set free, to disembarass or disengage from any perplexity, difficulty, complication, or embarrassment.

"He had brought himself into great distress, but had not the dexterity to *extricate* himself out of it."—Burnet: *Hist. Own Time*, vol. i., bk. 1.

*2. To solve, to clear from doubt or obscurity.

"This *extricath* that question which hath so much troubled the world."—Hale: *Origin of Mankind*, p. 40.

3. To set free, to discharge; to cause to be emitted or evolved; as, to *extricate* moisture from a substance.

¶ For the difference between to *extricate* and to *disengage*, see DISENGAGE.

**Ex-tri-câ-tion*, s. [EXTRICATE.]

1. The act or process of extricating, disentangling, or freeing from any difficulty, perplexity, or complication.

"She finds herself bound by the iron chain of circumstance, from which she can obtain no *extrication*."—W. E. Gladstone: *Juventus Mundi*, p. 507.

2. The act or process of sending out or emitting; as, the *extrication* of moisture from a substance.

**Ex-trin-sê-câte*, a. [Lat. *extrinsecus*.] Coming from without.

"Which nature doth not form of her own power,
But are *extrinsecate*, by marvellous wrought."
Wisdom of Dr. Doolittle (1600).

**Ex-trin-sic*, **ex-trin-sick*, **ex-trin-sique*, a. [Fr. *extrinèque*, from Lat. *extrinsecus*=from without, from *extrin*=extrin, adverbial form from *exter*=outward, exterior, and *secus*=by, beside. (*Skeat.*)] Outside, outward, external; proceeding from without; not contained in or inherent in a body; not essential; opposed to *intrinsic* (q. v.).

Law: A term applied to facts and matters deposited to on oath, but which, not being relevant to the point at issue, cannot be taken as part of the evidence.

¶ For the difference between *extrinsic* and *extraneous*, see EXTRANEOUS.

1. *Ord. Lang.*: A swelling or rising from any body; a protuberance, a knot, a prominence.

"And the dry land appeared." Not so precisely globous as before, but recompensed with an *extuberancy* of hills and mountains."—Gregory: *Notes on Passages in Scripture*, p. 114.

2. *Med.*: A swelling or rising of the flesh.

**Ex-tû-bër-ant*, a. [Lat. *extuberans*, pr. par. of *extubero*.] Swelled up; protuberant, rising up.

**Ex-tû-bër-âte*, v. i. [Lat. *extuberatus*, pa. par. of *extubero*.] To swell or rise up; to become protuberant.

**Ex-tû-bër-â-tion*, s. [Latin *extuberatus*, pa. par. of *extubero*.] The act of swelling up; a swelling, a protuberance.

**Ex-tû-mës-çence*, s. [Fr. from Lat. *extumes-cens*, pr. par. of *extumesco*: *ex*=out, and *tumesco*=to begin to swell; incept. of *tumeo*=to swell.] A swelling or rising.

**Ex-tû-gion*, s. [Lat. *extusus*, pa. par. of *extundo*: *ex*=out, and *tundo*=to beat.] The act of beating or driving away; expulsion. (*Bacon*.)

**Ex-û-bër-ance*, **ex-û-bër-an-çy*, s. [French *exuberance*, from Lat. *exuberantia*, from *exuberans*, pr. par. of *exubero*: Sp. *exuberancia*; Ital. *exuberanza*.] [EXUBERANT.] The quality or state of being exuberant; superfluous growth or abundance; excessive luxuriance or richness.

**Ex-û-bër-ant*, a. [Fr. from Lat. *exuberans*, pr. par. of *exubero*=to be luxuriant: *ex*=out, fully, and *ubero*=to be fruitful; *uber*=(a.) fruitful, (s.) an udder; Sp. *exuberante*; Ital. *exuberante*.]

1. Exceedingly fruitful; luxuriant in growth; characterized by abundance or richness.

2. Growing too luxuriantly or freely.

3. Abounding in the utmost degree; overflowing, exceeding.

¶ Crabb thus discriminates between *exuberant* and *luxuriant*: "These terms are both applied to vegetation in a flourishing state; but *exuberance* expresses the excess, and *luxuriance* the perfection: in a fertile soil where plants are left unrestrained to themselves there will be an *exuberance*; plants are to be seen in their *luxuriance* only in seasons that are favorable to them; in the moral application *exuberance* of intellect is often attended with a restless ambition . . . *luxuriance* of imagination is one of the greatest gifts which a poet can boast of." (Crabb: *Eng. Synon.*)

ēx vō-tō, *s. & a.* [Lat.]

A. As substantive:

Religions: An *ex voto* is something offered to some divinity either in gratitude for an exemplary favor, e. g., deliverance from imminent danger or miraculous restoration to health—or to obtain these benefits. The *ex votos* of the Romans were generally of the former kind. (Cf. *Hor.*, *Od.* i. v.; *ad Pison.*, 20, 21; *Juven.*, xii. 27, 28; *Pers.*, i. 89, 90.) In other forms of paganism *ex votos* were of both kinds, but ordinarily of the latter. Pictorial *ex votos* are common in Catholic churches on the Continent, and as they are not of a high order of art, it is usual, in the slang of the *ateliers*, to call a *danb* an *ex voto*. Like many other pagan customs this, with slight alteration, was adopted by the early Christians, not without protest on the part of the ecclesiastical authorities; but the custom still survives in the Roman Church, and *ex votos*—in the shape of pictures, models of diseased or wasted limbs, and even walking-sticks and crutches—may be seen suspended near the altars of the Virgin and the saints in many churches on the Continent, notably at Notre Dame des Victoires, in Paris, and at Lourdes, and in some few cases in England. The practice is based on the idea of the value of sacrifice, whether the offering of the model of the diseased limb be propitiatory before the cure or eucharistic after it has been performed. How widely this idea obtained in Germany, early in the present century, may be seen in Heine's *Walfahrt nach Kevelaar*, and in the note which relates the incident on which the poem was founded.

B. As adj.: Offered in order to obtain some miraculous benefit, or in thanksgiving for some benefit miraculously bestowed.

***ey** (1), *s.* [Egg.]

***ey** (pron. ī) (2), *s.* [Icel.: A. S. *ēg*.] [EYOT.] An island; it is still preserved as an element in the names of places, as in Sheppey, Alderney, Anglesea.

ey'-ā-lēt, *s.* A Turkish political division, under rule of a vizier.

ey'-ās (ey as ī), ***ey-ase**, *s. & a.* [Fr. *niais*=a nestling, from Low Lat. *nidas*, from Lat. *nidus*=a nest. The word is a mistake for a *nyas* or a *niais*, the *n* being mistaken for a part of the indefinite article; so, an apron for a *napron*.] [NIAS.]

A. As subst.: A young hawk just taken from the nest, and not able to prey for itself.

B. As adj.: Unfledged.

***eyas-musket**, *s.*

Shakespeare: *Tempest*, ii. 1.

* (15) Anything of supreme importance, power, beauty, or brilliance.

"Your daughter was the verie eye of the solemnitie."—Gough: *Strange Discovery* (1840).

II. Technically:

1. Anatomy:

(1) *Human*: The organ of sight. The principle on which the eye is constructed is that of the camera obscura, a dark chamber with a small opening for the admission of light, a quantity of black matter for the absorption of superabundant rays, and a nervous expansion on that wall which receives the rays of light. For protection it is deeply sunk in a fatty cushion within a bony cavity. The human eye is nearly globular, but the anterior part formed by the cornea (q. v.) is part of a smaller sphere, and slightly protuberant, in the proportion of 20 to 19. In the globe itself the chief constituents are: (1) The retina, the expansion of the optic nerve; (2) The transparent refracting media (the vitreous body or humor, the crystalline lens, the aqueous humor, the iris, and the pupil); (3) The tunica sclerotica, forming a dense tunic inclosing the first two. It is opaque except in front, where it becomes

Eye.

which the sclerotic does outside; it forms four-fifths of the whole globe, and its perfect fluidity allows for the expansion and contraction of the pupil and of the lens itself to or from the cornea.

The crystalline lens is divided into three equal parts by three lines, which radiate from the center to one-third of the surface; each one of these layers consists of hundreds of concentric layers, connected by finely serrated edges. This beautiful dove-tailing of fibers, which was first noticed by Sir David Brewster, is not peculiar to man; the best example is the lens of the common codfish.

(2) *Compar.*: The eyes of the Vertebrata are essentially like those of man. The eyes of insects are of two kinds: compound eyes and simple eyes or stemmata. The compound eyes are immovable. They consist of vastly numerous lenses; thus in the dragon-fly there are 12,000. Spiders have compound eyes; the higher members of the class have ocelli; many of the lower parasitic species are blind. The eyes of Crustacea vary greatly from a sessile median eye-spoke to two distinct eyes placed upon movable peduncles. The Centipedes have many simple eyes; in *Iulus* these are so near as almost to make two compound eyes. Of mollusks, the Cephalopoda have large eyes, the Gasteropoda possess them, as do the Pectens among the Conchifera, though in most other genera of the class, and in Brachiopoda, they seem wanting. The animals of lower organization are destitute of eyes. (Owen, &c.)

2. *Physiol.*: [ALBINO, BLINDNESS, DALTONISM, SIGHT.]

3. Architecture:

(1) The circular aperture in the top of a dome or cupola.

(2) The circle in the center of a volute scroll.

(3) A circular or oval window.

"A dark back-room with one eye in a corner."—Walpole: *Letter to Mann* (1748), i. 318.

4. *Milling*: The hole in a runner stone through which the grain passes to be ground.

5. Machinery:

(1) The hole through the center of a wheel, to be occupied by the axle, axis, or shaft.

(2) The eye of a crank; a hole bored to receive the shaft.

6. Nautical:

(1) A circular loop in a shroud or rope. A worked circle or grommet in a hank, rope, or sail.

(2) The loop of a block-strap.

(3) The hole in the shank of an anchor to receive the ring.

7. *Vehicles*: A metallic loop on the end of a trace, to go over the pin or hook on the end of a single-tree. A cock-eye.

8. Horticulture:

(1) *Gen.*: The bud of a plant.

(2) *Spec.*: A bud concealed in a depression; example, the potato.

(3) The central part or the central markings of a flower.

9. Bot.

(1) *To see with half an eye*: To see with the greatest ease.

(2) *To black one's eye*: To defeat in some project or intention, to outdo, or circumvent.

(3) *To bear one's eye*: To cheat or deceive one.

"To blere the wives eigne."—*Political Songs*, p. 333.

(4) *To change eyes*: To fall in love with each other.

"At the first sight they have changed eyes."

Shakespeare: *Tempest*, i. 2.

(5) *To set the eyes on*: To have sight of.

(6) *To find favor in the eyes of*: To be graciously received and treated by.

(7) *At eye*: At a glance.

"As may appear daily at eye."—Abp. Parker to Queen Elizabeth.

(8) *Eyes of a ship, Eyes of her*:

Naut.: The foremost part of the bows of a vessel, on which formerly eyes used to be painted. The term is also applied to the hawse-holes.

(9) Flemish eye:

Naut.: The strands of a rope's end opened and divided into two parts and laid over each other, marled, parceled, and sewed together, and so forming an eye.

(10) Lashing eye:

Naut.: An eye spliced on the end or ends of a rope for a lashing, being rove through to set it tight.

(11) *Indian eye*: The genus *Dianthus*.

(12) *The eye of Greece*: An epithet of Athens, attributed by Newton, in his note in *loc.* to Demosthenes, but the passage has never been identified.

B. *As adj.*: Pertaining to, used for, or intended for the eyes.

*eye-biting, a. Fascinating, enchanting.

*eye-bree, s. An eyebrow.

eye-brightening, a. Clearing or brightening the sight.

"As it had been some eye-brightening electuary of knowledge and foresight."—Milton: *Reason of Church Government*, bk. ii.

eye-cup, s. A cup for washing the eyeball. Its lip is held firmly against the open lid, and the eye-wash dashed against the ball, or forced against it by compressing the reservoir.

eye-doctor, s. An oculist.

eye-drop, s. A tear.

eye-extirpator, s.

Surg.: A surgical instrument for removing the eye.

eye-flap, s. A blinker on a horse's bridle.

eye-glance, s. A rapid glance or look.

eye-glass, s.

I. Ordinary Language:

1. *Lit.*: A pair of glasses to aid the sight; usually worn by clasping the bridge of the nose. The watchmaker's or engraver's eye-glass has a horn frame and a single lens. Its flaring edge is retained within the ocular orbit by the muscular contraction of the eyelids.

*2. *Fig.*: The retina of the eye; the sight.

"Ha! not you seen Camillo?"

But that's past doubt you have; or your eye-glass

Is thicker than a cuckold's horn."

Shakespeare: *Winter's Tale*, i. 2.

II. Technically:

1. *Optics*: The glass nearest to the eye of those forming the combination eye-piece of a telescope or microscope. The other glass, nearer to the object-glass, is called the Field-glass. [NEGATIVE EYE-PIECE.]

2. *Surg.*: An eye-cup.

*eye-glutting, a. Glutting or satisfying the sight.

eye-headed, a. Having an eye or aperture in the head.

eye-headed Bolt: A form of bolt having an eye at the head end. It is intended for securing together two objects at right angles—as a gland to a stuffing-box, &c.

eye-hole, s. A circular opening in a bar, &c., to receive a pin, hook, rope, or ring.

eye-lens, s.

Optics: That one of the four lenses in an eye-piece which is nearest to the eye; the eye-piece.

eye-offending, a. Offending or displeasing to the sight; hurting the eyes.

eye-piece, s.

Optics: An eye-piece, or power, as it is sometimes called, is the lens or combination of lenses used in microscopes or telescopes to examine the aerial image formed at the focus of the object-glass.

Eye-piece Micrometer: A graduated slip of glass introduced through slits in the eye-piece tube, so as to occupy the center of the field.

eye-pit, *eghe-putte, *eye-putte, s. The socket of the eye.

eye-pleasing, a. Pleasing to the sight.

eye-reach, s. The range of vision.

*eye-retorting, a. Looking back or backward.

eye-rim, s. A circular single eye-glass, adapted to be held to its place by the contraction of the orbital muscles.

eye-saint, s. An object dear to, or worshipped with, the eye.

eye-salve, *eghe-sallfe, s. Salve or ointment for the eyes.

eye (pron. i), *v. t. & i.* [EYE, *s.*]

A. Transitive:

1. To fix the eye upon; to watch or gaze at; to observe narrowly or anxiously.

"From heavy dreams fair Helen rose

And eyed the dawning red."

Scott: William and Helen, i.

*2. To envy.

"Saul eyed David."—1 Samuel xviii. 9.

*B. Intrans.: To assume an appearance; to appear.

"Since my becoming kill me when they do not

Eye well to you."

Shakesp.: Antony and Cleopatra, i. 3.

eye-ball (eye as i), *s.* [Eng. eye, and ball.] The ball, apple, or globe of the eye.

*eye-béam (eye as i), *s.* [Eng. eye, and beam.] A beam or glance of the eye.

*eye-bite (eye as i), *v. t.* [Eng. eye, and bite.] To fascinate. (*P. Holland, in Trench's English Past and Present, lect. ii.*)

eye-bólt (eye as i), *s.* [Eng. eye, and bolt.]

Naut.: A bolt having an eye or loop at one end for the reception of a ring, hook, or rope, as may be required. The insertion of a closed ring into the eye converts it into a ring-bolt.

eye-bright (pron. i-brit), *s.* [Eng. eye, and bright.] Coles says that goldfinches, linnets, &c., use it to repair their own and their young ones' sight, and that it is a cure for bloodshot eyes, which the purple and yellow spots on the flowers resemble. (See also the def.)

Botany:

1. The genus *Euphrasia*. The common Eyebright is *Euphrasia officinalis*. It is a small annual plant, with the lower leaves crenate, and the upper cut. The flower white or lilac, and purple-veined, with the upper lip yellow. It is very common in the temperate parts of Europe, Asia, and America. It flowers from May to September. It is slightly bitter and aromatic. It has been used with success in catarrhal inflammations of the eye, in cough, hoarseness, earache, or headache following on catarrhs.

2. *Veronica chamaedrys*.

3. *Bartsia odontites*. (*Lyte; Britten & Holland.*)

eye-brów (eye as i), *ee-bree, *eghe-brewé, *s.* [Icel. *auga-brún*; A. S. *edganbrég*; O. H. Ger. *oughbráwa*.]

I. *Ord. Lang.*: The same as II. (q. v.)

II. *Anat.*: The projecting front of the forehead above the eyes. The eyebrows are placed over the eyes as eaves to prevent the sweat disturbing the sight.

In the early part of the seventeenth century, artificial eyebrows were used as a means of enhancing feminine beauty. Prior, in an epigram, refers to the practice thus:

"The slattern had left, in the hurry and haste,

Her lady's complexion and eyebrows at Calais."

These artificial eyebrows appear to have been made of mouse-skin, for in another poem on the same subject he says:

"If we don't catch a mouse to-day,

Alas! no eyebrows for to-morrow."

eyed (pron. id), *eyde, *a.* [Eng. ey(e); -ed.]

1. *Ord. Lang.*: Having eyes; used generally in composition: as, a blue-eyed boy, dull-eyed, bright-eyed, &c.

"They were both so watchfull and well eyde."

Spenser: F. Q., iv. iii. 7.

2. *Her.*: A term employed when speaking of the spots in a peacock's tail.

*eye-ful, *a.* Attracting the eye; remarkable.

eyed hawkmoth, *s.*

Entom.: A hawkmoth, *Smerinthus ocellatus*. It is the *Sphinx ocellata* of Linnaeus. The anterior wings, which are every acute at the apex, are gray, tinged with rose-color, and variegated, clouded and streaked with brown, the hinder wings are carmine red, with gray margins and an ocellum of blue, brown or black. The caterpillar is of a fine green above, and below is tinged with blue; there are on it, too, white, rose-color, and yellow markings. It feeds on willows, the poplars, the apple, &c. Found in Epping Forest, and some other parts of England; very rare in Scotland. (*Duncan, in Jardine's Nat. Libr.*)

eye-lash (eye as i), *s.* [Eng. eye, and lash.]

I. *Ordinary Language:*

1. The row or line of hair edging the eyelid.

"That suited well the forehead high,

The eyelash dark, and downcast eye."

Scott: Rokeby, iv. 5.

2. A single hair from the edge of the eyelid.

II. *Anat.*: The eyelashes are strong, short, curved hairs, arranged in two or more rows along the margin of the lids, at the line of union between the skin and the conjunctiva. The upper lashes are more numerous and longer than the lower, and are curved in an opposite direction.

*eye-löss (eye as i), *a.* [Eng. eye; -less.] Wanting or destitute of eyes; deprived of sight.

"Ask for this great deliverer now, and find him

Eyeless in Gaza, at the mill with slaves."

Milton: Samson Agonistes, 41.

eye-lét (eye as i), *oi-lét, *s.* [Fr. *œillet*=a little eye, dimin. of *œil*=an eye.] A short metallic tube whose ends are flanged over against the surfaces of the object in which the said tube is inserted. It is used as a bushing for holes to prevent the tearing of the perforated edge of the fabric or material by lacing.

eyelet-hole, *s.* The orifice of an eyelet.

eyelet-punch, *s.* A device used at the desk for attaching papers together by eyeletting. It has usually a hollow punch for making a hole, and a die-punch to upset the flange of the eyelet.

eye-lét-cér (eye as i), *s.* [Eng. eyelet; -cer=er (q. v.).] A stabbing instrument of the work-table, to pierce eyelet-holes; a stiletto.

*eye-ll-ád (eye as i), *ey-li-ad, *i-li-ad, *a-li-ad, *s.* [Fr. *œillette*.] An ogle, a wanton look.

"Who even now gave me good eyes too, examined my parts with most judicious eyelids."

Shakesp.: Merry Wives of Windsor, i. 3.

eye-lyde (eye as i), *ee-led, *ehe-lid, *eye-lede, *eye-lydde, *s.* [Eng. eye, and lid.]

1. *Ord. Lang.*: The same as 2 (q. v.).

2. *Anat. (pl.)*: Movable portions of integument adapted for covering and protecting the eye. They are composed of different tissues arranged in successive strata one beneath the other. (1) The skin; (2) the orbicularis palpebrarum; (3) the expanded tendon of the levator palpebræ, in the upper lid only; (4) the tarsal cartilage; (5) meibomian glands; (6) the mucous membrane. These are separated by areolar tissue, which is entirely devoid of fat.

*ey-en (ey as i), *s. pl.* [EYE (1), *s.*]

tey-ér (ey as i), *s.* [Eng. eye (1), *v.*; -er.] One who eyes or watches another narrowly.

eyerie (pron. i-ér-i or ir-i), *s.* [EYRIE.]

eye-seeds (eye as i), *s. pl.* [Eng. eye, and seeds.] So called because the seeds, if blown into the eye, are said to remove bits of dust, &c.]

Bot.: Probably *Salvia verbenaca*. (*Britten & Holland.*)

eye-shót (eye as i), *s.* [Eng. eye and shot.] As far as the eye can reach; sight, range of vision, view.

eye-sight (pron. i-sit), *eh-sithe, *eh-sithe, *eih-sithe, *eye-siht, *eye-syht, *s.* [Eng. eye, and sight.]

1. The sight of the eye; view; observation.

"Flit ut of min ehsithe."—St. Marherete, p. 17.

2. The power or sense of seeing; sight.

"Thou schalt not lese thy eyesht."

Poems on Freemasonry, 676.

eye-sóre (eye as i), *s.* [English eye, and sore.] Something displeasing or offensive to the eye or sight.

"And is the like conclusion of psalms become now, at length, an eyesore, or a galling to the ears that hear it?"—Hooker.

eye-stóne (eye as i), *s.* [Eng. eye, and stone.] A "stone" for clearing foreign bodies out of the eye. Specif., a small calcareous stone, as an operculum of a univalve shell in one of the family Turbinae. This being put into the inner corner of the eye, works its way out, it is said, at the exterior one, bringing with it any foreign body lying in its path.

eye-wink (eye as i), *s.* [Eng. eye, and wink.] A wink of the eye given as a hint or token.

*eyne (pron. in), *s. pl.* [EYE, *s.*]

êy-ôt, ait, *ey-et, *eyght, *s.* [Mid. Eng. *ei*=an island, and dimin. suff. -et.] An ait; a little island in a stream, overgrown with willows. [EX (2), *s.*]

ey-rant, ay-rant, *a.* [EYRY.]

Her.: A term applied to eagles and other birds in their nests.

eyre (1) (pron. är), *eire, *s.* [O. Fr. *eire, erre, oire*=a journey, a way, from Latin *iter*.]

1. A journey or circuit.

2. A court of itinerant justices.

"The eire of justize wende aboute in the londe."

Robert of Gloucester, p. 517.

*eyre (2), *s.* [AIR, *s.*]

ey-rie (ey as i), ey-ry, *ey-er-ie, *eir-ie, *aerie, aery, arie, alery, ayery (pron. è-ri, à-ri, i-ri, ä-ër-i), *s.* [In Fr. *aerie, aery, eyrie*; Teut. *ey*=an egg; A. S. *æg*=an egg; Low Lat. *cria*=a nest of goshawks.]

1. A collection of eggs, an eggery, a nest.

"One atery with proportion ne'er discloses

The eagle and the wren."

Massinger: Maid of Honor, i. 2.

2. The occupant of a nest; a young brood.

"Your atery buildeth in our atery's nest."

Shakesp.: Richard III., i. 3.

*eyrish, *a.* [Mid. Eng. *ayre*=air; Eng. adj. suff. -ish.] Aerial.

eyry (pron. è-ri), *s.* [EYRIE.]

ê-zë-kî-el, *s.* [Eclat. Lat. *Ezekiel*; Gr. *Iezekiël*, from Heb. *Yechhezekel*, from *Yechhazeq El*=God will strengthen, or *chhozeg ha El*=the strength of God.]

1. *Scripture Hist.*: One of the Greater Prophets to whom is attributed the book described under 2.

2. *Scripture Canon*: One of the larger prophetic books of the Old Testament, the visions and utterances which it contains being expressly attributed in the work itself, to Ezekiel. He was the son of Buzi, a priest (1. 3). He was carried captive, in the time of Jehoiachin, B. C. 585, about eleven years before the destruction of Jerusalem under Zedekiah (xl. 1). His prophecies are mostly in chronological order, those excepted which are launched against foreign nations. There is no direct quotation from Ezekiel in the New Testament, but there are a few allusions to his utterances, especially in the book of Revelations, which, in the concluding portion, distinctly looks back to the temple arrangements prophesied in the last chapter of Ezekiel. The genuineness and authenticity of the prophecies of Ezekiel have not been seriously impugned either in the Jewish or Christian Church, and nearly universal suffrage has been given in favor of their canonicity.

Ê-z-râ, *s.* [Heb. *Ezra*=help. In Gr. *Esdras*.]

1. *Scripture Hist.*:

(1) A man of Judah (1 Chron. iv. 17).

(2) The head of one of the twenty-two courses of priests who returned from captivity along with Zerubbabel, the civil governor of the exiles, and Joshua their high priest (Neh. xii. 2). He is called in Neh. xii. 2, Azariah.

(3) The celebrated priest, whose patriotic and priestly services to the Jews are detailed in the book bearing his name. [2.]

2. *Scripture Canon*: An Old Testament book, arranged in the English Bible between 2 Chronicles and Nehemiah, but in the Hebrew Scriptures after Daniel, before Nehemiah, 1 and 2 Chronicles following next and completing the whole volume. The name Ezra is by most persons held to denote that he was the author of the book, as is undoubtedly the import of Matthew, Mark, Luke, and John, when placed at the head of the New Testament Gospels. It may, however, signify no more than that the doings of Ezra are the main theme of the book, which is certainly the case. The illustrious personage so designated was a priest descended from Phinehas, the son of Aaron. His immediate father was Seraiah. He was a ready scribe in the law of Moses, to which he was passionately attached (vii. 6). An exile in Persia, he so commended himself to the then reigning monarch (apparently Artaxerxes Longimanus), as to obtain from him a commission to lead the second expedition of Jews back to their own land. The enterprise began about B. C. 458. Subsequently he seems to have returned to the king, but we find him again at Jerusalem, this time, however, exercising only priestly functions under Nehemiah. Where he died is uncertain. The period

bôil, bôy; pòut, jôwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tton, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

which the book spans is about eighty years, viz., from the first of Cyrus (B. C. 536) to the eighth of Artaxerxes Longimanus (B. C. 456); the reigns embraced are those of Cyrus, Cambyses, Smerdis, Darius Hystaspis, Xerxes, and part of that of Artaxerxes. The language is Hebrew in its declining state, with occasional Aramaean passages (iv. 8, v. to vi. 18). Ezra first appears upon the scene in chap. vii. 1, being spoken of in the third person, which at viii. 15 changes to the first. The traditional view in which Havernick, Keil, and various other biblical scholars concur, is that the book, excepting quoted Aramaean passages, is from one pen, and that one Ezra's. Other investigators admit a plurality of authors. Lord Arthur Hervey attributes chap. i. to Daniel, chaps. ii. and iii. 1 to Nehemiah (cf. Neh. vii.), iii. 2 and iv., v., vi., to Haggai, the rest of the book to Ezra. Dr. Samuel Davidson, also admitting a variety of authors (Ezra included), considers the final editor to have been the author of the books of Chronicles. Both Jews and Christians consider the work part of the Scripture Canon.

THE sixth letter, and fourth consonant of the English language, is a labial or labio-dental articulation, being formed by the emission of breath between the lower lip and the upper teeth. It is a surd spirant, the corresponding sonant spirant being *v* (q. v.). In Anglo-Saxon it was pronounced as *v*, and it still retains that sound in *of*. It takes its form

from the Greek digamma, which also had a very similar power. An original *f* has frequently become *v* in English words, as *vat* for *fat*, *vetch* for *fetch*, *vizen* for *fiacen*. It has also disappeared from many words, as in *head* (O. Eng. *heved*), *lord* (O. Eng. *hlaford*), *hawk* (O. Eng. *hafoc*), *woman* (O. Eng. *wifman*), &c.; and in others it has been dropped, as *hasty* (O. Fr. *hastif*), *jolly* (O. Eng. *jotif*), *testy* (O. Eng. *testif*), &c. An *f* sound is now used in *trough*, *enough*, and *yough*, to represent an original guttural. In the plurals of nouns of pure English origin ending in *-f* or *-lf*, with a preceding long vowel (except *oo*), the *f* is changed into *v*. In Romance words the *f* remains unchanged, and the plural is formed by adding *s*. Words ending in *-ff* or *-rf*, also form the plural by the addition of *s*. In Russian the letter *f* is uniformly used to represent the sound of *th*, as *Feodor* for *Theodore*.

F as an initial is used:

1. In *Music*: For *Forté*, to mark that a passage is to be played or sung loudly; *ff*=*fortissimo*, when it is to be played or sung very loudly.
2. In *Distinctions*: For *Fellow*, as *F. R. S.*=*Fellow of the Royal Society*.
3. In *Med.*: For the Latin word *Fiat*=let it be made.

F as a symbol is used:

1. In *numerals*: For 40, and with a dash over it (*F*)=40,000.
2. In *Chem.*: For the non-metallic element Fluorine, and for Fluoride—*e. g.*, *FF*=Fluorine, *KF*=Potassium Fluoride. Sometimes *F* written with a stroke above is used for *Formic Acid*.
3. In *Music*:
 - (1) For the note called parhypate in the Greater Perfect system of the Greeks. The letter-name of Frite in the upper tetrachord.
 - (2) The first note of the Eolian mode, or church scale, commencing four notes above the hypochord.
 - (3) The note called Fa ut in the hexachord system. The fourth note in the scale of C. [NOTATION.]
 - (4) The key-note of the major scale requiring one flat in the signature; and the key-note of the minor scale related to A flat.
 - (5) For the note Fah in the Tonic Sol-fa notation.
4. In *Biblical Criticism*: *F* for the Codex Augiensis; *f* (small letter), for the Cursive MSS.
5. *Physics*: For Fahrenheit, denoting that the degree of temperature is according to that scale, as 60° F.

¶ All boiling points, melting points, &c., in the chemical articles of this Dictionary are expressed in degrees of the Centigrade scale, unless *F* is added, to show that the temperature is expressed in degrees Fahrenheit.

6. In *Old Law*: *F* was branded on felons, who were admitted to benefit of clergy.

7. In *Heraldry*: For the Fesse-point (q. v.).

fā-ble, *fā-bull, s. & a. [Fr. *fable*, from Lat. *fabula*=a narrative, from *for*=to speak; Sp. & Port. *fabula*; Ital. *favola*.]

A. As substantive:

*1. A story, a narrative, a tale.

*2. A feigned tale or story intended to enforce some moral precept; a fictitious narrative conveying some useful information, or intended for entertainment, or an allegory.

¶ Jotham's fable of the trees (Judges ix., about 1209 B. C.) is the oldest extant, and as beautiful as any made since. Nathan's fable of the poor man (2 Sam. xii., about 1034 B. C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnū Sharma, or Pīlpay, are the most beautiful, if not the most ancient in the world. Professor Max Müller traced La Fontaine's fable of the Milk-maid to a very early Sanscrit collection. Æsop's fables, supposed to have been written about 565 or 620 B. C., were verified by Babrius, a Greek poet, about 130 B. C., and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of Æsop. The fables of Phædrus in elegant Latin-iambics (about A. D. 8), of La Fontaine (1700) and of Gay (1727) are justly celebrated.

*3. The plot of a poem or story; the connected series of events in a dramatic or epic poem.

"Fable may be divided into the probable, the allegorical, and the marvellous."—Pope: *Homer's Iliad*. (Pref.)

4. A foolish story.

"But refuse profane and old wives' fables."—1 Tim. iv. 7.

5. A falsehood, an untruth, a fiction, a fabrication.

"And eke what folke there with him were
Without fable I wol discrive."

Romaunt of the Rose.

*6. A by-word; a subject of gossip or talk.

"We grew
The fable of the city where we dwelt."

Tennyson: *Gardener's Daughter*.

***B. As adj.**: Pertaining to or of the nature of a fable; fictitious, fabulous.

"Thou fable Styx! whose livid streams are roll'd
Through dreary coasts, which I tho' blind behold."

Pope: *Thebais of Statius*, 83, 84.

¶ Crabb thus discriminates between *fable, tale, novel, and romance*: "Different species of composition are expressed by the above words: the *fable* is allegorical; its actions are natural, but its agents are imaginary; the *tale* is fictitious, but not imaginary; both the agents and actions are drawn from the passing scenes of life. Gods and goddesses, animals and men, trees, vegetables, and inanimate objects in general, may be made the agents of a *fable*; but of a *tale*, properly speaking, only men or supernatural spirits can be the agents: of the former description are the celebrated *fables* of Æsop; and of the latter the *tales* of Marmontel, the *tales* of the Genii, &c. *Fables* are written for instruction: *tales* principally for amusement; *fables* consist mostly of only one incident or action, from which a moral can be drawn: *tales* always of many, which excite an interest for an individual. The *tale* when compared with the *novel* is a simple kind of fiction; it consists of but few persons in the drama; while the *novel*, on the contrary, admits of every possible variety in characters. The *tale* is told without much art or contrivance to keep the reader in suspense, without any depth of plot or importance in the catastrophe; the *novel* affords the greatest scope for exciting an interest by the rapid succession of events, the involvements of interests, and the unraveling of its plot. If the *novel* awakens the attention, the *romance* rivets the whole mind and engages the affections; it presents nothing but what is extraordinary and calculated to fill the imagination." (Crabb: *Eng. Synon.*)

***fable-maker, *fable-monger, s.** An inventor or writer of fables.

"To distinguish the true and proper allegorists from the *fable-mongers* or mythics."—Waterland: *Works*, vi. 16.

***fā-ble, *fā-blen, v. i. & t.** [O. Fr. *fabler*, from Lat. *fabulari*, from *fabula*.]

A. Intransitive:

1. To talk, to discourse, to converse.

"While the talkiden or *fableden*."—Wycliffe: *Luke* xxiv. 15.

2. To compose or write fables or fiction.

"To loftier rapture thou canst wake the thought
Than all the *fabling* poets' boasted powers."

Warton: *Pleasures of Melancholy*.

3. To tell falsehoods or untruths.

"He *fables* not: I hear the enemy."

Shakespeare: *Henry VI.*, Pt. I., iv. 2.

B. Trans.: To feign, to invent, to tell or say falsely.

"It being *fabled* that when the words were spoken aloud, some shepherds had repeated them over their bread, which was thereupon presently turned into flesh."

Burnet: *Hist. Reformation* (an. 1548).

***fā-blēr, s.** [O. Fr. *fabler, fableor*.] A writer or spreader of fables; one who deals in fiction; a fable-monger.

fāb-li-au (au as ō) (*pl. fāb-li-aux, aux as ō*), *s.* [Fr., dim. of *fable*.] A metrical tale composed by the Trouvères or poets of the Langue d'Oïl in the twelfth or thirteenth centuries. The *fabliaux* were sarcastic or witty references to passing events, and were intended for recitation.

fā-blīng, pr. par. a. & s. [FABLE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act or practice of making fables.

2. A fable.

***fabor, s.** [FAUBOURG.] A suburb.

fāb-ric, *fāb-rick, s. [Fr. *fabrique*, from Lat. *fabrica*=(1) a workshop; (2) a fabric, from *faber* (genit. *fabri*)=a workman, from a root *fa*=to set, to place (seen in *fa-cio*=to make); Sp. & Port. *fabrica*.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

I. Literally:

1. That which is fabricated.
(1) The frame or structure of a building; a building or structure; an edifice.

"Here's a fabric that implies eternity."

Middleton: *Mayor of Queenborough*, iv. 2.

(2) A cloth made by weaving or felting. The various names are derived from material, texture, fineness, mode of weaving, color, mode of coloring, surface-finishing, place of manufacture, &c.

2. The structure, manufacture, workmanship, or texture of anything; the manner in which the several parts of any material or structure are united.

*3. The act or purpose of fabricating or constructing; construction.

"This was received . . . for the fabric of the churches of the poor."—*Milman*. (Ogilvie.)

II. Fig.: Any system of united parts, as of the world, society, the Church, &c.

"With what a crash, heard and felt to the farthest ends of the world, would the whole vast fabric of society have fallen."—*Macaulay*: *Hist. Eng.*, ch. x.

¶ For the difference between *fabric* and *edifice*, see *EDIFICE*.

***fabric-lands**, *s. pl.* Lands given in former times for the rebuilding, repair, or maintenance of churches.

***fāb-ric**, ***fāb-rick**, *v. t.* [Fr. *fabriquer*; Sp. *fabricar*; Ital. *fabricare*.] To frame, to construct, to put together, to build, to fashion.

The quality of being fabulous, feigned, or fictitious.

"His fabulousness and credulity are justly blamed."—*Johnson*: *Journey to the Western Islands*.

***fā-būr-den**, ***fā-būr-then**, *s. & a.* [A corruption of Fr. *faux-bourdon*=(lit.) false burden. {BUR-DEN.} The word *bourdon* or *bordone* in its primary sense is (in French and Italian) a pilgrim's staff; hence, from similarity in form, the bass-pipe, or drone of the bag-pipe, and thence again simply a deep bass note. As the earliest *Falsi bordoni* of which we have specimens are principally formed, except at their cadences, by successions of fourths and sixths below the plain-song melody, such an accompanying bass, to those who had hitherto been accustomed to use the low octaves of the organum, and to consider thirds and sixths inadmissible in the harmonized accompaniment of the Gregorian Chant, would sound false; and this application of the meaning of the *falso* and *faux* seems a more rational derivation than that sometimes given from *falsetto* and *falsette*, as implying the combination of the high voices with the low in *Falso Bordone* harmony. (Grove.)] [FAUX-BOURDON.]

A. As substantive:

I. Literally:

Music: One of the early systems of harmonizing a given portion of plain-song or a canto fermo. It was afterward used as a term for a sort of harmony consisting of thirds and sixths added to a canto fermo. When counterpoint had superseded both diaphony and descent, the term *faburden* was still applied to a certain species of counterpoint, sometimes, but not always, note against note. (Stainer & Barrett.)

"Descanti, prycksonge, counterpoint, and *faburden*."—*Bale*: *Image*, pt. iii.

2. Fig.: A monotonous refrain.

"To sing, as it were, the *faburden* of a song."—*P. Holland*: *Plutarch*, p. 735.

B. As adj.: High-sounding.

"Mirabile, miraculoso, stupendo, and such *faburthen* words."—*Lodge*: *Wit's Misery* (1596).

fāc, *s.* [A contraction for *fac-simile* (q. v.).]

fā-ga-de, *s.* [Fr., from Ital. *facciata*=the front of a building, from *faccia*=the face; Lat. *facies*.] [FACE.]

Arch.: The face or front of any considerable building to a street, court, garden, or other place.

fāge, ***faas**, *s.* [Fr. *face*, from Lat. *facies*; Ital. *faccia*; O. Sp. *faz*.]

I. Ordinary Language:

1. Literally:

(1) The front part of the head of any animal, more especially of man, consisting of the forehead, eyes, nose, cheeks, mouth, and chin; the visage, the countenance.

"He is like unto a man beholding his natural face in a glass."—*James* i. 23.

(2) The aspect or expression of the visage, as indicative of pleasure or displeasure, favor or anger.

"The Lord make his face to shine upon thee."—*Numbers* vi. 25.

(3) That part of anything which presents itself to the view; as—

(a) The surface of anything.

"Thou hast driven me from the face of the earth."—*Genesis* iv. 14.

(b) The front, the forepart of anything.

"Also the breadth of the face of the house and of the separate place toward the east an hundred cubits."—*Ezekiel* xli. 14.

(c) A plane surface of a solid; one of the sides bounding a solid; thus a cube has six faces, an octahedron eight.

(4) The dial of a watch, clock, compass-card, &c.

(5) The edge of a cutting instrument.

2. Figuratively:

(1) Presence, sight.

"In the very face of the Court."—*Strype*: *Memorials*; *Q. Mary* (an. 1554).

†(2) Appearance, look, aspect.

"Nor heaven, nor sea, their former face retained."

Waller: *Instructions to a Painter*, 118.

* (3) The visible state of things.

"This would produce a new face of things in Europe."—*Addison*.

* (4) An outward show, appearance, or cover; surface show.

"They took him to set a face upon their own malignant designs."—*Milton*.

(5) A distortion of the features; as, He made a wry face.

"Why, what's the matter, Doll? You are making faces now."—*Dickens*: *Barnaby Rudge*, ch. iv.

(6) Confidence, boldness; effrontery, assurance.

"A chaplain of Cortes had the face to assert that in one engagement against the Indians St. James had appeared on a gray horse at the head of the Castilian adventurers."—*Macaulay*: *Battle of the Lake Regillus*. (Introd.)

* (7) Favor.

"Seek ye my face."—*Psalms* xxvii. 8.

II. Technically:

1. Architecture:

(1) The front or broadside of a building; the facade; the front of a wall.

(2) The surface of a stone exposed on the face of a wall. The sides are flanks, the upper and lower surfaces are beds.

***fâ-çin-ôr-ôus, *fa-cyn-er-ous, *fa-cin-er-us, a.** [Lat. *facinorosus*, from *facinus* (gen. *facinoris*) = a wicked deed, from *facio*=to do; Ital. & Sp. *facinoroso*.] Exceedingly wicked; wicked to an excess; atrocious.

***fâ-çin-ôr-ôus-nêss, s.** [English *facinorous*; -ness.] Extreme or atrocious wickedness.

***fa-cond, *fa-conde, *fa-cound, *fa-cunde, a. & s.** [O. Fr. *facond* (a.), *faconde* (s.), from Lat. *facundus*=eloquent, *facundia*=eloquence.]

A. *As adj.*: Eloquent.

B. *As subst.*: Eloquence.

fâç-sim-i-lê, s. [A contr. of Lat. *factum simile*=made like; *factum*, neut. sing. of *factus*, *pa. par.* of *facio*=to make, and *simile*, neut. sing. of *similis*=like.]

1. *Of material things*: An exact copy, counterpart, or likeness of an original, as of handwriting, a drawing, &c., in all its peculiarities, proportions, and characteristics.

"He took a paper, and made what they call a *facsimile* of the marks and distances of those small specks."—*North: Life of Lord Guilford*, i. 109.

†2. *Of immaterial things*: An exact copy or counterpart; as of habits, disposition, conduct, &c.

"His course can be the *facsimile* of no prior one, but is by its nature original."—*Carlyle: Sartor Resartus*, bk. I., ch. iv.

fâç-sim-i-lê, v. t. [FACSIMILE, s.] To make a facsimile or exact copy or counterpart of; to copy exactly; to reproduce in facsimile.

"The contour of draperies, such as those of the apostles *facsimiled* here."—*Athenæum*.

fâç-sim-i-lîst, s. [Eng. *facsimil*(e); -ist.] One who produces facsimiles or exact copies.

"Mr. — asks for the name and address of a *facsimilist*."—*Notes and Queries*.

fâçt, s. [Lat. *factum*=a thing done, neut. sing. of *factus*, *pa. par.* of *facio*=to do; Port. *facto*, *feito*; Ital. *fatto*; Fr. *fait*; Old Fr. *faict*. *Fact* is thus a doublet of *feat* (q. v.).]

I. Ordinary Language:

*1. A thing done, a deed, an act, a performance, a feat.

"The bloody *fact* Will be avenged." *Milton: P. L.*, xi. 457.

2. Reality; not supposition; truth.

"If this were true in *fact*, I do not see any color for such a conclusion."—*Addison: On the War*.

3. An assertion or statement of a thing done or existing; something asserted to have happened or existed, whether true or false; as, His book abounds with false *facts*.

II. *Law*: An act done; an incident which has happened; an event. Thus the jury determine on matters of *fact*, the judge decides on points of law in a case.

"This [writ of error] is a species of appeal which raises no question of *fact*."—*Macaulay: Hist. Eng.*, ch. xiv.

bôil, bôÿ; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shûn; -tion, -sion = zhûn. -tious, -cious, -sious = shûs. -ble, -dle, &c. = bel, del

† (1) *In fact*: In reality, in truth.

(2) *Matter of fact*:

(a) *As a subst.*: Something which has really happened.

(b) *Used as an adj.*: Prosaic; not imaginative.

† For the difference between *fact* and *circumstance*, see *CIRCUMSTANCE*.

făc-tion, *s.* & *a.* [Fr., from Lat. *factio*=a doing, a faction, from *factus*, *pa. par.* of *facio*=to do.]

A. As substantive:

I. Ordinary Language:

1. A clan, a society, a party.

"In Gallia . . . almost in every house are factions, and the heads of these factions are they whom they esteem worthyest to have it."—*Goldyng: Cesar*, fo. 153.

2. A party in a state combined or acting in union in opposition to the established government; usually applied to a minority, but it may be applied to a majority; a party combined to promote their own views or purposes even at the expense of order and the public good.

"There were indeed factions, but factions which sprang merely from personal pretensions and animosities."—*Macaulay: Hist. Eng.*, ch. xxii.

3. Tumult, discord, dissension.

"Far from her sight flew Faction, Strife, and Pride, And Envy did but look on her and died."

Dryden: Epistle to Duchess of York, 18.

II. Roman Antiq.: The name given to the contesting parties in the chariot-races in the Roman circus. They took their origin from the fact that the drivers of the chariots were distinguished from each other by the color of their garments, one being always dressed in white, another in green, the third in red, and the fourth in blue. Hence, from the keenness with which different persons espoused the cause of the different colors arose the four parties or factions, named respectively, *Factio Albata*, *Factio Prasina*, *Factio Russata*, and *Factio Veneta*. When Domitian introduced the practice of making six chariots start in each race, two new factions were necessarily added, the gold and the purple, but these were soon dropped, or, at least, not steadily maintained.

"The factions of the Blues and Greens were promised as many chariot-races as could be run between the morning and night."—*Elton: Origins of English History*, p. 308.

B. As adj.: (See the compounds.)

† Crabb thus discriminates between *faction* and *party*: "The term *party* has of itself nothing odious, that of *faction* is always so; any man, without distinction of rank, may have a *party* either at court or in the army, in the city or in literature, without being himself immediately implicated in raising it; but *factions* are always the result of active efforts: one may have a *party* for one's merits from the number and ardor of one's friends; but a *faction* is raised by busy and turbulent spirits for their own purposes." (*Crabb: Eng. Synon.*)

faction-fight, *s.* A quarrel between factions or parties of different religious or politics.

faction-mad, *s.* Furious with party spirit.

"The multitude made *faction-mad*,
Disturb good order." *Cowper: Task*, iii. 673.

făc-tion-ăire, *s.* [Fr. *fractionnaire*.] A soldier detailed for any service; a sentinel, a sentry.

făc-tion-al, *a.* [Eng. *faction*; -al.] Of or pertaining to a faction; connected with a faction.

făc-tion-a-ry, *s.* [Fr. *fractionnaire*.] One of a faction; a party man.

făc-tion-ër, *s.* [Eng. *faction*; -er.] One of a faction.

făc-tion-ist, *s.* [Eng. *faction*; -ist.] One who promotes or supports factions.

făc-tious, *a.* [Fr. *factieux*, from Lat. *factiosus*, from *factio*; Sp. *factioso*; Ital. *fazioso*.]

*1. Active, urgent, persevering.

"Be *factious* for redress of all these griefs."
Shakesp.: Julius Cesar, i. 3.

2. Given to faction or party; opposed to the established government; seditious, turbulent.

"Peace, *factious* monster! born to vex the state
With wrangling talent, formed for foul debate."
Pope: Homer's Iliad, ii. 306.

3. Pertaining to or proceeding from faction; characterized by opposition to government; seditious.

"He perpetually complains of the endless talking, the *factious* squabbling, the inconstancy, &c."—*Macaulay: Hist. Eng.*, ch. xx.

† Crabb thus discriminates between *factious* and *seditious*: "*Faction* is an epithet to characterize the tempers of men; *seditious* characterizes their conduct; the *factious* man attempts to raise himself into importance, he aims at authority, and seeks to interfere in the measures of government; the *seditious* man attempts to excite others, and to

provoke their resistance to established authority: the first wants to be a law-giver; the second does not hesitate to be a law-breaker: the first wants to direct the state; the second to overturn it. *Faction* is mostly applied to individuals; *seditious* is employed for bodies of men; hence we speak of a *factious* nobleman, a *seditious* multitude." (*Crabb: Eng. Synon.*)

făc-tious-ly, *adv.* [Eng. *factious*; -ly.] In a factious or seditious manner; by means of faction.

făc-tious-ness, *s.* [Eng. *factious*; -ness.] The quality of being factious or seditious; inclination to the forming of parties or factions; disposition to clamor and disturbance of public order.

făc-ti-tious, *a.* [Lat. *factitius*, from *factus*, *pa. par.* of *facio*; Sp. *facticio*; Fr. *factice*.]

1. Made by art; artificial, not natural.

"Glass becomes the chiefest ground for artificial and *factitious* gems."—*Broune: Vulgar Errors*, bk. i, ch. i.

2. Sham, false, not genuine.

"I have added sweets, from which our *factitious* wines are made."—*Burke: Regicide Peace*, let. 3.

3. Not natural, artificial, conventional.

"He acquires a *factitious* propensity, he forms an incorrigible habit of desultory reading."—*De Quincey*.

făc-ti-tious-ly, *adv.* [Eng. *factitious*; -ly.] In a factitious, artificial, or non-natural manner.

făc-ti-tious-ness, *s.* [Eng. *factitious*; -ness.] The quality of being factitious or artificial.

***făc-t-ist**, *s.* [Eng. *fact*; -ist.] One that makes poems, one that writes plays. (*Ash.*)

făc-ti-tive, *a.* [Lat. *factus*, *pa. par.* of *facio*.]

1. *Ord. Lang.*: Causing; tending to make or cause.

2. *Gram.*: Applied to that relation existing between two words, as between an active verb and its object, when the action expressed by the verb causes a new state or condition in the object; as *The people made him a king*.

***făc-tive**, *a.* [Lat. *fact(us)*; Eng. suff. -ive.] Making; having power to make.

"You are creator-like, *factive*, and not destructive."—*Bacon: To the King*, let. 276.

făc-tō, *adv.* [Lat. abl. sing. of *factum*=a deed, a fact.]

1. In fact, in deed, by the act or fact.

2. [DE FACTO.]

făc-tōr, ***făc-tour**, *s.* [Lat. *factor*, from *factus*, *pa. par.* of *facio*; Sp. & Port. *factor*; Fr. *facteur*; Ital. *fattore*.]

I. Ordinary Language:

*1. A doer; one who does any act.

2. An agent or substitute.

"Chief factors for the gods."

Shakesp.: Antony and Cleopatra, ii. 6.

3. A steward or agent of an estate, appointed by a landowner to manage the estate, collect rents, let lands, &c.

"The *factor* had received ready money to the amount of about £300."—*Sir W. Scott: Rob Roy* (Intro.).

4. One of several circumstances, elements, or influences on which a certain result depends, and which have to be taken into consideration in estimating the probable results of any events.

II. Technically:

1. *Alg.*: A name given to any quantity which constitutes an algebraical expression: thus $a + b$ and $a - b$ are factors of the product $a^2 - b^2$.

2. *Arith.*: The multiplier and the multiplicand; the numbers from the multiplication of which the product results.

3. *Comm.*: An agent employed by merchants to transact business for them in other places, as to buy and sell, to negotiate bills of exchange, &c. He differs from a broker in that he is intrusted with the possession and disposal of the goods, property, &c., and may buy and sell in his own name.

"The house in Leadenhall Street is nothing more than a change for their agents, *factors*, and deputies to meet in."—*Burke: Mr. Fox's East India Bill*.

***Prime factors**:

Math.: The prime factors of a quantity are those factors which cannot be exactly divided by any other quantity except 1. Every number has 1 for a prime factor. The prime factors of 12 are 1, 2, 2, and 3.

† Crabb thus discriminates between *factor* and *agent*: "Though both these terms, according to their origin, imply a maker or doer, yet, at present, they have a distinct signification: the word *factor* is used in a limited, and the word *agent* in a general sense: the *factor* only buys and sells on the account of others; the *agent* transacts every sort of business in general: merchants and manufacturers employ *factors* abroad to dispose of goods transmitted; lawyers are frequently employed as *agents* in the receipt and payment of money, the transfer of estates, and various other pecuniary concerns." (*Crabb: Eng. Synon.*)

făc-tōr, *v. t. & i.* [FACTOR, *s.*]

A. Transitive:

1. *Ord. Lang.*: To act as factor for, or look after property, lands, business, &c.; to manage.

2. *Math.*: To resolve a quantity into its factors: thus, $a^2 - b^2$ is factored into $a + b$ and $a - b$.

"No definite rules can be laid down for factoring algebraic expressions."—*Davies and Peck: Mathematical Dictionary*.

***B. Intrans.**: To trade or act as agents.

"Sent your prayers and good works to *factor* there for you."—*Ward: Sermons*, p. 173.

făc-tōr-age (age as *ig*), *s.* [Fr.] The allowance or commission given to a factor by his employer.

"He put £1,000 into Dudley's hands to trade for him to the end that his brother, Montague, might have the benefit of the *factorage*."—*North: Life of Lord Guilford*, ii. 292.

***făc-tōr-ess**, ***făc-tress**, *s.* [Eng. *factor*; -ess.] A female factor.

"Your *factress* hath been tampering for my misery."

Ford: The Fancies, Chaste and Noble, iii. 2.

făc-tōr-i-al, *a.* & *s.* [Eng. *factory*; -al.]

A. As adjective:

1. *Ord. Lang.*: Of or pertaining to a factory.

2. *Math.*: Of or pertaining to a factor or factors.

B. As substantive (pl.):

Math.: A term proposed by Arbogast for the different cases of the symbol x^n .

factorial expression, *s.*

Math.: A term sometimes applied to an expression of which the factors are in arithmetical progression: as, $(x+1)$, $(x+2)$, $(x+3)$, $(x+4)$, &c.

făc-tōr-ize, *v. t.* [Eng. *factor*; -ize.]

Law: To warn not to pay or give up goods; to attach the effects of a debtor in the hands of a third person.

făc-tōr-ship, *s.* [Eng. *factor*, and *ship*.]

1. The business or occupation of a factor; agency.

2. A factory.

făc-tōr-y, ***făc-tor-ie**, *s.* [Eng. *factor*; -y; Fr. *factorerie*; Sp. *factoria*; Ital. *fattoria*.]

1. A house or district inhabited by traders in a distant country, where they banded together under certain regulations for mutual assistance against the encroachments of the local governments, &c.

"In the suburb of the Company's *factory* at Madras."—*Burke: Nabob of Arcot's Debts*.

2. The body of factors in any place.

3. The business or occupation of a factor; agency.

4. A building or buildings in which any manufacture is carried on; a manufactory, a workshop, a mill.

Factory Acts: The labor troubles of the past few years have been the means of directing, in some of the states at least, legislative attention to the regulation of female and child labor. The resultant laws, although in each state differing in various details, are collectively spoken of as the "factory acts" of the commonwealths. Of these acts, those of the State of Illinois may be taken as typical of the legislation so much clamored for by the labor element. The Illinois statutes forbid the employment in any factory of labor of children under the age of fourteen years, and provide that eight hours shall constitute a day's work for women and girls in all factories. Certain modifications of the aforesaid rules are allowable under the law, and the attempted enforcement of the provisions of the statute developed a most determined opposition. A longer experience in the operation of such laws is necessary before any opinion as to their effect in this country can be expressed by the economist. Other countries, notably England, have long regulated these matters by statute.

factory-maund, *s.* A commercial weight of India. [MAUND.]

***Letters of factory**: Letters empowering one person to act for another.

făc-tō-tum, *s.* [Lat. *fac*, imper. of *facio*=to do, and *tutum*, neut. acc. of *totus*=all, everything.]

1. *Ord. Lang.*: A servant or person employed to do all sorts of business.

2. *Print.*: The ornamental great letters at the beginning of a book. (*Barclay*.)

***făc-tu-al**, *a.* [Eng. *fact*; -ual.] Relating to, containing, or consisting of facts.

***făc-tum** (pl. **făc-ta**), *s.* [Lat. neut. sing. of *factus*, *pa. par.* of *facio*=to do.] [FACT.]

I. Ordinary Language:

1. A thing done; an act or deed.

2. Fact, as distinguished from points of law.

II. Technically:

1. *Arith.*: The product of two or more numbers multiplied together.

făte, făt, färe, amidat, whăt, fáll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, plit, sîre, sîr, marine; gô, pôť, or, wôre, wôlf, wôrķ, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = é; ey = ä. qu = kw.

- (1) An act or deed done.
- (2) A writing; a deed.
- (3) The due execution of a will, including everything necessary to its validity.

făc-tūre, s. [Fr., from Lat. *factura*, from *factus*, *pa. par. of facio*; Ital. *fattura*; Sp. *factura*.]

*I. *Ord. Lang.*: The act or manner of doing or making anything.

II. Technically:

1. *Comm.*: An invoice, a bill of parcels. (*Simmonds*.)

2. Music:

- (1) The construction of a piece of music.
- (2) The measurement, dimension, or scale of organ pipes.

făc-u-lă, s. *pl.* [Lat., *pl. of facula*=a little torch, dimin. of *fax* (genit. *facis*)=a torch.]
Astron.: Certain luminous spots upon the sun's disc, among which the maculae or dark spots usually appear.

***făc-u-lençe**, s. [Lat. *facula*=a little torch.] Brightness, clearness. (*Ash*.)

făc-ūl-tŷ, ***făc-ul-te**, s. [Fr. *faculté*, from Lat. *facultas*=capability of doing, a contract, from *facilitas*, from *facilis*=easy; Sp. *facultad*; Ital. *facoltà*.]

I. Ordinary Language:

1. The power or ability of doing anything.

"There is no kind of *faculty* or power in man, or any creature, which can rightly perform the functions allotted to it, without perpetual aid and concurrence of that supreme cause of all things."—*Hooker: Eccles. Polity*.

*2. Mechanical power or effect: as, the *faculty* of the wedge.

3. One of the powers of the mind or intellect, which enable it to receive or retain perceptions: as, the *faculty* of imagining, remembering, &c. [II. 2.]

"The *faculties* of intellect and will
 Dispensed with equal hand, disposed with equal skill."
Dryden: Sigismunda and Guiscardo, 507, 508.

4. Capacity for any natural action or function.

5. Skill, readiness, ease, or dexterity in performance, possessed naturally or acquired by practice; adroitness, knack, special power.

*6. Personal qualities; disposition, habit, character.

"I'm traduced by tongues which neither know
 My *faculties* nor my person."
Shakespeare: Henry VIII., i. 2.

*7. Natural power or virtue; efficacy.

"Show me simples of a thousand names,
 Telling their strange and vigorous *faculties*."
Milton: Comus, 629, 630.

*8. Power, authority.

"This Duncan
 Hath borne his *faculties* so meek."
Shakespeare: Macbeth, i. 7.

9. The whole body collectively of the members of any of the learned professions; more specifically, the medical and surgical professions. [II. 3.]

"There is no end of my kind treatment from the *faculty*."—*Dryden: To John Driden, Esq.* (Note.)

II. Technically:

1. *Eccles. Law*: A privilege or license granted to any person by favor, and not as a right to do any act which by law he may not do.

"Law hath set down to what person, in what causes, with what circumstances, almost every *faculty* or favor shall be granted."—*Hooker: Eccles. Polity*.

2. *Mental Phil.*: A natural and active power of the human mind, as distinguished from a passive one, the latter being appropriately called a capacity or receptivity. (*Sir Wm. Hamilton*.)

3. *Scots Law*: The whole body of enrolled attorneys, or lawyers: as, the *faculty* of advocates.

4. Universities:

(1) In the United States, the body of persons who are intrusted with the government and instruction of a university or college, comprising the president, professors and tutors.

(2) One of the departments of the arts and sciences; these are four in number: arts, divinity, law and medicine. (*Eng.*)

(3) The masters and professors of the several departments of instruction in a university. (*Eng.*)

(4) *Roman Theol.* (*pl.*): Permission granted by an ecclesiastical superior to a duly qualified subject to hear confessions. Such permission only extends to the district over which the superior has jurisdiction (*q. v.*). Thus, *faculties* are granted by bishops to the priests in their dioceses, and by the heads of religious houses to such of their subjects as they judge qualified to hear the confessions of the community.

¶ Crabb thus discriminates between *faculty*, *ability*, and *talent*: "*Faculty* is a power derived from nature; *ability* may be derived either from circumstances or otherwise: the *faculty* is a permanent

possession, it is held by a certain tenure; the *ability* is an incidental possession. The powers of seeing and hearing are *faculties*; health, strength and fortune, are *abilities*. The *faculty* is some specific power which is directed to one single object; it is the power of acting according to a given form; the *ability* is in general the power of doing; the *faculty* therefore might, in the strict sense, be considered as a species of *ability*. A man uses the *faculties* with which he is endowed; he gives according to his *ability*; the *faculty* and *talent* both owe their being to nature, but the *faculty* may be either physical or mental; the *talent* is altogether mental. These terms are all used in the plural, agreeably to the above explanation: the *faculties* include all the endowments of body or mind, which are the inherent properties of the being, as when we speak of a man's retaining his *faculties*, or having his *faculties* impaired; the *abilities* include, in the aggregate, whatever a man is able to do; hence we speak of a man's *abilities* in speaking, writing, learning, and the like; *talents* are the particular endowments of the mind, which belong to the individual." (*Crabb: Eng. Synon.*)

***fă-cūnd**, ***fă-cunde**, a. & s. [Latin *facundus*=eloquent; *facundia*=eloquence.] [**FACOND.**]

¶ Crabb thus discriminates between to fail, to fall short, and to be deficient: "To fail marks the result of actions or efforts; a person fails in his undertaking: fall short designates either the result of actions, or the state of things; a person falls short in his calculation, or in his account; the issue falls short of the expectation; to be deficient marks only the state or quality of objects; a person is deficient in good manners. People frequently fail in their best endeavors for want of knowing how to apply their abilities: when our expectations are immoderate, it is not surprising if our success falls short of our hopes and wishes." (Crabb: *Eng. Synon.*)

fail, *falle, *falle, *fayle, *feyle, *failye, s. [O. Fr. *faillie*; Prov. *failla*, *failla*; Sp. *falla*; Ital. *falla*, *falla*, *falla*.]

2. The act of becoming bankrupt or insolvent; failure.

3. An imperfection, weakness, or fault.
"I have failings in common with every human being, besides my own peculiar faults."—*Fox: Speech on East India Bills*.

¶ Crabb thus discriminates between failing and failure: "The failure bespeaks the action, or the result of the action; the failing is the habit, or the habitual failure: the former is said of our undertakings, the latter of our moral character. The failure is opposed to the success; the failing to the perfection. The merchant must be prepared for failures in his speculations; the statesman for failures in his projects, the result of which depends upon contingencies that are above human control. With our failings, however, it is somewhat different; we must never rest satisfied that we are without them, nor contented with the mere consciousness that we have them." (Crabb: *Eng. Synon.*)

*fail-ing-ly, adv. [Eng. *failing*; -ly.] By failing or failure.

fail-lis, s. [Fr.]

*5. A failing, an imperfection, a slight fault.

II. Comm.: The act of becoming unable to meet one's engagements; a becoming bankrupt or insolvent.

¶ (1) Crabb thus discriminates between failure, miscarriage, and abortion: "Failure is more definite in its signification, and limited in its application; we speak of the failures of individuals, but of the miscarriages of nations or things; the failure reflects on the person so as to excite toward him some sentiment, either of compassion, displeasure, or the like; the miscarriage is considered mostly in relation to the course of human events. The abortion, in its proper sense, is a species of miscarriage; and in application a species of failure, as it applies only to the designs of conscious agents." (Crabb: *Eng. Synon.*)

(2) For the difference between failure and insolvency, see INSOLVENCY.

fain, *fagen, *fayn, *fayne, *fawe, *vayn, a., adv. & s. [A. S. *fægen*; O. S. *fagan*=glad; Icel. *feginn*=glad; *fagna*=to be glad; Sw. *fågen*; O. H. Ger. *gafegan*=to be glad; *fagon*, *gafagon*=to satisfy.]

7. Not bright, not vivid, not well defined.

"The coloring [is] in some parts faint."—Walpole: Anecdotes of Painting, vol. ii., ch. i.

8. Not loud or clear; wanting in loudness, sharpness, or distinctness.

"The voice grew faint."

Tennyson: Vision of Stn, 201.

II. Law: Feigned, sham; as, a faint action.

B. As substantive:

1. Ord. Lang.: A swoon; a fainting-fit.

2. Distill. (pl.): The later results of distillation of wash, of low specific gravity, and reserved for redistillation, in consequence of its being strongly impregnated with fusel oil.

"Is it not a great fault among distillers to allow any of the faints to run among their pure goods? These faints are of a bluish, and sometimes of a whitish color; whereas the right spirits are as pure and limpid as rock-water."—Mazzei: Sel. Trans., p. 235.

¶ Crabb thus discriminates between faint and languor: "Faint is less than languor; faintness is in fact in the physical application the commencement of languor; we may be faint for a short time, and if continued and extended through the limbs it becomes languor; thus we say to speak with a faint tone, and have a languid frame. In the figurative application, to make a faint resistance, to move with a languid air; to form a faint idea, to make a languid effort." (Crabb: Eng. Synon.)

faint-action, s.

Law: A sham, feigned, or collusive action.

*faint-draw, v. t. To draw or delineate lightly.

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. Ord. Lang.: The act or state of becoming faint.

2. Phys.: Syncope, a sudden suspension of the heart's action, of respiration, internal and external sensation, and voluntary motion. This morbid state generally continues from a few seconds to a minute, but in some cases it lasts for hours and even for days. Organic and other diseases of the heart, the pericardium, and the large arteries, or malformation of these parts tend to produce, or at least to predispose, to syncope. It can be produced by pain, loss of blood, other evacuations when too copious, objects offensive to sight or smell, the impure air generated in crowded public buildings, &c. It rarely ends in death. It is more common in females than in men, and recovery is more rapid in the recumbent position. Fresh, cool air, cold water sprinkled on the face or taken into the stomach, stimulant scents, embrocations, &c., tend to bring a fainting-fit to a speedy close.

fainting-fit, s.

Physiol.: A fit characterized by the fainting of the person affected. [FAINTING, C. 2.]

*fäint-ige, *faynt-ise, *feint-ise, *feynt-ise, *feynt-ye, s. [O. Fr. feintise, faintise.]

*23. Used as an expletive of courtesy; as, fair sir, fair cousin, &c.

"Fare you well, fair gentlemen."

Shakespeare: As You Like It, i. 2.

II. Technically:

1. Naut.: A fair wind, one that favors the ship. Fair is more comprehensive than large, since it includes about sixteen points, whereas large is confined to the beam or quarter, that is, to a wind which crosses the keel at right angles or obliquely from the stern, but never to one right astern.

2. Shipbuild.: Applied to the evenness or regularity of a curve or line.

B. As adverb:

*1. In a beautiful, elegant, or neat manner.

"All the pictures fairest lined."

Shakespeare: As You Like It, iii. 2.

*8. Softly, gently.

"Soft and fair, friar."—Shakesp.: *Much Ado*, v. 4.

9. Reasonably: as, He charged *fair* for the goods. (*Colloquial*.)

*C. As substantive:

1. Used elliptically for a fair or beautiful woman.

"O happy fair!"

Your eyes are lodestars, and your tongue's sweet air

More tuneable than lark to shepherd's ear."—Shakesp.: *Midsummer Night's Dream*, i. 1.

2. Beauty, fairness.

"Where fair is not, praise cannot mend the brow."—Shakesp.: *Love's Labor's Lost*, iv. 1.

¶ The fair: The female sex; women collectively.

"None but the brave deserve the fair."

Dryden: *Alexander's Feast*.

¶ (1) *Fair and square*: Honestly, justly; with straightforwardness.

(2) *Fair fall you, fair fa' you*: Good luck to you. (*Scotch*.)

(3) *To be in a fair way or road to*: To be proceeding without obstruction toward; to be likely to attain or reach; to stand a fair chance of arriving at.

(4) *To bid fair*: To promise well; to be in a fair way; to present a fair prospect.

(5) *To lead fair*:

Naut.: Ropes are said to lead *fair* when they suffer little friction in a pulley.

¶ (1) Crabb thus discriminates between *fair* and *clear*: "*Fair* is used in a positive sense; *clear* in a negative: there must be some brightness in what is *fair*; there must be no spots in what is *clear*. The weather is said to be *fair*, which is not only free from what is disagreeable, but somewhat enlivened by the sun; it is *clear* when it is free from clouds or mists. A *fair* skin approaches to the white; a *clear* skin is without spots or irregularities. In the moral application, a *fair* fame speaks much in praise of a man; a *clear* reputation is free from faults. A *fair* statement contains everything that can be said *pro* and *con*; a *clear* statement is free from ambiguity or obscurity. *Fairness* is something desirable and inviting; *clearness* is an absolute requisite, it cannot be dispensed with."

(2) He thus discriminates between *fair*, *honest*, *equitable*, and *reasonable*: "*Fair* is said of persons or things; *honest* mostly characterizes the person, either as to his conduct or his principle. When *fair* and *honest* are both applied to the external conduct, the former expresses more than the latter: a man may be *honest* without being *fair*; he cannot be *fair* without being *honest*. A man may be an *honest* dealer while he looks to no one's advantage but his own: the *fair* man always acts from a principle of right; the *honest* man may be so from a motive of fear. . . . When *fair* is employed as an epithet to qualify things, or to designate their nature, it approaches very near in signification to *equitable* and *reasonable*; they are all opposed to what is unjust: *fair* and *equitable* suppose two objects put in collision; *reasonable* is employed abstractedly; what is *fair* and *equitable* is so in relation to all circumstances; what is *reasonable* is so of itself. An estimate is *fair* in which profit and loss, merit and demerit, with every collateral circumstance, is duly weighed; a judgment is *equitable* which decides suitably and advantageously for both parties; a price is *reasonable* which does not exceed the limits of reason or propriety. A decision may be either *fair* or *equitable*; but the former is said mostly in regard to trifling matters, even in our games and amusements, and the latter in regard to the important rights of mankind." (Crabb: *Eng. Synon.*)

¶ Obvious compounds: *Fair-appearing*, *fair-complexioned*, *fair-haired*, *fair-shining*, &c.

fair (1), **feire*, **feyre*, *s*. [O. Fr. *feire*, *foire*; Fr. *foire*, from Lat. *feriae*=(1) a holiday, (2) a fair; Port. *feira*; Ital. *fierra*.] A stated market in a particular town or place, held generally annually, for

the sale of various commodities; as, cattle-fairs, horse-fairs, &c. Fairs took their origin in church festivals, when persons from various parts met, and took the opportunity of buying or selling such commodities as they possessed or needed. This origin is commemorated in the Latin *feria*, for *feria*=feast-days, from the same root as Eng. *feast* and *feast*, and in the German *messe*, which means both *mass* and *fair*. The most celebrated fairs in the world are those of Nijni-Novgorod in Russia, Lyons in France, and Frankfurt-on-the-Main and Leipzig in Germany. In this country nearly all of the states, and many of the cities, towns, and counties hold annual agricultural and mechanical exhibitions which are called fairs. [FESTIVAL.]

"To bringen me gay thinges for the feyre."

Chaucer: C. T., 5,802.

Bot.: *Digitalis purpurea*, or fox-glove. (Britten & Holland.)

fairy-green, *s.* A small circle of grass greener than the surrounding turf; really a fungus growth, but supposed to be due to the dances of the fairies. Their formation is very simple, natural, and easily accounted for. The center of the circle begins with a single fungus, which performs its functions and dies. The next season another patch appears outside the spot occupied by the original, forming a small ring, and this is repeated from year to year, the ring increasing in size. The decay of the previous fungi rendering the soil unfit for the reproduction of the same species, the mycelium or spores find fresh soil on the external margin of the ring, and again germinate. One species of fairy-ring fungus, *Marasmius oreades*, is edible, and is called the Champignon (q. v.).

fairy-hammer, *s.* A piece of green porphyry, shaped like the head of a hatchet, and once probably used as such.

fäit-ër-öus, *a. [FAITOUROUS.]

fäith, *fäyth, *faythe, *feith, *fay, *fey, *feyfe, *feyth, *s.* [O. Fr. *fai, fed, foi, foit*; Fr. *foi*, from Lat. *fides*; cogn. with Gr. *pistis*=faith; Sp. & Port. *fe*; Ital. *fede*. The *th* was added in English in order to make the word analogous in form to *truth, ruth, wealth, health, &c.* (Skeat.)]

A. As substantive:

1. Ordinary Language:

1. Faithfulness, fidelity; adherence to duty or engagements; constancy.

2. A promise or pledge given; a word of honor.

"I have given him my *faith*, and sworn my allegiance to him."—Bunyan: *Pilgrim's Progress*, pt. 1.

3. *Spec.*: A vow of love.

"Biron hath plighted *faith* to me."

Shakespeare: *Love's Labor's Lost*, v. 2.

4. Sincerity, honesty, veracity.

"Upon whose *faith* and honor I repose."

Shakespeare: *Two Gentlemen of Verona*, iv. 3.

5. The assent of the mind to what is stated or put forward by another; trust or confidence in the veracity or authority of another; firm and earnest belief in the statements or propositions of another on the ground of the manifest truth of that which he utters.

"All my honest *faith* in thee is lost."

Shakespeare: *Sonnet* 152.

6. In the same sense as II. 2. (1).

"Even so *faith*, if it hath not works, is dead, being alone. Yea, a man may say, Thou hast *faith* and I have works; shew me thy *faith* without thy works, and I will shew thee my *faith* by my works."—James ii. 17, 18.

7. That which is believed on any subject in science, politics, or religion; a doctrine or system of doctrines believed in and held; a creed.

"Don't you think that some definite *faith* or other is needed by the world?"—Mallock: *New Republic*, bk. iii., ch. iii.

*8. True love.

"Lost *faith* turn to despair."

Shakespeare: *Romeo and Juliet*, i. 5.

9. Credibility, reliability, trustworthiness.

II. Technically:

1. Scripture:

(1) *Old Test.*: It occurs but twice—viz., in Deut. xxxii. 20, where it seems to mean trustworthiness; and in Hab. ii. 4, where it is belief in Divine intimations of futurity.

(2) *New Test.*: It occurs more than 100 times, the majority of them being in the Epistles of St. Paul. It is the corresponding word to the Greek *pistis*, which with a Being or person for the object, means trust, and with a thing for the object, belief. It is from *peithomai*=to be prevailed upon, won over, or persuaded to comply, also to believe in.

2. *Theol.*: The older Scriptural commentary writers, Cruden for example, enumerated at least four kinds of faith.

(1) Historical faith, giving a bare assent to Scripture doctrine, but with no fruits following—the faith described in James ii. 17, 24.

(2) Temporary faith, like that described in Matt. xiii. 20.

(3) The faith of miracles (Matt. xvii. 20, and Acts iv. 9); and

(4) Justifying faith. With reference to this, the eleventh of the Thirty-nine Articles of the English Church says: "We are accounted righteous before God, only for the merit of our Lord and Saviour Jesus Christ by Faith, and not for our own works or deservings. Wherefore that we are justified by Faith only is a most wholesome Doctrine and very full of Comfort, as more largely is expressed in the Homily of Justification." The Confession of Faith and the Larger and Shorter Catechisms of the Westminster Assembly, Scottish Church, teach exactly the same doctrine. "Faith in Jesus Christ is a saving grace whereby we receive and rest upon Him alone for salvation, as He is offered to us in the gospel." (Shorter Catechism, Q. 86.)

B. As interj. or exclam.: In faith, in truth; verily, indeed.

"They have no more religion, *faith!* than you."

Dryden: *Satire on the Dutch*.

† *In faith*: In deed, in truth.

(2) *In good faith*: With honesty and uprightness; straightforwardly.

† *In faith* thus discriminates between *faith* and *creed*: "These words are synonymous when taken for the thing trusted in or believed; but they differ in this, that *faith* has always a reference to the principle in the mind; *creed* only respects the thing which is the object of *faith*: the former is likewise taken generally and indefinitely; the latter particularly and definitely, signifying a set form: hence we say to be of the same *faith*, or to adopt the same *creed*. The holy martyrs died for the *faith* as it is in Christ Jesus; every established form of religion will have its peculiar *creed*."

(2) He thus discriminates between *faith* and *fidelity*: "Though derived from the same source, they differ widely in meaning: *faith* here denotes a mode of action, namely, an acting true to the *faith* which others repose in us; *fidelity*, a disposition of the mind to adhere to that *faith* which others repose in us. We keep our *faith*, we show our *fidelity*. *Faith* is a public concern: it depends upon promises: *fidelity* is a private or personal concern: it depends upon relationships and connections. A breach of *fidelity* attaches disgrace to the individual; for *fidelity* is due from a subject to a prince, or from a servant to his master, or from married people one to another. No treaty can be made with him who will keep no *faith*; no confidence can be placed in him who discovers no *fidelity*." (Crabb: *Eng. Synon.*)

faith-breach, *s.* A breach of faith or honor.

fäith, *v. t. [FAITH, *s.*] To give faith or credence to; to believe, to credit.

"Would the reposal
Of my trust, virtue, or worth in thee
Make thy words *faith*'d."

Shakespeare: *Lear*, ii. 1.

fäithed, *a. [Eng. *faith*; -ed.] Holding a faith or creed.

"There aren't they folk that hav most God in awe,
And strongest *faithed* ben, I understand."

Chaucer: *Troilus*, i.

fäith-fül, *feith-ful, *feyth-fulle, *feythe-fulle, *a. & s.* [Eng. *faith*; -ful(l).]

A. As adjective:

*1. Full of faith; inclined or ready to believe in the statements or propositions of another.

"You are not *faithful*, sir."—Ben Jonson.

*2. Exhibiting or proving faith.

"By *faith* and *faithful* works."

Milton: *P. L.*, xi. 64.

*3. Firm, true, and constant to duty; loyal; of true fidelity.

"So spake the seraph Abdiel, *faithful* found,
Among the faithless *faithful* only he."

Milton: *P. L.*, v. 896, 897.

fäte, fät, färe, amidst, whät, fäll, father; wä, wët, hère, camël, hër, thêre; pine, pît, sîre, sîr, marine; gö, pôt, or, wöre, wölf, wörk, whô, sôn; müte, cüb, cüre, unite, cür, rüle, füll; trÿ, sÿrian. æ, œ = ē; ey = ä. qu = kw.

4. Firm in adherence to the truths of religion.

"Be thou faithful unto death, and I will give thee a crown of life."—*Revelation* ii. 10.

5. Observant of engagements, promises or compacts; true to one's word.

"Faithful to whom? To thy rebellious crew?"
Milton: *P. L.*, iv. 952.

6. Upright, honest, true.

"In action faithful, and in honor clear."
Pope: *Moral Essays*, v. 68.

7. That may be trusted; trustworthy; upright.

"The same commit thou to faithful men, who shall be able to teach others also."—*2 Timothy* ii. 2.

8. True; worthy of belief.

"This is a faithful saying, and worthy of all acceptance."—*1 Timothy* i. 15.

9. Exact, accurate, true; conformable to truth or to an original; as, a faithful narrative, a faithful likeness.

"They were close imitators of nature, and have perhaps transmitted more faithful representations."—*Walpole: Anecdotes of Painting*, vol. i., ch. vii.

*B. As subst.: A trusty adherent.

"Colored by your outcries against those his old faithfuls."—*British Beltman* (1648).

¶ *The faithful*: Those who are true adherents to a particular creed or system of religious belief.

¶ *Crabb* thus discriminates between *faithful* and *trusty*: "Faithful respects the principle altogether; it is suited to all relations and stations, public and private; *trusty* includes not only the principle, but the mental qualifications in general; it applies to those in whom particular *trust* is to be placed. It is the part of a Christian to be *faithful* to all his engagements; it is a particular excellence in a servant to be *trusty*. *Faithful* is applied in the improper sense to an unconscious agent; *trusty* may be applied with equal propriety to things as to persons. We may speak of a *faithful* saying, or a *faithful* picture; a *trusty* sword, or a *trusty* weapon." (*Crabb: Eng. Synon.*)

**faith-ful-ist*, s. [Eng. *faithful*; -ist.] A believer.

faith-ful-ly, **feithe-ful-ly*, **feyth-ful-lye*, adv. [Eng. *faithful*; -ly.]

1. With a firm belief in others, or in religion.
2. With a strict adherence to truth and duty; loyally.

"The docile mind may soon thy precepts know,
And hold them faithfully."—*Johnson: Horace; Art of Poetry*.

3. Without failure of performance; honestly, exactly; in full accordance with the directions or wishes of another.

"And faithfully my last desires fulfill."
Dryden: *Ovid; Heroides* xi.

4. With earnest or strong professions; earnestly.

"He did faithfully promise to be still in the king's power."—*Bacon: Henry VII*.

5. Honestly, truly; in conformity with truth, fact, or an original; accurately.

"A case
So far removed by time and place,
Is seldom faithfully related."
Cambridge: *Learning; A Dialogue*.

faith-ful-ness, **faith-ful-ness*, s. [English *faithful*; -ness.] The quality of being faithful; fidelity, loyalty, honesty, constancy.

"He surrendered the same with as much faithfulness as might be."—*Golding: Justine*, fo. 21.

faith-less, **faith-lesse*, a. [Eng. *faith*; -less.]

1. Not believing; unbelieving; not giving credit to.

"Be not faithless but believing."—*John* xx. 27.

2. Without belief in the truths of religion; unbelieving.

3. Not adhering to engagements, vows, or duty; disloyal, unfaithful.

"A faithless and shameless man."—*Macaulay: Hist. Eng.*, ch. ii.

4. Not observant of promises.

*5. Characterized by a want of good faith; dishonorable, disgraceful, treacherous.

"To make the breach the faithless act of Troy."
Pope: *Homer's Iliad*, iv. 98.

- *6. Not to be trusted; untrustworthy, deceptive, delusive.

"Still, perhaps, with faithless gleam,
Some other loiterer beguiling."

Wordsworth: *Lines while Sailing in a Boat at Even*.

¶ (1) *Crabb* thus discriminates between *faithless* and *unfaithful*: "Faithless is mostly employed to denote a breach of faith; and *unfaithful* to mark the want of fidelity. The former is positive; the latter is rather negative, implying a deficiency. A prince, a government, a people, or an individual, is said to be *faithless*; a husband, a wife, a servant, or any individual *unfaithful*. . . . A woman is

faithless to her husband who breaks the marriage vow; she is *unfaithful* to him when she does not discharge the duties of a wife to the best of her abilities."

(2) He thus discriminates between *faithless* and *perfidious*: "A *faithless* man is *faithless* only for his own interest; a *perfidious* man is expressly so to the injury of another. A friend is *faithless* who consults his own safety in time of need; he is *perfidious* if he profits by the confidence reposed in him to plot mischief against the one to whom he has made vows of friendship. *Faithlessness* does not suppose any particular efforts to deceive; it consists of merely violating that *faith* which the relation produces; *perfidy* is never so complete as when it has most effectually assumed the mask of sincerity. *Perfidy* may lie in the will to do so; *treachery* lies altogether in the thing done: one may therefore be *perfidious* without being *treacherous*. On the other hand, we may be *treacherous* without being *perfidious*. A servant may be both *perfidious* and *treacherous* to his master; a citizen may be *treacherous* but not *perfidious* toward his country." (*Crabb: Eng. Synon.*)

faith-less-ly, **faith-lesse-ly*, adv. [English *faithless*; -ly.] In a faithless or unfaithful manner; treacherously, dishonorably.

"And not faithlessly betrayed but sincerely discharged the several trusts reposed in us."—*Penryn: Treachery and Disloyalty*, p. 218.

faith-less-ness, **faith-lesse-ness*, s. [Eng. *faithless*; -ness.] The quality or state of being faithless or unfaithful; disloyalty; perfidy; treachery; inconstancy; unfaithfulness.

"Faithlessness was the chief cause of his disaster."—*Macaulay: Hist. Eng.*, ch. i.

**faith-ly*, **faith-ly*, **feith-ly*, **feith-liche*, **feyth-ly*, adv. [Eng. *faith*; -ly.] Faithfully; in good faith; truly, honestly.

"This forward to fulfill faithfully thou swore."
Destruction of Troy, 11.447.

faith-wor-thi-ness, s. [English *faithworthy*; -ness.] The quality of being deserving of faith or credit; trustworthiness.

faith-wor-thy, a. [English *faith*; -worthy.] Deserving of faith or credit; trustworthy.

**fait-ing*, **fait-yng*, s. [FAITEN.] Begging under false pretenses.

fäke (2), s. [FAKE, v.] A poison; a mixture for hocussing (q. v.). (*Slang*.)

fäke (3), s. A sham or deceit; a false report; a cooked-up article in a newspaper.

fäke, v. t. & i. [Etym. doubtful. Perhaps from Lat. *facio*.] (*Slang*.)

A. Transitive:

1. To do or make anything.
2. To cheat, to defraud, to deceive.
3. To steal.
4. To hocus (q. v.); to poison.

B. Intrans.: To steal, to rob.

"They molest not beggars unless they fake to boot."—*Reade: Cloister and Hearth*, ch. lv.

fäks-ër (2), s. [Eng. *fäke* (v.); -er.] One who steals anything; a pickpocket. (*Slang*.)

fa-kir (kir as *kër*), *fa-keër*, *fu-geer*, s. [Arab.=one of an order of mendicants, corresponding to the Pers. *Dervish* (q. v.), from *fakr*=poverty.]

1. A Mohammedan religious mendicant. Among Anglo-Indians, and even among the Hindoos, it is often used for a native mendicant of any faith; but specifically it is one of the Mohammedan religion; a Hindoo mendicant being better called a *Gosavee* (q. v.). Mohammedan Fakirs in the East either live in communities, like the Christian Cenobites, or are solitary, like the Eremites. The latter wander from place to place, are of filthy habits, and are regarded by the unthinking Mohammedan multitude as men of great sanctity. There are many ramifications both of the fixed and the wandering Fakirs.

2. A slang name given in this country to one of the numerous street merchants and mountebanks that infest our larger towns and cities; a peddler.

**fal*, s. [FALL, s.]

**fäl-bä-lä*, s & a. [FURBELOW.]

Bot.: Plane and curved with the edges parallel.

fäl-chiön, **fau-chon*, **fa-choun*, **faw-chun*, s. [Fr. *faucon*, from Ital. *falcione*=a scimitar, from Low Lat. *falcio*, from Lat. *falx* (genit. *falcis*)=a sickle, scythe.] A broad sword with a slightly curved point, in extensive use during the middle ages from its convenient form, it being shorter than the ordinary military sword, and less heavy.

fäl-cl-form, a. [Lat. *falx* (genit. *falcis*)=a scythe, a sickle, and *forma*=form, shape; Fr. *falci-forme*.]

1. Ord. Lang.: Having the form of a sickle; resembling a sickle.

II. Technically:

1. Bot.: Falcate, curved.

2. Anat.: Applied to different parts; the broad or suspensory ligament of the liver is sometimes called the *falciform* ligament.

fäl-cö, s. [Low Lat.]

Zool.: A genus of diurnal birds of prey, including the Peregrine, *Falco peregrinus*, Hobby, *F. sub-buteo* and Merlin, *F. æsalon*.

fäl-cön (silent), **fau-con*, **fau-coun*, **fau-con*, s. [O. Fr. *falcon*, *faucon*; Fr. *faucon*, from Lat. *falco*, so called from the hooked shape of the claws, from *falx* (genit. *falcis*)=a scythe, a sickle.]

1. Zool.: One of the Falconine, a sub-family of the Falconidae (q. v.). The beak is short, curved from the base with one or two strong indentations on the margin on each side. Wings very long. The best-known species is the Peregrine falcon (*Falco peregrinus*), so named from its wonderful distribution over the earth's surface. [PEREGRINE.] It has always been held in the greatest esteem for hawking. It is of a bluish-gray color, narrowly barred with black; length of male about fifteen inches, of female about seventeen inches. It still breeds in some places on our coasts on high rocks. Technically in falconry the female alone is termed a falcon, the male, which is smaller and less courageous, being known as a tessel or tiercel. [TERSEL.]

"Our hopes, like towering falcons, aim
At objects in an airy height."

Peregrine Falcon.

"Our hopes, like towering falcons, aim
At objects in an airy height."
Prior: To Hon. C. Montague.

böil, böy; pöut, jöw; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph=f.

fâl-côn-ër (I silent), ***fauk-en-er**, ***faw-con-er**, ***faw-ken-ere**, *s.* [O. Fr. *fauconier*; Fr. *fauconier*; Ital. *falconiere*; Port. *falconeiro*, from Low Lat. *falconarius*, from Lat. *falco*.] One who breeds and trains hawks for hawking; one who hunts with hawks.

"Who, like good falconers, take delight
Not in the quarry, but the flight."

Waller: *To the Mutable Fair*.

fâl-côn-ët, *s.* [Fr. *falconette*, dimin. of O. Fr. *falcon*; Port. *falconete*.]

1. *Zool.*: A little falcon; a name applied to a genus of tiny falcons, belonging to the sub-family *Falconinae*, peculiar to the Indian region. One, *Microhierax caerulescens*, is found in the Himalayas and Burmese countries. Not one of these little hawks is seven inches in length; they are said to be used by native chiefs for hawking insects and button-quails, being thrown from the hand like a ball. They sit solitary on high trees, and, according to native accounts, feed on small birds and insects.

*2. *Old Ord.*: A small piece of ordnance, having an outside diameter at the bore of four and a quarter inches, length six feet, weight four hundred pounds, and carrying a shot of about two inches diameter, and one and a quarter to two pounds in weight.

fâl-côn-l-dæ, *s. pl.* [Lat. *falco* (genit. *falconis*), and fem. pl. adj. suff. *-idæ*.]

Zool.: A family of raptorial birds, comprising the sub-families *caracaras* (*Polyborinae*), hawks (*Accipitrinae*), buzzards (*Buteoninae*), eagles (*Aquilinae*), and falcons (*Falconinae*). They are all remarkable for strong and sharply-hooked bills, and most of them have sharp and powerful talons. In the eagles and falcons these characters are developed in the highest degree. In most the female is larger than the male, and is much the more powerful bird. This difference in size is unmistakable in the long-legged sparrow-hawks, eagles and falcons. Another character possessed by these birds is the distinct *cere*, which is present in all: it is a waxy covering to the bill, but generally fleshy in substance. The toes are arranged as in a little perching bird, three in front and one behind. There is a projection over the eyebrows, which gives an appearance to the eyes of being very deeply set in the orbits.

fâl-cô-nî-næ, *s. pl.* [Lat. *falco* (genit. *falconis*), and fem. pl. adj. suff. *-inæ*.]

Zool.: A sub-family of birds, belonging to the order Falconidae, and containing the Falcons, Falconets, &c. [FALCON, FALCONIDÆ.]

fâl-côn-lîne (I silent), *a.* [Lat. *falco* (genit. *falconis*); Eng. adj. suff. *-ine*.] Of or pertaining to the Falconinae.

fâl-côn-rÿ (I silent), ***faul-con-rie**, *s.* [Eng. *falcon*; *-ry*; Fr. *fauconnerie*; Ital. *falconeria*.]

1. The art or science of training falcons to pursue and attack wild fowl or game.

"We find in *fauconrie*, sixteen hawks or fowls that prey."—P. Holland: *Pliny*, bk. x., ch. viii.

2. The sport of pursuing wild fowl, game, &c., with falcons or hawks; hawking.

fâl-cû-lâ, *s.* [Lat. dimin. of *falx* (genit. *falcis*) = a sickle, a scythe.]

Zool.: A term applied to a claw, which is compressed, elongated, curved, and sharp-pointed.

fâl-cû-lâte, *a.* [Lat. *falcul(a)*; Eng. adj. suff. *-ate*.]

Zool.: Compressed, elongated, curved, and sharp-pointed; said of a claw.

fald, **fauld**, *s. & v.* [FOLD, *s. & v.*] (Scotch.)

***fâld-age** (age as Ig), *s.* [Low Lat. *faldagium*, from *faldia*; A. S. *fald* = a fold.]

Feudal Law: A privilege which anciently several lords reserved to themselves of setting up folds for sheep, in any fields within their manors, the better

to manure them, and this not only with their own, but their tenants' sheep. This *faldage* in some places they call a foldcourse or freefold. (Harris.)

fâld-feë, *s.* [A. S. *fald* = a fold, and Eng. *fee*.]

Feudal Law: A composition or fee formerly paid by tenants for the privilege of faldage.

***fâld-ing**, ***fâld-yng**, *s.* [Etym. doubtful.]

27. To fall with bairn; To fall with child: To become pregnant.

† Crabb thus discriminates between *to fall*, *to drop*, *to droop*, *to sink*, and *to tumble*: "*Fall* is the generic, the rest are specific terms: *to drop* is to fall suddenly; *to droop* is to drop in part; *to sink* is to fall gradually; *to tumble* is to fall awkwardly or

contrary to the usual mode. In cataracts the water *falls* perpetually and in a mass; in rain it *drops* partially; in ponds the water *sinks* low. The head *droops*, but the body may *fall* or *drop* from a height; it may *sink* to the earth, it may *tumble* by accident. *Fall*, *drop*, and *sink* are employed in a moral sense, *droop* in the physical sense. A person *falls* from a state of prosperity; words *drop* from the lips and *sink* into the heart. Corn, or the price of corn, *falls*; a subject *droops*; a person *sinks* into poverty, or in the estimation of the world." (*Crabb: Eng. Synon.*)

fäll (1), *fal*, s. [A. S. *feal*, *fat*; O. S. *fal*; O. Fris. *fal*, *fel*; O. H. Ger. *fal*; leel. & Sw. *fall*; Dan. *fald*.] [FALL, v.]

* 17. Diminution or decrease in intensity or loudness; cadence.

"That strain again: it had a dying *fall*."

Shakesp.: Twelfth Night, i. 1.

18. The act or state of falling from a state of innocence or rectitude; defection from virtue.

"To make a second *fall* of cursed man."

Shakesp.: Richard II., iii. 4.

* 19. That which causes a defection from virtue or innocence.

"The *fall* of angels, therefore, was pride."—*Hooker: Eccles. Polity*, bk. i., ch. iv.

20. A veil.

* 21. The same as FALLING-BAND (q. v.).

"Under that fayre ruffe so sprucey set
Appears a *fall*, a falling-band forsooth."

Marston: Satire iii.

22. Lot, condition, state, fortune.

"From good to bad, and from bad to worse;
From worse unto that is worst of all,
And then returns to his former *fall*."

Spenser: Shepherd's Calendar.

II. Technically:

1. *Theol.*: A term used of the first sin of Adam, and hence often called "The Fall of Adam," with which "original sin" his posterity are held to have had mysteriously to do; on which account we often meet with the term "the Fall of Man." The verb "to fall" is often used in a generic sense in Scripture for a lapse into sin (*Ezek. xlii.* 12, *Rom. xiv.* 13, *1 Cor. x.* 12, *Rev. ii.* 5). The substantive is not

used equivocally in the same sense. "The Fall" is therefore a theological rather than a scriptural term, though the idea is undoubtedly present in the Bible. According to the Biblical narration, God created man in His own image (Gen. i. 27), like the rest of Creation "very good" (i. 31). In the midst of the garden of Eden, in which the first parents of our race were placed, was the Tree of the Knowledge of Good and Evil. This they were forbidden to eat on pain of death, all other trees being freely granted them for food (ii. 16, 17). Beguiled by the serpent, Eve first yielded, and then at her persuasion, Adam ate the forbidden fruit (Gen. iii. 1-6); after this he feared to continue communion with God (8-10), had sentence pronounced against them (16-19), were expelled from the blissful garden (24). In the New Testament it is indirectly hinted that the Devil used the serpent as a mouthpiece, whence he is called "that old serpent . . . which deceiveth the whole world" (Rev. xii. 9), and "the dragon that old serpent" (xx. 2), and is said by our Lord to have been "a murderer from the beginning" (John viii. 44). It is remarkable that in most mythologies the Serpent is worshiped as a beneficent being, though Tylor shows that Aji Dahaka of the Zarathustrians (Zoroastrians), which is a personification of evil, may have an historical connection with the serpent of Eden (*Primitive Culture*, 2d ed., ii. 242). With regard to the relation of man's fall to that of Adam, St. Paul says "by one man's disobedience many were made sinners" (Rom. v. 19), and "as by one man sin entered into the world, and death by sin, and so death passed upon all men for that all have sinned" (ver. 12). [ORIGINAL SIN.]

2. Nautical:

(1) [FALL-AND-TACKLE.] The descent of a deck from a fair curve lengthwise, as is frequently seen in merchantmen and yachts, to give height to the commander's cabin, and sometimes forward at the hawse-locks.

3. *Mech.*: That part of the rope in hoisting-tackle to which the power is applied. One end of the rope is attached to a point of support, as a hook or an eye below the upper block of the tackle, and is then rove through the blocks: the end carried to the winch, capstan, &c., is the fall.

4. *Eng.*: The amount of descent in a given distance, as (1), the vertical pitch of water at a mill; (2) the inclination of a water-course.

5. Mus.: Cadence.

¶ (1) *To try a fall*: To try a bout at wrestling. "Orlando hath a disposition to come in disguised against me to try a fall."—*Shakesp.*: *As You Like It*, i. 1.

(2) *To fall by the ears*: To fall out, to quarrel.

¶ Crabb thus discriminates between *fall*, *down-fall*, and *ruin*: "Whether applied to physical objects or the condition of persons, *fall* expresses less than *downfall*, and this less than *ruin*. The *fall* applies to that which is erect; the *downfall* to that which is elevated; everything which is set up, although as trifling as a stick, may have a *fall*; but we speak of the *downfall* of the loftiest trees or the tallest spires. The *fall* may be attended with more or less mischief, or even with none at all; but the *downfall* and the *ruin* are accompanied with the dissolution of the bodies that *fall*. The higher a body is raised, and the greater the art that is employed in the structure, the completer the *down-fall*; the greater the structure, the more extended the *ruin*. In the figurative application we may speak of the *fall* of man from a state of innocence, a state of ease, or a state of prosperity, or his *downfall* from greatness or high rank. He may recover from his *fall*, but his *downfall* is commonly followed by the entire *ruin* of his concerns, and often of himself. The *fall* of kingdoms, and the *downfall* of empires, must always be succeeded by their *ruin*, as an inevitable result." (*Crabb: Eng. Synon.*)

fall-and-tackle, s. The fall is the pulling-end of the rope; the tackle is the blocks with the rope rove through them.

fall-block hook, s. A hook for a davit-fall block, released by the action of a cord and link, when the boat has descended a certain distance, the end of the rope being secured on deck.

fall-board, s.

Carp.: The wooden drop-shutter of a window, which moves backward and forward on hinges.

***fall-bridge, fall-brig, s.** A sort of bridge, used in a siege; so called because the besiegers let it fall on the walls, that they might enter by means of it.

fall-cloud, s.

Naut.: A low cloud which forms a horizontal line; called also *STRATUS* (q. v.).

fall-poison, s.

Bot.: The name given in the United States to a melantheaceous plant, *Amianthum muscatocicum*, so called because cattle feeding on its foliage in the "fall" of the year are poisoned.

fall-trank, s. [Ger.]

Med.: A drink for curing the effects of falls; a vulnerary. It is a mixture of several aromatic and slightly astringent plants, which grow chiefly on the Swiss Alps; hence the name *Falltrank* *Suisse* given to such dried plants cut into fragments. Within the present century, in England, a kind of vulnerary beer was often prescribed, in country practice, in all cases of inward bruises. It bore the name *Cerevisia nigra*, or Black Beer, and was formed by infusing certain reputed vulnerary herbs in beer or ale. The infusion of the fall-trank is aromatic and slightly agreeable, but of no use in the cases for which it has been particularly recommended. (*Dunglison.*)

fall-trap, s. A trap which falls or gives way under one.

fall-wind, s.

Naut.: A sudden gust of wind.

fäll (2), *falle, *felle, s. [A. S. *feall*; O. H. Ger. *falla*; M. H. Ger. *valle*; Sw. *fälla*; Dan. *fælde*.] A trap, specially for mice or rats; otherwise known as a *dead-fall*. It is set with a figure 4 trigger.

fäll (3), faw, s. [Prob. Goth. *fale*=a pole or perch; Ital. *fale*=handle of a spear.] In Scotland, a measure nearly equal to an English perch or rood; a lineal fall is six ells long; a superficial fall contains thirty-six square ells.

fäll, interj. [FALL, v.]

Naut.: The cry to denote that a harpoon has been effectively delivered into a whale.

fäll-la, s. pl. [Derived from the *fal la*, with which each line or strain ended.]

Mus.: A short song with the syllables *fal la* at the end of each line or strain. Morley (about 1580), who composed some of them, speaks of their being a kind of ballet. Those of Hilton (about 1600) are held in the highest estimation for the freedom of their construction and the beauty of their melodies. Gustildi is the reputed inventor of *fallas*. (*Stainer & Barrett.*)

***fal-lace, *fal-las, s.** [Fr. *fallace*; from Lat. *fallacia*; from *fallax*.] [FALLACY.] Deception, deceit, deceitfulness.

***fäll-lä-cion, *fal-la-tion, s.** [Latin *fallax* (genit. *fallacis*)=deceitful; *fallo*=to deceive.] A fallacy.

fäll-lä-cious, a. [Lat. *fallaciosus*; Fr. *fallacieux*; from Lat. *fallacia*; from *fallax*=deceitful.] Pertaining to or involving a fallacy; producing or causing error or mistake; misleading, deceptive.

"It is weak arguing and fallacious drift."

Milton: P. R., iii. 4.

¶ Crabb thus discriminates between *fallacious*, *deceitful*, and *fraudulent*: "The *fallacious* has respect to falsehood in opinion; *deceitful* to that which is externally false; our hopes are often *fallacious*; the appearances of things are often *deceitful*. *Fallacious*, as characteristic of the mind, excludes the idea of design; *deceitful* excludes the idea of mistake; *fraudulent* is a gross species of the *deceitful*. It is a *fallacious* idea for any one to imagine that the faults of others can serve as any extenuation of his own; it is a *deceitful* mode of acting for any one to advise another to do that which he would not do himself; it is *fraudulent* to attempt to get money by means of a falsehood." (*Crabb: Eng. Synon.*)

fäll-lä-cious-lý, adv. [Eng. *fallacious*; -ly.] In a fallacious manner; deceitfully, sophistically, delusively; so as to mislead.

"Such an one that fallaciously pretends religion."—*Hammond: Works*, i. 301.

fäll-lä-cious-nëss, s. [Eng. *fallacious*; -ness.] The quality of being fallacious, deceptive, or misleading; deceitfulness; fallacy.

"Being persuaded of the fallaciousness of such thermoscopes."—*Boyle: Works*, iii. 334.

fäll-la-cý, s. [Fr. *fallace*, from Lat. *fallacia*, from *fallax* (genit. *fallacis*)=deceitful; *fallo*=to deceive; Ital. & Port. *fallaccia*; Sp. *fallacia*.]

1. *Ord. Lang.*: Deceit, deceitful appearance; that which deceives or misleads the eye or mind; deceitfulness.

2. *Logic*: An unsound argument or mode of arguing, which, while appearing to be decisive of a question, is in reality not so; an argument or proposition apparently sound, but really fallacious; a fallacious statement or proposition, in which the error is not apparent, and which is therefore likely to deceive or mislead; sophistry.

"His principal and most general fallacy is his making 'essence' and 'person' to signify the same."—*Waterland: Works*, vol. i., pt. ii., p. 283.

¶ Crabb thus discriminates between *fallacy*, *delusion*, and *illusion*: "The *fallacy* is commonly the act of some conscious agent, and includes an intention to deceive; the *delusion* and *illusion* may be the work of inanimate objects. We endeavor to

detect the *fallacy* which lies concealed in a proposition; we endeavor to remove the *delusion* to which the judgment has been exposed; and to dissipate the *illusion* to which the fancy or senses are liable. In all the reasonings of freethinkers there are *fallacies* against which a man cannot always be on his guard. The ignorant are perpetually exposed to *delusions* when they attempt to speculate on matters of opinion." (*Crabb: Eng. Synon.*)

***fäll-läl-ish, a.** [English *fallat*; -ish.] Sentimental.

***fäll-läl-ish-ly, adv.** [Eng. *fallalish*; -ly.] Sentimentally.

1. *Ord. Lang.*: One who falls.

II. Technically:

1. *Cotton Manuf.*: An arm on a mule-carriage, operating the faller-wire, whose duty it is to depress the yarns when the carriage is about to run back, in order that the yarns may begin to wind on at the bottom of the cop, and be regularly distributed thereon as the faller-wire is raised.

2. *Flax Man.*: A bar in the flax-spreading machine, to which are attached a number of vertical needles, forming a comb or gills. The office of the gills is to simulate the action of the human fingers in detaining to some extent the line as it passes to the drawing-roller. [GILL-BAR.]

faller-wire, s.

Weaving:

1. A horizontal bar by which the yarn, rovings, or slubbings are depressed below the points of the inclined spindles in a slubbing-machine or mule, in order that they may be wound into cops upon the spindle in the backward motion of the billy, or mule-carriage, as the case may be.

2. A device in the silk-doubling machine for stopping the motion of the bobbin if the thread break.

fäll-lil-bil-l-tý, s. [Low Lat. *fallibilis*, from *fallibilis*=fallible; Ital. *fallibilità*; Sp. *fallibilidad*; Fr. *fallibilité*.]

1. The quality or state of being fallible; liability to err or be misled.

"License and acknowledgment of fallibility."—*Hammond: Works*, ii. 608.

2. Liability to mislead or deceive.

fäll-lil-ble, a. [Low Latin *fallibilis*, from Latin *fallo*=to deceive; Ital. *fallibile*; Sp. *fallible*; Fr. *fallible*.] Liable to err, or be mistaken; that may be deceived or misled.

falling-down, s. Epilepsy (q. v.).

falling-evil, *falland-evil, s. Epilepsy (q. v.).

falling-home, a.

Naut. A term applied to the upper parts of the sides of a ship when they curve inward. It is called also tumbling-home, and formerly, too, hausing in. It is opposed to wall-sided or flaring-out (q. v.).

falling-molds, s. pl.

Carp. The two molds which are applied, the one to the convex, the other to the concave vertical side of the rail-piece in hand-rails, in order to form its back and under-surface, and to finish the squaring.

falling-off, s.

I. Ord. Lang. Degeneracy, change to the worse.

"Oh! Hamlet, what a falling-off was there."

Shakespeare: Hamlet, i. 5.

II. Nautical:

1. The opposite of *gripping* or *coming-up* to the wind. It is the movement or direction of the ship's head to leeward of the point whither it was lately directed, particularly when she sails near the wind or lies by.

2. The angle contained between her nearest approach to the wind and her furthest declination from it when trying—that is, preventing—herself from rolling to windward, by a judicious balance of canvas. (Smyth.)

falling-sickness, s. Epilepsy (q. v.).

falling-slucice, s.

Hydraul. Engin. A kind of floodgate for mill-dams, rivers, canals, &c., which is self-acting, or so contrived as to fall down of itself in the event of a flood, whereby the waterway is enlarged.

falling-star, s.

1. Astron. A body which has this resemblance to a star that it shines and is in the sky. Though the epithet falling be applied to it, its course may to the eye be horizontal, or oblique rather than perpendicularly downward. On any clear night, one, two or more of such falling stars may be seen. At certain times they come in large numbers. [STAR-SHOWERS.] Immense multitudes of meteorites, some of iron, others having sodium in some form in their composition, move in long elliptic orbits around the sun. When the orbit of the earth cuts through one of these rings, its atmosphere comes against these little meteorites, which cut through it with planetary velocity. The iron ignites by means of the great heat generated, and they become visible to the eye, having been black and dark before. The head of the falling star is the ignited meteorite. The tail which often accompanies it, is an optical illusion. The ignited meteor tends to dissipate in dust, and, of course, becomes invisible. [AEROLITE, METEORITE.]

2. Bot. *Noctoc commune*; also called Fallen-star (q. v.).

falling-stone, s. A meteorite; a stone falling from the atmosphere; an aerolite.

falling-style, s. That style of a gate to which the latch is placed.

Fäl-löp-I-an, a. [After Fallopius, a famous Italian anatomist, who died A. D. 1562.]

Anat. Pertaining to or discovered by Fallopius. **Fallopiian-tubes, s. pl.**

Anat. Two ducts or canals floating in the abdomen, and extending from the upper angles of the womb to the pelvis. They were popularly but incorrectly believed to have been discovered by Fallopius.

fäl-lōw, *fal-ow, *fal-we, *fal-ewe, a. & s. [A. S. *fealu, fealo*=yellowish; cogn. with Dut. *vaal*=fallow, faded; Icel. *fölr*=pale; O. H. Ger. *valo*; M. H. Ger. *val*; Ger. *fahl*=pale, faded; Lat. *pallidus*=pale; Gr. *polios*=gray; Sansc. *palita*; Sw. *fal*; Ital. *falbo* (Skeat).]

With verdure."—Couper: Task, iv. 316.

2. The plowing or turning over of land without sowing it.

"The *fallow* gives it a better tilth than can be given by a fallow crop."—Sir J. Stclair.

*II. Fig.: Unworked, unexercised part.

"Break up the *fallowes* of my nature."—Ep. Hall: Contempl.; The Resurrection.

† A green *fallow* is where land is mellowed and freed from weeds by a green crop, such as potatoes or turnips.

fallow-chat, s. The Fallow-finch (q. v.).

fallow-crop, s. A crop taken from fallow ground.

fallow-deer, s.

Zool. *Dama vulgaris*, an animal of the deer kind, well known from being preserved in a semi-domesticated state in many English parks. The color of the wild animal, both buck and doe, is a rich yellowish-brown in summer, spotted with white all over. In winter the tints are more somber and grayish. Domestic varieties vary immensely, both in the distinctness of the spotting and the general coloration. The buck is about three feet high at the shoulder; the head is short and broad, the tail between seven and eight inches long. The antlers are palmated in the upper parts, in the region of the sur-royals, the digitations or terminal points being developed along the convex posterior margin of the palmated surface. Until six years of age the buck receives a distinct name each year from sportsmen—viz., fawn, pricket, sorrel, soare, buck of the first head, and buck complete, the antlers not being developed at all in the fawn, being simple snags in the pricket, with two front branches in the sorrel, with slight palmation of the extremity of the beam in the soare, and the whole antler larger and larger until the sixth year. It is a native of Northern Europe. The dark-colored and more hardy breed seen in England was brought from Norway by James I.

Fallow-deer.

fallow-finch, s.

false-bark, s.

Bot. The layer on the outside of the stem of an exogen, which consists of cellular tissue with fibrous tissue entering it obliquely.

false-bedding, s.

Geol. Cross bedding in which the minor layers are not parallel to the principal ones. Professor Sedgwick says that there are three distinct forms of structure exhibited in certain rocks throughout

large districts—viz., (1) Stratification, (2) Joints, and (3) Slaty Cleavage. The first of these constitutes true bedding; the others may be classed together as false-bedding. Joints are natural fissures which often traverse rocks in straight and well-determined lines. Slaty cleavage, which is best seen in the clay, slate, and other metamorphic rocks, generally crosses the true planes of stratification at a high angle. The rock can be cleft into fissile layers parallel to the cleavage.

false-bilberry, s.

Bot.: *Gaylussacia pseudo-vaccinium*, a Brazilian plant.

false-blows, s. pl.

Bot.: The male flowers of the melon and cucumber; because they produce no fruit.

Bot.: A name applied to *Brachypodium*, a genus of grasses consisting of about a dozen species, natives of temperate countries. Glumes very short and empty.

false-cadence, s.

Music: There are four principal forms of cadence in harmony: the whole or authentic, the half, the interrupted, and the plagal cadence. When the last chord—the major or minor chord of the key-note—is preceded by the major chord of the dominant, such cadence is called whole or perfect. If the last chord is the dominant, and is preceded by the chord of the tonic, the cadence is called half or imperfect. When the last chord of the phrase is other than the tonic chord, and is preceded by that of the dominant, the cadence is said to be interrupted, *false*, or deceptive. The cadence called plagal is that in which the chord of the tonic is preceded by the major or minor chord of the subdominant. The whole cadence is used to conclude most modern music; the half and the interrupted cadence in the progress of a harmonized melody. The plagal cadence was frequently employed as a close by the old contrapuntal writers. (Stainer & Barrett.)

false-catarrh, s. [FALSE, A., II. 2.]

false-claim, s.

Old Eng. Law: By the forest laws, where a man claimed more than his due, he was punished and amerced for so doing.

false-key, s. A key roughly made of a rough slip adapted to avoid the wards of a lock; a pick-lock.

false-membrane, s. Membranous productions which form on all the free natural surfaces, and on every free accidental surface, are so called. They are usually caused by the exudation of a fibrinous matter susceptible of organization, which takes place in consequence of inflammation of the various tissues. These accidental membranes occur on the skin after the application of a blister; on mucous surfaces, as in croup; on the parietes of inflamed veins and arteries, &c. The cicatrices of wounds are formed of them. By some it has been proposed to give the name pseudo-membrane [Gr. *pseudēs*=false] to fibrinous exudations, as in diptheritis, which are devoid of organization, while neomembrane [Gr. *neos*=new] may be applied to such fresh productions, as from serous membranes, as have become supplied with vessels and nerves. (Dunglison: Med. Dict.)

false-mercury, s.

Bot.: *Chenopodium bonus henricus*. "It is taken for a kind of mercurie, but improperly, for that it hath no participation with mercurie, either in form or quality, except yee will call every herbe mercurie which hath power to loose the bellie." (Gerard: Index. Britten & Holland.)

false-muster, s.

Naut.: An incorrect statement of the number of men on a vessel, which, when proved, subjects the captain to cashiering.

***fāl-sēt**, s. [FALSEHOOD.]
***fāl-sēte**, a. & s. [FALSETTO.]

A. As adj.: Belonging to, or having the qualities of the tone called Falsetto or Falsetto.

B. As substantive:
Rhet.: A high or shrill tone of the voice; a cry, a scream.

fāl-sēt-tō, s. & a. [Ital. Sp. falsete; Fr. fausset, from Lat. falsus=false.]

A. As substantive:
Music: The voices of both men and women contain two, or, as defined in the *Méthode du Chant du Conservatoire de Musique*, three registers—viz.: Chest voice (*voce di petto*), head voice (*voce di testa*),

and a third which, as being forced, or non-natural, is called by Italians and French *falsetto* or *fausset*, or "false" voice. The limits of these are by no means fixed. In every voice identical notes can be produced in more ways than one, and thus each register can be extended many degrees beyond its normal limits. But it is all but impossible for a singer to keep both first and third registers in working order at the same time. The male counter-tenor, or alto voice, is almost entirely *falsetto*, and is generally accompanied by an imperfect pronunciation, the vowels usually partaking more or less of the quality of the Italian *u*, or English *oo*, in which the *falsetto* seems to be most easily producible." (Grove: Dict. of Music.)

B. As adj.: Having the characteristics of, or produced as the voice described in A.

fāl-sī-crī-mēn, phr. [Latin,=the crime or charge of what is false or fraudulent.]

***fāme** (1), *s.* [FOAM, *s.*]

fāme (2), *s.* [Fr.; Sp.; Port., & Ital. *fama*, from Lat. *fama* = report, from *for* = to speak; Gr. *phēmē*, in Doric dial. *phama*, from *phēmi* = to say, speak.]

*1. Public rumor or report.

"And the fame hereof went abroad into all that land."—Matthew ix. 26.

*2. Report or opinion widely diffused; reputation, renown; notoriety or celebrity, favorable or unfavorable.

"At the very moment at which his fame and glory reached their highest point."—Macaulay: *Hist. Eng.*, ch. xi.

¶ Crabb thus discriminates between *fame*, *reputation*, and *renown*: "*Fame* . . . is the most noisy and uncertain; it rests upon report; *reputation* is silent and solid; it lies more in the thoughts, and is derived from observation. *Renown* . . . signifies the reverberation of a name: it is as loud as *fame*, but more substantial and better founded; hence we say that a person's *fame* is gone abroad; his *reputation* is established; and he has got *renown*. *Fame* may be applied to any object, good, bad, or indifferent; *reputation* is applied only to real eminence in some department; *renown* is employed only for extraordinary men and brilliant exploits."

He thus discriminates between *fame*, *report*, *rumor*, and *hearsay*: "*Fame* has a reference to the thing which gives birth to it; it goes about of itself without any apparent instrumentality. The *report* . . . has always a reference to the reporter. *Rumor* . . . has a reference to the flying nature of words that are carried; it is therefore properly a flying report. *Hearsay* refers to the receiver of that which is said; it is limited therefore to a small number of speakers or reporters. The *fame* serves to form or establish a character either of a person or a thing; it will be good or bad, according to circumstances. . . . The *report* serves to communicate information of events; it may be more or less correct according to the veracity or authenticity of the reporter: the *rumor* serves the purposes of fiction. . . . the *hearsay* serves for information or instruction, and is seldom so incorrect as it is familiar." (Crabb: *Eng. Synon.*)

***fame** (3), *s.* [Fr. *faim*.] Hunger.

II. Technically:

*1. Biology:

(1) *Zoöl.*: An assemblage of genera or of sub-families akin to each other, and naturally grouping themselves around a typical genus. Macleay, Swainson, and the other advocates of the now abandoned Quinary system, introduced great precision into classification, and considered that in Zoölogy there were nine ranks or grades in a natural classification of animals—viz., (1) Kingdom, (2) Sub-kingdom, (3) Class, (4) Order, (5) Tribe, (6) Family, (7) Sub-family, (8) Genus, (9) Sub-genus. Families were uniformly made to end in *Mod. Lat. -ida*, from Gr. *eidos* = form.

This termination for a zoölogical family still almost, though not quite, universally prevails. Other terms are sometimes intercalated in both zoölogy and botany, viz., sub-class, sub-order, &c.

(2) *Bot.*: A group of plants, or a group of sub-families, or a group of genera, or a group of species, or a group of individuals, or a group of parts, or a group of organs, or a group of functions, (2) *Bot.*: Here the term is used with less precision, and with divers meanings. Most commonly it is made synonymous with order; thus the Euphorbiaceae Order and the Euphorbiaceae Family are the same. In this *Encyclopaedic Dictionary* Family has been used after the analogy of zoological nomenclature for those groups of plants which terminate in *-idae*; thus the Orchidaceae are called an order; its primary division Malaceae, Epiden-dree, &c., tribes; and the division, &c., of them Liparidæ, Dendrobideæ, &c., families.

(3) *Phil.*: A group of cognate languages.

"We have called a certain body of languages a *family*, the Indo-European. The name *family* was applied to it by strict analogy with the use of the same term elsewhere; the languages in question had been found, on competent examination, to show good evidence of descent from a common ancestor."—*Whitney: Life and Growth of Language*, ch. xii.

(3) *Med.*: Family diseases, called also hereditary diseases, are those inherited from progenitors, or those an hereditary tendency to which is in the constitution.

(4) *Chem.*: A group of compounds having a common element. Thus the several members of the alcohol family agree in containing the radical ethyl.

B. As adj.: Of or belonging to a family; as, a family seat, family connections, &c.

¶ (1) *Arms of family*:

Her.: Those arms received by some distinguished person, and borne with modifications by all his descendants.

¶ (2) *Family-head*:

Naut.: An old name for the stern of a vessel when it was surmounted by several full-length figures.

(3) *Family of Love*:

Church Hist.: A Christian sect founded about A. D. 1546 in the Netherlands by Henry Nicolai, or Nicolas of Munster, who, in the latter years of Edward VI., passed over to England and joined the Dutch Church in London. He regarded himself as a chosen servant of God by whom a new revelation was to be made to the world. He considered doctrine as of little importance, but the possession of piety and love all in all. His followers, though as a rule quite moral, were cheerful to an extent which gave offense to some. In 1575 they laid a confession of their faith before Parliament, and applied unsuccessfully for toleration. In 1580, Queen Elizabeth and her Council made an effort to suppress them. They were denounced by proclamation, and their books ordered to be burned in October, 1580. In 1604 and 1645, Blunt says that: "Familists were extreme Antinomians. Strype mentions two sections of them, the Family of the Mount, and the Family of the Essentialists, who denied the existence of sin. There was thus gross immorality among them, and Penn and Baxter speak in severe terms of their excesses." (*Blunt: Dict. of Sects*, &c.) Among those who wrote against them were Henry Moore and George Fox, the founder of the Quakers. They were also called Familists (q. v.).

¶ Crabb thus discriminates between *family*, *house*, *lineage*, and *race*: "*House* figuratively denotes those who live in the same house, and is commonly extended in its signification to all that passes under the same roof; hence we rather say that a woman manages her *family*; that a man rules his *house*. The *family* is considered as to its relationships; the number, union, condition and quality of its members: the *house* is considered more as to what is transacted within its walls. We speak of a numerous *family*, a united or an affectionate *family*, a mercantile *house*; the *house* (meaning the members of the House of Parliament). In an extended application of these words they are made to designate the quality of the individual, in which case *family* bears the same familiar and indiscriminate sense as before; *house* is employed as a term of grandeur. When we consider the *family* in its domestic relations, in its habits, manners, connections and circumstances, we speak of a genteel *family*, a respectable *family*, the royal *family*; but when we consider it with regard to its political and civil distinctions, its titles and its power, then we denominate it a *house*, as an illustrious *house*; the *house* of Bourbon, of Brunswick, or of Hanover; the imperial *house* of Austria. *Family* includes in it every circumstance of connection and relationship; *lineage* respects only consanguinity; *family* is employed mostly for those who are coeval; *lineage* is generally used for those who have gone before. *Race*, from the Latin *radix*, a root, denotes the origin or that which constitutes their original point of resemblance. A *family* supposes the closest alliance; a *race* supposes no closer connection than what a common property creates. *Family* is confined to a comparatively small number: *race* is a term of extensive import, including all mankind, as the human *race*; or particular nations, as the *race* of South-sea Islanders; or a particular *family*, as the *race* of the Heraclides: from Hercules sprang a *race* of heroes." (*Crabb: Eng. Synon.*)

family-man, *s.* One who leads a domestic life; one who has a family or household.

family-tie, *s.* The bond of union and affection between members of the same family.

family-way, *s.* A state of pregnancy.

¶ *In the family-way*: Pregnant.

fām-ine, **fām-yn*, **fām-yne*, *s. & a.* [Fr. *famine*, from Low Latin **famina*, from Latin *fames*=hunger; Fr. *faim*; O. Sp. *fame*.]

A. As substantive:

1. *Ord. Lang.*: Scarcity of food; dearth; great distress for want of food; destitution.

"Famine and meager want besieged us round."

Pope: *Homer's Odyssey*, xii. 394.

2. *Hist.*: In the hotter countries rain is not diffused as uniformly over the year as in this country, but is nearly limited to one portion of it. In India, for example, the rainy season lasts four months, and then there are eight of dry weather. Whereas, in such regions, no means are taken to store the water for the purpose of irrigation, drought great enough to be destructive to crops will sooner or later take place and famine supervene. Of such a drought and dearth there is a highly graphic description in Jer. xiv. 1-6. Many famines are recorded in Scripture (Gen. xii. 10, xxvi. 1, xli. 54-57; Ruth i. 1; 2 Sam. xxi. 1; 1 Kings xviii. 26; 2 Kings xxv. 3; Jer. lii. 6). Most of these were produced by drought, others by sieges or other military operations. India has long been the seat of famines. Mr. Mill mentions one between A. D. 1640 and 1655, which extended all through India and beyond it; one in the Deccan in 1661; one in Bengal in 1770, which is said to have destroyed one-third of the inhabitants of that large and very populous province; these were produced by drought. One in Madras in 1782 arose from the ravages of Hyder Ali's army. More recent Indian famines were in the North-Western Provinces in 1837-8, when it is said that more than 800,000 people died; in Bengal and Orissa in 1865-6, when about a million perished; in Bengal in 1874, which was so successfully grappled with, but at an expense of about six million pounds of money, that few died; and finally one in Bombay, Madras, and Mysore, in 1876-7, less successfully treated, for the deaths are by some estimated at half a million. A portion of the Indian revenues are now annually set aside to constitute a famine fund.

Famines have occurred in Europe in ancient and mediæval, and in modern times. England was visited by them in 1087, 1251, 1315, 1335, 1353, &c. Famines have several times taken place in Ireland, owing to the failure of the potato crop, on which the mass of the people have too exclusively depended for subsistence. The most notable one was that in 1846, which led to the abolition of the British Corn Laws (q. v.). Ten millions of pounds were voted by Parliament in 1847, to relieve the distress.

B. As adj.: Of or pertaining to a famine; occurring in or characteristic of a time of famine.

"Wheat was at seventy shillings the quarter, which would even now be considered as almost a famine price."—*Macaulay: Hist. Eng.*, ch. iii.

famine-fever, *s.*

Medical:

1. Typhus fever.

2. Relapsing fever.

famine-pined, *a.* Wasted by famine. (*Dryden: Virgil; Georgic* iv. 382.)

fām-ish, **fām-ysh*, *v. i. & t.* [Formed with suff. *-ish*, from the base *fam*- seen in O. Fr. *afamer*, Fr. *affamer*, by analogy with *languish*, *demolish*, &c. The base *fam*- is from Lat. *fames*=hunger.]

A. Intransitive:

I. Literally:

1. To suffer extreme hunger; to suffer from deprivation of food.

"You are all resolved rather to die than *famish*!"—*Shakespeare: Coriolanus*, i. 1.

2. To die of hunger or want of food.

"All the race
Of Israel here had *famished*, had not God
Rained from heaven manna."

Milton: *P. R.*, ii. 811.

**II. Fig.*: To be or become exhausted; to faint.
"The Lord will not suffer the soul of the righteous to *famish*."—*Proverbs* x. 3.

B. Transitive:

I. Literally:

1. To reduce to great straits by deprivation of food; to distress by famine or dearth.

"The land of Egypt and the land of Canaan were *famished* by reason of the dearth."—*Bible* (1651), *Genesis* xlvii.

2. To kill with hunger or starvation; to starve.

"What, did he marry me to *famish* me?"—*Shakespeare: Taming of the Shrew*, iv. 3.

*3. To reduce, force, or compel by famine.

"He had *famished* Paris into a surrender."—*Burke: On the French Revolution*.

II. Figuratively:

1. To deprive of anything necessary to the preservation of life.

"Famished him of breath, if not of bread."

Milton: *P. L.*, xii. 78.

2. To affect with extreme cold.

*3. To exhaust, to wear out.

"That were nectar
Unto my *famished* spirits."

Ben Jonson: *Sejanus*, iv. 1.

**fām-ish-mēnt*, **fām-ysh-mēnt*, *s.* [English *famish*; *-mēnt*.] The state or pain of extreme hunger or want of food; famine.

"And Elijah went to show him self unto Ahab, for there was a great *famishment* in Samaria."—*Bible* (1651), 3 *Kings* xviii.

**fā-mōs'-l-tŷ*, *s.* [Fr. *famosité*, from Lat. *famositas*, from *famosus*=famous; Ital. *famosità*.] Fame, renown, celebrity.

fām-oūs, **fām-ouse*, *a.* [Fr. *fameux*, from Lat. *famosus*=renowned or noted, either for good or ill; *fama*=fame, renown; Sp., Port., & Ital. *famoso*.] [FAME, *s.*]

1. Renowned, celebrated, much talked of, distinguished, illustrious.

"There was a clerke, one Lucius,
A courtier, a famous man." Gower, v.

2. It is followed by *for* before the thing for which one is famed.

"He consulted several men famous for their skill in polite literature."—*Mason: Life of Mons. Du Fresnoy*.

3. Noted, much spoken of, conspicuous, whether for good or ill; notorious.

"Meneceates and Menas, famous pirates,
Make the sea serve them."

Shakespeare: *Antony and Cleopatra*, i. 4.

4. Of good character, trustworthy; opposed to *infamous*.

*5. Injurious to the character of another; libelous, calumnious, slanderous, defamatory.

"That na manner of man mak, write, or imprint any billis, writings, or balladis, famous or slanderous to any person spiritual or temporal."—*Balfour: Pract.*, p. 537.

¶ Crabb thus discriminates between *famous*, *celebrated*, *renowned*, and *illustrious*: "*Famous* is a term of indefinite import: it conveys of itself frequently neither honor nor dishonor, since it is employed indifferently as an epithet for things praiseworthy or otherwise: it is the only one of these terms which may be used in a bad sense. The others rise in a gradually good sense. The *celebrated* is founded upon merit and the display of talent in the arts and sciences; it gains the subject respect: the *renowned* is founded upon the possession of rare or extraordinary qualities, upon successful exertions and an accordance with public opinion; it brings great honor or glory to the subject: the *illustrious* is founded upon those solid qualities which not only render one known but distinguished; it ensures regard and veneration. A person may be *famous* for his eccentricities; *celebrated* as an artist, a writer, or a player; *renowned* as a warrior or a statesman; *illustrious* as a prince, a statesman, or a senator." (*Crabb: Eng. Synon.*)

**fā-mōused*, *a.* [English *famous*; *-ed*.] Celebrated, renowned, illustrious, noted.

**fā-mōis-lŷ*, *adv.* [Eng. *famous*; *-ly*.]

*1. By common report, notoriously; commonly.

"As for the religion of Mahomet, it is *famously* known to have been planted by force at first."—*Tillotson: Sermons*, vol. i., ser. 20.

2. In a famous, renowned, or illustrious manner; with great fame or renown.

"Then this land was *famously* enriched
With politic grave counsel."

Shakespeare: *Richard III.*, ii. 3.

3. Capitably, very well, splendidly. (*Slang.*)

**fā-mōūs-nēs*, *s.* [Eng. *famous*; *-ness*.] The quality of being famous; fame, renown, celebrity.

"Not by *famousness* of name, nor portliness of life."

Udall: *Luke* i.

**fām-u-lāte*, *v. i.* [Lat. *famulatus*, pa. par. of *famular*, from *famulus*=a servant.]¹ To serve. (*Cockeram.*)

**fām-u-lā-tive*, *a.* [Lat. *famulatus*, pa. par. of *famular*.] Serving, aiding, abetting.

"As being *famulative* alwaies to brutish, and many times to unlawful lusts."—*Cudworth: Intellectual System*, p. 45.

**fām-u-lūs*, *s.* [Lat.=a servant.]

1. The assistant of a magician.

"The magician's *famulus* got hold of the forbidden book, and summoned a goblin."—*Carlyle*.

2. A drudge.

bōil, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.

fān, *fanne, *s.* [A. S. *fann*, from Lat. *vannus*; Old Fr. *van*; Fr. *fan*; Ital. *vanno*; O. H. Ger. *vanna*; Sw. *vanna*; Dut. *wan*, *wanne*=a fan, *wannen*=to fan.]

I. Ordinary Language:

1. Literally:

(1) An instrument or device waved or rotated to cause a circulation of air. [II.]

"I have erected an academy for the training of young women in the exercise of the fan."—*Addison: Spectator*, No. 102.

(2) The instrument by which the chaff is blown away when corn is winnowed.

"Y shall scatter them with a fan in the yatus of the lond."—*Wycliffe: Jeremiah xv. 7.*

2. Figuratively:

(1) Anything spread out, like a lady's fan, into a triangle with a broad base.

"As a peacock and crane were in company, the peacock spread his tail, and challenged the other to show him such a fan of feathers."—*L'Estrange: Fables.*

(2) The quintain (q. v.). So called from its turning round like a weathercock, in exact proportion to the force of the blow delivered on the flat board.

"Now, sweete sir, will ye just at the fan."

Chaucer: C. T., 16,991.

(3) Anything by which the air is moved, such as wings.

"The prisoner with a spring from prison broke, Then stretched his feathered fans with all his might, And to the neighboring maple winged his flight."—*Dryden: Cook and Fox*, 769-71.

(4) Any agency or influence which tends to excite or stimulate the activity or strength of a passion, or emotion, as a fan excites flame.

"Nature worketh in us all a love to our own counsels; the contradiction of others is a fan to inflame that love."—*Hooker: Eccles. Polity*, (Pref.)

II. Technically:

1. *Mach.*, &c.: A device for exciting a current of air, either for ventilation or for urging a fire; as,

(1) An instrument made of palm-leaves, carved wood, ivory, &c., mounted on a handle, and used by ladies to agitate the air and cool the face.

(2) Any contrivance of vanes or flat discs, revolving by the aid of machinery, as for winnowing corn, for cooling fluids, urging combustion, assisting ventilation, &c.

(3) An apparatus for checking or regulating, by the resistance of the air to its motion, the velocity of light machinery, as in a musical box; a fly.

(4) An apparatus, called also a *fan-governor*, for regulating the throttle-valves of steam-engines.

(5) The small vane which turns the cap of the smock-mill on its axis, to keep the sails presented to the wind.

2. *Eccles.*: [FLABELLUM.]

fan-blast, *s.*

Iron-work.: The blast produced by a fan, in contradistinction to one produced by a blowing-engine.

fan-blower, *s.* A blower in which a series of vanes fixed on a rotating shaft creates a blast of air for forge purposes, or a current for draught or ventilation. Blowers are *plenum* (pressure), or *vacuum*, which is equivalent to exhaust; either form is used for the various purposes of ventilation, air-draft for furnaces, &c. [BLOWER; FANNING-MILL.]

fan-brakes, *s.* The resistance of a fluid to a fan rotating in it.

fan-coral, *s.*

Zool.: The name of the genus *Rhipidogorgia*, belonging to the family *Gorgoniidae*.

fan-cricket, *s.*

Entom.: *Gryllotalpa vulgaris*, called also the Fen-cricket or Mole-cricket or Churr-worm. It digs for itself a small hole in the ground.

fan-foot, *s.*

1. *Entom.*: A name given to the genus of moths *Polypogon*.

2. *Zool.*: *Ptyodactylus gecko*, a species of lizard, a native of Northern Africa, reputed to be exceedingly venomous. The toes form at the extremities round discs (whence the name *Fan-foot*), enabling the animal to climb up walls; the claws are retractile. The venom is said not to be injected by the teeth, but to be exuded from the lobules of the toes, whence the scientific name *Ptyodactylus*, from Gr. *ptyō*=to spit, and *daktylos*=a finger or toe.

fan-governor, *s.* [FAN, *s.* II. i. (4).]

fan-light, *s.*

Arch.: A window in shape of an open fan; the light placed over a doorway.

fan-like, *a.*

1. *Ord. Lang.*: Resembling a fan in form or appearance.

2. *Bot.*: Leaves which are folded up like a fan; also called *Plicate* (q. v.).

fan-nerved, *a.*

1. *Bot.*: Having the nerves or nervures radiating and arranged in the manner of a fan.

2. *Entom.*: In the same sense as 1.

fan-palm, *s.*

Bot.: A name applied to all palms having fan-shaped or flabelliform leaves, represented in Southern Europe and Northern Africa by *Chamærops humilis*, occupying extensive sandy plains and rocky places, generally growing in a crowded caespitose manner without stem, the length of the leaves not exceeding three or four feet; but in cultivation, by the suppression of suckers, it forms a stem which attains a height of twenty to thirty feet. A tough fiber is obtained from the leaves, which is used for many purposes, such as making ropes, brushes, &c. The name is more particularly applied to plants of the genus *Corypha*, such as the Talipot tree, *Corypha umbraculifera*, a native of Ceylon and Malabar. [CORYPHA, TALIPOT.]

fan-shaped, *a.*

1. *Ord. Lang.*: Resembling a fan in shape or form.

2. *Bot.*: Plaited like a fan, as the leaves of *Borassus flabelliformis*.

Fan-shaped window:

Arch.: A window consisting of rather more than a semicircle, the circumference of which is cut out in circular notches. Windows of this kind are frequent in the early German style of architecture.

fan steam-engine, *s.* An engine, the action of which is the inverse to that of the fan. The outer annular casing receives steam from the boiler, and discharges from its inner surface in tangential jets upon the scoop-shaped blades which are attached to a rotating shaft.

fan-tail, *s.*

1. *Zoology*:

(1) A genus of Australian birds (*Rhipidura*) belonging to the family *Muscicapidae*. They derive their name from the fan-like shape of their tails.

(2) A variety of the domestic pigeon.

Fan-tail warbler:

Ornith.: *Cisticola cursitans*, a very tiny bird, somewhat like a diminutive lark. It is a native of Southern Europe, Africa, India, and China. It is remarkable for the very neat and beautiful nest which it makes.

fan-tickles, *s. pl.* [FARTICKLES.]

fan-tracery, *s.*

Arch.: A term applied to tracery used in vaulting, in which all the ribs that rise from the springing of the vault have the same curve, and diverge equally in every direction, producing an effect not unlike that of the stiff portions of a fan. It was used in late pointed work.

Fan-tracery vaulting:

Arch.: A very complicated mode of roofing or vaulting used in the Perpendicular style, in which the vault is covered with fan-tracery. It is peculiar to English Gothic. Very fine examples of it exist in England in Henry VII.'s Chapel, Westminster; St. George's Chapel, Windsor; King's College Chapel, Cambridge; and the cloisters of Gloucester Cathedral.

fan-veined, *a.*

Bot.: Applied to a leaf whose veins or ribs are arranged like those of a fan.

fan-wheel, *s.* A fan-blower; an apparatus consisting of a shaft armed with wings or beaters revolving in a case. It is used in grain-cleaners, winnowing-machines, blowers for furnaces, &c., and is the most common device for obtaining a blast of air for any purpose.

fān, *fan-nen, *van-ni, *v. t.* [FAN, *s.*]

1. Literally:

"To move, agitate, or set in motion as with a fan." "They summed their pens, and soaring the air sublime,

With clang despised the ground . . . the air floats as they pass, fanned with unnumbered plumes." *Milton: P. L.*, vii. 432.

2. To cool or refresh by causing a current of air to pass over the face with a fan.

"I would not have a slave to till my ground, To carry me, to fan me while I sleep." *Cowper: Task*, ii. 29, 30.

3. To blow upon; to ventilate.

"Gentle airs, due at their hour To fan the earth, now waked." *Milton: P. L.*, x. 94.

4. To winnow; to separate the chaff from, and drive it away by a current of air.

"Chaff, which fanned, The wind drives." *Milton: Ps. i. 11.*

II. Figuratively:

1. To excite, to stimulate, or increase the activity or strength of, as a fan excites a flame.

"By slow degrees he fans the gentle fire, Till perseverance makes the flame aspire." *King: Art of Love*, pt. xiv.

2. To separate as by winnowing; to discriminate. "I have collected some few therein, fanning the old, not omitting any."—*Bacon*.

fā-nāl, *s.* [Fr.] A lighthouse; more specifically, the apparatus placed in a lighthouse to give light.

fān-ām, *s.*

1. A money of account formerly used in Madras; value about 3½ cents.

2. A Ceylon copper coin worth about 3 cents.

fā-nāt-ic, *fā-nāt-ick, *a. & s.* [Fr. *fanatique*, from Lat. *fanaticus*=(1) pertaining to a temple, (2) inspired, enthusiastic, from *fanum*=a temple; Sp. & Ital. *fanatico*.]

A. As adjective:

1. Wild or extravagant in opinions, particularly on points of religion; enthusiastic to an extreme; struck or possessed with a kind of frenzy or craze on certain subjects; bigoted.

"Thy country, Wilberforce, with just disdain, Hears thee by cruel men and impious called Fanatic." *Cowper: To Wilberforce*.

2. Characterized by fanaticism; extravagant; enthusiastic.

"Nor that wild energy which leads The enthusiast to fanatic deeds." *Hemans: A Tale of the Secret Tribunal*.

B. As subst.: A person entertaining wild or extravagant ideas upon any subject, particularly on points of religion; an enthusiast; a bigot.

"Alas for thee, fair Greece! when Asia poured Her fierce fanatics to Byzantium's walls." *Hemans: Modern Greece*.

† (1) For the difference between *fanatic* and *visionary*, see ENTHUSIASM.

(2) The words *fanatic* and *enthusiast* differ in meaning. A *fanatic* is an *enthusiast* transformed or developed. A typical *enthusiast* has a warm imagination and a sensitive heart, with the malignant element still latent. He lives only for one object; and when he encounters opposition in carrying that single object out, the malignant element is apt to be excited and become permanently conspicuous in his character, after which he is no longer an *enthusiast* but a *fanatic*. *Fanaticism* is thus *enthusiasm* with the malignant element quickened into activity. (*Isaac Taylor: Nat. Hist. Enthusiasm*.)

fā-nāt-ic-al, *a.* [Latin *fanatic(us)*, and Eng. adj. suff. *-al*.] The same as FANATIC (q. v.).

"Yet no ingratitude could damp the ardor of his fanatical loyalty."—*Macaulay: Hist. Eng.*, ch. xvi.

fā-nāt-ic-al-ly, *adv.* [English *fanatical*; *-ly*.] In a fanatical manner; with excessive enthusiasm; wildly.

"The whole body of working men was fanatically devoted to her cause."—*Macaulay: Hist. Eng.*, ch. v.

fā-nāt-ic-al-ness, *s. [Eng. *fanatical*; *-ness*.] The quality or state of being fanatical; fanaticism.

fā-nāt-ic-ism, *s.* [Eng. *fanatic*; *-ism*.] Wild and extravagant notions or opinions, particularly on points of religion; excessive enthusiasm; religious frenzy; bigotry; fervid zeal. [FANATIC, ¶ (2).]

"With Wildman's fanaticism was joined a tender care for his own safety."—*Macaulay: Hist. Eng.*, ch. v.

fā-nāt-ic-ize, *v. t. & i.* [Eng. *fanatic*; *-ize*.]

1. *Trans.*: To render fanatical.

2. *Intrans.*: To act as a fanatic.

"Fighting and fanaticizing amid a nation of his like."—*Carlyle: French Revolution*, pt. iii., bk. iii., ch. ii.

fān-a-tism, *s. [Fr. *fanatisme*; Ital., Sp. & Port. *fanatismo*.] Religious frenzy or enthusiasm; fanaticism.

fān-cī-cal, *a. [Eng. *fancy*; *c* connective; *-al*.] Fanciful.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

fān'-gled, pa. par. & a. [FANCY, v.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. Formed in the fancy or imagination; imaginary.

"More than thy fancied guilt with jealous pangs could sting."
Hemans: The Maremma.

2. Esteemed, thought highly of, liked, valued, attractive.

fān'-gl-ēr, s. [Eng. fancy; -er.]

1. One who fancies or imagines anything.

2. One who takes a fancy or liking to anything; an admirer.

3. One who breeds and keeps for sale birds, animals, &c., as, a pigeon-fancier, a bird-fancier.

"It would prevent the comb of the male from being perfectly upright, which would be abhorrent to every fancier."—Darwin: Descent of Man (1871), vol. ii, p. 159.

fān'-gl-fūl, a. [Eng. fancy; -ful(l).]

1. Dictated by or arising in the fancy or imagination; appealing to or pleasing the fancy; wild; as, a fanciful theory.

2. Curiously or extravagantly constructed or shaped; fantastic.

"I love a fanciful disorder,
And straggling out of rule and order."

Lloyd: Familiar Letter of Rhyme.

3. Existing only in the imagination; fancied, imaginary.

"Shake at shadows fanciful and vain."

Dryden: Lucretius, ii.

4. Guided by the fancy or the imagination rather than by reason.

"It seemed to a fanciful view
To weep for the buds it had left with regret."

Cowper: The Rose.

5. Subject to the influence of fancy; whimsical, capricious, fantastical.

"The English are naturally fanciful."—Addison.

¶ Crabb thus discriminates between *fanciful*, *fantastical*, *whimsical*, and *capricious*: "*Fanciful* and *fantastical* are both employed for persons and things; *whimsical* and *caprice* are mostly employed for persons or for what is personal. *Fanciful*, in regard to persons, is said of that which is irregular in the taste or judgment; *fantastical* is said of that which violates all propriety, as well as regularity: the former may consist of a simple deviation from rule; the latter is something extravagant. A person may, therefore, sometimes be advantageously *fanciful*, although he can never be *fantastical* but to his discredit. Lively minds will be *fanciful* in the choice of their dress, furniture, or equipage: the affectation of singularity frequently renders people *fantastical* in their manners as well as their dress. *Fanciful* is said mostly in regard to errors of opinion or taste; it springs from an aberration of the mind: *whimsical* is a species of the *fanciful* in regard to one's likes or dislikes; *capricious* respects errors of temper, or irregularities of feeling. The *fanciful* does not necessarily imply instability; but the *capricious* excludes the idea of fixedness. One is *fanciful* by attaching a reality to that which only passes in one's own mind; one is *whimsical* in the inventions of the fancy; one is *capricious* by acting and judging without rule or reason in that which admits of both. . . . In application to things, the terms *fanciful* and *fantastical* preserve a similar distinction; what is *fanciful* may be the real and just combination of a well-regulated fancy, or the unreal combination of a distempered fancy; the *fantastical* is not only the unreal but the distorted combination of a disordered fancy." (Crabb: Eng. Synon.)

fān'-gl-fūl-lŷ, adv. [Eng. fanciful; -ly.]

1. In a fanciful, curious, or fantastical manner; fantastically.

"Just as ancient Egyptian wisdom did in hieroglyphic symbols *fancifully* analogized."—Warburton: Divine Legation, bk. iv, § 14.

2. In a whimsical, capricious, or fantastical manner.

fān'-gl-fūl-nēss, s. [Eng. fanciful; -ness.] The quality of being fanciful, or arising in the fancy rather than in reason.

"The fancifulness of some of its imagery does not cool it in the least."—Athenæum.

fān'-gl-fŷ, v. i. [Eng. fancy; -fy.] To fancy.

fān'-gl-lēss, a. [Eng. fancy; -less.] Destitute of fancy or imagination, unimaginative; prosaic.

fān'-çŷ, *fan-sle, s. & a. [A corruption of the fuller form *fantasy* (q. v.); O. Fr. *fantasie*; from Low Lat. *fantasia*, *phantasia*, from Gr. *phantasia* = a making visible; imagination; *phantazō* = to make visible, and *phainō* = to bring to light, to shine; Sp., Port. & Ital. *fantasia*.] [FANTASIA, FANTASY.]

A. As substantive:

1. Ordinary Language:

1. The power by which the mind forms to itself images and representations of things, persons, or scenes of being; the creative faculty; imagination.

"In the soul
Are many lesser faculties, that serve
Reason as chief; among these fancy next
Her office holds." Milton: P. L., v. 102.

2. The result of such faculty or power; an image or representation formed in the mind; a conception, a thought, an idea, a conceit.

"While in dark ignorance we lay, afraid
Of fancies, ghosts, and every empty shade."
Buckinghamshire: Mr. Hobbes and his Writings.

3. An opinion bred rather in the imagination than in the reason; an idea or opinion resting upon insufficient grounds; a supposition; a capricious opinion or idea.

"Men's private fancies must give place to the higher judgment of that church which is in authority over them."—Hooker: Eccles. Polity.

4. Caprice, humor, whim.

"The sultan of Egypt kept a good correspondence with the Jacobites toward the head of the Nile, for fear they should take a fancy to turn the course of that river."—Arbuthnot: History of John Bull.

5. An inclination, liking, or fondness; taste.

"For you, fair Hermia, look you arm yourself,
To fit your fancies to your father's will."

Shakespeare: Midsummer Night's Dream, i. 1.

*6. Love.

"Tell me, where is fancy bred,
Or in the heart, or in the head?"

Shakespeare: Merchant of Venice, iii. 2.

*7. Taste, idea, conception of propriety.

"The little chapel called the Salvation is very neat, and built with a pretty fancy."—Addison.

*8. Some one or something which pleases or entertains without inspiring real affection or respect.

"London-pride is a pretty fancy for borders."—Mortimer: Husbandry.

*9. Fantasticalness.

"Costly thy habit as thy purse can buy,
But not expressed in fancy, rich not gaudy."

Shakespeare: Hamlet, i. 3.

*10. A love song; a song in general. [II. 1.]

"They were his fancies or his good-nights."
Shakespeare: Henry IV., Pt. II., iii. 2.

II. Technically:

1. Music:

(1) An old name for a composition in an impromptu style; a fantasy.

(2) A short piece of music without words. (Stainer & Barrett.)

2. Mental Phil.: The power or faculty called imagination, but so exercised as to bring into life mental pictures in which the grouping is founded on superficial points of similarity or other associations, rather than on the deeper and more natural affinities. The scenes or beings generated by fancy are cleverly rather than thoughtfully delineated, they are characterized by odd conceits fitted to give momentary pleasure or amusement, but not powerfully to affect the motions. Fancy is strong in children and women; imagination in men of genius.

3. Bot.: *Viola tricolor*. The name Fancy is given as a suggested explanation of the word Pansy, the common name for this flower. (Lyte, &c.)

B. As adj.: Adapted to please the fancy rather than for use; ornamental, elegant, fine; as, fancy goods.

¶ The fancy: A slang term for sporting characters generally, but especially for prize-fighters, dog-fanciers, &c.

"As the patrons of the fancy are proud of their champion's condition."—G. Eliot: Janet's Repentance, ch. ii.

¶ Crabb thus discriminates between *fancy* and *imagination*. "*Fancy*, considered as a power, simply brings the object to the mind, or makes it appear; but *imagination*, from *image*, is a power which presents the images or likenesses of things. The *fancy*, therefore, only employs itself about things without regarding their nature; but the *imagination* aims at tracing a resemblance, and getting a true copy. The *fancy* consequently forms combinations, either real or unreal, as chance may direct; but the *imagination* is seldom led astray. The *fancy* is busy in dreams, or when the mind is in a disordered state; but the *imagination* is supposed to act when the intellectual powers are in full play. The *fancy* is employed on light and trivial objects, which are present to the senses; the *imagination* soars above all vulgar objects, and carries us from the world of matter into the world of spirits, from time present to the time to come." (Crabb: Eng. Synon.)

fancy-ball, s. A ball at which the guests appear dressed in fanciful or fantastical costumes, representative of real, historical, or imaginary personages.

¶ To *fang* a well: To pour water into a pump, for restoring its power of operation.

"We believe, that to *fang* a well signifies to pour into it sufficient liquid to set the pump at work again."—*Blackwood's Magazine*.

fāng, *feng, *fenge, s. [A. S. *fang*=a taking, a seizing, **fangan*=to seize, take [FANG, v.]; Icel. *fang*=a catch of fish; Sw. *fång*=a catch; Ger. *fong*=a catch, a fang, a talon.]

I. Ordinary Language:

1. Literally:

*(1) The act of capturing, seizing, or taking.

"To my purpos breifly I will me haist,

How gud Wallace was set among his fayis.

To London with him Clyffurd and Wallang gais,

Quhar king Eduard was rycht fayn off that *fang*."

Wallace, xi. 1, 219.

*(2) That which is caught or taken; a thing caught; prey.

"Was thou not at me right now

And fedd me wit thi *fang* I trau?"

Cursor Mundi, 3, 728.

(3) A claw or talon.

(4) The tusk of a boar or other animal by which the prey is seized and held; a long, pointed tooth.

"Two mastiffs gaunt and grim her sight pursued,

And off their fastened *fangs* in blood embured."

Dryden: *Theodore and Honoria*, 113, 114.

2. Figuratively:

(1) A coil, or bend of a rope; a noose, a trap.

(2) The clutches or power of anything.

(3) Any shoot, or other thing by which hold can be taken.

"The protuberant *fangs* of the yuca."—*Evelyn*: *Kalendarium Hortense*.

(4) Power of seizing, or holding; as when a pump of a well has lost the power of suction, so that the water does not rise in it, perhaps from something being wrong about the well, the piston is said to have lost the *fang*. In this case water is poured in for restoring the power of operation. Here *fang* is used merely as denoting the power of apprehension, in a literal sense. For it obviously signifies the hold which the pump, as it were, takes of the water for bringing it up.

II. Technically:

1. Zoology:

(1) The lower part of a tooth; the portion imbedded in the jaw.

(2) (Pl.) The poison teeth of a serpent. [POISON FANG.]

It is performed by men and women taking hands, and forming a long line, and winding in and out with a waving motion. The manner of taking hands is peculiar. The men and women are placed alternately, each man's right hand is held by a woman's right hand, and his left by the left hand of another woman, so that along the line, when seen from the front of the row, there is a woman's face and a man's back, and the reverse. The dance is sometimes made the means of fanning popular excitement. . . . The figures of the Farandola, by the name of the Spanish Dance, were well known in English ballrooms thirty years since. (*Stainer & Barrett*.)

farce, *s.* [Fr.=a stuffing in meat; a fond and dissolute play (*Cotgrave*), from *farcer*=to stuff; Lat. *farctio*; Ital. *farza*.]

*1. Seasoning, stuffing, &c., of meat; forcemeat.

*2. A composition of different foods.

3. Originally a petty show exhibited in the street; now a recognized performance at the theaters. The difference between comedy and farce is that the former keeps to nature and probability, and therefore is confined to certain laws allowed by critics; whereas farce sets aside all laws upon occasion. Its end is to make merry, and it sticks at nothing that may further it. Hence the dialogue is usually low, the persons of inferior rank, the fable or action trivial or ridiculous, and nature and truth everywhere heightened and exaggerated to make more palpable ridicule.

"Farce is that in poetry which grotesque is in picture. The persons and actions of a farce are all unnatural, and the manners false, that is, inconsistent with the characters of mankind."—*Dryden: Parallel of Poetry and Painting*.

4. Ridiculous or empty show or parade; mere show.

"My lord, eat also, though the *färe* is coarse."

Tennyson: Geraint and Enid, 1,067.

8. The quantity of fish taken in a fishing-boat.

9. The fishing season for cod.

¶ Crabb thus discriminates between *fare* and *provision*: "These terms are alike employed for the ordinary concerns of life, and may either be used in the limited sense for the food one procures, or in general for whatever necessary or convenience is procured; to the term *fare* is annexed the idea of accident; *provision* includes that of design; a traveler on the continent must frequently be contented with humble fare, unless he has the precaution of carrying his *provisions* with him." (*Crabb: Eng. Synon.*)

fare-box, *s.* A place of deposit for fares in some smaller kinds of street-cars, particularly in the kind known as the "bob-tail" car, on which no conductor or collector is employed.

farm, *farme, *ferme, *s. & a.* [A. S. *feorm*=a feast, from Low Lat. *firma*=a feast, a tribute; O. Fr. *ferme*. The modern sense of *farm* arose by degrees. In the first place lands were let on condition of supplying the lord with so many nights' entertainment for his household. Thus the *Saxon Chron.*, A. D. 775, mentions land let by the Abbot of Peterborough, on condition that the tenant should annually pay £50, and *anes nihtes feorme*, one night's entertainment. This mode of reckoning constantly appears in *Domesday Book*: "Reddet *firma* trium noctium—i. e., 100 libr." The inconvenience of payment in kind early made universal the substitution of a money payment, which was called *firma alba* or *blanche ferme*, from being paid in silver or white money instead of victuals. Sometimes the rent was called simply *firma*, and the same name was given to the *farm*, or land from whence the rent accrued. From A. S. the word seems to have been adopted in Fr. *ferme*=a farm, or anything held in farm; a lease. (*Wedgwood*.)]

A. As substantive:

*1. Food; a feast, a meal.

"This haste *farme* hadde bene a feast."
Chaucer: *Dream*, 1,752.

*2. Tribute.

"The *fermez* he fangez of fyftene rewmes."

farm-ër, *farm-our, *ferm-our, *s.* [English *farm*; *-er*.]

I. Ordinary Language:

1. One who farms or contracts to collect taxes, imposts, duties, &c., for a certain payment per cent.

"He met one day . . . a publican or farmer of the foreign taxes and tribute for the city."—P. Holland: *Plutarch*, p. 762.

2. One who farms or cultivates ground; an agriculturist; a husbandman.

"Nothing is of greater prejudice to the farmer than the stocking of his land with cattle larger than it will bear."
—Mortimer: *Husbandry*.

II. Eng. Min. Law: The lord of the field, or one who farms the lot and cope of the crown.

† Crabb thus discriminates between *farmer* and *agriculturist*: "The *farmer* is always a practitioner; the *agriculturist* may be a mere theorist: the *farmer* follows husbandry solely as a means of living; the *agriculturist* follows it as a science: the former tills the land upon given admitted principles; the latter frames new principles, or alters those that are established. Betwixt the *farmer* and the *agriculturist* there is the same difference as between practice and theory. . . . Farming brings immediate profit from personal service; *agriculture* may only promise future, and consequently contingent advantages." (*Crabb: Eng. Synon.*)

farmer-general, *s.* In France, one of a company which, under the monarchy, contracted with the government for the privilege of collecting certain taxes, paying over to the government a certain fixed sum each year, and taking the proceeds of the taxes as their equivalent. far'-o, ***phar'-ao**, ***phar'-aoh**, ***phar'-aon**, ***phar'-o**, *s.* [From Fr. *pharaon*; Ger. *farospiel* = the game of faro; the name is said to be derived from the name of the ancient kings of Egypt, a representation of a Pharaoh having been depicted on one of the cards.]

Cards: A game of cards, in which the player plays against the bank, which is kept by the proprietor of the table. It was introduced into France by the Venetian ambassador in 1674, in a form like bassette; but so many nobles were ruined by this game that Louis XIV. made a law against it. To elude this law it was called *Pour et Contre*, which gave rise to new prohibitions, to evade which the name Pharaoh was adopted. The game essentially consists in betting on which of two piles into which the cards are alternately dealt, a certain card will fall. It is played with a "lay-out" of thirteen cards, ranging from ace to king, inclusive, and a pack of fifty-two cards dealt from a box, one at a time, into two piles, alternately, as above said. There are various percentages accruing to the dealer, the principal one being known as a split, which occurs when two cards of the same denomination follow in succession from the box, in which case the dealer takes half the sum bet by the player. When but two or three cards remain to be dealt, the player who succeeds in naming the order in which they will appear (or "calls the turn," as the gambler hath it) receives from two to four to one, according to the denomination of the cards, the amount being determined by the doctrine of chances.

faro-bank, *s.* A bank or deposit of money against which the players play in the game of faro; a gambling house or room.

The hoopskirt of latter days is the lineal descendant of the farthingale.

***far'-tī-gal**, *s.* [FARTHINGALE.]

fās'-cēs, *s. pl.* [Lat. pl. of *fascis* = a bundle.]

1. *Rom. Antiq.:* The most ancient insignia of the Roman magistrates, consisting of bundles of elm or birch rods, in the center of which was an ax. The custom was borrowed from the Etruscans, and some authors assert that it was known in the time of Romulus, while others maintain that Tarquinius Priscus was the first to adopt it. After the banishment of Tarquinius Superbus, the fasces were carried before the consuls by men called *lictores*; but this honor was granted to the consul-major only. The consul and pro-consul had twelve *lictores*, each of whom carried a fasces; the dictator had twenty-four, and when in Rome the ax was carried before him. The pretors of the towns had only two fasces; those of the provinces and the army six. Under the empire the consuls, who were merely civil magistrates, had twelve fasces, while the pro-pretors and pro-consuls were allowed six, and this lasted till the fall of Rome.

*2. *Fig.:* A nymblem of authority.

"You must submit your fasces to theirs."—Burke: *Affairs of Ireland*.

fās-qi-q (or **fā-shī-q**), *s.* [Lat.=a sash, a band, a fillet.]

1. *Dress*: A bandage employed in various ways, as—

* (1) A diadem, worn round the head as an emblem of royalty, the color being white: that worn by women was purple.

* (2) As a support to the breast by women.

* (3) As a bandage round the legs, especially of women, from the ankle to the knee, serving as a protection or a support to the legs of the wearer, a practice that was adopted in Europe in the middle ages.

(4) As a bandage for enswathing the bodies of infants, as practiced by the modern peasants of Italy.

"The fascia is found a convenient style of dress for mothers and nurses."—*Country Life in Italy*, in *Cornhill Magazine*, Nov., 1881.

2. *Anat.*: A thin, tendon-like covering surrounding the muscles of the limbs, and binding them in their places; a tendinous expansion or aponeurosis. The fasciæ are named from (1) the position, as the *anal* and *lumbar* fasciæ; (2) from some peculiar function, as the *cremasteric*; or (3) from some peculiarity, as the *cribriform* fascia.

3. *Arch.*: A flat architectural member in an entablature or elsewhere; a band or broad fillet. The architrave in the more elegant orders of architecture is divided into three bands, which are called fasciæ; the lowest being called the first fascia, the middle one the second, and the upper one the third. When there are only two fasciæ, as in the annexed cut, they are called the Upper and the Lower. The term is also applied to the board or strip over a shop-front, on which the name, &c., of the owner or occupier is written.

"The architrave consists of three fasciæ or bands."—*Rees: Cyclopædia*.

* 4. *Astron.*: The belt of a planet.

"Jupiter's fasciæ, or belts, are more luminous than the rest of his disc, and are included between parallel lines."—*Oxford: Encyclopædia*.

* **fās-qi-āte**, *s.* [FASCINATE, *v.*] Fascination, enchantment, magic.

fās-qi-ā-tion, *s.* [Lat. *fascinatio*, from *fascinus*, *pa. par.* of *fascino*; Fr. *fascination*; Port. *fascinazão*; Sp. *fascinación*; Ital. *fascinazione*.]

1. The act or power of fascinating, or of exercising supernatural and irresistible influence upon a person or animal; a bewitching, charming, or enchantment. Such power or influence was formerly ascribed to magicians, and to certain animals, as the basilisk, and the belief in the power or influence of the "evil eye" is a remnant of this superstition.

"Several naturalists of late years have been inclined to revive this belief and have endeavored to show that it really has some foundation in nature. One writer claims to have 'had ocular proof that some influence akin to fascination can be exercised by a predatory animal over a victim which it desires to get within its power. I saw in Central India a large fly, one evening after the lamps were lit, unable to take its eyes off a scorpion. At last it was fatigued enough to fly across from one wall to the next three different times to attack the scorpion, which finally caught and devoured it.'

"We see the opinion of fascination is ancient for both effects of procuring love; and sickness caused by envy; and fascination is ever by the eye."—*Bacon: Natural History*, § 844.

2. The act or power of fascinating, charming or captivating by beauty, grace or other excellent quality.

"The fascination of sex was called in to aid the fascination of art."—*Macaulay: Hist. Eng.*, ch. iii.

3. The state or condition of being fascinated, enchanted, or charmed.

"The ancients believed that spitting in their bosoms three times (which was a sacred number), would prevent fascination."—*Fawkes: Theophrastus*, Id. vi. (Note.)

4. That which fascinates, enchants, charms or captivates.

* For the difference between to fascinate and to charm, see CHARM.

"The disdain and shame whereof hath ever since kept Hector fasting and waking."—Shakesp.: *Troilus and Cressida, i. 2.*
2. To abstain entirely or partially from food voluntarily for a certain time for the mortification of the body or appetites, as a token of grief, sorrow, affliction, or penitence.
"Thou, when thou fastest, anoint thine head, and wash thy face; that thou appear not unto men to fast."—Matthew vi. 17, 18.

fast, *fasste, s. [A. S. *fasta*; Dan. *faste*; O. H. Ger. & Icel. & Sw. *fasta*; Dut. *vasti*; O. Fris. *fasta*.]

I. Ordinary Language:

1. Total or partial abstinence from or deprivation of food; an omission to take food.
2. A time set apart to express national grief for some calamity, or to deprecate an impending evil.

"The people of Nineveh proclaimed a fast."—Jonah iii. 3.

*3. Any holy time or season.

"The Easter fast: was it always and in every place uniformly observed?"—Culphill: *Answer to Martiall, p. 269.* (Davies.)

II. Religions:

1. *Ethnic Fasts*: The old Egyptians, the Assyrians (Jonah iii. 5), the Greeks, Romans, and other ancient nations, had most of them stated or occasional fasts, as have the modern Mohammedans, Hindoos, &c.

2. *Jewish Fasts*: The Day of Atonement was the only fasting-day enjoined by the law of Moses, but the Mishna speaks of four others, respectively commemorating the storming of Jerusalem by Nebuchadnezzar, the burning of the Temple by Titus, the sack of Jerusalem by Nebuchadnezzar, and the receiving by Ezekiel and the other captives of the news of the destruction of Jerusalem. There were also fasts proclaimed by royal or other authority on special occasions (1 Kings xxi. 9-12; 2 Chron. xx. 3; Ezra viii. 2). For the spiritual and unspiritual way of keeping a fast, see Isaiah lviii. 3.

3. *Christian Fasts*: No stated fasts are enjoined in the New Testament; they arose subsequently, the Lent fast taking the lead. [LENT.] In the third century the Latins fasted on the seventh day. In A. D. 813 the Council of Mentz in its thirty-fourth canon, ordered a fast the first week in March, the second week in June, the third week in September, and the last full week preceding Christmas Eve. Toward the end of the tenth century, the custom became prevalent of fasting on Saturday in honor of the Virgin Mary. In the Episcopal and Roman Catholic churches the principal fasts of the year are Lent, the Ember days, All-Saints, the Immaculate Conception, Rogation days, and the eves or vigils before certain festivals; as before Christmas day. Some of these fasts are common to both churches.

4. *Modern Fasts*: Several times in the course of political events have different Christian governments proclaimed days of fasting and prayer, supplication being directed to the great Guide and Director of affairs that He would avert the threatened danger with which the state was confronted. As a notable antitype of this custom may be mentioned our national Thanksgiving, in which feasting and not fasting is the salient feature.

fās-ti, **s. pl.** [LAT.]

Roman Antig.: The calendar in which were comprised the various days, feasts, games, holidays, &c. There were two kinds: *Fasti magistrates* and *Fasti calendares*. The latter were books containing a description of the whole year, with the peculiarities of its several days. They were subdivided into *Fasti urbani* and *Fasti rustici*, the former containing days to be observed in the city, the latter those celebrated in the country, where there would be fewer holidays. The *Fasti magistrates* contained everything relating to religion and the magistrates, and in later times to the emperors, such as their birthdays, &c. When the fasti became full of such details they were called *Fasti magni*, to distinguish them from the *Fasti calendares*. There were also *Fasti consulares*, an annual register. Each year was known as that of such and such consuls, and this method of notation is useful in fixing dates.

***fās-tid-i-ös-i-tý**, **s.** [Lat. *fastidiosus* = fastidious (q. v.).] The quality of being fastidious; disdainfulness, contemptuousness, fastidiousness.

fās-tid-i-ös-a, **a.** [Lat. *fastidiosus* = disdainful, disgusting; *fastidium* = loathing, from *fastus* = arrogance, and *tædium* = disgust; Fr. *fastidieux*; Sp., Port., & Ital. *fastidioso*.]

*1. Causing disgust; loathsome.

"That thing for the which children be oftentimes beaten, is to them ever after fastidious."—Sir T. Elyot: *Governor, bk. i., ch. ix.*

2. Hard or difficult to please; over-nice, squeamish.

"His temper placid and forgiving, but fastidious."—Macaulay: *Hist. Eng., ch. ii.*

¶ Crabb thus discriminates between *fastidious* and *squeamish*: "A female is *fastidious* when she criticises the dress or manners of her rival; she is *squeamish* in the choice of her own dress, company, words, &c. Whoever examines his own imperfections will cease to be *fastidious*; whoever restraining humor and caprice will cease to be *squeamish*." (Crabb: *Eng. Synon.*)

C. As *substantive*:

1. *Ord. Lang.*: The act or state of abstaining partially or entirely from food.

"In hunger and thirst, in manye fastyngs, in coold and nakednesse."—*Wycliffe*: 2 *Corinthians* xi. 27.

II. *Technically*:

1. *Med.*: Loss of appetite without any other apparent affection of the stomach; so that the system can sustain almost total abstinence for a long time without fainting. (*Dunglison*.)

¶ For a number of years a lively discussion has been carried on as to the length of time a human being could exist while voluntarily fasting—there being not a few who claimed to be able to duplicate the forty-day fast imputed to Jesus Christ. To set the matter at rest, early in the last decade Dr. Tanner, of New York City, attempted to fast for forty days, and although the friends and admirers of the gentleman claimed that he accomplished the feat, others there were who were not satisfied with the result. Nothing definite in a scientific point of view resulted; and since that time the Doctor has had numerous imitators, some going so far as to claim to be able to maintain life even when interred for that length of time. This last experiment, however, is as yet (1894) in abeyance.

2. *Religious*:

(1) *Among the Ethnic Nations*: Its chief object was to produce religious exaltation, with visions, dreams and imagined intercourse with superior beings. As the Zulus say, "The continually stuffed body cannot see secret things." Fasting exists for this purpose among the North American Indians and many other tribes. Dreams, visions, &c., thus produced are not supernatural, but morbid.

(2) *Among the Jews*: It was practiced in seasons of affliction, nature having in a manner prescribed this by taking hunger away during keen sorrow (1 Sam. xxxi. 13; Esther iv.); to chasten or humble the soul (Psalm xxxiv. 15; lxi. 3); as a concomitant of prayer (Psalm xxxv. 13; Dan. ix. 3; Luke ii. 37, &c.); as an act deemed meritorious (Luke xviii. 12).

(3) *Among Christians*: Jesus miraculously fasted forty days and nights (Matt. iv. 2; Luke iv. 2), as Moses and Elijah had done previously (Exod. xxiv. 28; 1 Kings xix. 8), and as several Roman saints claim to have done since. The practice is not, however, formally enjoined in the New Testament, though our Lord indirectly sanctioned it (Matt. vi. 16-18), as did St. Paul (1 Cor. vii. 5). The apostles and the church of which they constituted a part practiced it on specially solemn occasions (Acts xiii. 2; xiv. 23). Combined with prayer it could be rendered effective to expel evil spirits (Matt. xvii. 21; Mark ix. 29). In the Roman and Greek Obedience, Communion must be received fasting, except when administered by way of viaticum.

fast-ing (2), *pr. par., a. & s.* [FAST (1), *v.*]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

fāt (1), ***fatte**, ***fette**, ***vat**, ***vatte**, ***vet**, ***vette**, *a. & s.* [A. S. *fæt*; cogn. with *Dut. vet*, *Dan. fed*, *Sw. fet*, *Icel. feitr*, *O. H. Ger. feizt*.]

A. As *adjective*:

I. *Ordinary Language*:

1. *Literally*:

(1) Full of fat; plump; fleshy; full fed; the opposite to *lean* or *thin*.

"And of fatte wetheres an hundred thousand also."
Robert of Gloucester, p. 62.

(2) Full of fat; oily, greasy, unctuous.

(3) Abounding in fat, as distinguished from the lean of meat.

2. *Figuratively*:

(1) Dull, heavy, stupid; as, a fat or coarse animal.

"O souls! in whom no heavenly fire is found,
Fat minds, and ever grovelling on the ground."
Dryden: *Perseus*, sat. ii.

(2) Coarse, gross.

"Added fat pollutions of our own."
Dryden: *Mrs. Killigrew*, 64.

(3) Wealthy, rich, affluent.

"Mark the fat oil, whose good round sum
Amounts at least to half a plum."
Lloyd: *A Familiar Epistle*.

(4) Rich; producing a large income.

"A fat benefice is that which so abounds with an estate and revenues that a man may expend a great deal in delicacies of eating and drinking."—*Ayliffe*: *Parergon*.

(5) Fertile, fruitful, rich; affording a good return; as, a fat soil.

"A fat londe and ful of donge foulest wedes groweth."
P. Plowman, p. 213.

(6) Abounding in spiritual endowments and comfort.

"They [the righteous] shall be fat and flourishing."—*Psalm* cxli. 14.

II. *Technically*:

1. *Naut.*: Broad; as, the quarter of a ship.

2. *Print.*: Applied to a page having many blank spaces or lines, and, hence, to any work which pays well.

B. As *substantive*:

I. *Ordinary Language*:

1. *Literally*:

(1) Plumpness, fleshiness.

(2) In the same sense as II. 1.

2. The best or most choice part of anything.

"Ye shall eat the fat of the land."—*Genesis* xiv. 18.

II. *Technically*:

1. *Anat.*: An animal substance of a more or less oily character deposited in vesicles in adipose tissue. It forms a considerable layer under the skin, is collected in large quantity around certain organs, as, for instance, the kidneys, fills up furrows on the surface of the heart, surrounds joints, and exists in large quantity in the marrow of bones. It is an excellent packing material in the body, being light, soft and elastic. It gives to the surface of the human frame its smooth, rounded contour. Being a bad conductor of heat, it enables a person to retain the warmth which he has generated; but its chief use is for the purpose of nutrition. (*Quain*.)

2. *Chem. (pl.)*: Fats are glycerides of acids belonging to the fatty or acetic series and of acids belonging to the acrylic series, being the ethers of the triatomic alcohol glycerine. They are insoluble in water, but soluble in ether. They vary in

consistence from a thin oil (olive oil) to a hard, greasy substance (suet). They leave a greasy stain on paper. When fats are boiled with any caustic alkali they are decomposed [SAPONIFICATION], and yield an alkaline salt of the fatty acid [SOAP], and glycerine (q. v.).

3. *Print.*: Copy which affords light work, as blank or short pages or lines, loaded matter, rule-and-figure work, poetry, and such like matter, profitable to the compositor.

¶ The fat is in the fire: All is confusion, or all has failed.

***fat-already**, *a.* Already too well fed or puffed.

"To enlard his fat-already pride."

Shakesp.: *Troilus and Cressida*, ii. 3.

***fat-brained**, *a.* Dull of apprehension; stupid.

fat-faced, *a.* Having a plump, round face.

fat-head, *s.* A dull, stupid fellow.

fat-headed, *a.* Dull, stupid, slow of apprehension.

fat-hen, *s.*

Bot.: A name applied to various plants, but especially to certain Chenopodiaceæ, having thick, succulent foliage: (1) *Chenopodium album*, (2) *Chenopodium bonus henricus*, (3) *Chenopodium rubrum*, (4) *Chenopodium vulvaria*, (5) *Atriplex patula*, (6) *Atriplex erecta*, (7) *Atriplex hystata*, (8) *Polygonum fagopyrum*, (9) *Nepeta glechoma*, (10) *Chrysanthemum segetum*, (11) *Cappella buxapastoris*, (12) *Artemisia vulgaris*. (*Britten & Holland*.)

***fat-kidneyed**, *a.* Gross-paunched, corpulent, obese.

fat-lute, *s.* A mixture of pipe-clay and linseed oil for filling joints.

***fat-witted**, *a.* Dull of apprehension; stupid, fat-headed.

fat-vesicles, *s. pl.*

Physiol.: The vesicles in the bodies of men and the inferior animals in which fat is deposited. [ADIPOSE TISSUE.] They are often situated in the interstices between organs, to which they afford protection. They also facilitate motion and improve the symmetry of the figure. (*Todd & Bowman*: *Phys. Anat.*)

***fāt** (2), ***fatt**, ***fatte**, ***fet**, *s.* [A. S. *fæt*.] [VAT.]

1. A vat; a large tub or vessel; a cask, a barrel.

2. A measure of capacity, differing in different commodities. A fat of grain was a quarter, or 8 bushels; a fat of wire, from 20 to 25 cwt.; a fat of isinglass from 3½ to 4 cwt.

fāt, *v. t. & i.* [FAT, *a.*]

A. Trans.: To make fat or plump; to fatten.

"I should have fatted all the region kites
With this slave's offal."—*Shakesp.*: *Hamlet*, ii. 2.

B. Intrans.: To become fat; to fatten; to gain flesh.

"An old ox fats as well and is as good as a young."—*Mortimer*: *Husbandry*.

fāt-al, *a.* [Fr., from Lat. *fatalis*, from *fatum*=fate; Sp. *fatal*; Ital. *fatale*.]

1. Proceeding from fate or destiny; inevitable.

2. Decried by fate; destined.

"It was fatal to the king to fight for his money."—*Bacon*: *Henry VII*.

3. Fraught with or instrumental to destiny or fate; influencing destiny; fateful.

"Parca's fatal web."—*Shakesp.*: *Henry V.*, v. 1.

4. Foreboding death or destruction.

"That fatal screech-owl to our house
That nothing sung but death to us and ours."
Shakesp.: *Henry IV.*, Pt. III., ii. 6.

5. Causing death; deadly; mortal.

6. Ruinous, destructive, pernicious, deadly.

"Great, therefore, is the deceit and fatal the error by which all those delude themselves."—*Clarke*: *Sermons*, vol. ii., ser. 120.

¶ For the difference between *fatal* and *deadly*, see DEADLY.

fāt-al-izm, *s.* [Eng. *fatal*; *-ism*.] The doctrine that all things are ordered for men by the arbitrary decrees of God or the fixed laws of nature. In Theology it has given birth to theories of Predestination, and in Moral Science to such systems as those of Spinoza and Hegel, and more recently to the philosophy of Mr. Herbert Spencer. It is carried out to its most pitiless logical extreme among the Mohammedans, where everything that can happen is "kismet," i. e., fatal, or decreed by fate.

fā-tal-ist, *s.* [Eng. *fatal*; *-ist*.] One who holds or supports the doctrine of fatalism.

"Being a fatalist in natural things, and at the same time maintaining free-will in man."—*Warburton*: *Divine Legation*, bk. iii., s. 4.

fāt-al-ist-ic, *a.* [Eng. *fatalist*; -ic.] Of or pertaining to fatalism; implying or partaking of the nature of fatalism.

"Are you a Christian, and talk about a crisis in that fatalistic sense?"—*Coleridge: Table Talk.*

fa-tāl-i-tŷ, *s.* [Fr. *fatalité*; Lat. *fatalitas*; from *fatalis*, from *fatum*=fate.]

1. A state of being fatal or predestined by fate; a fixed and unalterable course of things independent of any controlling cause.

"The stoics held a *fatalitas* and a fixed, unalterable course of events; but then they held also that they fell out by a necessity emergent from and inherent in the things themselves which God Himself could not alter."—*South.*

2. A decree of fate.

fa-ta mor-ga-nā, *s.* [Ital. *fata*=a fairy, and *Morgana*, a local name for a fairy=Morgana.] A remarkable aerial phenomenon observed from the harbor of Messina and adjacent places, and supposed by the Sicilians to be the work of the fairy Morgana. Objects are reflected sometimes on the surface of the sea, and sometimes in a kind of aerial screen to thirty feet above it. Father Angelucci thus describes it: "As I stood at my window, I was surprised with a most wonderful, delectable vision. The sea that washes the Sicilian shore swelled up, and became, for ten miles in length, like a chain of dark mountains, while the waters near our Calabrian coast grew quite smooth, and in an instant appeared as one clear, polished mirror, reclining against the aforesaid ridge. On this glass was depicted, in chiaro-oscuro, a string of several thousands of pilasters, all equal in altitude, distance, and degree of light and shade. In a moment these lost half their height, and bent into arcades, like Roman aqueducts. A long cornice was next formed on the top, and above it arose castles innumerable, all perfectly alike. These soon split into towers, which were shortly after lost in colonnades, then windows, and at last ended in pines, cypresses, and other trees, even and similar."

"Hope still guided them on, as the magic *Fata Morgana*."—*Longfellow: Evangeline, ii. 4.*

Which do possess the empire of the air,

Was none more favorable, nor more fair."

Spenser: *Muioptomos*.

*Crabb thus discriminates between favorable and propitious: "*Propitious* is a species of the favorable, namely, the favorable as it springs from the design of an agent: what is propitious, therefore, is always favorable, but not vice versa: the favorable properly characterizes both persons and things; the propitious, in the proper sense, characterizes the person only; as applied to persons, an equal may be favorable; a superior only is propitious: the one may be favorable only in inclination; the latter is favorable also in granting timely assistance."

In the improper sense, propitious may be applied to things with a similar distinction: whatever is well disposed to us, and secures our endeavors, or serves our purpose, is favorable; whatever efficaciously protects us, speeds our exertions, and decides our success, is propitious to us; on ordinary occasions a wind is said to be favorable which carries us to the end of our voyage; but it is said to be propitious if the rapidity of our passage forwards any great purpose of our own." (*Crabb*: *Eng. Synon.*)

Palaeont.: A genus of fossil plants belonging to the Sigillarioids (q. v.). They are found first in the Devonian period, and attain their maximum in the Carboniferous. They often attained a height of thirty to fifty feet or more. The smaller branches were destitute of ribs, with elliptical, spirally-disposed areoles. The stem branched dichotomously; leaves broad, with numerous parallel veins.

fā-vūs, s. [Lat.=a honey-comb.]

1. Ord. Lang.: A slab or piece of marble cut into a hexagonal shape, so as to produce a honey-comb pattern.

2. Pathol.: A disease of the skin, characterized by the breaking out of pustules, which are succeeded by cellular crusts bearing some fanciful resemblance to an irregular honey-comb. Their seat is commonly upon the scalp. Infants are often affected by it, adults more rarely. The disease does not hurt the general health. It is caused by the attack of a parasitic fungus, *Achorion schenleii*. Cleanliness, soap, and hot water, with attention diet, are its appropriate remedies.

II. Old Law: (See extract.)

Faalty, suit of court, and rent, are duties and services usually issuing and arising *ratione feutorie*, being the conditions upon which the ancient lords granted out their lands to their feudatories; whereby it was stipulated that they and their heirs should take the oath of *faalty* or fidelity to their lord, which was the feudal bond or *commune vinculum* between lord and tenant; that they should do suit, or duly attend and follow the lord's courts, and there from time to time give their assistance, by serving on juries, either to decide the property of their neighbors in the court-baron, or correct their misdemeanors in the court-leet; and, lastly, that they should yield to the lord certain annual stated returns, in military attendance, in provisions, in arms, in matters of ornament or pleasure, in rustic employments, or prädial labors, or, which is *instar omnium*, in money, which will provide all the rest; all which are comprised under the one general name of *reditus*, return, or rent. And the subtraction or non-observance of any of these conditions, by neglecting to swear *faalty*, to do suit of court, or to render the rent or service reserved, is an injury to the freehold of the lord, by diminishing and depreciating the value of his seigniority."—*Blackstone: Comment.*, bk. iii., ch. 8.

fear-bér-rý, s. [FAYBEERY.]

fear, *feer, *fer, *fere, s. [A. S. *fēr*; cogn. with Icel. *fār*=harm, mischief; O. H. Ger. *fāra*, *vār*=danger, fright; Ger. *gefāhr*=danger. From the same root as to *fare*, specifically and originally used of the *perils* and *experiences* of a way-faring. (*Skeat.*)]

6. Causing fear or terror; terrible, awful, frightful.

"In dreams they fearful precipices tread."—*Dryden: Annus Mirabilis*, lxxi.

¶ Crabb thus discriminates between *fearful*, *dreadful*, *frightful*, *tremendous*, *terrible*, *terrific*, *horrible*, and *horrid*: "The first two affect the mind more than the senses; all the others affect the senses more than the mind; a contest is *fearful* when the issue is important, but the event doubtful; the thought of death is *dreadful* to one who feels himself unprepared. The *frightful* is less than the *tremendous*; the *tremendous* than the *terrible*; the *terrible* than the *horrible*; shrieks may be *frightful*; thunder and lightning may be *tremendous*; the roaring of a lion is *terrible*; the glare of his eye *terrific*; the actual spectacle of killing is *horrible* or *horrid*. In their general application these terms are often employed promiscuously to characterize whatever produces very strong impressions; hence we may speak of a *frightful*, *dreadful*, *terrible*, or *horrid* dream; of a *frightful*, *dreadful*, or *terrible* tempest; of a *dreadful*, *terrible*, or *horrid* consequences." (*Crabb: Eng. Synon.*)

fëast, *feest, *feeste, *fest, *feste, s. [O. Fr. *feste*; Fr. *fête*, from Lat. *festā*(=festivals), neut. pl. of *festum*=a festival, from *festus*=joyful; O. Sp., Port. & Ital. *fiesta*; Sp. *fiesta*; Ger. *fest*.]

I. Ordinary Language:

1. Literally:

(1) A sumptuous meal or entertainment of which a large number of persons partake; a public entertainment or banquet.

"Alle the noble men of this lond to the noble *fest* come."—*Robert of Gloucester*, p. 156.

(2) An anniversary or periodical celebration of some event; a festival in commemoration of some great event or personage.

"Now at that *fest* he released unto them one prisoner, whomsoever they desired."—*Mark* xv. 6.

2. Figuratively:

(1) A pleasing or abundant repast; anything very grateful to the palate.

(2) Entertainment, treat.

"The feast of reason, and the flow of soul."—*Pope: Horace: Satires*, ii. l. 128.

fâte, fât, färe, amidst, whât, fáll, father; wê, wët, hère, camêl, hër, thêre; pine, plit, sîre, sîr, marine; gô, pô, or, wôre, wôlf, wôr, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; try, Sýrian. æ, æ = ē; ey = â. qu = kw.

II. *Religious, &c.*: A day set apart for religious observance, accompanied with joy, as distinguished from one attended by sorrow.

1. *Ethnic*: Such feasts exist in most faiths, and are much more common than fasts. The Greeks and Romans had many of them; so have the modern Hindus and the Mohammedans. [FESTIVAL.]

2. *Jewish*: Of all the Jewish festivals, only that on the great day of Atonement was a fast: the rest were joyous observances. Among the latter were the Passover, Pentecost, the Feast of Tabernacles, that of Trumpets, &c.

3. *Christian*: To put down a festival once established in any faith is almost impossible; it may be transformed but not extinguished. The early missionaries finding this to be the case, christianized the feasts they could not destroy, and many Christian festivals nearly or quite agree in time with ethnic ones of greater antiquity. The same process had taken place in India ages before: the Aryans, having failed to eradicate various Tauranian festivals, had to give them a Brahminic varnish, and adopt them into the Hindoo faith. Of the joyous festivals existing at the time of the Reformation, some immovable and some movable festivals have been retained. The former are Christmas Day, the Circumcision, the Epiphany, Candlemas, the Purification, Lady Day or the Annunciation of the Virgin Mary, and the various Saints' Day. Of the latter are Easter, the time of which fixes all the rest, Ascension Day, Whitsun Day, and Trinity Sunday.

¶ (1) Crabb thus discriminates between *feast*, *banquet*, *carousal*, *entertainment*, and *treat*: "A *feast* may be given by princes or their subjects; by nobility or commonalty; the *banquet* is confined to men of high estate, and more commonly supposes indulgence of the appetite, both in eating and drinking, but not intemperately; a *carousal* is confined mostly to drinking, and that to an excess: a *feast*, therefore, is always a good thing, unless it ends in a *carousal*; a *feast* may be given by one or many, at private or public expense; but an *entertainment* and a *treat* are altogether personal acts, and the terms are never used but in relation to the agents; a *treat* is given by way of favor to those whom one wishes to oblige; a nobleman provides an *entertainment* for a particular party whom he has invited; he gives a *treat* to his servants, his tenants, his tradespeople, or the poor of his neighborhood. *Feast*, *entertainment*, and *treat*, are taken in a more extended sense, to express other pleasures besides those of the table; *feast* retains its signification of a vivid pleasure, such as voluptuaries derive from delicious viands; *entertainment* and *treat* retain the idea of being granted by way of courtesy: we speak of a thing as being a *feast* or high delight; and of a person contributing to one's *entertainment*, or giving one a *treat*; men of a happy temper give and receive *entertainment* with equal facility; they afford *entertainment* to their guests by the easy cheerfulness which they impart to everything around them; they in like manner derive *entertainment* from everything they see, or hear, or observe; a *treat* is given or received only on particular occasions; it depends on the relative circumstances and tastes of the giver and receiver; to one of a musical turn one may give a *treat* by inviting him to a musical party."

(2) He thus discriminates between *feast*, *festival*, and *holiday*: "Feast as a technical term is applied only to certain specified holidays: a holiday is an indefinite term, it may be employed for any day or time in which there is a suspension of business; there are, therefore, many feasts which are no holidays, and many holidays where there are no feasts: a *feast* is altogether sacred; a holiday has frequently nothing sacred in it, nor even in its cause; it may be a simple, ordinary transaction, the act of an individual; a *feast* has always either a sacred or a serious object. A *feast* is kept by religious worship; a *holiday* is kept by idleness; a *feast* is kept by mirth and festivity; some feasts are festivals, as in the case of the carnival at Rome; some festivals are holidays, as in the case of weddings and public thanksgivings." (Crabb: *Eng. Synon.*)

Shakesp.: *Cymbeline*, i. 1.

***fēa-tē-ōus**, ***fetis**, **a.** [FEATOUS.]

***fē-a-tē-ōus-lŷ**, **adv.** [FEATOUSLY.]

***fēath-ēr**, ***fed-yr**, ***feth-er**, ***feth-re**, ***fyth-ere**, **s.** [A. S. *fēðer*; cogn. with Dut. *veder*; Dan. *fjæder*; Sw. *fjäder*; Icel. *fjóðr*; Ger. *feder*; Lat. *penna*; Gr. *pteron*; Sansc. *pātra*, from a root *pāt*=to fly.]

I. Ordinary Language:

1. **Lit.**: In the same sense as II. 6.

"His *feathers* all seemed to be turned the wrong way." Barnham: *Ingoldsby Legends*; *Jackdaws of Rheims*.

2. **Figuratively:**

*(1) A kind, a class, a species; as in the proverb, "Birds of a *feather* flock together."

"I am not of that *feather* to shake off my friend." Shakesp.: *Timon of Athens*, i. 1.

(2) Anything very light.

II. Technically:

1. **Join.**: A tongue on the edge of a board, fitting into a channel on the edge of another board, in the operation of joining boards by feathering or tonguing and grooving.

2. **Found.**: A narrow, strengthening rib on a structure; a longitudinal rib on a shaft to resist flexion or fracture.

3. **Mach.**: A slip inserted longitudinally into a shaft or arbor, and projecting as a fin therefrom so as to fit a groove in the eye of a wheel which may have a longitudinal motion on the said shaft, but no rotation.

4. **Mason.**: A wedge-shaped key between two semi-cylindrical plugs placed in a hole bored in a stone, and driven in to rend the stone.

5. **Naut.**: The same as FEATHER-SPRAY (q. v.).

6. **Ornith. & Physiol.**: A plume or quill, one of the dermal growths, multitudes of which constitute the covering of a bird. A feather is homologous with a hair from the skin of a mammal, and some of the inferior birds have imperfect feathers suggestive of hairs only. A feather consists (a) of a central shaft, which is tubular at the base. This is inserted in the skin like a plant in the earth, living and growing. (b) Of a web on either side, that on one side being often developed more than on the other. This web is composed of a series of regularly arranged fibers, called *barbs*. (c) In some cases, of a small supplementary shaft with barbs, called the *plumule*—i. e., the little plume. Feathers are of two kinds, quills on the wings and tail, and plumes generally diffused. The *Primary feathers* rise from the bone corresponding to the hand in mammals; the *Secondary feathers* from the distal end of the forearm; and the *Tertiary feathers* from the proximal end of the forearm. A feather is intensely strong; the arch of the shaft resisting pressure. It is a bad conductor of heat, and is therefore very useful in preserving the high temperature of the bird, while it is so light that it is easily carried in flight, which, moreover, is effected chiefly through the instrumentality of the wing and tail quills. The feathers are renewed once or twice a year; the bird is languid during the process, but, when fresh plumage is obtained, renews its youth in vigor as well as in beauty.

7. **Chem.**: The beard and quill of feathers have essentially the same composition, containing about 52.5 of carbon, 7.2 of hydrogen, 17.9 of nitrogen, and 22.4 of oxygen and sulphur. The ash of feathers of graminivorous birds contain about 40 per cent of silica, of which there is more in the feathers of old than of young birds. Feathers owe their permanent color to peculiar pigments, of which the red, green, lilac and yellow are soluble in alcohol and ether. Black feathers contain a pigment insoluble in alcohol and ether, but soluble in ammonia. Feathers when heated give off a peculiar odor; when submitted to destructive distillation they yield pyrrol, a mixture of volatile bases and a gas containing sulphur. Goose-feathers boiled for a considerable time with dilute sulphuric acid yield leucine, $\text{CH}_3(\text{CH}_2)_3\text{CH}(\text{NH}_2)\text{CO}\cdot\text{OH}$, and tyrosine $\text{C}_6\text{H}_4 < \text{CH}_2\cdot\text{CH}(\text{NH}_2)\cdot\text{CO}\cdot\text{OH}$. Feathers damaged by bending may be restored to shape by dipping them for a minute in boiling and then in cold water. (Watts: *Dict. Chem.*)

8. **Racing**: The same as FEATHER-WEIGHT (q. v.).

9. **Rowing**: The horizontal adjustment of the blade of an oar so as to escape the retarding action of the wind blowing against it as the oar rises from the water.

10. **Vet.**: A sort of natural frizzling of the hair on a horse, which in some places rises above the lying hair, and presents the appearance of the tip of an ear of wheat.

¶ (1) A *feather in the cap*: An honor; a distinction; as, His victory was a *feather* in his cap.

"If I had a right to the *feathers*, I should stick one of the finest in my cap."—Southey: *Letters*, iv. 442.

(2) **To be in high feather**: To be in high spirits; to be elated.

(3) **To show the white feather**: To show signs of cowardice or timidity.

(4) **To cut a feather**:

Naut.: To leave a foamy ripple, as a ship moving rapidly; hence, figuratively, to make one's self conspicuous; to cut a dash. [FEATHER-SPRAY.]

"The sovereignty exercised by the whole *foederacy*."—*Brougham*.

***fēd'-ēr-al**, *a. & s.* [Fr., from Lat. *foedus* (gen. *foederis*)=a treaty, an alliance.]

A. As adjective:

I. Ordinary Language:

1. Pertaining to a treaty, league, or contract; derived from or founded on an agreement or contract between parties.

"Parties to the federal rites which confirmed those benefits."—*Warburton: Divine Legation*, bk. ix., ch. ii.

2. United in or under a *foederacy*.

"Such as those composed of the federal tribes."—*Shaftesbury: Advice to an Author*, pt. ii., § 2.

3. Favorable to the preservation of federal government. [II.]

II. History:

1. (*Gen.*): In the same sense as I. 2. Used chiefly in connection with American politics.

2. (*Spec.*): Pertaining or relating to the *Federals* in the struggle described under B. (q. v.)

B. As subst. (pl.): The name assumed by that vast section of the American republic who sought to maintain the Federation, more commonly called the Union of the Federal states, in opposition to the Confederates, who sought, and with temporary success, to draw some states into secession. For the war between the *Federals* and the *Confederates*, carried on from 1861 to 1865, see *Confederate States of America*.

federal-states, *s. pl.* States united by a federation or treaty which, binding them sufficiently for mutual defense and the settlement of questions bearing on the welfare of the whole, yet leaves each state free within certain pretty wide limits to govern itself. Switzerland and the United States are examples of this political constitution.

***fēd'-ēr-al-īsm**, *s.* [Eng. *federal*; -ism.] The principles of federalists.

***fēd'-ēr-al-ist**, *s.* [Eng. *federal*; -ist.]

1. *Gen.*: A federal (q. v.).

2. *Specialty*:

American History: The name of an old political party. After the acknowledgment of the independence of the thirteen colonies by the mother country, the first task that confronted the successful revolutionists was the erection of a government and the formulation of a constitution. When the deliberative body upon whom devolved this duty met, it was discovered that there were various sentiments entertained by its members, these differences of opinion aligning themselves on opposite sides of the great question of organic union. One faction favored the erection of a nation with more or less absence of independence of its constituent members, while the other urged a federation of sovereign states, each one of which should retain its autonomy, and not be amenable to the general government any further than it by actual cession gave that government authority. The principal actors in the great drama of the revolution were divided on this question, those favoring a strong or national organic union being called *federalists*, and numbering in their ranks such men as George Washington, Alexander Hamilton, and others, while those favoring the sovereignty of the states were called *republicans*, and were equally fortunate in the great names that appeared upon their roll, among them being Thomas Jefferson, James Madison, and others equally distinguished. The republicans in this contest were victorious, and thereby sowed the seed that led to the civil war of 1861-1865. Later in the history of the country the federalists became known as *whigs*, while the republicans were called *democrats*.

***fēd'-ēr-al-ize**, *v. t. & i.* [Eng. *federal*; -ize.]

6. Possession.
"Who holds the land in fee, its careless lord!"
Wordsworth: *Excursion*, bk. vii.

II. Technically:

1. *Feudal Law*: All lands and tenements which are held by any acknowledgment of superiority to a higher lord; land held by the benefit of another, and in name whereof the grantee owes services or pays rent or both to a superior lord.

2. *American and English Law*: A freehold estate of inheritance, descendible to heirs general, and liable to alienation at the pleasure of the proprietor.

(1) A tenant in *fee-simple* (also called *fee-absolute*) is one who has lands, tenements, or hereditaments, to hold to him and his heirs for ever: generally absolutely and simply; without mentioning what heirs, but referring that to his own pleasure, or to the disposition of the law. This is property in its highest degree.

(2) Limited fees, or such estates of inheritance as are clogged with conditions, are of two sorts: (1) Qualified, or base fees; and (2) Fees conditional, so called at the common law; and afterward fees-tail, in consequence of the statute *De Donis*.

(a) A base, or qualified, fee is such one as has a qualification subjoined thereto, and which must be determined whenever the qualification annexed to it is at an end.

(b) A conditional fee, at the common law, was a fee restrained to some particular heirs, exclusive of others; as to the heirs of a man's body, by which only his lineal descendants were admitted, in exclusion of collateral heirs; or to the heirs male of his body, in exclusion both of collaterals, and lineal females also.

1. Mechanics:

(1) The motion or action which carries stuff forward to the machine; as, the cloth to the needle in a sewing-machine; the board to the planer, &c.

(2) The motion of a tool toward its work; as, the auger, bit, or drill into the object; the cutter on the slide-rest of a lathe to or parallel to the work suspended on the centers, &c.

2. Mach.: The supply of material to a machine; as, the water to a steam-boiler; the grain to a run of stones, &c.

feed-bag, s. A nose-bag for a horse or mule, to contain his noon-day feed.

feed-cloth, s.

Fiber: The apron which leads the cotton, wool, or other fiber into the cleaning, lapping, carding, spinning, or other machine.

feed-cutter, s. A machine for cutting straw, hay, or cornstalks into short feed or chaff. [STRAW-CUTTER.]

feed-hand, s.

Gear: A rod by which intermittent rotation is imparted to a ratchet-wheel.

feed-head, s.

1. *Steam-eng.*: A cistern containing water and communicating with the boiler of a steam-engine by a pipe, to supply the water by the gravity of the water, the height being made sufficient to overcome the pressure within the boiler.

2. *Found.*: Also called Dead-head, or simply Head. The metal above and exterior to the mold which flows into the latter as the casting contracts, and also serves to render the casting more compact by its pressure; also called a Riser, and the metal which occupies it a Sullage-piece.

feed-heater, s.

Steam:

1. A drum or chamber in which feed-water for the boiler is heated by the exhaust steam.
2. A boiler or kettle for heating food for stock.

feed-motion, s. That contrivance in a machine by which the material under treatment is advanced or fed to the machine. [FEED, s. II. 1. (1).]

feed-pipe, s.

Steam-eng.: The pipe carrying water to the boiler. [FEED, s. II. 2.]

feed-pump, s.

Steam- or Donkey-eng.: A force-pump driven by hand, by doctor- or donkey-engine, or by the engine itself, for supplying to the boiler a quantity of water equal to that removed in the form of steam, by the brine-pump in the marine engine, the blow-off or mud-valve, or other sources of outlet. In high-pressure engines it takes water from the heater; in condensing engines from the hot-well.

feed-rack, s. A stock-feeding device with grain-trough and hay-rack under shelter, which is sometimes extended to the stock.

feed-screw, s.

Turn.: A long screw employed to impart a regular motion to a tool-rest or to the work; as the feed-screw in the bed of a lathe, which moves the screw-cutting tool.

feed-water, s.

Steam-eng.: The water supplied to steam-boilers by the feed-pump through the feed-pipe.

Feed-water apparatus: An automatic device for supplying steam-boilers with feed-water.

Feed-water heater: A device for heating the feed-water for high-pressure engines by passing it through a chamber traversed by a coil of pipe carrying the exhaust steam.

Feed-water pump: [FEED-PUMP.]

feed-wheel, s. A continuously or intermittently revolving wheel or disc which carries forward an object or material.

Feed of a lock:

Hydraul. Engin.: The amount of water required to pass a boat through a canal lock.

feed-ër, s. [Eng. feed; -er.]

1. Ordinary Language:

1. Literally:
(1) One who feeds or supplies food or nourishment.

"With besotted base ingratitude

Crams and blasphemes his feeder." Milton: *Comus*, 779.

- (2) One who feeds or eats.

"He tires betimes, that spurs too fast betimes;
With eager feeding, food doth choke the feeder." Shakespeare: *Richard II.*, ii. 1.

- (3) One who feeds or subsists on certain foods; as, Small birds are feeders upon grain or seeds.

"We meet in Aristotle with one kind of thrush, called the missel thrush, or feeder upon misselto." Browne: *Vulgar Errors*, bk. ii., ch. vi.

- (4) One who looks after the feeding of cattle, &c.; one who fattens cattle.

"I will your very faithful feeder be."

Shakespeare: *As You Like It*, ii. 4.

- (5) One who eats in a certain mode; as, a nice feeder; a gross feeder, &c.

"The inhabitants partaking of its influence, gross feeders, fat-witted." Dryden: *Life of Plutarch*.

- (6) A master, an employer.

"His feeders have of late put him upon another job." The *Loyal Observer*, 1868.

- (7) A servant, a dependant.

2. Figuratively:

- (1) One who nourishes, encourages, or supports; a supporter.

"The tutor and the feeder of my riots."

Shakespeare: *Henry IV.*, Pt. II., v. 5.

- (2) A stream, fountain, or channel which feeds or supplies a main stream or canal with water.

- (3) A branch or side railway, intended to bring traffic to the main line.

"It is proposed to construct lines of a less substantial character, to act as feeders to the main lines." London *Daily Telegraph*.

II. Technically:

1. **Hydraul. Engin.**: A water-course, natural or artificial, carrying water to a canal or reservoir. Obviously, the principal feeder is at the summit level, and it is commonly supplied from a reservoir.

2. **Mining**: The side branch of a vein which passes into a lode.

3. **Sewing-mach.**: That part which carries the cloth along the length of a stitch between each penetration of the needle. [SEWING-MACHINE FEED.]

4. **Mach.**: An auxiliary or supplying part of a machine, that which leads along the stuff being operated upon: as—

- (1) A toothed or binding wheel which carries and directs a plank into the planing machine.

(2) That motion or combination of parts which carries and directs a blank or rod to the place where it is operated upon. Such are the feeders and feed-motions in machines for making wood screws, pins, eyelets, hooks and eyes, &c. Such also are the motions by which planchets are fed to the coining-press; eyelets and clasps to the machines for attaching them to garments; pins, needles, and hooks and eyes to the machines which stick and paper them.

5. **Iron-found.**: A head or supply of fluid iron to a runner or mold in heavy castings.

6. **Nail-making**: A contrivance with an intermittent oscillating or semi-rotary and forward motion to present the plate to the cutters, so that the head of the nail may be taken from the respective edges alternately.

7. **Print., &c.**: A device with fingers which take the top sheet from a pile and lead it into the press where it is printed, folded, or what not. Also a device by which blanks are taken successively from a pile and carried into an envelope-machine, or paper-bag or box-machine, as the case may be.

8. **Steam-eng.**: A device for supplying steam-boilers with water in quantities as required. Automatic boiler-feeders act by means of floats upon the surface of the water in the boilers.

9. **Threshing**: The grain-feeder which forwards the opened sheaves into the throat of the thrasher, or the grain into the eye of the millstone, or the grain and chaff from the hopper to the middle of a winnowing-machine, or the grain from the bin to the manger of sheep or other stock.

10. **Elect.**: A lead in an electric central station distribution system, which lead runs from the station to some point in the district to supply current. It is not used for any side connections, but runs direct to the point where current is required, thus "feeding" the district directly. In the two-wire system a feeder may be positive or negative; in the three-wire system there is also a neutral feeder. Often the term feeder includes the group of two or three parallel lines. (Sloane.)

feed-îng, *fed-yng, *fed-yngs, pr. par., a. & s. [FEED, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. Ordinary Language:

1. The act of supplying with food or nourishment.
2. The act of taking food or eating.

"There is a sacramental feeding and a spiritual feeding." Waterland: *Works*, vii. 101.

A. Transitive:

1. Literally:

1. To perceive by the touch; to have a sensation caused by contact with any part of the body.
2. To touch, to handle.

"Her other tender hand his fair cheek feels."

Shakespeare: *Venus and Adonis*, 352.

II. Figuratively:

1. To have a sensation of; to perceive within one's self; to be sensible of; to be affected by; to experience.

"Pressing my hand with force against the table, I feel pain, and I feel the table to be hard." Reid: *Essays*, ii. 16.

- *2. To smell.

"So nobil smell was tham about,
And so gude snoure gan thai feel."

Legends of Holy Rood, p. 73.

- *3. To understand; to comprehend; to perceive with the intellect.

"We saie comenly in English that we feel a man's mind when we understand his entent or meaning, and contrariwise, when the same is to us very darke and hard to be perceived, we do comenly say, 'I cannot feel his mind;' or 'I have no maner feeling in the matter.'" Udal: *Apoph. of Erasmus*, p. 128.

4. To be touched or moved by.

"What heart but feels his sweetly moral lay?"

Goldsmith: *Epitaph on Dr. Parnell*.

- *5. To experience.

"Would I had never trod this English earth,
Or felt the flatteries that grow upon it!"

Shakespeare: *Henry VIII.*, iii. 1.

- *6. To try; to sound; to make trial of; to essay; to test.

"He hath wrote this to feel my affection to your honor." —Shakespeare: *Lear*, i. 2.

- *7. To know; to be acquainted with.

"Then, and not till then, he felt himself."

Shakespeare: *Henry VIII.*, iv. 2.

B. Reflex.: To be in health; to find one's self in health; as, How do you feel yourself to-day?

"How dost thou feel thyself now?" —Shakespeare: *Richard III.*, i. 4.

C. Intransitive:

1. Literally:

1. To perceive by the touch; to have perception by the sense or act of touching.

2. To seek for by feeling.

3. To give or raise a sensation by contact or touch; to excite the sense of feeling; to appear to the touch.

"Blind men say black feels rough, and white feels smooth." Dryden. (Webster.)

II. Figuratively:

1. To have the passions moved.

"Oh! could I feel as I have felt, or be what I have been." Byron: *Stanzas for Music*.

2. To feel one's self; to perceive one's self to be. (Followed by an adjective descriptive of the state; as, A person feels sick.)

3. To know in the heart; to be conscious.

"That I love her I feel."

Shakespeare: *Much Ado about Nothing*, i. 1.

- *4. To search after; to seek.

"They should seek the Lord if haply they might feel after him, and find him." —Acts xvii. 27.

"[Crabb thus discriminates between to feel, to be sensible, and to be conscious: "In the moral application to feel is peculiarly the property or act of the heart: to be sensible is that of the understanding: an ingenious mind feels pain when it is sensible of having committed an error: one may, however, feel as well as be sensible by means of the understanding; a person feels the value of another's service; is sensible of his kindness; one feels or is sensible of what passes outwardly; one is conscious only of what passes inwardly; we feel the force of another's remark; we are sensible of the evil which must spring from the practice of vice; we are conscious of having fallen short of our duty." (Crabb: *Eng. Synon.*)

*feēl (1), s. [FOOL.]

*feēl (2), *feil, s. [FEEL, v.]

1. The sense of feeling; the touch.
2. The quality of producing a particular sensation or feeling on being touched.

"The difference of these tumors will be distinguished by the feel." —Sharp: *Surgery*.

- *3. Knowledge, acquaintance.

"Thou has full little felt of fair indyte."

Dunbar: *Evergreen*, ii. 63, st. 8.

feēl-ër, s. [Eng. feel; -er.]

1. Ordinary Language:

1. Lit.: One who feels.

"This hand, whose touch

Whose ev'ry touch would force the feeler's soul

To the oath of loyalty." Shakespeare: *Cymbeline*, i. 7.

2. Fig.: Any device, plan, or means resorted to in order to ascertain the designs, wishes, or opinions of others; tentative action.

"After putting forth his right leg now and then as a feeler." —Dickens: *Sketches by Boz*, ch. i.

B. *As adjective*:

1. *Lit.*: Perceiving by the touch; having perception by touch.

II. Figuratively:

1. Easily affected or moved; of great sensibility.

"Earn, if you want; if you abound, impart:

These both are pleasures to the feeling heart."

Cooper: Progress of Error, 253, 254.

2. Expressive of or manifesting great sensibility; tending to excite the emotions; affecting; as, He spoke in a most feeling manner.

"Thy wailing words do much my spirits move,

They uttered are in such a feeling fashion."

Sidney. (Johnson.)

*3. Coming from the heart; heartfelt.

"I had a feeling sense

Of all your royal favors."—*Southerne. (Johnson.)*

B. *As substantive*:

1. Ordinary Language:

1. Literally:

(1) In the same sense as II. 2.

(2) The sensation or impression produced in the mind when a material body is touched by any part of the body.

2. Figuratively:

(1) A physical sensation of any kind due to any one of the senses; as, a feeling of warmth, or of cold.

(2) A mental sensation or emotion; mental state or disposition.

"There was a faction among them which regarded him with no friendly feeling."—*Macaulay: Hist. Eng.*, ch. v.

(3) Moral conception, consciousness, conviction.

"One word alone can paint to thee

That more than feeling—I was Free!"

Byron: Bride of Abydos, ii. 18.

* (4) Experience, knowledge, acquaintance.

"He had some feeling of the sport."

Shakesp.: Measure for Measure, iii. 2.

(5) Sensibility; readiness to feel for and sympathize with distress; tenderness of heart.

"By objects which might force the soul to abate

Her feeling, rendered more compassionate."

Wordsworth. Happy Warrior.

(6) That element in our moral constitution which is possessed of sensibility or sensitiveness; as, to hurt a person's feelings.

II. Technically:

1. *Fine Arts*: That visible quality of a work of art which embodies the mental emotion of the artist, and similarly affects the spectator.

2. *Phys. & Psychol.*: According to Mr. Herbert Spencer any portion of consciousness which occupies a place sufficiently large to give it a perceivable individuality; any one which has its individuality so marked off from adjacent portions of consciousness by quantitative contrasts, and which when introspectively contemplated appears to be homogeneous. Classifying them by their functions, they may be divided into centrally-initiated feelings called emotions, and peripherally-initiated feelings called sensations. These last again are subdivided into epiperipheral sensations, being those which arise on the exterior surface of the body, and endoperipheral sensations, those which arise in its interior. The proximate components of mind are of two broadly contrasted kinds, feelings and the relations between them. Quantity of feeling is of two kinds, that which arises from intense excitation of a few nerves, and that which springs from slight excitation of many nerves. (*H. Spencer: Psychol.*, ch. ii.)

† Crabb thus discriminates between feeling, sensation, and sense: "Feeling is the general, sensation and sense are the special terms; the feeling is either physical or moral; the sensation is mostly physical; the sense physical in the general, and moral in the particular application. The term feeling is most adapted to ordinary discourse; that of sensation is better suited to the grave and scientific style: a

child may talk of an unpleasant feeling; a professional man talks of the sensation of giddiness; it is our duty to command and curb our feelings; it is folly to watch every passing sensation. The feeling, in a moral sense, has its seat in the heart; it is transitory and variable; sense has its seat in the understanding; it is permanent and regular. We may have feelings of anger, ill-will, envy, and the like, which cannot be too quickly overpowered, and succeeded by those of love, charity, and benevolence; although there is no feeling, however good, which does not require to be kept under control by a proper sense of religion."

(2) He thus discriminates between feeling, sensibility, and susceptibility: "Sensibility is always taken in the sense of a habit. Traits of feeling in young people are happy omens in the estimation of the preceptor: an exquisite sensibility is not a desirable gift; it creates an infinite disproportion of pains. Feeling and sensibility are here taken as moral properties, which are awakened as much by the operations of the mind within itself as by external objects. Susceptibility designates that property of the body or the mind which consists in being ready to take an affection from external objects; hence we speak of a person's susceptibility to take cold, or his susceptibility to be affected with grief, joy, or any other passion: if an excess of sensibility be an evil, an excess of susceptibility is a still greater evil; it makes us a slave to every circumstance, however trivial, which comes under our notice." (*Crabb: Eng. Synon.*)

feël-ing-lý, ***fel-ing-ly**, *adv.* [*Eng. feeling; -ly*.]

1. With feeling or expression of sensibility; tenderly.

"The words of men leaving the world make usually the deepest impressions, being spoken most feelingly and with least affectation."—*Bates: Funeral Sermon of Dr. T. Jacob.*

2. So as to be sensibly felt; heartily.

"How toilsome, nay, how dire it was, by thee

Is known—by none, perhaps, so feelingly."

Wordsworth: To Thomas Clarkson.

***feël-lëss**, a. [*Eng. feel; -less*.] Without or destitute of feeling; insensible.

feet-washing, s.

1. A religious ceremony observed in the Roman Catholic Church, on which occasion, just before Easter, the Pope washes the feet of attendant ecclesiastics, in imitation of the action of Jesus Christ in washing the disciples' feet.

2. A ceremony performed, often with some ludicrous accompaniments, to a bride or bridegroom the night preceding marriage.

"The evening before a wedding there is a ceremony called the *feet-washing*, when the bride-maids attend the future bride, and wash her feet."—*Letters from a Gentleman in North of Scotland*, i. 261.

3. Transferentially, the night on which this custom is observed.

"The eve of the wedding-day is termed the *feet-washing*, when a party of the neighbors of the bride and bridegroom assemble at their respective houses; a tub of water is brought, in which the feet of the party are placed, and a small piece of silver or copper money dropped into the water; at this moment one of the company generally tosses in a handful of soot, by which the water is completely blackened; a most eager and ludicrous scramble now takes place among the lads and lasses, striving who shall get the piece of money, pushing, shoving, and splashing above the elbows; for the lucky finder is to be first married of the company. A second and more cleanly ablution takes place."—*Edinburgh Magazine*, Nov. 1818, p. 412.

feeth, **feith**, s. [*Etym. doubtful*.] A net, fixed and stretching into the bed of a river.

feith-net, s. The same as FEETH (q. v.).

"The largest *feith-net* is six fathoms long, two fathoms deep at the river end, and one fathom at the land end."—*State, Leslie of Powis, &c.*, p. 109.

Fëh-lîng, s. [*For etym. see def.*] The name of the inventor of the solution called after him.

Fehling's solution, s.

Chem.: A solution used to determine the amount of glucose in a solution. It is prepared by dissolving in 200 cubic cent. of distilled water, 34.64 grammes of pure crystallized cupric sulphate, previously powdered and pressed between blotting paper, and mixing it with 174 grammes of Rochelle salt dissolved in 400 c. c. of a solution of pure caustic soda. Specific gravity, 1.14, the volume being made up to 1 liter. Each c. c. of the solution represents 5 milligrammes of anhydrous grape-sugar, 746 milligrammes of milk sugar, 63464 grammes of cupric sulphate and 10103 grammes of CuO. The liquid must be kept in bottles protected from the light, and from absorption of CO₂ from the air. A known volume of the Fehling's solution, 10 c. c. of solution and 40 c. c. of water, is placed in a white porcelain dish, heated to boiling, and a diluted solution of liquid to be examined is run in from a burette till the whole of the copper is separated as suboxide, as shown from the absence of blue color. Starch can be converted into glucose by boiling with dilute sulphuric acid 100 parts of grape sugar = 90 of starch, therefore each c. c. of Fehling's solution equals 4.5 milligrammes of starch. (*Blyth: Pract. Chem.*)

***fëide**, s. [*FEUD*.]

fëigh (*gh guttural*), *interj.* [*Fr.*]

fëign (*g silent*), ***fain-en**, ***fayn-en**, ***fëigne**,

***fëine**, ***feyne**, v. t. & i. [*Fr. feindre*, from Lat *fingo*=to feign.]

A. Transitive:

1. To invent or imagine; to image by an act of the mind.

"No such things are done as thou sayest, but thou feignest them out of thine own heart."—*Nehem.* vi. 8.

2. To make a show of, to pretend, to counterfeit.

"He shulde not with feigned chere

Deceive love." *Gower*, i. 67.

*3. To dissemble, to hide, to conceal under a false show.

"Yet both do strive their fearfulness to feign."

Spenser: F. Q., II. iii. 20.

*B. *Reflex.*: To assume a false or counterfeit appearance.

"He feynede hym somdel syk."

Robert of Gloucester, p. 336.

C. Intransitive:

1. To represent falsely, to fable, to relate in fiction.

"The poet

Did feign that Orpheus drew trees, stones, and floods."

Shakesp.: Merchant of Venice, v. 80.

2. To counterfeit, to dissemble.

"Most friendship is feigning."

Shakesp.: As You Like It, II. 7.

† Crabb thus discriminates between *to feign* and *to pretend*: "These words may be used either for doing or saying; they are both opposed to what is true, but they differ from the motives of the agent: *to feign* is taken either in a bad or an indifferent sense; *to pretend* always in a bad sense: one *feigns* in order to gain some future end; a person *feigns* sickness in order to be excused from paying a disagreeable visit; one *pretends* in order to serve a present purpose; a child *pretends* to have lost his book who wishes to excuse himself for his idleness. *To feign* consists often of a line of conduct; *to pretend* consists always of words; Ulysses *feigned* madness in order to escape from going to the Trojan war; according to Virgil, the Grecian Sinon *pretended* to be a deserter come over to the Trojan camp; in matters of speculation, *to feign* is to invent by force of the imagination; *to pretend* is to set up by force of self-conceit." (*Crabb: Eng. Synon.*)

fëigned (*g silent*), *pa. par.* or a. [*FEIGN*.]

***fé-llç-1-fy**, *v. t.* [Lat. *felix* (genit. *felicia*)=happy; *facio* (pass. *fito*)=to make.] To make happy; to felicitate. [Quarles.]

fé-llç-1-tâte, *v. t.* [FELICITATE, a.; Fr. *féliciter*; Sp. *felicitar*; Ital. *felicitare*.]

*1. To make happy; to confer happiness upon.

*2. To congratulate; to wish joy or happiness to.

¶ Crabb thus discriminates between to *felicitate* and to *congratulate*: "*Felicitate* . . . signifies to make happy, and is applicable only to ourselves; *congratulate* . . . is to make agreeable, and is applicable either to ourselves or others; we *felicitate* ourselves on having escaped the danger; we *congratulate* others on their good fortune." (Crabb: *Eng. Synon.*)

***fé-llç-1-tâte**, *a.* [Low Lat. *felicitatus*, pa. par. of *felicitare*, from Lat. *felix* (genit. *felicia*)=happy.] Made happy.

"I am alone felicitate In your dear highness' love."—*Shakesp.: Lear*, i. 1.

fé-llç-1-tâ-tion, *s.* [Fr., from *féliciter*=to felicitate (q. v.).] The act of felicitating or congratulating another on his good fortune; congratulation.

1. Happiness; blissfulness; blessedness; good fortune.

"Johnson declared that a tavern chair was the throne of human felicity."—*Macaulay: Hist. Eng.*, ch. iii.

*2. A blessing; a source of happiness or bliss.

"The felicitities of her wonderful reign may be complete."—*Atterbury*. (Johnson.)

*3. A happy faculty or skill; dexterity.

"His felicity in taking a likeness."—*Walpole: Anecdotes of Painting*, vol. iv., ch. iii.

4. Appropriateness, neatness, happiness, aptness; as, the *felicity* of an expression.

¶ For the difference between *felicity* and *happiness*, see HAPPINESS.

fé-llç-dæ, *s. pl.* [Lat. *felis*, *feles* (genit. *felis*)=a cat, and fem. pl. adj. suff. -idæ.]

1. *Zool.*: A family of Mammals, order Carnivora, tribe Digitigrada. Head, short, round; jaws, short; teeth, incisor, $\frac{1}{2}$, or they may be called $\frac{3}{4}$, premolars, $\frac{3}{4}$, molars, $\frac{1}{2}$. Or by another arrangement preferred by Owen the premolars are called $\frac{3}{4}$, and the molars $\frac{1}{2}$. In all there are thirty teeth. The canines are long and large: it is with

them that prey is held. The true molars are also large, sharp, and terminated by two or three points: the others, too, are enameled, and the cutting edges of the upper and lower series fit into each other and operate like a pair of scissors. The motion of the jaw is chiefly vertical. The legs are powerful, claws prehensile, the foot so cushioned on the sole as to permit these animals to approach their victims with noiseless tread. The species, notwithstanding great external diversities, so much agree in all essential respects that it has been doubted whether there is in the family more than a single recent genus, the typical *Felis*. Most modern naturalists, however, break it up into various genera, as *Felis*, *Leo*, *Leopardus*, *Lynx* or *Lynceus*, &c. Representatives of the family exist in both the Old and New Worlds. [FELIS.]

2. *Palæont.*: The family has existed from at least the Middle Eocene. It became abundant in the Miocene.

fé-ll-næ, *s. pl.* [Lat. *felis*, *feles* (genit. *felis*)=a cat, and fem. pl. adj. suff. -inæ.]

Zool.: The typical sub-family of Felidæ. When the family Felidæ was made to comprehend the hyenas and dogs as well as the cats, as was the case in the arrangement of Swainson and his school, such a sub-family as Felinæ was necessary; now that these are excluded, it has sunk into disuse.

fé-line, *a. & s.* [Lat. *felinus*, from *felis*=a cat.]

A. As adjective:

1. *Lit.*: Like or allied to a cat in outward form.

2. *Fig.*: Having the mental characteristics attributed to the species; sly, stealthy.

B. As subst.: A member of the family Felidæ (q. v.).

fé-lls, *s.* [Lat.=a cat.]

1. *Zool.*: Cat. A Linnean genus of animals corresponding with FELIDÆ (q. v.). Some, however, break it up into various genera, though admitting the difficulty of obtaining any important characters to discriminate them. When the genus is not broken up, then *Felis leo* is the Lion, *F. tigris* the Bengal Tiger, *F. leopardus* the Leopard—of which the Panther (*F. pardus*) may be only a variety, and the Ounce (*F. uncia*) the half-developed young—*F. jubata* the Hunting Leopard or Cheetah, *F. onca* the Jaguar, *F. concolor* the Puma, *F. lynceus* the European Lynx.

2. *Palæont.*: The genus came into existence at least as early as the Miocene. To the glacial period there was existent in Europe one species, *Felis spelæa*, which was, perhaps, not specifically distinct from the modern lion, *F. leo*.

2. A variety of Orthoclase. [ORTHOCLASE-FEL-SITE.]

fēl-sŷt-ŷc, *a.* [Eng. &c., *felsit(e)*; -ic.]

Geol.: Containing more or less of felsite. Thus Prof. T. McKenny Hughes calls the Dinorwig beds of the Pre-Cambrian rocks, Felsitic series. (*Quar. Jour. Geol. Soc.* (1879), xxxv, p. 686.)

fēl-sō-bān-yŷte, *s.* [Named from Felsöbanya, in Hungary, where it is found.]

Min.: An orthorhombic, snow-white, translucent or subtransparent mineral, optically bi-axial. Hardness, 1.5; specific gravity, 2.33; luster, pearly on the cleavage face. Composition: Sulphuric acid, 17.2; alumina, 44.1; water, 38.7=100. (*Dana.*)

fēl-spar, **fēld-spar**, *s.* [From Ger. *feldspat*=felspar; *fēld*=field, and *spat*=spar.]

A. As substantive:

Min.: A genus of minerals rather than a single mineral. Formerly there were included under it five species—viz.: (1) *Adularia* or Moonstone, (2) *Common*, (3) *Compact*, (4) *Glassy*, and (5) *Labrador Felspar*. Now *Dana* elevates Felspar into a group. [FELSPAR-GROUP.]

B. As adj.: [FELSPAR-GROUP.]

felspar-group, *s.*

Min.: A group of Unisilicates, having the specific gravity below 2.85, the hardness 6 to 7, fusibility 3 to 5; crystallization oblique or clinohedral, the prismatic angle near 120°, the cleavage two, one basal the other brachy-diagonal, with inclination to each other of about 90°; its composition having the protoxide bases lime, soda, potash, and, in one species, baryta, the sesquioxide only alumina; ratio between the two 1.3. *Dana* includes under it the species Anorthite (Lime felspar), Labradorite (Lime-soda felspar), Hyalophane (Baryta-potash felspar), Andesite and Oligoclase (Soda-lime felspar), Albite (Soda-lime felspar) and Orthoclase (Potash felspar). (*Dana.*) (See these words.) To this list the *Brit. Mus. Catal.* adds Microcline and Petalite (q. v.).

†1. *Blue Felspar:*

Min.: The same as LAZULITE (q. v.).

†2. *Common Felspar:*

Min.: The same as ORTHOCLASE (q. v.).

†3. *Compact Felspar:*

Min.: FELSITE (q. v.). It is either (a) *Compact massive oligoclase*, oligoclase felsite, or (b) *Compact orthoclase*, orthoclase felsite, hallefinta, hellefinta.

†4. *Glossy Felspar:*

Min.: The same as SANIDINE (q. v.).

†5. *Labrador Felspar:*

Min.: The same as LABRADORITE (q. v.).

†6. *Lime Felspar:*

Min.: (a) The same as INDIANITE (*Beudant*, 1824), † (b) The same as LABRADORITE (*Dana*).

†7. *Potash Felspar:*

Min.: The same as ORTHOCLASE. The name was used specially to distinguish it from Albite (Soda felspar) (q. v.).

†8. *Soda Felspar:*

Min.: The same as ALBITE (q. v.).

felspar porphyry, *s.*

Geol.: A volcanic rock, having a base of felspar, with crystals of felspar, as well as crystals and grains of quartz. It is called also Hornstone porphyry (q. v.).

A. As adjective:

I. Ordinary Language:

1. Of or pertaining to a woman; womanly; like or becoming to a woman.

"There was no want of *feminine* wit and shrewdness in her conversation."—*Macaulay: Hist. Eng.*, ch. xi.

2. Wholly with a bad meaning when applied to a man; effeminate.

"But Ninus being esteemed no man of war at all, but altogether *feminine*, and subjected to ease and delicacy, there is no probability in that opinion."—*Raleigh: Hist. of the World*, bk. ii., ch. i., § 1.

3. Soft, tender, delicate.

II. Gram.: Having the form of a word denoting a female; denoting the gender of nouns really or hypothetically female.

***B. As subst.**: A female; a woman; the female sex.

"Fill the world at once

With men, as angels, without *feminine*."

Milton: P. L., x. 893.

¶ Crabb thus discriminates between *feminine*, *female*, and *effeminate*: "*Female* is said of the sex itself, and *feminine* of the characteristics of the sex. *Female* is opposed to male, *feminine* to masculine. In the *female* character we expect to find that which is *feminine*. The *female* dress, manners, and habits, have engaged the attention of all the essayists from the time of Addison to the present period. The *feminine* is natural to the *female*; the *effeminate* is unnatural to the male. A *feminine* air and voice, which is truly grateful to the observer in the one sex, is an odious mark of *effeminacy* in the other. Beauty and delicacy are *feminine* properties; robustness and vigor are masculine properties; the former, therefore, when discovered in a man, entitle him to the epithet of *effeminate*." (Crabb: *Eng. Synon.*)

fēm-i-nine-ly, adv. [Eng. *feminine*; -ly.] In a feminine manner; as, becomes a woman.

fēm-i-nin-ism, s. [English *feminin(e)*; -ism.] The quality or state of being feminine or female.

To fall and blast her pride!"

Shakesp.: *Lear*, ii. 4.

fēnce, *fens, *fense, *fenss, s. [An abbreviation for *defense* (q. v.).]

I. Ordinary Language:

1. Literally:

(1) Protection, guard, defense, or security against attack.

"He was fully the *fens* and the fyn stuf
Of all the tulkes of Troy."

Destruction of Troy, 7,368.

(2) That which serves to inclose and protect a piece of ground, or to keep cattle from straying; a structure on the boundary of a lot, field, or estate, to keep off intruders or to act as a screen; as, a wall, a hedge, a paling, a bank, a line of rails or posts, &c.

"In front, near the edge of the morass, were some fences out of which a breast-work was without difficulty constructed."—*Macaulay: Hist. Eng.*, ch. xvi.

(3) The art of using the sword, or fencing; skill in fencing or sword-exercise; the art of self-defense with a sword.

"I bruised my shin the other day, with playing at sword and dagger with a master of *fence*."—*Shakesp.: Merry Wives of Windsor*, i. 1.

2. Figuratively:

(1) Skill or adroitness in meeting and defeating the attacks of an opponent in argument.

(2) A guard, defense, or protection of any kind.

"Whatever disregard certain modern refiners of morality may attempt to throw on all the instituted means of public religion, they must in their lowest view be considered as the out-guards and fences of virtuous conduct."—*Blair*.

(3) A purchaser or receiver of stolen goods. (*Slang*.)

(4) The act of opening a court, parliament, &c.
"The affirmation and *fence* of the court, that na man tak speech upon hand, without leave askit and obtenit."—*Balfour: Practica*, p. 278.

II. Technically:

1. *Gun.*: The arm of the hammer-spring of a gun-lock.

2. *Locks.*: An arm or projection which enters the gates of the tumblers when they are adjusted in proper position and coincidence, and at other times prevents such movement of the dog, stump, or other obstructing member as would permit the retraction of the bolt. In common tumbler-locks the fence forms the obstructing medium between the bolt and the tumblers, to prevent the retraction of the former when the tumbler-gates are not in coincidence.

3. *Wood-work.*: An adjustable guard-plate or edge on a gauge, or on a grooving, banding, plow, filister, or reglet plane, by which the distance of the groove from the guide-edge is regulated. A straight edge on the work-table of a circular, band, or scroll saw, or of a planing, molding, or mortising machine. It acts as a gauge and guide, and is adjustable to any required distance from the tool.

Crabb thus discriminates between *fence*, *guard*, and *security*: "The *fence* in the proper sense is an inanimate object; the *guard* is a living agent; the former is of permanent utility, the latter acts to a partial extent. In figurative sense they retain the same distinction. Modesty is a *fence* to woman's virtue; the love of the subject is the monarch's greatest safeguard. . . . The *guard* only stands at the entrance to prevent the ingress of evil; the *security* stops up all the avenues, it looks up with firmness. A *guard* serves to prevent the ingress of everything that may have an evil intention or tendency; the *security* rather secures the possession of what one has, and prevents a loss." (*Crabb: Eng. Synon.*)

Ring-fence: A fence which completely encircles an estate.

fence-jack, s. A lever jack adapted for lifting the corner or lock of a worm-fence in order to lay in a new bottom-rail, a fence-chunk, or a stone.

fence-month, s. The fawning month during which deer-hunting is forbidden; a defense-month (q. v.). It varies in different localities. There are also fence-months for various kinds of fishes, as trout, salmon, &c.

fēn-ēs-trāt-ēd, a.

[Lat. *fenestratus*, pa. par. of *fenestro*=to furnish with windows; *fenestra*=a window.]

Arch.: Fur-

nished with windows.

fenestrated-

membrane, s.

Anatomy: A

term applied

to that form of

the elastic tissue

of the middle or contrac-

tile coat of the

arteries, in which it presents a homogeneous mem-

brane, the meshes of which appear as simple per-

forations.

fēn-ēs-trā-tion, s. [Lat. *fenestratus*, pa. par. of *fenestro*.]

*I. Ord. Lang.: The act of making or supplying

with windows.

2. Arch.: Fenestration is, in contradistinction to

columination, the system of construction and mode

of design marked by windows. Fenestration and

columination are so far antagonistic and irrecon-

ciliable, that fenestration either interferes with the

effect aimed at by columination with insulated col-

umns, as in a portico or colonnade, or reduces it, as

in the case with an engaged order, to something

quite secondary and merely decorative. Astylar

and fenestrated ought, therefore, to be merely convertible terms; but as they are not, that of Columination fenestrated has been invented, to denote that mode of composition which unites fenestration with the semblance, at least, of the other. (Weale.)

***fēn-ēs-tre (tre as tēr),** [O. Fr. from Latin *fenestra*; Fr. *fenêtre*.] A window. (P. Plowman, 9,317.)

fēn-ēs-trāle, s. [Latin *fenestrula*, dimin. of *fenestra*=a window.]

Min.: A species of transparent alabaster, sometimes used for windows

Fē-ni-an, s. & a. [Mod. Lat. *Fenii*; Ir. *Fionna*, *Fiona*, pl. of *Fion*, *Fian*=a race of heroes celebrated in Irish mythical history. Moore calls them the famous Fianna Erin, or Militia of Erin, whose achievements formed so often the theme of our ancient romances and songs, and speaks of Fenian heroes and Fenian poems. Their leader was Finn, or Fionna Mac Cumhal, claimed also by the Scottish Celts, who called him Fingal, as in Fingal's Cave. In Gael. is also Fian= a Fingalian, a giant. (Moore: *Hist. Ireland*, pp. 135, 140, 141, &c.) The date of Finn Mac Cumhal has been fixed hypothetically at A. D. 213 to 253, but Mr. Skene believes that he and his organization belonged to an earlier Irish race than that which now inhabits Ireland.]

A. As *subst. (pl.)*: An Irish secret society which was formed, it is believed, in March, 1853, in America by the refugees who crossed the Atlantic after the unsuccessful outbreak of 1843, and had for its object the expulsion of the British Government, or even the Saxons from Ireland, and the conversion of that island into an independent republic. Its originator divided it into district clubs called circles, each with a president called a center; the whole organization being ruled over by a senate, over which a "head center" presided. Its members had to take an oath before being entrusted with its secrets. In January, 1864, they began to attract notice in Ireland, and the next year some of them were seized and imprisoned. Between 1865 and 1867 they made various outbreaks. In 1866 they captured a British vessel, and made a raid into Canada, but were defeated by the volunteers and censured by President Johnson. In 1867 they unsuccessfully attempted an attack on Chester Castle in England, made other risings, and on December 13 blew in the wall of Clerkenwell prison, killing and wounding a number of innocent people living in the adjacent houses. A second Fenian raid into Canada took place in 1870, but was repelled by the militia. The basis for all the Fenian operations was America, where, in 1865, 600 Fenian representatives held a congress. First and last many Fenians were captured and imprisoned by the British Government, most of whom were after a time released. The organization seemed to become dormant about 1874, and various persons who had been connected with it joined the "Invincibles," formed some years later for the purpose of assassinating government officers or others obnoxious to its members or its chiefs, but not much was known of this latter organization until the murder of Lord Cavendish called attention to them. [INVINCIBLE.]

B. As *adj.*: Pertaining or relating to the brotherhood described under A.; as, a Fenian raid, a Fenian outbreak.

fēr-mēt, s. & a. [Lat. *fermentum*, or *fervimentum*, from *ferveo*=to boil, to be agitated; Fr. *ferment*; Sp., Port., & Ital. *fermento*.]

A. As substantive:

1. Ordinary Language:

1. Literally:

(1) In the same sense as II.

(2) A gentle internal motion or boiling of the constituent parts of a fluid.

"Down to the lowest lees the ferment ran."

Thomson: Castle of Indolence, li. 30.

2. Fig.: A state of commotion, agitation, or disturbance.

"He had no sooner entered on his functions than all Paternoster Row and Little Britain were in a ferment."—Macaulay: Hist. Eng., ch. xix.

bōl, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, a; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

II. Chem.: Ferments are substances which cause fermentation (q. v.). They are of two kinds: (1) Chemical, or unorganized, as diastase, emulsin, myrosin, the ferment of the pancreas, &c.; (2) Physiological, or organized, such as yeast, mycoderms, microzymes, bacteria, &c. A mode of distinguishing between the two is afforded by the action of chloroform, which kills the latter, but does not produce any alteration in the former. Thus chloroform arrests the fermentation of sugar, but does not interfere with the action of emulsin or amygdalin. Unorganized ferments may be extracted from the vegetable and animal organs in which they occur by means of glycerine. Thus diastase may be extracted from germinating wheat and barley, emulsin from sweet almonds, and animal sugar, forming ferment, from the glands which produce it. The ferment may be precipitated from the glycerine solution by alcohol, and purified by repeated solution and precipitation. The ferment of the pancreas acts on fibrine at 90°. It is said that organized ferments have been produced by spontaneous generation in organic liquids, but careful experiments have shown that the germs of these ferments are floating in the air. Borax appears to prevent fermentation, and has been recommended for preserving meat from putrefaction.

B. As adj.: (See the compound.)

ferment-oils, s. pl.

Chem.: Volatile oils produced by the fermentation of various plants, not originally contained therein, and different from the oils which are extracted from the unfermented plants by distillation with water. They were known to the alchemists, and by them designated quintessences. Ferment-oils are for the most part more soluble in water than ordinary volatile oils. They are generally formed by allowing the flowering-plant to ferment in water; the liquid is distilled when the fermentation is ended, and the oil extracted from the distillate by shaking it with ether, which dissolves the oil; the ether is then allowed to evaporate off.

fēr-mēnt, v. t. & i. [Lat. *fermento*, from *fermentum*, from *ferveo*=to boil, to be agitated; Fr. *fermenter*; Sp. *fermentar*; Ital. *fermentare*.]

A. Transitive:

1. To cause or excite fermentation in.

"A moist and well fermented earth."—*Bp. Hall: Sermon* (Jan. 29, 1825).

2. *Fig.*: To excite, to agitate, to heat, to warm.

"Ye vigorous swains! while youth ferments your blood,
And purer spirits swell the sprightly flood,
Now range the hills." *Pope: Windsor Forest*, 139.

B. Intransitive:

1. *Lit.*: To be in a state of fermentation; to effervesce; to undergo sensible internal motion, as the constituent parts of a fluid.

2. *Fig.*: To be in a state of ferment; to be agitated, heated, warmed, or excited, as by violent emotions.

***fēr-mēnt-a-bil-l-ty**, s. [Eng. *ferment*; *-ability*.] The quality or state of being fermentable; capability of fermentation.

***fēr-mēnt-a-ble**, a. [Eng. *ferment*; *-able*.] That may or can be fermented; capable of fermentation.

***fēr-mēnt-tal**, a. [Eng. *ferment*; *-al*.] Having the power or property of causing fermentation.

***Fēr-mēnt-ār-l-ang**, s. pl. [English *ferment*; *-arian*.] The Christians of the Greek Church, so called by the Latins on account of their using fermented bread in the Eucharist. (*Ash*.)

***fēr-mēnt-ār-l-oūs**, a. [Eng. *ferment*; *-arius*.] Belonging to fermentation. (*Cole*.)

***fēr-mēnt-tate**, v. t. [Lat. *fermentatus*, pa. par. of *fermento*.] To leaven.

fēr-mēnt-tā-tion, s. [Fr., from Lat. *fermentatio*, pa. par. of *fermento*=to ferment; Sp. *fermentación*; Ital. *fermentazione*.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II.

2. *Fig.*: A state of excitement, agitation, or commotion of spirit; a ferment.

II. Chem.: Alcoholic fermentation was known to the ancients, and is the change which sugar undergoes under the influence of yeast. Before fermentation takes place, cane sugar is transformed into glucose, thus, $C_{12}H_{22}O_{11} + H_2O = 2C_6H_{12}O_6$. About 95 per cent. of the glucose is converted into alcohol, $C_6H_{12}O_6 = 2CO_2 + 2C_2H_5.OH$. Of the other 5 per cent., about 1 part is used by the growth of yeast, the other 4 parts are converted into succinic acid, glycerine, carbonic acid, and free hydrogen: a larger quantity of these secondary products is formed if the fermentation is slower, or is made

with more exhausted and impure yeast. Fermentation takes place most readily at about 24 to 30°. The saccharine liquid becomes turbid, gives off CO_2 , and becomes warmer than the air; when the evolution of CO_2 ceases, the yeast or ferment, *Torula cerevisia*, separates from the liquid which now contains alcohol, glycerine, and succinic acid in the place of the sugar. A small quantity of acetic acid is always formed, probably from the decomposition of the yeast. Most of the natural saccharine juices, as beet-root, potato, and grape juice, when fermented, yield small quantities of alcohols, homologous with ethylic alcohol, forming Fusel oil (q. v.), which contains propyl, butyl, and amyl alcohols, also a small quantity of caproic, capenanthyl, and caprylic alcohols. These may be produced probably not from glucose, but from some other substances present in the juice, or from glucose by the action of special ferments; an increase of yeast takes place when the liquid contains a nitrogenous substance; the action of yeast on sugar is prevented by too great concentration of the liquid. The presence of chemical compounds, as silver nitrate, soluble salts of lead, iron, copper, tannin, creosote, phenol, alcohol when its strength is above 20 per cent., and oxalic acid, hinders fermentation.

1. Butyric fermentation:

Chem.: The conversion of lactic acid, &c., into butyric acid, due to the presence of *Vibrio*, according to Pasteur.

(2) Lactic fermentation:

Chem.: The conversion of sugar into lactic acid, said to be due to the presence of *Penicillium glaucum*. It takes place when 2 gallons of milk are mixed with 6 pounds of raw sugar, 12 pints of water, 8 ounces of putrid cheese, and 4 lbs. of zinc white; the mixture is kept at a temperature of 30° for some weeks. If the fermentation is allowed to go further, the lactic acid, $CH_3.CHOH.CO.OH$, is converted into butyric acid, $CH_3.CH_2.CH_2.CO.OH$.

(3) Mucous fermentation:

Chem.: The conversion of sugar into mannite, $C_6H_{12}O_6$, gum, $C_{12}H_{20}O_{10}$, and carbonic acid, CO_2 , under the influence of a peculiar ferment.

(4) Tannous fermentation:

Chem.: The conversion of tannin, in a solution of galls, into gallic acid, $C_{17}H_{12}O_{11} + O_2 = 3C_7H_6O_5 + 6CO_2 + 2H_2O$. The conversion of alcohol into acetic acid is due to slow oxidation, as the presence of a ferment is not required, but it takes place rapidly in the presence of *Mycoderma aceti*, in a solution containing 10 per cent. of alcohol, at a temperature between 20° and 30°.

fēr-mēn-ta-tive, a. [Fr. *fermentatif*; Sp. & Ital. *fermentativo*.]

1. Causing or having the power to cause fermentation.

"Aromatical spirits destroy by their fermentative heat."—*Arbuthnot: On Aliments*, ch. v.

2. Consisting in fermentation.

"It is not a fermentative process."—*Paley: Nat. Theology*, ch. x.

fēr-mēn-ta-tive-ness, s. [Eng. *fermentative*; *-ness*.] The quality or state of being fermentative.

***fēr-mēn-tēs-çl-ble**, s. [Lat. *fermentesco*, incept. from *fermento*=to ferment.] A body or substance capable of fermentation.

fēr-mēnt-lāg, pr. par., a. & s. [FERMENT, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The state of fermentation.

fermenting-square, s.

Brewing: An oblong or square shallow vat in which wort is fermented.

fermenting-vat, s. A tank or tun in which wort is placed to undergo the fermentation resulting from the addition of the yeast. Certain arrangements for keeping the liquid at the desired temperature in the heat of summer or cold in winter are added in some cases.

***fēr-mēr-ēre**, s. [Low Lat. (in) *fīrmarius*, from *infīrmāria* = an infirmary; Lat. *infīrmus* = weak, sickly; in pref. negative, and *fīrmus* = strong.] The person in a religious house who had charge of the infirmary.

***fēr-mil-lēt**, s. [Old Fr. dimin. of *fermeil* = a clasp, from *fermer* = to make fast or firm.] A buckle, a clasp.

fērñ, ***ferne**, s. [A. S. *fearn*; cogn. with Dut. *varen*; O. H. Ger. *farn*, *farn*; Ger. *farn*.]

1. Botany:

(1) *Gen.*: The Filical Alliance, consisting of vascular Acrogens, with marginal or dorsal one-celled spore-cases, usually surrounded by an elastic ring; spores of only one kind. (*Lindley*.) Ferns are leafy plants, springing from a rhizome, which creeps below or on the surface of the ground, or rises into the air like the trunk of a tree. This trunk does not taper, but is of equal diameter at both ends. It is covered by a hard, cellular, fibrous rind; its wood, when any is present, consists of large, scalariform or dotted ducts;

Fern.

1. Filix Mas. 2. Pair of Pinnules.

the venation of the leaves is circinate, their venation often dichotomous. Reproductive organs, consisting of spore-cases, arising from the veins on the lower surface of the leaves or from their margins. The collection of seeds are called sori. Most ferns are comparatively small, while some tree-ferns reach seventy-five feet high. The closest affinities of ferns is with Lycopodiaceæ. Seventy-five genera and about 2,500 species are known. Lindley divided them into three orders: Ophioglossaceæ, Polypodiaceæ, and Danæaceæ (q. v.). The last-named order is now generally called Marattiaceæ (q. v.). The three are thus distinguished: Ophioglossaceæ have the fructifications marginal, on rachiform fronds; Marattiaceæ have the fructifications dorsal on flat leafy fronds; Polypodiaceæ have the spore-cases not valvate, rarely somewhat two-valved vertically. The last has jointed spore-cases, the first two have none.

(2) *Spec.*: The order Polypodiaceæ. It contains all the Filical Alliance, with the exception of a few abnormal genera.

2. *Palæo-bot.*: The fronds of ferns or their impressions are frequently met with, and in a beautiful state of preservation. In some cases even the form of the sori has been preserved. Ferns are known from about the middle of the Silurian period. They became more numerous during the Devonian period; tree-ferns (*Psaronius* and *Cyclopteris*) appearing among the rest. Ferns are quite a notable feature of Carboniferous vegetation. There are both herbaceous and tree-ferns. The genera of the former are numerous. The most important are *Sphenopteris*, *Pecopteris*, *Neuropteris*, *Cyclopteris*, &c. The ferns of the Permian system are less numerous; they generally resemble those of the Carboniferous. Ferns abound again in the Oolitic rocks, after which they lose their relative importance as plants of higher organization multiply.

3. *Pharm.*: *Filix mas*, Male Fern, the dried rhizome of *Aspidium filix mas*. It should be collected in summer. It is of a greenish-brown color externally, yellow within; the taste is at first sweet, then bitter; the powder is yellowish-green. It is used to form *Etractum filicis liquidum*, fern in fine powder two pounds extracted with eighty fluid ounces of ether. It is anthelmintic, and is employed to expel tapeworms.

fern-bracken, s.

Bot.: *Nephrodium filix mas*.

fern-owl, s.

Zool.: The Nightjar or Goatsucker, *Caprimulgus europæus*.

fern-seed, s. The seeds or spores of ferns; these were in former times supposed to possess supernatural virtues or powers, such as rendering a person invisible.

fern-shaw, s. Fern-brake or fern-thicket. (*Browning: Flight of the Duchess*.)

***fērne**, a. & adv. [A. S. *fyrn*; O. Sax. *fern*, *forn*, *furn*; O. H. Ger. *fīrni*; Goth. *fairnis*.]

A. As adj.: Former, past.

"Farewel all the snowgh of *ferne yere*."

Chaucer: Troilus and Cresside, v. 1, 176.

B. As adv.: Formerly, before.

"The kyndnesse that myn evercristene

***fērñ-ēr-y**, s. [Eng. *fern*; *-ery*.] A place where ferns are artificially grown.

fērñs-münd, s. [Eng. *fern*, and Lat. *osmunda*.] A fern, *Osmunda regalis*. (*Markham in Nares; Britten & Holland*.)

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wāt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

fěrn'-tī-cle, farn-tic-kle, *fern-tyk-ylle, s. [Eng. *fern*, and *tickle*.] A spot on the skin resembling the seed of a fern; a freckle.

fěrn'-y, fern-ie, a. [Eng. *fern*; -y.]

1. Full of, or overgrown with ferns.

2. Resembling or having the characteristics of fern.

***fě-rōc'-l-ent, s.** [Lat. *ferox* (genit. *ferocis*) = *fierce*.] Fierce, ferocious.

fě-rōc'-l-ty, v. t. [Lat. *ferox* (genit. *ferocis*) = *fierce*, and *facio* (pass. *fiō*) = to make.] To make fierce or ferocious.

fě-rō-cious, a. [Fr. *féroce*, from Latin *ferox* (genit. *ferocis*); Ital. *feroce*; Sp. & Port. *feroz*.]

1. Fierce, savage, wild, ravenous.
2. Indicating or expressive of ferocity.
3. Infuriated.

fě-rō-cious-lý, adv. [Eng. *ferocious*; -ly.] In a ferocious or savage manner; with ferocity.

fě-rō-cious-něss, s. [Eng. *ferocious*; -ness.] The quality of being ferocious; ferocity; savage fierceness.

fě-rōc'-l-ty, s. [Fr. *féroçité*, from Lat. *ferocitas*, from *ferox* (genit. *ferocis*) = *fierce*, from *ferus* = wild.] The state of being ferocious; savageness, fierceness, wildness, fury.

"No kindness will tame the sullen ferocity of a priest-hood."—Macaulay: *Hist. Eng.*, ch. xvi.

Crabb thus discriminates between *ferocious*, *fierce*, and *savage*: "Ferocity marks the untamed character of a cruel disposition: *fierceness* has a greater mixture of pride and anger in it, the word *fiers* in French being taken for haughtiness: *savageness* marks a more permanent, but not so violent a sentiment of either cruelty or anger as the two former. *Ferocity* and *fierceness* are in common applied to the brutes, to designate their natural temper: *savage* is mostly employed to designate the natural temper of man, when uncontrolled by the force of reason and a sense of religion. In an extended application of these terms, they bear the same relation to each other: the countenance may be either *ferocious*, *fierce*, or *savage*, according to circumstances. A robber who spends his life in the act of unlawfully shedding blood acquires a *ferocity* of countenance: a soldier who follows a predatory and desultory mode of warfare betrays the licentiousness of his calling and his undisciplined temper in the *fierceness* of his countenance; the tyrant whose enjoyment consists in inflicting misery on his dependents or subjects evinces the *savageness* of his temper by the *savage* joy with which he witnesses their groans and tortures." (Crabb: *Eng. Synon.*)

fě-rō-nl-a, s. [See def. 1.]

1. *Roman Myth.*: A goddess, commonly ranked among the rural divinities, and worshiped with great solemnity both by the Sabines and the Latins, but more especially by the former.

2. *Astronomy.*: An asteroid, the seventy-second found. It was discovered by Peters, on Jan. 9, 1862.

3. *Bot.*: A genus of Aurantaceæ (Citronworts), the order to which the orange belongs. The single species is the Wood-apple or Elephant-apple (*Feronia elephantum*). It is a large and handsome tree, with pinnate leaves, and a large gray fruit with a very hard rind. It grows in India, where the native practitioners consider the young leaves, which when bruised have a smell like anise, stomachic and carminative.

4. *Entom.*: A genus of Coleoptera, belonging to the section Pentamera, and family Carabidæ.

fě-r-ōsh, s. [Hind *farash*.] An Indian servant in charge of tents, furniture, &c. He is expected to sweep the ground and spread carpets (Jaffur Shurreef & Herklots.)

***fě-r-ōus, a.** [Lat. *ferus*.] Wild, savage.

fě-r-ran-dine, s. & a. [Fr.]

A. *Assubstantive*:

Fabric: A mixed stuff of silk and other materials. It probably resembled poplin.

B. *As adj.*: Made of the stuff described in A. (Pepps: *Diary*, Jan. 28, 1662-3.)

***fě-r-ra'-ra, a.** [For etym. see def.]

Old Armor: A broadsword of especial excellence, named after Andrea Ferrara, a famous swordsmith.

[*Andrea Ferrara*: The same as FERRARA (q. v.).

fě-r-rār'-l-a, s. [Named after J. B. Ferrari, an Italian botanist.]

Bot.: A genus of bulbous plants from the Cape of Good Hope. They belong to the natural order Iridacæ.

***fě-r-ra'-ry, s.** [Eng. *ferrum*=iron.] [FARRIEBY.] The art of working in iron. (Chapman: *Homer's Iliad*, xvi.)

fě-r-rāte, s. [Eng. *ferrum*]; suff. -ate (Chem.).]

Chem.: A salt of ferric acid, H_2FeO_4 . The free acid has not been obtained. When a mixture of

four parts of dry potassium nitrate and one part of pure ferric oxide, Fe_2O_3 , is heated to full redness for an hour in a covered crucible, and the resulting brown mass treated with ice-cold water, a deep violet-red colored solution of potassium ferrate, K_2FeO_4 , is obtained. Potassium ferrate is also prepared by passing chlorine gas through a strong solution of potassium hydrate in which recently precipitated ferric oxide is suspended. The potassium ferrate is precipitated as a black powder, which may be drained on a porous tile. A solution of potassium ferrate decomposes, oxygen being liberated, and hydrated ferric oxide is precipitated. Ferrate of barium, $BaFeO_4$, is obtained by adding $BaCl_2$, barium chloride, to a solution of the potassium salt. It is a deep crimson-colored powder, and is a stable compound. Organic matter decomposes a solution of potassium ferrate.

***ferre, a.** [FAR.] Further, farther.

***fě-r-rē-an, a.** [Lat. *ferreus*, from *ferrum*=iron.] Of or pertaining to iron; of the nature of iron; made of iron.

***fě-r-rē-ūs, a.** [Lat. *ferreus*.] The same as FERREAN (q. v.).

***fer-rest, a. & adv.** [FARTHEST.]

fě-r-rēt (1), s. [Fr. *furet*, from Low Lat. *furetus*, *furectus*, the origin of which is doubtful, being derived by some from Lat. *fur*=a thief, by others from Bret. *fūr*=wise; Wel. *ffur*=wise, crafty; *ffured*=a crafty one, a ferret; Gael. & Ir. *fēred*.]

1. *Zool.*: *Putorius furo*, a domesticated variety of the genus *Putorius*. It is of African origin, and is unable to endure great cold. It is about fourteen inches in length, the fur of a pale yellow color, and the eyes pink. Ferrets are much used, both in this country and Europe, for killing rats and driving rabbits out of their holes.

2. *Glass Manuf.*: An iron used to make the rings at the mouths of bottles, or to try the melted matter.

fě-r-rēt (2), s. [Fr. *fleuret*.] A kind of narrow tape made of cotton, wool, or silk.

fě-r-rēt, v. t. & i. [FERRET (1), s.]

A. *Transitive*:

I. *Lit.*: To drive out of a hole or retreat, as a ferret does a rabbit.

"The archbishop had ferretted him out of all his holds."—*Heylin: Hist. Presb.*

II. *Figuratively*:

1. To drive out of any retreat or lurking-place.

"Let's in and ferret out these cheating rake-hells."—*Cartwright: Ordinary*, v. 4.

2. To find out, to discover, to search out by secret or cunning means; followed by out; as, to ferret out a secret.

"The War Office here is slowly but surely ferretting out the ramifications of the recent military conspiracy."—*London Daily Telegraph*.

B. *Intrans.*: To hunt after rabbits, &c., with a ferret.

fě-r-rēt-ēr, s. [Eng. *ferret* (v.); -er.] One who ferrets or hunts out a person or thing which is hidden or secret.

fě-r-rēt-tō, s. [Ital., dimin. of *ferro*=Lat. *ferrum*=iron.]

Glass Manuf.: A preparation of copper employed in glass-coloring. It is made by placing thin sheets of copper, interstratified with powdered brimstone, in a crucible which is luted tight and exposed to the heat of a blast-furnace for about two hours; when cool, the copper is found to be calcined so as to be readily crumbled between the fingers; it is then pulverized and sifted for use. A superior article to the foregoing is prepared by using vitriol instead of brimstone, and exposing the crucible to the heat of the glass furnace for three days. The old vitriol is then replaced by fresh, and the heating operation repeated six times.

fě-r-rī-age (age as íg), *fě-r-l-age, *fě-r-ry-age, subst. [Eng. *ferry*; -age.] The price, sum, or fare paid for conveyance in a ferry.

"Physic, journeying, ferrage, carriage, &c."—*Strype: Life of Parker*, bk. iv., ch. 25.

fě-r-ric, a. [Lat. *ferrum*=iron; suff. -ic.]

1. *Ord. Lang.*: Of or pertaining to iron; extracted from iron.

2. *Chem.*: Having iron in its composition. Each molecule contains two atoms of iron, united to each other by one bond.

ferric acetate, s.

Chem.: A dark-red, uncrystallizable liquid; when boiled, a basic acetate is precipitated.

ferric arsenate, s.

Pharmacy: $Fe_2As_2O_8$, *Ferri arsenias*. A green, amorphous, insoluble powder, obtained by precipitating a mixed solution of four parts of arseniate of sodium with three parts of sodium acetate, by a solution of nine parts ferrous sulphate. It has the same medicinal properties as arsenic.

ferric chloride, s.

1. *Chem.*: Fe_2Cl_6 , sesquichloride of iron. It is obtained in brilliant red-brown scales when chlorine gas is passed over red-hot iron. It is very deliquescent, and soluble in alcohol and in ether. It forms double salts with potassium chloride, and with ammonium chloride. It is obtained in a hydrated condition by dissolving ferric oxide in hydrochloric acid. A solution of ferric chloride dissolves a large quantity of freshly precipitated ferric hydrate, the solution becoming darker in color. The dilute solution is decomposed by heat into hydrochloric acid and colloidal ferric oxide, which remains in solution. Ferric chloride is reduced to ferrous chloride by sulphur dioxide, stannous chloride, metallic zinc, and by sulphuretted hydrogen gas. Ferric chloride is a disinfectant. Ferric chloride gives a red color with acetates, sulphocyanates, meconates, also with diamidophenol. A blue color with ferrocyanide of potassium, and characteristic reactions with phenol, &c.

2. *Pharm.*: Ferric chloride, *Ferri perchloridi liquor fortior*, strong solution of perchloride of iron. Prepared by dissolving iron wire in hydrochloric acid, and then evaporating the solution with nitric acid; it should contain 15.62 grains of Fe_2O_3 in a fluid drachm. It is used in the form of *Liquor ferri perchloridi*, solution of perchloride of iron, and *Tinctura ferri perchloridi*. These contain one part of the strong solution to three parts of water, or alcohol. They are powerful astringents, and blood restorers. A piece of blotting paper, moistened with strong solution of ferric chloride, is very useful to stop bleeding from a slight cut.

ferric nitrate, s.

Chem.: $Fe_2(NO_3)_6$, pernitrates of iron. Obtained by dissolving iron wire in nitric acid, specific gravity 1.3, and then adding to the solution a quart of stronger acid, specific gravity 1.43, when the salt separates out in colorless prismatic crystals, containing either six or nine molecules of water. Ferric nitrate is soluble in alcohol, and in water. The solution of ferric nitrate is red-brown in color, and dissolves hydrated ferric oxide, forming a basic nitrate. Ferric nitrate is used in dyeing and in pharmacy under the name of *Ferri pernitratis liquor*, as a powerful astringent tonic in cases of diarrhoea.

ferric oxide, s.

1. *Chem.*: Fe_2O_3 , peroxide of iron, sesquioxide of iron, red oxide of iron, rouge, colcothar. It occurs in nature, as red hematite, specular iron ore, and is obtained by heating, $FeSO_4$, ferrous sulphate in the preparation of sulphuric acid. It is a red powder, nearly insoluble in acids; it is used as a pigment, and to give an orange or purple color to glass and porcelain, according to temperature. Ferric oxide is not magnetic, and is unaltered by heat. It is used to polish glass, and then finely divided by jewelers under the name of rouge. The hydrated sesquioxide is obtained in a bulky brown precipitate by precipitating ferric chloride by ammonia; soda or potash must not be used, as the oxide retains a large quantity of these substances. The hydrate occurs native, as brown hematite. Hydrated ferric oxide is soluble in acids forming ferric salts; these solutions dissolve excess of the oxide, which is afterward precipitated as a basic salt. The hydrated oxide is used to remove H_2S from coal gas, and as a mordant in dyeing. It is reduced by organic matter, but is reoxidized in the air. Ferric oxide unites with ferrous oxide to form magnetic oxide of iron, $Fe_2O_3 \cdot FeO$, or Fe_3O_4 . [MAGNETIC IRON OXIDE.]

2. *Pharm.*: *Ferri peroxidum hydratum*, hydrated peroxide of iron. Obtained by drying the moist peroxide of iron at 212° F., and then reducing it to powder. It is used in the preparation of *Emplastrum ferri*, chalybeate plaster. Ferric oxide is a non-irritating preparation of iron: it is given internally in cases of neuralgia. *Ferri peroxidum humidum*, moist peroxide of iron. Obtained by precipitating persulphates of iron with soda, collecting on a calico filter, and keeping in a covered vessel; it contains about 86 per cent. of uncombined water. It is used as an antidote in cases of arsenical poisoning; it converts the arsenious acid into insoluble arsenate of iron.

ferric sulphate, s.

Chem.: $Fe_2(SO_4)_3$, persulphate of iron, sesquisulphate of iron. Obtained as a yellowish-brown deliquescent mass readily soluble in water. It forms basic salts, with excess of the ferric hydrate. Obtained by oxidizing ferrous sulphate with nitric acid, and adding sulphuric acid. Or by dissolving ferric hydrate in sulphuric acid. It forms alums, in which aluminium is replaced by iron. $Fe_2(SO_4)_3 \cdot (NH_4)_2SO_4 \cdot 24H_2O$. This salt is used in dyeing. It is insoluble in alcohol.

Ferric salts are not precipitated by H_2S from acid solutions, but are reduced to ferrous salts with separation of sulphur. Ferric salts give a red precipitate with caustic alkalies and ammonia; ammonium sulphide gives a black precipitate of

bōil, bōy; pōut, jōwī; cat, cell, chorus, ghin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist, ph = f.
-cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

ferrous sulphide and sulphur. Potassium ferrocyanide gives a deep blue precipitate; potassium ferricyanide gives no precipitate; and sulphocyanate of potassium (KCN_S) gives a blood-red color with ferric salts, which is not destroyed by HCl, but is decolorized by the addition of HgCl₂.

fēr-ri-cāl'-cite, s. [FERROCALCITE.]

fēr-ri-cy'-ān-ic, s. [Eng. ferri(c), and cyanic (q. v.).] Pertaining to or derived from iron and cyanogen.

ferri-cyanic acid, s.

-Chem.: [FERRICYANIDE OF HYDROGEN.]

fēr-ri-cy'-ān-ide, s. [Eng. ferri(c), and cyanide (q. v.).]

-Chem.: A salt of hydro-ferricyanic acid. Ferricyanides are formed by the action of oxidizing agents on ferrocyanides. The ferricyanides of ammonia, sodium, potassium, and of the alkaline earth-metals are soluble, the other ferricyanides are mostly insoluble, and have characteristic colors, so that ferricyanide of potassium is used as a test for metals, giving a deep blue color with ferrous salts, an orange color with zinc salts, a yellowish-green with cupric salts. The most important salt is ferricyanide of potassium (q. v.).

ferricyanide of hydrogen:

-Chem.: Hydroferricyanic acid, ferricyanic acid, hydrogen ferricyanide, H₂(Fe₂)^{vi}(CN)₁₂. It is obtained as a reddish-brown liquid by decomposing lead ferricyanide with dilute sulphuric acid. The solution is acid, and is decomposed by boiling.

ferricyanide of potassium, s.

-Chem.: K₃(Fe₂)^{vi}(CN)₁₂. Red prussiate of potash. It is prepared by slowly passing chlorine gas, with agitation, into a cold solution of ferrocyanide of potassium, till a drop of the solution no longer gives a precipitate with ferric chloride. The solution is then concentrated and allowed to crystallize; the salt is purified by recrystallization. It forms ruby-red anhydrous prismatic crystals, which are soluble in four parts of cold water; they are very slightly soluble in alcohol. The crystals burn and give off sparks in the flame of a candle; they detonate when heated with potassium nitrate. Excess of chlorine decomposes the salt, chloride of cyanogen and hydrocyanic acid being formed and the solution deposits Prussian green, Fe₃(CN)₆·4H₂O. With solutions of ferrous salts it precipitates a deep blue ferrous ferricyanide, Fe₃(Fe₂)^{vi}(CN)₁₂, which is used as a pigment under the name of Turnbull's blue. Ferricyanide of potassium is reduced to ferrocyanide of potassium by the action of sulphurous acid and by sulphites, and by boiling a solution of it, rendered alkaline by potash, with the hydrates of lead, protoxides, manganous oxide, the oxides being converted into higher oxides; it is also reduced by stannous chloride, and by many organic substances. Ferricyanide of potassium in an alkaline solution oxidizes sugar, gum, starch, and cellulose into carbonic acid and water. Ferricyanide of potassium is used as a chemical reagent and in dyeing.

fēr-ri-cy'-ān-ō-gēn, s. [Eng. ferri(c), and cyanogen (q. v.).]

-Chem.: A hexatomic radical contained in ferricyanides, having the formula (Fe₂(CN)₁₂)^{vi}, also written (Fe₂Cy₁₂)^{vi}; but this formula is often for convenience divided by two; hence, ferricyanide of potassium is written K₃Fe(CN)₆, instead of K₆Fe₂(CN)₁₂. This radical is also expressed by the sign (Cf_{dy}).

ferriferous rocks, s. pl.

-Geol.: Rocks which contain iron ore, if they do not even mainly consist of it. The bands of clay ironstone of the Carboniferous age are of this character; very thick beds of ferriferous rocks also occur in the Lias of Yorkshire and Lincolnshire, in the inferior Oolite of Yorkshire and Northamptonshire, and in the Neocomian beds, Lincolnshire, England.

ferrocyanic acid, s.

-Chem.: H₂Fe(CN)₆ or H₄C₆F₂. Hydroferrocyanic acid, ferrocyanide of hydrogen, ferro-prussic acid. It is obtained by adding to a cold saturated aqueous solution of ferrocyanide of potassium an equal volume of concentrated hydrochloric acid, washing the precipitate with hydrochloric acid, drying on a porous brick, and then dissolving in alcohol and precipitating with ether; or by decomposing ferrocyanide of barium with sulphuric acid, or ferrocyanides of lead or copper with sulphuretted hydrogen. Ferrocyanic acid is a colorless crystalline mass easily soluble in water and in alcohol; insoluble in ether. It is tetrameric; it has an acid reaction, reddens litmus, and decomposes many metallic salts, yielding ferrocyanides. When an aqueous solution of ferrocyanic acid is heated, it gives off hydrocyanic acid, and deposits Prussian blue.

fēr-rō-cy'-ān-ide, s. [Pref. ferro-, and Eng. cyanide (q. v.).]

-Chem.: A salt of hydroferrocyanic acid, ferro-prussiate. The ferrocyanides of ammonium, sodium, potassium, barium, strontium, calcium, and magnesium are soluble. Cupric ferrocyanide is a reddish-brown powder; ferric ferrocyanide is blue, Prussian blue; nickel and cobalt ferrocyanides are green; the ferrocyanides of silver, lead, zinc, and manganese are white insoluble powders. By the action of oxidizing agents ferrocyanides are converted into ferricyanides; by the action of nitric acid into nitro-prussides. When heated ferrocyanides are decomposed into cyanide of iron and cyanide of the other metal, the cyanide of iron being further converted into iron and carbon, and nitrogen is given off; the other cyanide remains either unaltered, as cyanide of potassium, or the metal is reduced and nitrogen given off. The presence of iron in ferrocyanides cannot be detected by the addition of caustic alkalies, nor by ammonium sulphide. The following are the chief ferrocyanides:

ferrocyanide of barium, s.

-Chem.: Ba₂Fe(CN)₆. Obtained by the action of ferrous sulphate on cyanide of barium, which can be obtained by passing a current of air over an ignited mixture of charcoal and barium carbonate. Barium ferrocyanide can also be obtained by boiling Prussian blue with baryta water. It forms small, yellow, anhydrous, monoclinic prisms, which dissolve in 584 parts of cold and 116 parts of boiling water.

ferrocyanide of hydrogen, s.

-Chem.: [FERROCYANIC ACID.]

ferrocyanide of iron, s.

-Chemistry: Prussian blue, Fe₇(CN)₁₃·9H₂O, or 2Fe₂Cy^{vi}(Fe(CN)₆)₃·9H₂O. It is best obtained by adding potassium ferrocyanide to ferric chloride, 3K₄Fe(CN)₆+2FeCl₃=12KCl+Fe₇(CN)₁₃. Another method is practiced by adding potassium cyanide to a mixture of both the ferrous and the ferric salts, 18KCN+3FeCl₂+2Fe₂Cl₆=18KCl+Fe₇(CN)₁₃. This last reaction is Scheele's test for hydrocyanic acid. But Prussian blue is made on a large scale by adding ferrous sulphate to ferrocyanide of potassium, and allowing the white precipitate of K₂Fe₂(CN)₆ to oxidize by contact with the air, or by treatment with chlorine. Ferric ferrocyanide dries into a hard brittle mass with a copper-red luster like indigo. It is very hygroscopic. It is insoluble in water and in acids, but soluble in oxalic acid, forming a deep blue liquid, which, when thickened with gum, can be used for blue ink. Boiled with water and mercuric oxide, it yields mercuric cyanide and ferric oxide. Heated in contact with the air, it burns like tinder and leaves oxide of iron. Soluble Prussian blue is prepared by adding excess of ferrocyanide of potassium to ferric chloride. Pure Prussian blue is called Paris blue; impure, containing alumina, is called mineral blue. Prussian blue is often adulterated with alumina, chalk, gypsum, and starch. It is used as a pigment, and also to dye wool, cotton, and silk.

ferrocyanide of potassium, s.

-Chem.: K₄Fe(CN)₆·3H₂O, yellow prussiate of potash. Ferropussiate of potash. Obtained by boiling Prussian blue with an aqueous solution of caustic potash. By digesting precipitated ferrous cyanide with an aqueous solution of potassium cyanide, or any soluble ferrous salt, with aqueous cyanide of potassium. On a large scale it is prepared by

melting animal matter containing nitrogen with carbonate of potassium and iron filings. The carbonate of potash is first fused in large covered iron pots heated to bright redness, and then the iron and animal matter are added gradually, large quantities of gases being evolved. The mixture is then heated till the reaction is finished. The fused mass, when cold, is broken into small pieces, thrown into water, well stirred, and heated quickly to 80° or 90°. The impure cyanide of potassium is thus converted into ferrocyanide of potassium, and the solution evaporated; the salt is purified by recrystallization. The ferrocyanide has been shown by Liebig to be formed by the lixiviation, and not during the fusion. Ferrocyanide of potassium crystallizes in large, transparent, yellow, tetragonal crystals, containing three molecules of water. Soluble in four parts of cold and in two parts of boiling water; it is insoluble in alcohol. Heated with carbonate of potassium, it is converted into cyanide and cyanate of potassium, and metallic iron separates out. Ferrocyanide of potassium is used as a chemical reagent, and for the preparation of Prussian blue. By the action of oxidizing agents, it is converted into ferricyanide of potassium. Heated with strong sulphuric acid, it gives off carbon monoxide, and is converted into ammonium, ferrous, and potassium sulphates. Heated with dilute sulphuric acid, it gives off hydrocyanic acid; heated with ammonium chloride, it gives off ammonium cyanide.

fēr-rō-cy'-ān-ō-gēn, s. [Pref. ferro-, and Eng. cyanogen (q. v.).]

-Chem.: A tetratomic radical contained in ferrocyanides, having the formula (Fe^{vi}(CN)₆)^{iv}, also written (FeCy₆)^{iv} and Cy₆^{iv}.

fēr-rō-sō-fēr-ric, a. [As if from a Lat. *ferrus*, from *ferrum*=iron, and Eng. *ferric* (q. v.).]

-Chem.: Ferrosferric oxide, Fe₂O₃·FeO, or Fe₃O₄, occurs naturally as black magnetic oxide of iron, and can be obtained by burning iron in oxygen, or by passing steam over iron filings, or heating iron in carbonic acid gas, or by heating ferrous sulphate with calcium chloride in a crucible. Ferrosferric oxide crystallizes in regular octahedra or tetrahedra, and is magnetic. When heated in a stream of hydrogen, it is reduced to metallic iron; it is also reduced by heating it with coke, or with carbon monoxide. It is soluble in acids, forming a mixture of ferrous and ferric salts. Ferrosferric hydrate can be formed when ferric sulphate and ferrous sulphate are dissolved in water, precipitated by ammonia, and then boiled till the precipitate becomes granular and black. It is also magnetic.

ferrous carbonate, s.

1. *Chem.*: FeCO_3 . Protocarbonate of iron. It occurs native as spatose iron ore, and in an impure state of clay ironstone in the carboniferous series. When heated in a closed vessel $3\text{FeCO}_3 = 2\text{CO}_2 + \text{CO}$ and Fe_3O_4 , black magnetic oxide of iron is formed. Hydrated ferrous carbonate is obtained as a whitish-green precipitate. When a solution of a ferrous salt is mixed with an alkaline carbonate, it absorbs oxygen from the air and loses carbonic acid, and is converted into hydrated ferric oxide. Ferrous carbonate occurs in chalybeate springs, being held in solution by the excess of carbonic acid present.

2. *Pharm.*: Carbonate of iron obtained by decomposing a solution of sulphate of iron by carbonate of ammonia, and rubbing the precipitate with sugar, and drying at 212°Fahr . It is called *Ferri carbonas saccharata*. It is used in *Mistura ferri composita* and in *Pilula ferri carbonatis*. It is not astringent, and restores the blood.

ferrous chloride, s.

Chem.: FeCl_2 or Fe_2Cl_4 . Protochloride of iron. Obtained anhydrous in white crystalline, deliquescent scales by passing chlorine over excess of red-hot metallic iron, or by reducing ferric chloride by heating it in a current of hydrogen. It absorbs ammonia gas. Hydrated ferrous chloride, $\text{FeCl}_2 \cdot 4\text{H}_2\text{O}$, is obtained in bluish-green monoclinic crystals by dissolving iron in hydrochloric acid, and concentrating the solution. Ferrous chloride is very soluble in water. It also dissolves in alcohol. Ferrous chloride unites with ammonium chloride, forming a double salt, $\text{FeCl}_2 \cdot 2\text{NH}_4\text{Cl} \cdot 2\text{H}_2\text{O}$. Ferrous chloride oxidizes in the air.

ferrous iodide, s.

1. *Chem.*: FeI_2 . Proto-iodide of iron. Obtained by digesting iodine with water and iron wire. It forms a pale-green solution which, when evaporated, deposits green deliquescent crystals of $\text{FeI}_2 \cdot 4\text{H}_2\text{O}$. Its solution decomposes into free iodine and peroxide of iron, but if iron wire be kept in the solution, the strength remains the same, as the iodine set free again dissolves iron.

2. *Pharm.*: Ferrous iodide. *Ferri iodidum* is used to prepare *Syrupus ferri iodidi*, syrup of iodide of iron, which does not so readily decompose as the solution of ferrous iodide, and in *Pilula ferri iodidi*. Iodide of iron possesses the properties of iron and of iodine. It is used in scrofulous diseases.

ferrous nitrate, s.

Chem.: $\text{Fe}(\text{NO}_3)_2$. Can be obtained by mixing barium nitrate with ferrous sulphate $\text{Ba}(\text{NO}_3)_2 + \text{FeSO}_4 = \text{BaSO}_4 + \text{Fe}(\text{NO}_3)_2$, or by dissolving iron monosulphide in cold dilute nitric acid. When evaporated in vacuo over sulphuric acid it crystallizes in pale-green deliquescent crystals, which, when heated, evolve nitric oxide and yield a basic ferric nitrate. Ferrous nitrate is used in dyeing.

ferrous oxide, s.

Chem.: FeO . Protoxide of iron, obtained as a black powder by heating iron in carbon dioxide, $\text{Fe} + \text{CO}_2 = \text{FeO} + \text{CO}$. It takes fire when heated in the air, forming ferric oxide. The hydrate of ferrous oxide, $\text{Fe}(\text{OH})_2$, ferrous hydrate, is obtained as a white precipitate when a solution of a ferrous salt is mixed with a solution of caustic potash, both perfectly free from air. If boiled in a vessel free from oxygen it loses its water of hydration, becoming black. Ferrous hydrate rapidly absorbs oxygen from the air, the color changing from white to green and then to red brown, owing to the formation of ferric hydrate. Ferrous hydrate is slightly soluble in a solution of ammonia.

ferrous sulphate, s.

1. *Chem.*: $\text{FeSO}_4 \cdot \text{H}_2\text{O}$. Protosulphate of iron, green vitriol, iron vitriol, copperas, sulphate of iron. Ferrous sulphate is obtained pure by dissolving iron wire in pure dilute sulphuric acid, also when ferrous sulphide is acted upon with dilute sulphuric acid in the preparation of sulphide of hydrogen, H_2S . On evaporating the ferrous sulphate separates out in transparent and bluish-green rhomboidal crystals, which effloresce in dry air; in moist air they become coated with a brown crust of ferric sulphate. Ferrous sulphate is insoluble in alcohol, and soluble in twice its weight of cold water. The salt loses six molecules of water at 100° and retains the other molecule till it is heated to 300° . At red heat it is decomposed, yielding Nordhausen sulphuric acid and ferric oxide. A solution of ferrous sulphate gradually absorbs oxygen when exposed to the air, but can be kept by placing iron wire in the solution. It absorbs dioxide and trioxide of nitrogen, forming a dark brown liquid which rapidly absorbs oxygen. Ferrous sulphate forms double salts with the alkaline sulphates, as $\text{FeSO}_4 \cdot \text{K}_2\text{SO}_4 \cdot 6\text{H}_2\text{O}$. These salts are used to determine the strength of permanganate and bichromate solutions employed in volumetric analysis. Ferrous sulphate is used as a black dye in combination with vegetable astringent matters.

Large quantities of ferrous sulphate are obtained by exposing to the action of air and moisture iron pyrites, FeS_2 , which is decomposed into FeSO_4 and H_2SO_4 ; the latter acting on the clay forms aluminium sulphate.

2. *Pharm.*: Ferrous sulphate, *Ferri sulphas*, used in the preparation of *Mist. ferri comp.* Ferrous sulphate is a powerful astringent. Granulated sulphate of iron, *Ferri sulphas granulata*, is prepared by pouring a hot solution of ferrous sulphate into rectified spirit, and stirring the mixture, so that the salt shall separate in minute granular crystals.

ferrous sulphide, s.

Chem.: FeS . Sulphide of iron. Obtained by projecting into a red-hot crucible a mixture of five parts of sulphur with eight parts of iron filings. Also by rubbing a red-hot bar of iron with roll sulphur. Ferrous sulphide is a black, brittle substance, and is used in the laboratory as a source of sulphuretted hydrogen, H_2S , that gas being liberated by the action of dilute sulphuric or hydrochloric acid on FeS . Hydrated ferrous sulphide is precipitated when ammonium sulphide is added to a solution of a ferrous salt. This precipitate absorbs oxygen rapidly from the air, and is converted into sulphur and hydrated ferric oxide.

† Ferrous salts are not precipitated by H_2S from acid solutions. They give a white precipitate of ferrous hydrate with caustic alkalies and ammonia, which quickly oxidizes. Carbonates of potassium, sodium, and ammonium precipitate white ferrous carbonate, which quickly becomes red-brown. Ammonium sulphide gives a black precipitate of ferrous sulphide. Potassium ferrocyanide gives a pale bluish-white precipitate, which darkens in color on exposure to the air. Potassium ferricyanide gives a deep-blue precipitate.

fēr-rū-ġin-āt-ēd, a. [Lat. *ferrugineus*, *ferrugineus*, from *ferrugo* (genit. *ferruginis*) = rust of iron; *ferrum* = iron.] Having the properties or color of rusty iron.

1. Containing particles of iron; partaking of the nature of iron.

2. Of the color of iron rust or oxide of iron.

ferruginous-springs, s. pl.

Geol.: Springs with much more than the normal amount of iron in their composition. They have a partly milky partly ochereous hue where the water stagnates, and cement the loose stones to which they have access. For instance, a ferruginous spring which rises on the northern shore of the Firth of Forth, between Pittenweem and St. Monace, cements the pebbles of the beach into a conglomerate as hard as that of the Old Red Sandstone.

A. Transitive:

*1. To carry, to bear, to convey.

"The kyng in his cortyn watz kaght by the heles,

Feryed out bi the feet."

Early Eng. Allit. Poems: Cleanliness, 1, 789.

2. To carry or transport over a river, strait, or other narrow water, in a boat, barge, &c.

"The rugged Charon fainted,
And asked a navy rather than a bont
To ferry over the sad world that came."

Ben Jonson: *Catiline*, l. 1.

*B. *Intrans.*: To pass or be transported in a boat, &c., across a river, strait, or other narrow water.

"They ferry over this Lethæan shore."

Milton: *P. L.*, ii. 604.

ferry-bridge, s. A form of ferry-boat in which railway or other vehicles move on to the elevated deck, are transported across the water, and land on the other side. Tramways forming inclined approaches are adjustable to the requirements of different stages of water in the river, or states of the tide in estuaries.

ferry-railway, s. A railway, the track of which is laid on the bottom of the water-course, and whose carriage has an elevated deck which supports the train.

fēr-rŷ, s. [FERRY, v.]

1. A boat or vessel for carrying passengers or goods across a river, strait, or other narrow water; a ferry-boat.

2. The place or passage where a ferry-boat passes to carry passengers and goods across a river, &c.

fēr-rŷ-boat, s. [Eng. *ferry*, and *boat*.] The same as FERRY, s., 1.

fēr-rŷ-man, s. [Eng. *ferry*, and *man*.] One who keeps a ferry; one who for hire conveys passengers and goods across a river, strait, &c.

*fers, a. [FIERCE.]

*fers (1), s. [VERSE.]

fers (2), s. [Pers. *pherz* = a general.] The queen in chess.

fēr-tile, fēr-tile, a. [Fr., from Lat. *fertilis*, from *fero* = to bear, produce; Sp. & Port. *fertil*; Ital., *fertile*.]

I. *Ordinary Language* (either absolutely or followed by of or in):

1. Productive, fruitful, rich; producing food in abundance; prolific.

"Three tribes distinct possess her fertile lands."

Pitt: *Virgil*; *Æneid* x.

2. Having abundant resources; quick, ready, well-supplied or endowed.

"He becomes quick of observation and fertile of resource."—Macaulay: *Hist. Eng.*, ch. ii.

*3. Abundant, ample.

"Good store of fertile sherris."—Shakesp.: *Henry IV.*, Pt. II., iv. 3.

*4. Bountiful, liberal. (Shakesp.: *Winter's Tale*, i. 2.)

II. *Bot.*: Fruit-bearing; capable of producing fruit.

† Crabb thus discriminates between *fertile*, *fruitful*, and *prolific*: "*Fertile* expresses in its proper sense the faculty of sending forth from itself that which is not of its own nature, and is peculiarly applicable to the ground which causes everything within itself to grow up. *Fruitful* expresses a state containing or possessing abundantly that which is of the same nature; it is, therefore, peculiarly applicable to trees, plants, vegetables, and whatever is said to bear fruit. *Prolific* expresses the faculty of generating; it conveys, therefore, the idea of what is creative, and is peculiarly applicable to animals. We may say that the ground is either *fertile* or *fruitful*, but not *prolific*: we may speak of a female of any species being *fruitful* and *prolific*, but not *fertile*; we may speak of nature as being *fruitful*, but neither *fertile* nor *prolific*. A country is *fertile* as it respects the quality of the soil; it is *fruitful* as it respects the abundance of its produce; it is possible, therefore, for a country to be *fruitful* by the industry of its inhabitants, which was not *fertile* by nature. . . . The lands in Egypt are rendered *fertile* by means of mud which they receive from the overflowing of the Nile: they consequently produce harvests more *fruitful* than in almost any other country. Among the Easterns, barrenness was reckoned a disgrace, and every woman was ambitious to be *fruitful*; there are some insects, particularly among the noxious tribes, which are so *prolific*, that they are not many hours in being before they begin to breed. In the figurative application they admit of a similar distinction. A man is *fertile* in expedients who readily contrives upon the spur of the occasion; he is *fruitful* in resources who has them ready at hand; his brain is *prolific* if it generates an abundance of new conceptions." (Crabb: *Eng. Synon.*)

*fēr-tile, v. t. [FERTILE, a.] To make fertile; to fertilize.

fēr-tile-lŷ, *fer-til-y, adv. [Eng. *fertile*; -ly.] In a fertile or fruitful manner; fruitfully.

fër-tile-nëss, *s.* [English *fertile*; -ness.] The quality or state of being fertile; fertility.

***fër-til-l-tâte**, *v. t.* [Lat. *fertilitas*=fertility.] To make fertile or fruitful; to fertilize; to impregnate.

fër-til-l-tÿ, ***fër-til-l-tye**, *s.* [French *fertilité*, from Lat. *fertilitas*, from *fertilis*=fruitful; Sp. *fertilidad*; Ital. *fertilità*.]

1. The quality or state of being fertile, fruitful, or prolific; fruitfulness, fecundity, productiveness.

"Thy very weeds are beautiful, thy waste
More rich than other lands' fertility."

Byron: *Child Harold*, iv. 28.

2. Richness of invention; abundance of resources; readiness; quickness.

"The quickness of the imagination is seen in the invention: the fertility in the fancy; and the accuracy in the expression."—Dryden: *Letter to Sir R. Howard*.

fër-til-l-ä-tion, *s.* [Eng. *fertiliz(e)*; -ation.]

I. Ordinary Language:

1. The act or process of making fertile, fruitful, or productive.

2. The act of fecundating or impregnating; fecundation.

II. Bot.: The fecundation of a plant by the application of the pollen to the stigma. In some cases the pollen simply drops upon the stigma, which is called self-fertilization. In most instances, however, it is blown by the wind, or carried by bees, or moths, or such-like insects, from other flowers of the same species. This is what is termed cross-fertilization. Mr. Darwin found that twenty heads of Dutch Clover (*Trifolium repens*) left open to the visits of bees produced 2,200 seeds; the same number defended from the visit of bees did not yield even one seed.

"In many trees in which the organs of reproduction are in separate flowers (as hazel and willow) the leaves are not produced until fertilization has been effected."—Balfour: *Botany*, § 496.

fër-til-l-ize, *v. t.* [Fr. *fertiliser*; Sp. *fertilizar*; Ital. *fertilizzare*, from Lat. *fertilis*=fertile.]

1. To make fertile, fruitful, or productive; to supply with the proper nourishment for plants; to make rich.

"Round the shady stones
A fertilizing moisture . . . gathers."

Wordsworth: *Excursion*, bk. v.

2. To impregnate; to fecundate.

fër-til-l-iz-ër, *s.* [Eng. *fertiliz(e)*; -er.] One who, or that which fertilizes; specif., a manure applied to land.

"When more is taken from the land than is given back, the purchase of extraneous fertilizers is the only resource."—London: *Encycl. of Agriculture*.

fertilizer-mill, *s.* One in which the materials are ground to powder so as to be sown from a machine.

fertilizer-sower, *s.* A form of seeding-machine adapted to sow granulated manures, such as dry poudrette, the phosphates, bone-dust, lime, guano, &c. It sometimes forms a machine by itself, and sometimes is an attachment to a wheat-drill or a turnip-drill.

***fër-tre**, ***fëer-tyr**, *s.* [O. Fr. *fertere*, *fiertere*, from Lat. *feretrum*.] A feretory (q. v.).

***fër-tre**, *v. t.* [FERTRE, *s.*] To place in a feretory or shrine.

fër-u-lä, *s.* [Lat.=(1) an umbelliferous herb or shrub, having a stalk filled with a soft pith, in which fire was easily harbored; fennel-giant; (2) a rod or whip, because made of the stalks of (1); from *ferio*=to strike, from the stalks being used as rods.] [FERULE.]

*I. Ord. Lang.: A ferule; a rod.

II. Technically:

*1. Antiq.: The scepter of the emperors of the Eastern Empire.

2. Bot.: A genus of umbelliferous plants, natives of the shores of the Mediterranean and Persia. They have tall stalks filled with soft pith, and deeply-divided leaves, the segments being frequently linear. They yield a kind of gum-resin, which is employed as a stimulant in medicine. *F. communis*, giant-fennel, is a tall perennial, a native of Southern Europe, the stem of which often attains a height of eight to ten feet, and a diameter of two to three inches, having finely-divided compound leaves and umbels of yellow flowers. The stems are full of white pith, which, when dry, ignites like tinder, and is used in Sicily and other parts as such. When once ignited, it burns very slowly, and without injury to the tube of the stem. It is used for preserving and carrying fire from place to place. *F. dulce* is a variety of *F. communis*, differing in having the radical leaf-stalk swollen, thick, and becoming united, thus forming a kind of tube, which is used extensively in France and Italy as a culinary vegetable, under the name of *Firrocchio* or *Pirrichio*. It may sometimes be met with in the vegetable

markets of London. *F. persica* yields asafetida, and from *F. orientalis* and *F. tingitana* a gum resin is procured, which very closely resembles, but is less powerful than, asafetida.

***fër-u-lä-cë-öus**, *a.* [Latin *ferulaceus*, from *ferula*; Fr. *ferulaçé*.] Of or pertaining to canes or reeds; resembling ferula; having a stem like a reed or cane.

***fër-u-lär**, **fër-u-lër**, *s.* [Latin *ferula*.] A ferule, a rod.

***fër-u-lär-y**, *a.* [Eng. *ferule*; -ary.] Pertaining to a rod.

fër-üle (1), ***fër-u-lä**, *s.* [Lat. *ferula*=a rod; Fr. *ferule*; Ital. & Sp. *ferula*.] A rod or cane used by a master to punish children in school; a piece of wood used for the same purpose.

fër-üle (2), *s.*

1. A metallic cylinder or thimble placed around the handle of a knife or fork at the point of entrance of the tang of the blade to prevent the handle splitting.

"Will you have some of this?" said the fat boy, plunging into the pie up to the very ferules of the knife and fork."—Dickens: *Pickwick*, ch. liv.

2. The metallic thimble or shoe with which a walking stick or staff is shod, or any similar contrivance used to bind the end of a rod.

***fër-üle**, *v. t.* [FERULE (1), *s.*] To beat or punish with a ferule; to cane.

"I should be beeferuled for my faults."—Gosson: *Schools of Abuse*, p. 24.

***fër-üled**, *a.* [Eng. *ferul(e)* (2), *s.*; -ed.] Fitted or furnished with a ferule.

"He has his volunteer bodyguard of . . . fierce patriots, with feruled sticks."—Carlyle: *French Revolution*, vol. iii., bk. vi., ch. iv.

fë-rül-ic, *a.* [Lat. *ferula* (q. v.), and Eng. suff. -ic.] Derived from plants of the genus *Ferula*.

ferulic acid, *s.*

Chem.: $C_{10}H_{10}O_4$. An acid existing in asafetida, extracted by precipitating the alcoholic solution with lead acetate, and decomposing the precipitate with dilute sulphuric acid. It can be obtained synthetically by digesting sodium vanillin with sodium acetate and excess of acetic anhydride in an oil bath at 160° for four hours with an inverted condenser, treating the product with water, and dissolving the residue with ether; the ether solution is agitated with acid sodium sulphite to precipitate acetovanillin, and the residue left on evaporation the ether is boiled with alcoholic potash. Ferulic acid is soluble in alcohol, ether, and in hot water; it crystallizes in needles, which melt at 169°. Its aqueous solution is colored yellow-brown by ferric chloride. When fused with caustic potash, it yields salts of acetic and proto-catechuic acids.

fër-vën-yÿ, ***fër-ven-ye**, *s.* [Lat. *fervens*, pr. par. of *ferveo*=to boil.] [FERVER.] The quality or state of being fervent; heat of mind, ardor, earnestness, eagerness, zeal, fervor.

"He desired the prayers of the Church, wherein he joined with great fervency and devotion."—Dr. Bridcock: *Let. in Parl.*; Hist. Charles II. (an. 12).

fër-vent, *a.* [Fr., from Lat. *fervens*, pr. par. of *ferveo*=to boil; Ital. & Port. *fervente*; Sp. *fervente*.]

*1. Hot, boiling, heated, glowing, very warm.

"For the fervent brennyng of the soanne."—Maunder: *v. l. 156*.

*2. Hot in temper; vehement, excitable, excited.

"And thus the son the fervent sire addressed."

Pope: *Homer's Odyssey*, xix. 4.

3. Ardent, earnest, eager, zealous, very warm, animated; full of ardor, zeal or fervor.

"Then, all at once, his thoughts turned round,
And fervent words a passage found."

Wordsworth: *White Doe of Rylstone*, ii.

fër-vent-lÿ, ***fër-vent-liche**, *adv.* [Eng. *fervent*; -ly.]

*1. With great heat; hotly, so as to burn.

"It continued so fervently hot that men roasted eggs in the sand."—Hakewill.

2. Eagerly, vehemently, hotly.

3. With ardor, zeal, or fervor; ardently, zealously, eagerly, warmly.

fër-vent-nëss, *s.* [Eng. *fervent*; -ness.] Fervency, fervor, ardor, zeal.

***fër-vës-çent**, *a.* [Lat. *fervescens*, pr. par. of *ferveo*, incept. of *ferveo*=to boil.] Growing or becoming hot.

fër-vid, *a.* [Lat. *fervidus*, from *ferveo*=to boil; Sp. & Ital. *fervido*.]

1. Burning; very hot, boiling.

"The mounted sun
Shot down direct his fervid rays."

Milton: *P. L.*, v. 301.

2. Heated, made hot.

"Then staid the fervid wheels."

Milton: *P. L.*, vii. 224.

3. Fervent, earnest, ardent, zealous.

"The fervid wishes, holy fires."

Parnell: *Happy Man*.

***fër-vid-l-tÿ**, *s.* [Eng. *fervid*; -ity.] Heat, fervency, fervor, fervidness.

fër-vid-lÿ, *adv.* [Eng. *fervid*; -ly.] In a fervid or fervent manner; fervently, eagerly, ardently, zealously.

fër-vid-nëss, *s.* [Eng. *fervid*; -ness.] Fervency, fervor, ardor, eagerness, zeal, warmth.

fër-vör, **fër-voür**, ***fër-voüre**, *s.* [O. Fr. *fervor*, *fervour*; Fr. *ferveur*, from Lat. *fervor*, from *ferveo*=to boil; Sp. & Port. *fervor*; Ital. *fervore*.]

*1. Heat, warmth.

"The fervor and the force of Indian skies."

Couper: *Expostulation*, 12.

2. Fervency of mind; ardor, zeal, earnestness; intensity of feeling.

"The pure fervor of eternal love."

Beattie: *Judgment of Paris*.

¶ Crabb thus discriminates between *fervor* and *ardor*: "*Fervor* is not so violent a heat as *ardor*. The affections are properly *fervent*; the passions are *ardent*: we are *fervent* in feeling, and *ardent* in acting: the *fervor* of devotion may be rational; but the *ardor* of zeal is mostly intemperate. The first martyr, Stephen, was filled with a holy *fervor*; St. Peter, in the *ardor* of his zeal, promised his master to do more than he was able to perform." (Crabb: *Eng. Synon.*)

fë-sä-pö, *s.* [A word of no etymology.]

Logic: The fourth form of the fourth figure of syllogisms, in which the Middle is the predicate of the Major premise, and the subject of the Minor consists of a universal negative, a universal affirmative, and a particular negative—e. g.,

(fE) No A is B.

***fēs'-tī-nā-tion, s.** [Lat. *festinatio*, from *festinatus*, pa. par. of *festino*=to hasten.] Haste, hurry, expedition.

***fēs'-tīng, pr. par. or a.** [FEST, v.]

fest-ing-money, s. Earnest money given to a servant to bind an engagement.

***fēs'-tīn-ī-tȳ, s.** [Eng. *festin(ate)*; *-ity*.] Haste, speed. (*Ash.*)

fēs'-tī-nō, s. [A word of no etymology.]

Logic: The third form of the second figure in which the Middle Term is the predicate of both premises. It consists of a Universal Negative, a Particular Affirmative, and a Particular Negative.

(fEs) No A is B
 (tL) Some C is B
 (nO) Some C is not A.

fēs'-tī-val, a. & s. [Old Fr., from Low Latin *festivus*, from Lat. *festivus*=festive, festal; *festum*=a feast; Sp. & Port. *festival*.]

A. As adj.: Pertaining to or becoming a feast or time of rejoicing; festive, festal, joyous, mirthful.

B. As subst.: A time of feasting or rejoicing; a feast; a festive celebration or anniversary, civil or religious.

¶ If the term be used generally it may be held to include both feasts and fasts (q. v.). The observant Anglo-Indian has an opportunity of studying the

Hindu and Mohammedan feasts and fasts, and reasoning out from them the tendency and working of festivals in general. He sees three elements enter into their composition. They were designed at first to be purely religious, and a multitude of those who come together on such occasions do so from pious motives. They, however, require to make purchases, and thus the commercial element finds its way into the gathering. Finally, the young people present, with not a few adults of similar proclivities, look out for opportunities of pleasure at the fast no less than the feast, and, unless severely repressed, convert the holy day into a holiday. There may be places in various lands where a day having been fixed to commemorate by an annual gathering an alleged manifestation of Divinity, the religious festival thus instituted has degenerated first into a commercial and ultimately into a pleasure fair.

¶ For the difference between *festival* and *feast*, see *FEAST*.

***fēs'-tī-val-ly, *fes-tī-val-y, adv.** [Eng. *festival*; *-ly*.] In a festive manner; festively.

fēs'-tīve, a. [Lat. *festivus*, from *festum*=a feast.]

1. Joyous, gay, mirthful, becoming a feast or festival.

2. Pertaining to or used for a feast, or festival, or festivities.

fēs'-tīve-ly, adv. [Eng. *festive*; *-ly*.] In a festive, joyous, or mirthful manner; with festivity.

fēs'-tīv-ī-tȳ, s. [Fr. *festivité*, from Lat. *festivitas*, from *festivus*=festive; Sp. *festividad*; Ital. *festività*.]

***1. A feast, a festival; an anniversary, civil or religious.**

"The king also ordered the office for his festivity to be dashed out of all breviaries."—*Burnet: Hist. Reformation* (an. 1538).

2. A festival, feast, or festive entertainment.

3. Mirth, jollity, joyfulness.

"The Roman drama had its rise in the unrestrained festivity of the rustic youth."—*Hurd: Notes on Art of Poetry*.

¶ Crabb thus discriminates between *festivity* and *mirth*: "There is commonly *mirth* with *festivity*, but there may be frequently *mirth* without *festivity*. The *festivity* lies in the outward circumstances; *mirth* in the temper of the mind. *Festivity* is rather the produce of *mirth* than the *mirth* itself. *Festivity* includes the social enjoyments of eating, drinking, dancing, cards, and other pleasures; *mirth* includes in it the buoyancy of spirits which is engendered by a participation in such pleasures; but *festivity* may be accompanied with intemperance." (*Crabb: Eng. Synon.*)

***fēs'-tīv-ōus, a.** [Lat. *festivus*, from *festum*=a feast.] Pertaining or suited to a feast; festive, merry, mirthful; as, Gayton's "*Festivous Notes upon Don Quixote*."

***fēs'-tīv-ōus-ness, s.** [Eng. *festivous*; *-ness*.] Festivity, joyfulness. (*Ash.*)

***fēs'-tīch, a.** [Mid. Eng. *fest*=feast; *-lich*=like.] Used to feasts; festive.

fēs'-tōon, s. [Fr. *feston*, from Low Lat. *festus*=a garland; Ital. *festone*; Sp. *feston*; usually derived from Lat. *festum*=a feast, but a connection with Low Lat. *festis*; O. Fr. *fest, faist, faiste*; Fr. *faite*=a top, a ridge (from the base of the Lat. *fastigium*) is almost as likely. (*Skeat*.)]

1. Ord. Lang.: A chain or string of any materials suspended between two points; specif. a chain or garland of flowers, foliage, drapery, &c., suspended by the ends so as to form a depending curve.

2. Arch.: A carved ornament in wood, stone, &c., usually in the form of a garland or wreath, composed of flowers, fruits, leaves, &c., bound together

Festoon.

and suspended by the ends. This method of ornamentation was employed by the architects of the middle ages, frequently with much success, in their friezes of the Composite order. Festoons are still usefully and aptly employed in decoration.

fēs'-tōon, v. t. [FESTOON, s.]

1. To form any material in depending curves or festoons.

2. To ornament or adorn with festoons.

***fēs'-tōon-ȳ, a.** [Eng. *festoon*; *-ȳ*.] Of or pertaining to festoons; consisting of or resembling festoons.

***fes-traw, *fes-trawe, s.** [A corruption of *fescue* (q. v.).] A fescue or pointer used in teaching children to read.

fēs'-tū-cā, s. [Lat.=fennel-giant.] [FESCUE.]

Bot.: Fescue-grass, an extensively and widely distributed genus of grasses found in the temperate or colder regions of the world. Several species are in many places cultivated as meadow and pasture grasses. *Festuca ovina* is the Sheep's fescue, and *F. pratensis* the Meadow fescue.

fēs'-tū-cē-s, s. pl. [Lat. *festuc(a)*, and fem. pl. adj. suff. *-eae*.]

Bot.: A tribe of grasses containing two families, Bromideæ and Bambusideæ.

***fēs'-tū-cīne, a. & s.** [Lat. *festuc(a)*; Eng. adj. suff. *-ine*.]

A. As adj.: Of a straw color, or between green and yellow.

"Therein may be discovered a little insect of a fectucine or pale green, resembling a locust or grasshopper."—*Browne: Vulgar Errors*, bk. v, ch. iii.

B. As substantive:

Min.: A splintery fracture. (*Crabb*.)

***fēs'-tū-coūs, a.** [Latin *festuc(a)*; Eng. adj. suff. *-ous*.] Formed of straw; consisting of straw.

"We speak of straws, or fectucous divisions, lightly drawn over with oil."—*Browne: Vulgar Errors*, bk. ii, ch. v.

***fēs'-tūe, s.** [FESCUE.]

***fēs'-tȳ-cock, s.** [Etym. doubtful.] New-ground meal made into a ball, and baked among the burning seeds in a kiln or mill.

***fēt, *fete, s.** [FEAT.]

1. A contrivance, a piece of work.

"The bottom clear
 Now laid with many a fet
 Of seed-pearl!"

Drayton: Quest of Cynthia.

2. Fact.

1. To fetch, to carry, to bring.

"I shal the fete bred and chese."—*Havelock, 642.*

2. To derive, to draw.

"Whose blood is fet from fathers of war-proof."
Shakespeare: Henry V., iii. 1.

fē'-tal, fō'-tal, a. [Lat. *fetus, foetus*=a fetus (q. v.).] Of or pertaining to a fetus.

fē'-tā-tion, fō'-tā-tion, s. [Lat. *fetus, foetus*.] The formation of a fetus.

fētch, s. [Etym. doubtful, but probably from the verb.]

1. A stratagem; a trick; a contrivance; an artifice by which anything is brought to pass.

2. An apparition of a living person; a wraith.

3. The deep and long inspiration of a dying person.

fetch-candle, s. A light appearing at night, and believed by the superstitious to portend the death of some person.

fētch, *fecche, *fecchen, *fech, *feche, *fetche, *fethyn, v. t. & i. [A. S. *fetian*, *gefetian*, from *fel*=a pace, a step; *feccan*=to lead, to take.] [FET, v.]

A. Transitive:

1. To go and bring.

"Fetch me a little water, I pray thee."—*1 Kings xvii. 10.*

"Draw forth the monsters of the abyss profound,
Or fetch the aerial eagle to the ground."
Pope: *Essay on Man*, iii. 221, 222.

*7. To bring back, to bring to.

"In smells we see their great and sudden effect in fetch-
ing men again, when they swoon."—Bacon: *Natural His-*
tory.

*8. To bring to any state, condition, or position.

"At Rome any of those arts immediately thrives, under
the encouragement of the prince, and may be fetched up
to its perfection in ten or a dozen years, which is the work
of an age or two in other countries."—Addison: *On Italy*.

*9. To perform, to make; to apply to motion.

"I'll fetch a turn about the garden, pitying
The pangs of barred affection; though the king
Hath charged you should not speak together."
Shakespeare: *Cymbeline*, i. 1.

*10. To reach, to arrive at; to attain or come to.

"Meantime flew our ships, and straight we fetched
The syrens' isle; a spleenless wind so stretched
Her wings to waft us, and so urged our keel."
Chapman: *Homer's Odyssey*, xii.

*11. To reach in striking.

"The conditions of weapons, and their improvements,
are the fetching afar off; for that outruns the danger, as it
is seen in ordnance and muskets."—Bacon.

12. To reach to in price; to obtain; to bring in.

"All the precious gifts which nature had lavished on
him he valued chiefly for what they would fetch."—Mac-
aulay: *Hist. Eng.*, ch. xiv.

B. Intransitive:

fě-tigh, fě-tish, s. [Fr. fétiche, from Port.
feticço=(1) sorcery, (2) a wooden idol, from feticço
=artificial, from Lat. factitius, from facio=to
make. Of the two spellings given Sir John Lub-
bock uses the former and Mr. Tylor the latter form.]

1. Lit.: Any material object whatsoever, sup-
posed to be the vessel, vehicle, or instrument of a
supernatural being, and the possession of which
gives to the possessor or joint possessors power
over that being. Thus, a fetish differs from a talis-
man in that personal consciousness or power is
attributed to it, from an idol because a fetish is
not necessarily worshipped, and from a totem inas-
much as the power attributed or honor paid to an
individual does not extend to the species.

"An idol is indeed an object of worship, while on the
contrary, a fetish is intended to bring the deity within
the control of man."—Lubbock: *Origin of Civilization*
(1892), p. 329.

2. Fig.: An object of devotion; an idol.

fě-tigh-ism, fě-ti-çism, fě-tigh-ism, subst.
[Eng. fetic; -ism.]

1. Lit.: Since the introduction of this word by
De Brosses in the last century, various meanings
have been affixed to it. It was first employed to de-
note the African worship of terrestrial objects;
Comte used it in the sense of a general theory of
primitive religion, in which external objects are
animated by a life analogous to that of man; Tylor
defines fetishism as the doctrine of spirits embodied
in, attached to, or conveyed through certain ma-
terial objects; and Sir John Lubbock ranks it as the
second stage in the evolution of religious thought,
but objects to class it as a religion, since it does
not necessarily involve the idea of worship, for the
negro believes that by means of his fetish he can
force his deities to comply with his desires. It is
in reality only a form of witchcraft: an extension
of the belief that the possession of any part of an
enemy—the parings of the nails, a lock of the hair,
or even a portion of his clothing—will give the
possessor power over him. So the negro believes
that the possession of a fetish representing a spirit
makes that spirit his servant; he beats it if the re-
quests he prefers are not attended to, and seriously
believes he is thus inflicting suffering on the actual
deity. A somewhat similar custom obtains among
the Roman Catholics of the lower orders in the
South of Europe, showing how widely popular
practice differs from the teaching of that church;
though the motive which inspires such conduct is
the same in the European and in the negro. Feti-
chism is more general in Africa than elsewhere; but,
wherever a belief in witchcraft exists, there some
form of fetishism is sure to be found.

"The savage does not abandon his belief in Fetishism,
from which no race of men has yet entirely freed itself."
—Lubbock: *Origin of Civilization* (1892), p. 334.

2. Fig.: Devotion to any object, pursuit, or idea.

feudal system, *s.* A system of social polity, of which lordship and vassalage were the essential features, and of land tenure in which real ownership inhered solely in the lord, only use, possession, or tenancy belonging to the grantee. Some traces of feudalism may be found in all monarchical countries, but the rise of the feudal system distinctively so called was in those parts of Europe in which the Teutonic conquerors of the Roman empire acquired paramount power. As early as the ninth century the term vassals, or *vassi*, was used of noblemen who attached themselves to the court of their sovereign, moved by natural, and as yet unpurchased loyalty. When in those unsettled times soldiers of fortune gained by the sword territories which they were afraid to lose, they parceled them out among their superior officers, who again transferred all the land for which they had no immediate use to their soldiers on similar conditions. The regular sovereigns were necessitated in self-defense to adopt a similar policy. Four distinct forms have been traced in the development of the feudal system. First the land granted, if not resumable at pleasure, was so on the expiry of the grantee's life. Then it tended to become to a certain limited extent hereditary. Next it became completely hereditary, and was called a feud. Finally the order of descent was settled, collateral relations admitted to inheritance, and the reciprocal obligations of lord and tenant settled by fixed regulations known and published.

In England certain traces of feudality in its milder form are traceable among the Anglo-Saxons. The feudal system itself came in with all its rigor under William the Conqueror. He would not admit the existence of any "allodial" land, that is, land held in absolute possession, in England, though some exists in Shetland, once Danish isles. All belonged to him as lord paramount, to be parceled out among his Norman vassal knights. They were called tenants *in capite*—i. e., in chief. These knights were allowed again to allot it to others. When they did so they were themselves called *mesne* (middle) lords, and their vassals tenants *paravail* (lowest tenants). The appropriation of lands by conquerors, with the destruction, expulsion, or bondage of the original inhabitants, was an act of great wrong. When, without this initial blot, land was obtainable to be parceled out in the feudal way, an organized society in many ways adapted to mediæval times was the result. Every one had his place and his duties defined. He was taught loyalty, good faith, and self-respect. [**CHIVALRY**.] But feudality had serious defects, and with the progress of society it was sure sooner or later to decline.

When Henry II. dispensed with the inefficient service of the military vassals, and accepted in lieu a tax called *escuage*, wherewith to hire proper soldiers, one great prop of the feudal system was overthrown. Feudalism fell during the Commonwealth, and had lost some of its worst excrescences before it rose again.

When towns and cities began to gain importance through industry and commerce, the inhabitants were restive under the domination of the feudal lord. But to the present day in Britain (and thence in this country) feudality retains part of its old power, drawing distinction between "real" property in law and personal property, that is, money, &c., and giving greater political and social importance to the individual who has the former than to one who possesses only the latter. The system of conveyancing also is almost wholly feudal, with more or less modification to meet the exigencies of the times.
